REPORT

OF THE

SECRETARY OF THE TREASURY

ON THE

STATE OF THE FINANCES,

FOR

THE YEAR 1864.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1864.

FINANCE REPORT.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

His annual report of the finances for the year 1864.

DECEMBER 6, 1864.—Referred to the Committee of Ways and Means and ordered to be printed.

TREASURY DEPARTMENT, *December 6, 1864.*

SIR: I have the honor to transmit to the House of Representatives the annual report of the Secretary of the Treasury, as required by law.

With great respect,

W. P. FESSENDEN,
Secretary of the Treasury.

HON. SCHUYLER COLFAX,
Speaker of the House of Representatives.

INDEX TO REPORT ON THE FINANCES.

Statement No. 22. Stocks held in trust by the United States for the Chickasaw national fund and the Smithsonian Institution	293
Statement No. 23. Rules and regulations concerning commercial intercourse with and in States and parts of States declared in insurrection, and the collection and disposition of captured and abandoned property &c.....	294
Statement No. 24. General regulations for the purchase of products of the insurrectionary States on government account.....	345

REPORT

OF THE

SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,

December 6, 1864.

In presenting to Congress his annual report on the state of the finances, in obedience to the requirements of law, the Secretary of the Treasury feels that, while there is no occasion to distrust the ability of the people of the United States to bear the great and increasing burdens imposed upon them by the arduous and prolonged struggle for national existence in which they are engaged, there is, nevertheless, much in the financial condition of the government which requires careful and anxious consideration. Among the serious duties devolved upon him, the Secretary recognizes a full and clear exposition of that condition as first in importance, in order that the wisdom of Congress may provide a remedy for existing evils, and guard against the recurrence of similar evils in the future.

The Secretary's assumption of office was so nearly coincident with the commencement of the present fiscal year, that he would be naturally impelled to begin by stating the exact condition of the Treasury upon that day. Before proceeding to do so, however, a brief review of the financial measures adopted since the outbreak of the rebellion, and of their operation and effect, may not be without value in endeavoring to arrive at just conclusions with regard to the future.

On the fourth day of March, A. D. 1861, the national debt was, comparatively so inconsiderable as hardly to deserve the name. Accustomed to a degree of prosperity before unexampled in the history of nations, the people of the United States had grown rich and powerful, without being conscious of national burdens, and equally unconscious of their own vast and increasing ability to sustain a weight which, could it have been anticipated, might have seemed altogether beyond their strength. Unaccustomed, for a long course of years, to great national efforts, it was fortunate that their power of endurance should be tested only by degrees, as the struggle which Providence had prepared for them developed its vast proportions, and the necessity of great and long-continued effort became apparent. Had it been then foreseen that what was believed to be a contest for months was to be continued for years, and that hundreds of millions of public

debt would be swollen into thousands of millions before the close of that contest, it may well be doubted whether, ignorant as they were of their own immense resources, the people might not have shrunk appalled from an undertaking which contemplated sacrifices so far exceeding all former experience.

In his first report to Congress, made on the fourth day of July, 1861, my predecessor estimated the whole amount required for the service of the fiscal year ending June 30, 1862, at \$318,519,581 87. To meet this anticipated expenditure, Congress, by an act approved July 17, 1861, authorized a loan of \$270,000,000, which, with the ordinary revenues, was considered an ample provision for the exigencies of the year. By an act approved August 5, 1861, Congress further authorized a direct tax of twenty millions, and a tax of three per centum on the excess of all incomes over eight hundred dollars per annum. It was not anticipated, however, that any revenue, derived from these last mentioned sources, would be available within the year.

Experience proved that the estimate of the Secretary, though founded on what seemed to be reliable data, was altogether inadequate; and in his report of December 9, 1861, he was compelled to ask Congress to provide for a probable deficiency of \$213,904,427 62. In the same report he estimated the expenditures of the fiscal year commencing on the first day of July, 1862, at \$475,331,245 51.

On the 30th of December, 1861, and soon afterwards, most of the State banks suspended specie payments.

In view of this condition of affairs, and of the large appropriations called for to meet the public wants, Congress passed various laws, which need only be alluded to. It had become manifest that, while much the largest portion of the amount required must be provided by loans in some form, resort must be had to a wider and more stringent taxation, in order to preserve the credit of the government. Accordingly, the act of July 1, 1862, called the internal revenue law, was passed, providing for a levy of duties on various domestic manufactures, upon trades and occupations, and also providing a system of stamp, income, and other duties. This important measure, it was hoped, would, in connexion with the duties on imports, and the sums derived from other sources, furnish such a proportion of the revenue needed as would place the national credit upon a stable foundation, through the evidence thus afforded of a readiness to impose on the present a reasonable share of public burdens, leaving to the future no more than, in justice, it ought to bear. If these hopes were not realized, the disappointment was, perhaps, imputable, in a great degree, to the facts that the system adopted was one to which the people had not been accustomed, that the machinery was complicated, the officers who were to execute it inexperienced, and that sufficient allowance was not made for the important element of time, which alone can give to any such system the requisite efficiency.

With a like view to increase the revenue, and to sustain our own industry under the burden imposed by the internal revenue law, Congress, by an act approved July 14, 1862, largely increased the duties on imports. It was justly believed that these measures could hardly fail to inspire confidence in the ability

and purpose of the nation to meet all its obligations in the present and the future.

The necessities of the treasury were, however, immediate. To raise money in large amounts by taxation, and even by loans, requires more time than can always be afforded with large armies in the field and great navies afloat. The demands of war are imperative, and cannot await the slow process of financial negotiations. To meet a demand thus urgent, Congress, by acts of February 25 and July 11, 1862, saw fit to authorize the emission of United States notes to the amount, including sixty millions of treasury notes previously authorized, which were to be redeemed and cancelled, of three hundred millions of dollars, as a substitute for coin, declaring them a legal tender for debts, public and private, and clothing them with all the requisites of currency. These notes were convertible, at the will of the holder, into bonds of the United States, paying interest at six per centum, semi-annually, in coin, to secure which the revenue from customs, also payable in coin, was specifically pledged. The same act of February 25, 1862, authorized the issue of bonds to the amount of five hundred millions, increased subsequently to five hundred and eleven millions, redeemable after five years and payable in twenty years from date.

Notwithstanding the ample provision supposed to be made by Congress for the expenditures of the fiscal year ending on the 30th of June, 1863, the report of the Secretary, submitted on the 4th of December, 1862, showed a deficiency for the current year of \$276,912,517 66; while the estimated amount of expenditures over receipts from ordinary sources for the succeeding year was \$622,388,186 56. To provide for the aggregate of these amounts, Congress, by an act approved March 3, 1863, authorized a loan of three hundred millions for the then current, and of six hundred millions for the then next, fiscal year. By the second section of the same act the Secretary was authorized to issue, as a part of said loan, four hundred millions in amount of treasury notes, bearing interest at a rate not exceeding six per centum per annum, payable in lawful money, which notes, payable at periods expressed on their face, might be made a legal tender at their face value. By the third section, one hundred and fifty millions in amount of United States notes, of a like character with those previously issued under the provisions of former acts, were authorized as a part of said loan.

It will be seen that, by the several acts of Congress referred to, government paper, as a substitute for coin, under the respective designations of United States notes and treasury notes, might be issued to the amount of eight hundred and fifty millions of dollars, viz: United States notes, not bearing interest, to the amount of four hundred and fifty millions, but of which fifty millions were to be held in reserve for the redemption of temporary deposits, and to be replaced as soon as possible, thus leaving the whole amount intended for circulation but four hundred millions; and four hundred millions of treasury notes, bearing interest, and which it was hoped and believed would not remain in circulation, as they could be made a legal tender only for their face value, without interest.

In the preceding enumeration of the several acts passed by Congress with a view to provide the large means required to meet annual expenditures to a period including the fiscal year 1864, no reference has been made to several auxiliary measures, designed to meet the exigencies of the hour, but neither enlarging nor diminishing the amount required, and serving no other purpose than a mere temporary resource. Of such was the act of March 1, 1862, authorizing the issue of certificates of indebtedness, payable one year or less after date, with six per cent. interest, and the several acts authorizing the Secretary to receive deposits at the treasury for a period not less than thirty days, to be repaid at ten days' notice. Of a somewhat similar character, from its necessarily limited amount, is the fractional currency authorized by the fourth section of the act of March 3, 1863.

The object of the Secretary in calling attention to these various acts of Congress in connexion with the estimates of his predecessor is to show—

First. The utter impossibility, in times like the present, of ascertaining with any degree of certainty prospective demands upon the treasury. Estimates, apparently, on the most liberal scale may be, as they have been, found inadequate. Hence arise large deficiencies, occasioned by an unexpected increase of military force in the first place, and upon a rise of prices for material invariably consequent upon military operations conducted upon a gigantic scale, even if the currency could be maintained in a sound and natural condition.

Second. The difficulty of fixing upon any policy not subject to the contingencies of the hour. It is, in the Secretary's judgment, not only difficult but impossible to apply fixed rules to a condition of affairs constantly changing, or to meet contingencies which no human wisdom can foresee by a steady application of general laws, especially in a government, and with a people, where public opinion is the controlling element, and that opinion is not under the direction of those who may happen to administer public affairs. Accordingly it has been seen that the attempt to conduct financial operations, on so immense a scale, upon a strict specie basis soon proved impracticable.

Resort to some other species of currency of a national character became unavoidable, as was unanswerably demonstrated by my predecessor in his report of December, 1862. Fraught with danger as government paper has almost invariably proved, there was, under the circumstances, no other resource. Of course, the danger increases with enlarged demands upon the treasury, growing out of increased expenditures, a rise of prices occasioned by an increase of taxation on articles of consumption, the withdrawal of labor from productive pursuits, accompanied by an aggravated demand for products and material, incident to a state of war. The problem to be solved is how to mitigate the evil, if it cannot be wholly avoided. If loans can be negotiated at reasonable rates, and the treasury can be thus kept in a condition to meet current demands, it is not difficult to restrain the circulation of government paper within safe limits. But this, not always certain in a time of peace, though with abundant resources it

always should be, is often impossible when war upon a large scale, and long continued, has created distrust. Hence it has followed that, under the acts referred to, our bonds have assumed various forms, to suit what was supposed to be the choice of lenders. Our notes have shown a similar diversity of character, while it has been found impossible to avoid the necessity of using them to an extent which could not but aggravate the troubles incident to the necessities of our condition.

Yet, though forced to resort to the issue of paper for the time, the idea of a specie basis was not lost sight of, as the payment of interest on long loans in coin was amply secured. And though, in several of the acts authorizing the issue of bonds at long periods, payment of the principal at maturity in coin is not specifically provided, the omission, it is believed, was accidental, as there could have been no intention to make a distinction between the different classes of securities in this regard. It is respectfully recommended to remove all doubt upon this point by proper legislation.

Although the wisdom of thus securing the payment of interest on bonds in coin has been questioned, and the pledge of the receipts from customs, to be collected in coin for that purpose, has perhaps facilitated the operations of those disposed to enhance the price of gold for speculative purposes, the Secretary is of the opinion that these measures were not only wise, but necessary at the time, and greatly aided in sustaining public credit.

The expenditures for the preceding fiscal year so slightly exceeded the estimates of the department, that at the last session of Congress it was not considered necessary to increase the amount authorized to be borrowed by existing laws. Experience had shown, however, that some changes of form were advisable. By an act approved March 3, 1864, authority was given to the Secretary to issue bonds to the amount of two hundred millions in lieu of so much of the loan authorized by act of March 3, 1863, redeemable after any period not less than five years, and payable not more than forty years from date. At a subsequent period of the session, June 30, 1864, the authority conferred by the first section of the act of March 3, 1863, was repealed, except so far as it affected an amount of seventy-five millions then advertised, and power was given to borrow four hundred millions of dollars on bonds redeemable after five years, and payable not more than forty years from date. By the second section of the same act authority was conferred to issue, in lieu of the same amount of bonds, two hundred millions in treasury notes, which might be made a legal tender at their face value, bearing interest at a rate not exceeding seven and three-tenths per centum, payable in lawful money, and convertible, at the pleasure of the Secretary, into bonds issued under the authority of said act. The Secretary was further empowered to substitute for treasury notes issued under former acts an equal amount of notes such as were therein authorized.

A table is appended to this report, showing the amounts issued under the several acts hereinbefore referred to, to the beginning of the present fiscal year, from which it appears that, by the laws in force on that day, the Secretary had

authority to borrow, on the credit of the United States, the amounts following, viz :

1. Under the act of March 3, 1863, so much of seventy-five millions, advertised previously to June 30, 1864, as had not been awarded to bidders.....	\$32, 459, 700 00
2. Under the act of March 3, 1864, so much as had not been subscribed for, and paid into the treasury, viz:.....	127, 603, 520 00
3. Under the act of June 30, 1864.....	400, 000, 000 00
4. Amount of treasury notes issued under former acts, which had been redeemed and cancelled, and which the Secretary was authorized to replace by notes issued under the act of June 30, 1864.....	62, 191, 400 00
Total available resources under laws authorizing loans...	\$622, 284, 625 00
To this may be added the actual balance in the Treasury, July 1, 1864.....	18, 842, 588 71
Total.....	641, 127, 213 71

A statement of the receipts and expenditures, estimated and actual, for the year ending June 30, 1864, will show how this balance in the treasury is obtained, and the increase of the public debt during the year, viz :

RECEIPTS.

	Estimated.	Actual.
From customs.....	\$72, 562, 018 42	\$102, 316, 152 99
Lands.....	436, 182 09	588, 333 29

Which deducted, it leaves applicable to expenditures....	<u>\$618, 114, 884 92</u>	
Deduct balance July 1, 1864.....	<u>18, 842, 558 71</u>	
Balance applied to service of the year	<u>\$599, 272, 326 21</u>	
The public debt, as stated by my predecessor, in his re- port of December 10, 1863, was.....		
To this should be added amount paid into the treasury previous to July 1, 1863, for which evidences of debt were subsequently issued.....		<u>\$1, 098, 793, 181 37</u>
Amount of debt July 1, 1863		<u>23, 782, 423 20</u>
		<u>\$1. 122, 575, 604 57</u>

Brought forward.....	\$1, 122, 575, 604 57
Add amount of loans applied to actual expenditures as above, and balance in the treasury July 1, 1864.....	618, 114, 884 92
It gives amount of public debt July 1, 1864.....	<u>1, 740, 690, 489 49</u>

The very large comparative receipts from miscellaneous sources require explanation. They are accounted for as follows, viz :

From captured and abandoned property.....	\$2, 146, 715 09
Premium on gold shipped from San Francisco to London.....	2, 799, 920 64
Sales of prizes and due to captors.....	4, 088, 111 42
Internal and coastwise intercourse fees.....	5, 809, 287 20
Premium on sales of gold coin.....	16, 498, 975 49
Commutation money.....	12, 451, 896 15
All other sources.....	3, 716, 542 11
Total.....	<u>\$47, 511, 448 10</u>

The Secretary is of the opinion that not over twenty-five millions can be safely calculated upon as likely to accrue from similar sources during the current year.

The item of "premium on gold shipped from San Francisco to London," may also require further explanation. In March, 1863, it became necessary to transmit a considerable amount of funds to London, for a special purpose, for which an appropriation had been made by Congress, and it was thought advisable to deposit a certain amount of our securities with an eminent London banker, against which bills might be drawn. Five-twenty bonds, to the amount of ten millions, were, accordingly, placed in the hands of two distinguished citizens, to whose care the negotiation was committed. The negotiation failed, and six of the ten millions were returned to the treasury and disposed of. It was thought advisable that the amount of four millions should remain, and that exchange should be drawn against it, and the bonds disposed of abroad, if a favorable market should be found. It appears, however, that very nearly this amount of issue is in excess of the five hundred and eleven millions authorized by existing laws, \$510,756,900 having been disposed of. The act of June 30, 1864, authorizes the Secretary to dispose of "any bonds known as five-twenties remaining unsold." It is at least questionable whether by this clause power is conferred to dispose of an amount beyond that fixed by existing laws. Additional legislation may remove that doubt, should Congress think it advisable, otherwise they may be cancelled.

Exchange having been drawn, it became necessary to provide funds to meet the bills at maturity, which was accomplished by shipments of gold from California.

The expenditures for the current fiscal year were estimated in the last report of the Secretary as follows, viz :

Estimated balance of former appropriations.....	\$350, 000, 000 00
For the civil service	27, 973, 194 81

For pensions and Indians.....	\$9,631,304 73
For the War Department.....	536,204,127 77
For the Navy Department.....	142,618,785 40
For interest on the public debt.....	85,387,677 15
Aggregate.....	<u>\$1,151,815,089 86</u>
Deducting, as likely to remain unexpended, on the 30th of June, 1864.....	<u>400,000,000 00</u>
Leaving to be provided for.....	751,815,089 86
And the receipts from ordinary sources were estimated in the aggregate at.....	<u>206,836,539 93</u>
Leaving to be provided by loans.....	<u><u>\$544,978,549 93</u></u>

This estimate, like all others of a similar character, was necessarily based on past experience with regard to unexpended balances, and upon estimates from the different departments, which, in a time of war, must be liable to great uncertainty. Additional information enables me to state the probable expenditures with a nearer approach to accuracy. As corrected by including so much of the actual balance of former appropriations as is liable to be used during the year, those made at the last session of Congress, the additional amounts called for to meet probable deficiencies, and reducing the balance of unexpended appropriation at the end of the year, as from amounts expended during the first quarter would seem necessary, the estimate is as follows, viz :

Actual unexpended balances as above.....	\$380,387,050 23
For the War Department.....	625,945,741 65
For the Navy Department.....	110,047,459 96
For the civil service.....	21,796,572 50
For pensions and Indians.....	6,590,089 12
Indefinite appropriations.....	9,152,007 11
For interest on public debt.....	<u>91,810,215 18</u>
Amount.....	<u>\$1,245,729,135 75</u>
Add public debt matured and maturing during the year, viz : Certificates of indebtedness.....	160,729,000 00
Texas debt.....	2,149,000 00
Loan of 1842.....	196,808 45
Treasury notes under act of March 2, 1861, and prior thereto.....	<u>278,511 64</u>
Total.....	<u><u>\$1,409,082,455 84</u></u>

The amount of certificates outstanding on the first of November, 1864, was \$238,593,000. This being a much larger amount than the market ought to bear, it would not be wise to calculate upon these securities as available for the

service of the year, beyond \$75,000,000. The available probable resources for the current year may then be stated as follows :

From customs.....	\$70, 271, 091 96
From lands.....	642, 185 84
From internal revenue.....	249, 562, 859 92
From miscellaneous sources.....	24, 020, 171 44
From direct tax.....	16, 079 86
From certificates of indebtedness.....	75, 000, 000 00
	<hr/>
	\$419, 512, 389 02

To this should be added :

Probable unexpended balances June 30, 1865	350, 000, 000 00
Balance of cash July 1, 1864.....	18, 842, 558 71
	<hr/>
Total resources	\$788, 354, 947 73

Which, deducted from expenditures, leaves balance to be provided by loans	620, 727, 508 11
	<hr/>

If, however, an additional sum of fifty millions should be realized, as proposed by the Commissioner, from internal duties, the amount to be raised by loans would be	570, 727, 508 11
From this should be deducted the public debt redeemed...	88, 353, 320 09
	<hr/>

Leaving as increase of the public debt at the close of the year.....	482, 374, 188 02
--	------------------

Stated in the usual form by taking the actual receipts and expenditures of the first quarter as a distinct basis of calculation, the result is the same, viz :

For the first quarter of the current year, ending September 30, 1864, the actual receipts, as shown by the books of the treasury, were as follows :

From customs.....	\$19, 271, 091 96
From lands.....	342, 185 84
From direct tax.....	16, 079 86
From internal revenue.....	46, 562, 859 92
From miscellaneous sources.....	9, 020, 171 44
	<hr/>
	75, 212, 389 02
Add actual balance in the treasury	
July 1, 1864.....	18, 842, 558 71
	<hr/>
Receipts from all sources excepting loans.....	\$94, 054, 947 73

Note.—In addition to the liabilities before stated, it may be mentioned that the 7.30 notes, so called, the issue of 1861, and the one year five per cent. legal tenders, amounting to \$43,585,000, also become payable during the current year. The conversion of the former being provided for, however, by the act of August 5, 1861, and the latter by a power of substitution under the act of June 30, 1864, they have been excluded from this estimate. The amount of 7.30 notes redeemed in money to November 1, 1864, is only \$63,500, charged to current expenditures ; while the whole amount converted to that date is \$125,864,900.

Brought forward.....	\$94, 054, 947 73
For the three remaining quarters, ending on the 30th of June, 1865, the estimate is:	
From customs.....	\$51, 000, 000 00
From internal revenue.....	203, 000, 000 00
From lands.....	300, 000 00
From miscellaneous sources.....	15, 000, 000 00
	<u>\$269, 300, 000 00</u>
Total receipts from ordinary sources, actual and estimated, with balance on hand July 1, 1864.....	<u>363, 354, 947 73</u>

The expenditures for the first quarter, ending September 30, 1864, were as follows, viz:

For civil service.....	\$8, 712, 422 51
For pensions and Indians.....	4, 935, 179 31
For War Department.....	286, 200, 288 52
For Navy Department....	33, 292, 916 49
For interest on public debt.....	19, 921, 054 48
	<u>\$353, 061, 861 31</u>
Total, exclusive of principal of public debt.....	
For the three remaining quarters the estimated expenditures, based upon appropriations and estimated deficiencies, are:	
For the civil service.....	\$26, 852, 489 47
For pensions and Indians	6, 516, 595 72
For War Department	677, 479, 384 39
For Navy Department.....	109, 929, 644 16
For interest on public debt.....	71, 889, 160 70
	<u>892, 667, 274 44</u>
Total of expenditures, actual and estimated.....	1, 245, 729, 135 75
These estimates include all unexpended appropriations from former years, and there may be deducted, as a probable unexpended balance at the close of the year.....	<u>350, 000, 000 00</u>
Leaving total amount, actual and estimated, for the current year	895, 729, 135 75
Deducting from the total of expenditures the total of receipts, actual and estimated....	<u>363, 354, 947 73</u>
There will remain.....	532, 374, 188 02

Brought forward.....	\$532, 374, 188 02
If Congress should adopt measures for increasing the internal revenue at an early day, the Secretary believes there may be added to the receipts from that source.....	50, 000, 000 00
Which being deducted, there would remain to be provided..	<u>\$482, 374, 188 02</u>
The public debt, matured and maturing, during the year, is, as before stated.....	163, 353, 320 09
From this may be deducted, as likely to be provided by new certificates of indebtedness.....	75, 000, 000 00
	<u>88, 353, 320 09</u>
Add this sum to balance to be provided for expenditures of the year, viz.....	482, 374, 188 02
It makes whole amount to be provided from loans.....	<u>570, 727, 508 11</u>
But as this would include so much of the existing public debt as would be redeemed, exceeding certificates issued within the year, viz.....	88, 353, 320 09
This sum is to be deducted from the amount to be obtained by loans, viz., \$570, 727, 508 11, showing the probable increase of the public debt during the year to be.....	482, 374, 188 02
Which added to.....	<u>1, 740, 690, 489 49</u>
Would make the public debt on July 1, 1865.....	2, 223, 064, 677 51

subject to such increase as may be occasioned should Congress not provide for additional revenue, or should the income from ordinary sources fall short of the estimates submitted.

Any estimate which may be made of the probable receipts and expenditures for the next fiscal year must necessarily be liable to still greater uncertainty. This remark applies more particularly to expenditures. For while, if existing laws remain unchanged, the amount of revenue may be calculated with reasonable certainty, it is impossible to anticipate what the exigencies of war may require. On the one hand this may call for increased effort, and on the other it may be confidently hoped that the great struggle is near its termination, and that, consequently, the estimate now submitted will prove far beyond the wants of the year. While any doubt remains, however, it would be unsafe to assume any other basis of calculation than one predicated upon the existing state of affairs.

The receipts for the year ending June 30, 1866, are estimated as follows:

From customs.....	\$70, 000, 000 00
From internal duties.....	300, 000, 000 00
From lands.....	1, 000, 000 00
From miscellaneous sources.....	25, 000, 000 00
Aggregate.....	<u>\$396, 000, 000 00</u>

The expenditures are estimated as follows :

Balance of unexpended appropriations..	\$350, 000, 000 00
For the civil service.....	33, 082, 097 24
For pensions and Indians.....	14, 196, 050 64
For the War Department.....	531, 758, 191 11
For the Navy Department.....	112, 219, 666 18
For interest on the public debt.....	127, 000, 000 00
Aggregate	\$1, 168, 256, 005 17
But from this aggregate there may be deducted, as likely to remain unexpended at the close of the year.....	350, 000, 000 00
Total.....	\$818, 256, 005 17
Deduct estimated receipts from ordinary sources.....	396, 000, 000 00
There will remain to be provided for by loans.....	\$422, 256, 005 17
To this should be added for redemption of excess of certificates of indebtedness.....	47, 365, 000 00
Making the whole amount to be provided for by loans....	\$469, 621, 005 17

Assuming the correctness of these estimates, the whole debt on the 1st day of July, 1866, would be found by adding the foregoing amount of \$422,256,005 17 to the estimated debt on July 1, 1865, \$2,223,064,677 51, giving \$2,645,320,682 68 as the amount of the debt at the close of the next fiscal year. This calculation is made on the same basis of receipts as that assumed for the current year. It is quite probable, in the judgment of the Commissioner of Internal Revenue, that \$300,000,000 may be received in another year from that source, without the additional legislation suggested by him. Should this supposition be verified, and the new taxes proposed for this year be laid and continued, an additional fifty millions might be expected from internal revenue. The Secretary has, however, thought it wiser to name \$300,000,000 as all that would probably be realized.

It will be observed that the actual receipts from ordinary sources, for the last fiscal year, varied materially from the estimates, particularly from customs and internal revenue. This variation is imputable, in great part, to the legislation of Congress at its last session, increasing largely the rates of duty on foreign and domestic articles. It is apprehended, however, that similar results will not follow for the residue of the present year, in both these particulars. The increase of duties on imports, under the act of June 30, 1864, has already had the effect to decrease importations to a considerable extent, and the same effect will be likely to continue; so that, estimating the receipts of the three remaining quarters by those of the first, in the light of former experience, it will not be safe to calculate upon revenue from customs much exceeding \$70,000,000 for the current year.

In the judgment of the Secretary, this disadvantage, in a financial point of

view, is more than counterbalanced by the stimulus afforded to domestic industry, and the consequent increased revenue from that source.

From internal revenue a different, and far more favorable, result may be anticipated. It will be noticed that, instead of \$77,599,703 59, there was received from this source in the past year \$108,260,320 59, under substantially the same law which, in ten months of the preceding year, yielded only \$37,640,787 95.

The new law which went into operation on the 1st of July last, largely increasing these duties, although it will probably fail to produce the amount of revenue hoped for, may, if not materially changed, together with the special income tax imposed by the joint resolution of July 2, 1864, be safely estimated to produce the sum of \$250,000,000, should the business of the country be ordinarily prosperous. The same causes which, under preceding laws, produced so large an increase in the second year, would be likely to have a similar effect, to some extent, under the new, so that at least the amount of \$250,000,000 may be expected from it in another year without the aid of a special income tax.

But this amount is not, and ought not to be, satisfactory. Three hundred millions, at least, should be realized from internal duties. It is for Congress to select the sources and devise the modes in which this most desirable result can be attained, and the report of the Commissioner of Internal Revenue is referred to for his views on this important point, as well as for many valuable suggestions having reference to the same general subject.

The Secretary will venture, with great deference, to remark that, in his judgment, a commission, properly constituted, for the purpose of inquiring as to profitable sources of revenue, and devising improvements in the modes of its collection, might, in a country of such varied production, and among a people of such diverse industrial pursuits, elicit much information which would materially assist the deliberations of Congress, and lighten its labors, upon a subject so new to legislative experience on this continent. As, however, a resolution pointing to this end did not meet the approval of Congress at its last session, the Secretary did not feel authorized to institute an inquiry through such instrumentality, and he has been unable to adopt other effective measures for the same purpose.

After much reflection, and a careful revision of his opinions heretofore expressed in another place, to which, under the circumstances, he may be pardoned for referring, the Secretary feels obliged to say that he sees no other resource for raising the additional revenue, so necessary to the national credit than those pointed out by the Commissioner. He is aware of the great difficulties attending the collection of the duties proposed, and feels all the force of the objections heretofore made to their imposition. He nevertheless believes that a tax on tobacco in the leaf, or unmanufactured, if it can be enforced, is the only mode by which a duty on that article can be collected fairly and equally, and through which an adequate amount of revenue can be obtained from it. He believes, also, that, although a tax on sales would probably fail of collection to some extent, yet, by applying to it stringent rules, requiring frequent periodical returns, verified by oath, coupled with the power to compel an exhibit of books of account, it might become a very large and important item of revenue. The

Secretary would further suggest whether the income tax should not be collected upon all, without exemption. As the law is, it opens the door to innumerable frauds, and in a young and growing country the vast majority of incomes are small, while all participate alike in the blessings of good government. The adoption of a scale, augmenting the rate of taxation upon incomes as they rise in amount, though unequal in one sense, cannot be considered oppressive or unjust, inasmuch as the ability to pay increases in much more than arithmetical proportion as the amount of income exceeds the limit of reasonable necessity.

From the results of experience, as well as from all the information received, the Secretary is well convinced that much revenue fails to be collected through an imperfect execution of the law, and more through a fraudulent evasion of its provisions. Time and effort will, it is hoped, remedy these evils in a great degree, and the confident expectations of those who framed it be realized. In the mean time no effort should be spared to perfect it, as far as possible, and no experiment to increase its efficiency, of which there is a reasonable hope of success, should be left untried.

In connexion with the subject of increased taxation, and the necessity of providing additional revenue from ordinary sources, the Secretary cannot but call the attention of Congress to our public domain, and more especially to that portion of it abounding in the precious and other metals, which, by the policy of the government, has been reserved to the nation. He can add little, however, on these points, to what has been heretofore so ably set forth by his predecessor. The agricultural region has, through the operation of the homestead law, almost ceased to afford a direct revenue. Whatever might be the opinions of the Secretary as to the good effects of this law, either in a State or national point of view, it is not probable that any expression of those opinions would tend to effect any material change, or modification. Possibly, had the struggle in which the nation is now engaged been foreseen, or even apprehended, Congress might have deemed it prudent not to adopt a system which renders so large a portion of the public domain unavailable as a basis of credit, either by way of pledge of its proceeds, or an appropriation of those proceeds, permanently, to the creation of a sinking fund for the ultimate redemption of the public debt. In either aspect that domain might have been made to render material aid. But it may still fairly be questioned whether, and to what extent, such aid has not been afforded by the inducements offered to an immigration which is daily augmenting the resources and power of the republic. With regard to the mineral lands, the question is freed from this embarrassment. These are still the property of the nation, and may be disposed of as Congress shall determine. That they should yield a revenue to the owner, independent of the collateral advantages derived from individual enterprise in extracting the precious metals, would seem to admit of no dispute. On the one hand it may be said that to sell them absolutely is to part with an unequalled and inexhaustible source of wealth and power, the control of which should always remain in the hands of the government; on the other, that all attempts, hitherto, to realize any considerable amount of revenue from any system of rents have proved

unsuccessful. It is to be hoped that Congress may be able to devise some mode by which these lands may be made available, to an extent in some just measure proportionate to their yearly production. The question is one involving a knowledge of the subject which the Secretary does not now possess, and requiring an amount of study and reflection which, thus far, he has been unable to bestow. The attention of Congress is invited to a paper on this subject, prepared by direction of the Secretary, which accompanies this report, and will repay an attentive perusal.

The act of February 25, 1862, provides that the coin received for duties on imports shall, after paying interest on bonds and notes, be appropriated to the purchase of one per centum of the public debt, to be set apart, with its accruing interest, as a sinking fund, as the Secretary might from time to time direct. All experience has proved that in a time of war, when expenditures must largely exceed receipts from ordinary sources, and large sums are borrowed in each year, the attempt to establish a sinking fund invariably fails. It is, in fact, simply borrowing to lend again. For this reason no attempt to carry out this provision has yet been made. As the time is approaching, however, when the present unnatural condition of affairs may be expected to terminate, it is well to consider whether some legislation postponing for a time the operation of the provision referred to, and designating a board of officers as commissioners of the sinking fund, under proper regulations, may not be advisable; their duties to commence at such time as the Secretary of the Treasury may designate. Such legislation would, at least, show that the provision for a sinking fund is not intended to remain a dead letter upon the statute-book when peace shall return, and with it the power to render that provision effective. Should any further aid be necessary, the Secretary would respectfully suggest whether such income as may be received from the public domain, from sales, or in the shape of rents or royalty, may not be beneficially appropriated to the same purpose.

From preceding statements it appears that, exclusive of the receipts from ordinary sources, the amounts following are to be provided, viz :

For the fiscal year ending June 30, 1865.....	\$570, 727, 508 11
For the fiscal year ending June 30, 1866.....	469, 621, 005 17
	<hr/>
	1, 040, 348, 513 28
Deduct amount now authorized, and balance in the treasury July 1, 1864.....	560, 063, 188 02
	<hr/>
It leaves a balance to be provided for by additional legislation of.....	\$480, 285, 325 26
	<hr/> <hr/>

It will be observed that this balance is predicated upon contingencies which may not occur, and calculations which may prove deceptive. It would be unsafe, therefore, to limit so closely the provision to be made by Congress for meeting the expenditures of this and the succeeding years.

To raise a large portion of the amount necessary to meet these anticipated expenditures, it is obvious that recourse was to be had to loans; which have been

already, in part, negotiated. The necessities of former years have led to many expedients, as is apparent from the diversity of forms which our securities present. As the debt increases, from year to year, borrowing becomes more difficult. Embarrassed as the country is with two systems of banking, and obstructed as the government is by a currency wholly beyond its control, it is manifest that to push its own circulation far, if at all, beyond its present limit could only be justified by absolute necessity. To thrust our securities upon the market in such amounts as it is not able to bear, and to retain no check upon stockjobbing combinations, must exercise a disastrous effect upon public credit, and operate injuriously upon large numbers who have heretofore invested their means, liberally and confidently, in government issues.

The Secretary is not unmindful that, in the opinion of many persons conversant with financial matters, recourse should be had to foreign markets; and in two acts of Congress, one of which is still in force, authority has been given to negotiate a foreign loan. This, if practicable at all, on terms which the Secretary could feel justified in accepting, would, in his opinion, at the present time and under existing laws, be so inconsiderable in amount, that its effects would be merely temporary, and would afford an alleviation rather than a relief. Our bonds have already, to a considerable amount, been sought for abroad, and to that extent the home market has been relieved and strengthened. Communication with Europe is now so easy and regular, intelligence is transmitted so rapidly, business facilities are so abundant, that foreign markets are almost at our own doors, and a demand abroad is felt almost at the moment, and supplied without injurious delay. To effect a foreign loan would not, as it has seemed to the Secretary, add much, if at all, to the whole amount of sales, unless stimulated by efforts and inducements which our financial condition has not, as yet, called for. And, although a certain advantage might be gained in the power to control, in some degree, the rate of foreign exchange, by the deposit of a large sum to be drawn against as occasion might require, the possible benefit thence to be derived has not seemed sufficient to counterbalance other and opposing considerations.

This nation has been able, thus far, to conduct a domestic war of unparalleled magnitude and cost without appealing for aid to any foreign people. It has chosen to demonstrate its power to put down insurrection by its own strength and furnish no pretence for doubt of its entire ability to do so, either to domestic or foreign foes. The people of the United States have felt a just pride in this position before the world. In the judgment of the Secretary, it may well be doubted whether the national credit abroad has not been strengthened and sustained by the fact that foreign investments in our securities have not been sought by us, and whether we have not found a pecuniary advantage in self-reliance.

But, however this may be, it seemed to the Secretary that, even if inclined to attempt the negotiation of a foreign loan, the time was unpropitious, and the difficulty attending such a negotiation, while exchange was subject to rapid and violent fluctuation, upon any safe terms, appeared almost insurmountable. Whatever risk was to be incurred must necessarily fall upon the

government. He thought it wiser, therefore, to wait until events should have more fully demonstrated the inevitably favorable result of the contest in which the nation is engaged—which time he believes to be near at hand—rather than venture upon an experiment which, if successful, could afford but temporary relief, and a failure in which might be attended with evils of a very serious character. Believing that the country can, if it will, sustain, for a long time to come, any burden which the war is likely to impose, the Secretary has deferred an undertaking which seemed to him so doubtful of success, and so questionable in its results. It may be added to these considerations, that to have the interest on our public debt payable at home, and to our own rather than to a foreign people, are advantages, the value and importance of which can hardly be too highly estimated.

The whole amount of national circulation, not bearing interest, exclusive of fractional currency, and of notes issued by national banks, is limited to four hundred millions of dollars, subject to slight occasional increase from the fifty millions held in reserve for the payment of temporary deposits. Of five per cent. interest-bearing notes there were outstanding, on the first of November last, \$120,519,110. To a considerable extent these notes have been, and will continue to be, used as currency. Those with coupons have been found particularly objectionable, as, though withdrawn to a certain extent while the interest is maturing, they are liable to be periodically rushed upon the market. In consideration of this feature, a large amount, viz: about ninety millions of the original issue of one hundred and fifty millions of these coupon notes, have been withdrawn and destroyed, and their place occupied by notes payable in three years, bearing interest at six per centum, compounded semi-annually. This is believed to be the best form of interest-bearing legal tender notes, as being more likely to be withdrawn and held until maturity, as an investment. Of these, fifteen millions in amount were issued under the act of March 3, 1863, and about ninety millions under the act of June 30, 1864. The total amount of interest-bearing notes outstanding on the 22d of November last was \$210,222,870. What proportion of these may be considered as an addition to the circulation I am unable to determine. To that extent, whatever it may be, they contribute to the amount of the currency, and thus in some degree occasion, and in still greater degree sustain, an increase of prices, and depress values.

The amount of bills issued to the national banks, as appears from the books of the Comptroller of the Currency, was, up to the 22d of November inclusive, \$65,160,210. As these banks have absorbed capital which might otherwise have been invested in State corporate institutions, and in many instances have taken the place of those institutions, by conversion, their issues cannot be regarded as so much addition to the body of currency. The returns on file at the department show that the whole circulation of the State banks on the first of January, 1864, was \$169,926,129, while the whole circulation of such banks for the month of July, 1864, returned to the internal revenue bureau, and which embraced, with a few trifling exceptions, all of these institutions

outside of the rebellious States, was only \$126,196,606 72. The diminution is \$43,729,522 28, which, deducted from \$65,160,210, leaves \$21,436,687 72 as the amount of increase to November 22, 1864, on the supposition that the circulation of State banks has not been enlarged since July.

The subsequent returns, though incomplete, would tend rather to show a diminution since that date. Arguing from the fact that the notes of State banks have almost ceased to be current in some of the northwestern States, it may well be doubted whether, under the limitations of the law authorizing national banks, the establishment of these institutions has not had the effect rather to limit than to enlarge the whole amount of circulation.

It is observable that, notwithstanding the apparently large circulation of paper money issued under the authority of the various acts of Congress before enumerated, its scarcity in the market has occasioned no slight embarrassment in the negotiation of loans. This can be accounted for only upon the supposition that large amounts are carefully held by the people, thereby exhibiting their confidence in its character and value, and that the impetus given to trade of every description by the large and increasing wants of government requires a largely increased amount of the circulating medium. A rise of prices tends, proportionately, in the same direction.

Believing, however, that, with the large addition made to the volume of currency by State banks through their various forms of credit, the whole amount far exceeded the limit of necessity, it was with extreme reluctance that the Secretary felt himself compelled to replace the five per centum coupon notes, which had been withdrawn, by an issue of six per centum compound interest notes under the act of June 30, 1864, and even to exceed that amount to a small extent. But the necessities of the hour left him no choice. And he will now proceed to state the condition of financial affairs which, in his judgment, rendered such action imperative.

On assuming office, upon the 5th day of July last, the Secretary found his condition peculiarly embarrassing. The cash balance in the treasury was, on the 1st of July, as before stated, \$18,842,558 71. The unpaid requisitions on the 5th were \$71,814,000. The amount of certificates of indebtedness outstanding was \$161,796,000. The daily expenditures could not be calculated at less than two and one quarter millions. The larger portion of unpaid requisitions was for pay to the army, and the Secretary was obliged to look forward to an increase, from the same quarter, of over fifty millions on the 1st of September. Thus situated, he could not avoid scrutinizing with some anxiety his probable means of meeting these most pressing claims upon the treasury, and also of providing for the additional daily expenditures. He could look nowhere but to the receipts from ordinary sources, and to the power to borrow money under existing laws. From customs he could expect no substantial aid, and the returns for the first quarter of the current year will show that, beyond the revenue pledged to pay the interest upon bonds issued and to be issued during the year, comparatively little assistance could be derived from this source. With regard to internal revenue the Secretary felt more encouraged.

Congress had wisely provided for a large increase of internal duties, by a law which went into operation on the 1st day of July. Under former laws the amount received had been steadily increasing during the three preceding months, and in the month of June had reached very nearly to fifteen millions of dollars. The Secretary confidently hoped that for July and the succeeding months it would reach, if it did not exceed, the daily average of three-quarters of a million. But this hope, if realized, would still leave him with a very large deficiency, to meet which, in part, he might issue certificates of indebtedness to public creditors. It was desirable, however, to avoid, could other means be found, increasing the amount of these securities. He might have recourse to the power conferred by the act of June 30, 1864, and put an additional two hundred millions of legal tender notes upon the market, and even increase that amount by some sixty millions, in substitution for five per cents., issued under the act of March 3, 1863, which had been destroyed or were ready to be destroyed. Flushed as the money market was with circulation, sufficiently, at least, to meet the necessities of business, he was anxious, if possible, to avoid so doubtful an expedient.

The prospect of negotiating a loan in the ordinary way was by no means flattering, as the notice for a loan of thirty-three millions, advertised on the 25th day of June, had been withdrawn on the 2d of July, the Secretary having reason to believe that such loan would not be taken on terms which it would be for the interest of the government to accept.

Under these circumstances the Secretary thought it advisable, in order to meet pressing emergencies, to borrow upon bonds or notes, authorized by the various acts referred to, fifty millions of dollars, of the banks in the cities of New York, Philadelphia, and Boston, and met the representatives of a large number of these institutions in New York for the purpose of effecting that object. The result proved, however, that, notwithstanding a professed, and, as the Secretary was convinced, a real desire to aid the government, these institutions were not able to furnish the assistance required upon terms, which, under existing provisions of law, the Secretary felt authorized to accept. He had then no other alternative than to issue legal-tender notes to a very large amount, or again to advertise for a loan; and he had no hesitation as to which course should be adopted. Accordingly, on the 25th of July he issued proposals for a national loan, under the act of June 30, 1864, upon notes payable in three years, with semi-annual interest at $7\frac{3}{10}$ per cent. per annum in lawful money. He incurred a considerable expense in advertising this loan, believing that it should be as widely diffused and as generally understood as possible, and offered liberal inducements to stimulate the efforts of corporations and individuals to dispose of the notes. His success, though not what he hoped for, or anticipated, has been such as not to diminish his confidence in the disposition and ability of the people to relieve the wants of their government. A serious obstacle to greater success has been, the Secretary believes, the amount of other desirable national securities pressing upon the market, and presenting more favorable opportunities for investments

Failing to raise the means required in the ordinary mode, and urged by the conviction that the large amount of suspended requisitions, swollen to more than \$130,000,000 00, should be reduced, the Secretary resolved to use all the means at his command to pay so much, at least, as was due to our brave soldiers, who were suffering from the long delay in satisfying their just claims, but still continuing to serve their country with unflinching courage and uncomplaining devotion. To effect this object he was compelled to replace the whole amount of five per cent. notes which had been cancelled, amounting to more than eighty millions of dollars, and even slightly to exceed that sum. More fully to accomplish his purpose, the Secretary resolved to avail himself of a wish expressed by many officers and soldiers, through the paymasters, and offered to such as desired to receive them, seven-thirty notes, of small denominations. He was gratified to find that these notes were readily taken in payment to a large amount, our gallant soldiers, in many instances, not only receiving them with alacrity, but expressing their satisfaction at being able to aid their country by loaning money to the government. The whole amount of notes thus disposed of exceeded twenty millions of dollars, and the Secretary has great satisfaction in stating his belief that the disposal thus made was not only a relief to the Treasury, but proved a benefit to the recipients, in affording them a safe and valuable investment, and an easy mode of transmitting funds to their families.

To meet other pressing demands, the Secretary again offered to public competition bonds issued under the act of March 3, 1863, amounting to about \$32,000,000 00. This offer was most favorably received, the bids reaching nearly \$70,000,000 00, and the whole amount offered being taken at a premium of four per centum and upwards; the Treasury receiving, premiums included, the sum of \$33,179,614 33.

Subsequently, on the 1st of October, the Secretary advertised for another loan of forty millions, upon five-twenty bonds, issued under the act of June 30, 1864. At the time of this offer the money market was in a feverish condition, arising from violent fluctuations in gold, and other causes, and serious doubts were entertained whether acceptable offers would be made. Under these circumstances, and with the hope of affecting favorably the market price of certificates of indebtedness which had become somewhat depressed by the large amount to which the issue had been necessarily increased, the Secretary decided to receive one-fourth of the subscription in these securities. The result was, that, notwithstanding the anticipated failure of the loan, bids were received amounting to nearly \$60,000,000 00, and the whole amount offered was taken at a rate above par, and averaging to the government, a fraction less than one per centum.

These negotiations have afforded satisfactory evidence, not only of the ability of the people to furnish, at a short notice, such sums as may be required, but of the entire confidence felt in the national securities. After nearly four years of a most expensive and wasting war, the means to continue it seem apparently undiminished, while the determination to prosecute it with vigor to the end is unabated.

In some particulars the Secretary has found himself embarrassed by the re-

strictive provisions of the act of July 2, 1864, and he will, therefore, at an early day, suggest such modifications as he considers necessary. In his judgment, a wide discretion should be intrusted to the officer charged with the duty of negotiating loans, in order that he may be enabled to avoid unexpected difficulties, occasioned by possible conditions of the money market. This delicate and responsible duty must necessarily be intrusted to somebody, and the people can have no other reliable security for faithfulness than may be found in the established character of the individual charged with so important a trust, whoever he may be. The discretion thus confided should, in the opinion of the Secretary, include the power of increasing the currency. To no individual would any considerable addition to the circulation, in any form, be more objectionable than to the present head of the Treasury Department, and no one would resort to such a measure, when the circulation was adequate to the wants of business, with more reluctance. Nor does he believe that a patriotic people, struggling for national existence, and possessed of ample means, would compel him to adopt a measure so fraught with injurious consequences as an issue of paper money beyond the limit so prescribed. The question, however, would be one for that people to decide. They have pronounced for a continuance of the war, until its great objects shall have been accomplished, in unmistakable terms. It is for them further to determine whether the necessary means shall be furnished by way of loan, and the circulation be restrained within safe limits, or whether they will prefer to endure the evils of exorbitant prices, with a loss of credit in the present, and a debt of needless magnitude entailed upon the future. Their financial officer can only submit to their decision, and act as the necessities of the occasion may demand. But the Secretary confidently believes that, judging from past events and recent demonstrations, there can be little doubt what the public voice will be upon a question so vital.

It is the province of Congress to indicate, and determine upon, the terms that may be offered to those who are invited to invest their means in government securities, and it would seem both wise and prudent to make those terms sufficiently liberal. If our public debt must necessarily be large, and require a long course of years for its liquidation, its wide diffusion is most desirable. Such advantages should be offered as will induce all who have anything to spare beyond the amount required for their own support, or use, to invest that surplus, or a portion of it, in the national securities. These advantages can only be found in an increased rate of interest, an exemption from public burdens, and security of possession. What limit should be fixed, in either of these particulars, it is for the practical experience and wisdom of Congress to ascertain and determine.

The experience of the few past months cannot have failed to convince the most careless observer that, whatever may be the effect of a redundant circulation upon the price of coin, other causes have exercised a greater and more deleterious influence. In the course of a few days the price of this article rose from about \$1 50 to \$2 85 in paper for \$1 00 in specie, and subsequently fell,

in as short a period, to \$1 87, and then again rose, as rapidly, to \$2 50; and all without any assignable cause, traceable to an increase or decrease in the circulation of paper money, or an expansion or contraction of credit, or other similar influence on the market, tending to occasion a fluctuation so violent. It is quite apparent that the solution of the problem may be found in the unpatriotic and criminal efforts of speculators, and probably of secret enemies, to raise the price of coin, regardless of the injury inflicted upon the country, or desiring to inflict it. All such attempts should be indignantly frowned upon by a patriotic community, and the efforts of all good citizens invoked to counteract such nefarious schemes. A law, providing for the exemplary punishment of combinations for such a purpose might tend to vindicate, if it could not fully protect, the public rights in this regard, and should be, so far as possible, rigidly enforced.

But whatever success might attend any effort to check speculation in coin, or to counteract its injurious effect, it is still obvious that, so long as there remains a large and increasing necessity for its use, and a limited supply, it will command a price commensurate with the necessity and the difficulty of obtaining it. This necessity arises from the demand for foreign exchange, for customs duties, and to pay the interest on the public debt. The matter of foreign exchange I do not propose to discuss. The demand for duties on imports, and that to pay the interest on a large portion of the public debt, are so far identical that one is dependent upon the other. The laws authorizing the issue of bonds bearing interest in coin specifically pledged the revenue from customs to the payment of that interest, and provided for the collection of those duties in the same currency. In the opinion of the Secretary, that pledge should not be violated. A departure from it could only be vindicated by one of those state necessities which justify a nation in temporarily postponing its obligations in order to preserve the power to discharge them at a future day. When the pledge was given, no one anticipated a possible continuance of the war for such a length of time as would involve the increase of the public debt to the point it has already attained, or the possible payment of interest in coin to an amount beyond the ability of duties on imports to supply. It will be noticed, however, that our annual coin interest now exceeds fifty-six millions of dollars. Should the additional amount required for the expenditures of the present fiscal year be raised upon bonds bearing interest in coin, and the revenue from customs not exceed the estimate predicated upon the receipts of the first quarter, it is quite manifest that resort must soon be had to some other source of supply, or recourse must be had to the emission of securities of a different character. It could not be expected that such securities would stand on a level with those the interest upon which is payable in coin, unless an increased value should be given them by a higher rate of interest, or their payment should be secured by a specific lien upon revenue. In view of the serious considerations presented by this question, whether as affecting the market value of coin or the ability of government to meet its specie interest, should the war continue, from the revenue now specifically appropriated to that purpose, the Secretary is forced to the conclusion that

we should in the future rely, for the most part, upon securities bearing interest in currency, convertible into bonds, the interest of which is payable in coin. Notes bearing an increased rate of interest, payable in currency, redeemable in three or five years, and convertible at maturity into five-twenty bonds, would be preferable, in the judgment of the Secretary, to any other form of security. Bonds at long date, the interest of which is payable in currency at the usual rates, would be less attractive, and in the end involve a much greater sacrifice. The $7\frac{3}{10}$ notes authorized by the act of June 30, 1864, and now offered to the public, present as many advantages as any form of currency security, uniting a high rate of interest with convertibility. At the period of their maturity it may be confidently believed that the country will have been restored to a state of unity and peace, with all disturbing elements quieted, its population and resources increased and increasing, its strength confirmed, and with ample ability to meet all its obligations from its ordinary resources.

In the report of the Comptroller of the Currency will be found statements of the number of national banks organized since his last annual report, the States and Territories wherein organized, the amount of capital paid in, circulation, and bonds deposited. The statement exhibits a large and rapid increase, and demonstrates the popularity of the system. The rapid and extensive conversion of State institutions of established character, conducted through a long series of years by men of recognized financial ability, into banks organized under the new system, could not have taken place unless after full and careful consideration as to its safety and superior advantages. If it should be said, that, perhaps, these advantages may be rather to those individually interested than to the community at large, the reply is, that a single uniform currency, possessing the same value throughout the whole country, has been too long a general object of desire to have its importance questioned. If to this great and obvious good be added the benefits to government, in its financial operations, of being freed from all the uncertainties and embarrassments arising from a currency over which it can exercise no control, the advantages of any system which will effect these objects can admit of no debate. The Secretary was not among the first to approve the plan adopted by Congress, and which seems to be receiving the popular sanction. Time and observation of its effects have, however, convinced him that the system, if not without defects, is based upon sound principles, and is entitled to all the benefit of a fair trial; and it is quite apparent that the good to be hoped cannot be fully realized, so long as another system, at war with the great objects sought to be attained, shall continue to exist, unchecked and uncontrolled.

While, therefore, the Secretary would not advise the adoption of unfriendly or severe measures, likely to embarrass the business of the country, especially when the indications are so favorable that the national system will soon replace all of a merely local character, he is yet of the opinion that such discriminating legislation should be had as will induce the withdrawal of all other circulation than that issued under national authority, at the earliest practicable moment.

For a statement of the transactions of the treasury during the past year you are respectfully referred to the report of the Treasurer. The labors of that officer are largely increased by the number of depositories which have been designated under the act "to provide a national currency." The labors of the Treasurer, and also those of the assistant treasurers in the principal cities, and the depositories designated under the act of August 6, 1846, are necessarily proportionate to the vast amounts passing through their hands; and the pecuniary responsibilities of some are such as few men, whose character and capacity would justify so important a trust, are willing to assume. Necessarily obliged to surround themselves with a large number of assistants, for whose care and integrity they must be answerable, and to give bonds in amounts that few private fortunes would meet, a high degree of courage is required to endure the perplexities and incur the hazards of such an office. In view of these facts, and of the much better compensation readily paid to such men for labors much lighter, and responsibilities far less important, I cannot but recommend that the salaries of the Treasurer, and of the assistant treasurers, and of some of the designated depositories, be increased. Within the current year the assistant treasurer at New York having been compelled by ill health to resign, after long and most useful and honorable service, it became necessary to find a person qualified by his knowledge of business and financial affairs, by spotless character and acknowledged ability, to discharge the duties of that most important position. This the Secretary found to be extremely difficult, principally because the great pecuniary risk deterred men who had anything to lose, while the compensation allowed by law was much lower than is customarily paid for similar, but far inferior, service. The office was most reluctantly accepted by the present incumbent, who relinquished an honorable position, with a much higher salary, at the urgent solicitation of the Secretary, purely from a sense of patriotic duty. Impelled by the same honorable feeling, the assistant treasurer at St. Louis consented to withdraw his resignation, which had been tendered to the department. Not only justice, but the best interests of the government, require that such compensation be paid to all public officers as will enable them to discharge important trusts, freed from the harassing cares and anxieties attendant upon inadequate incomes, and bearing a just proportion to the nature and amount of service. The difficulty of inadequate compensation has occasioned much embarrassment in other operations of this department. Many persons of experience and skill, and who could readily command higher pay in similar employments elsewhere, have resigned their places in the department. These places it has been found extremely difficult to fill, although there has been no reason to complain of a lack of applicants for employment. But in the vast and complicated affairs of the Treasury Department many persons are required possessing a high order of ability, derived both from study and experience, and without whose aid those affairs could not be well and speedily transacted. Such persons cannot be expected to remain in the public service and be content with a compensation too small for the daily wants of themselves and families, when solicited to accept other situations justly, and even liberally, remunerated. While, therefore, the

Secretary does not favor high salaries, and feels as strongly as any one the necessity of strict economy, he is compelled to state this condition of things for the consideration of Congress.

The high rates of duties on imports, imposed by recent laws, afford such temptation to smuggling, and such facilities are presented for successful attempts to evade the revenue laws, by the extent and nature of our sea-coast, and more especially of our frontier, that the necessity of strenuous efforts to prevent and punish offences of this kind is impressed upon this department with daily increasing force. The attention of Congress is particularly invited to so much of the report of the Commissioner of Customs as relates to this very important subject. The act "to prevent smuggling, and for other purposes," approved June 27, 1864, contains important provisions, which, if properly enforced, will, it is believed, prove highly efficient. Sufficient time, however, for all the preparations necessary to carry all of these provisions into effect has not as yet been afforded. In the mean time, a careful preliminary inspection has been made by the Commissioner, under instructions from the Secretary, along our sea-coast and frontier lines, and the result of his observations leads to the conviction that preparations on a large scale are in progress for extensive and systematic operations in smuggling across our northern and northeastern border. To prevent, or even to check, these operations, an increase of preventive force will be absolutely necessary, and means should be placed at the disposal of the department for that purpose, to be expended in such manner as the exigency may require. From the report of the Commissioner, and the nature of the case, it is no less obvious that an increase in the number of revenue boats, especially on the lakes, is not only expedient but necessary; and the appropriation for that object should also be increased, so as to meet the wants of the service.

The act approved July 2, 1864, entitled "An act in addition to the several acts concerning commercial intercourse between loyal and insurrectionary States, and to provide for the collection of captured and abandoned property, and the prevention of frauds in States declared in insurrection," modified, in several important particulars, pre-existing laws upon the same subjects. So much of the act of July 13, 1861, as authorized the President to permit commercial relations in insurrectionary States and sections was repealed, except in certain specified cases. The rules and regulations with regard to commercial intercourse previously adopted have been modified accordingly. The second section largely extended the powers and responsibilities of this department, by placing in its charge abandoned lands, houses, and tenements in insurrectionary States, for the purposes of occupation and lease, and still further by directing that provision should be made "in such lease, or otherwise, for the employment and general welfare of all persons within the lines of national military occupation within said insurrectionary States, formerly held as slaves, who are or shall become free." This clause is regarded as placing all such persons under the protection of this department, through which their *general welfare* is to be provided for.

In framing rules and regulations to carry the provisions of this act into effect,

as directed in section eleven, such as were deemed essential to the proper execution of the powers conferred in relation to freedmen, were made, and approved by the President as required. It was, however, found necessary to suspend their operation for a time. This class of persons had been, and were yet, under the protection of the War Department, and the necessary provision for their welfare had been afforded under military authority and supervision. The arrangements made for this purpose contemplated a continuance of the system adopted through the current year. It was deemed advisable, therefore, to defer action in this regard, until the time should arrive for commencing the operations of a new year, and in the mean time to allow the freedmen to remain as they had been, under military protection.

The eighth section of said act authorizes the Secretary of the Treasury, with the approval of the President, to appoint agents to purchase, on certain specified terms, any products of States declared in insurrection. The amount of funds placed at the disposal of the Secretary for that purpose was, however, so limited, that large operations on a cash basis were out of the question. In fact, the proper execution of the authority conferred by this provision of the statute has been attended with great embarrassment. After much consideration, however, a series of regulations was framed and approved, and several agents have been appointed, who have commenced operations under the law; but their appointment is so recent that no sufficient time has elapsed to afford a basis for any reliable opinion of the probable result. The Secretary is, however, of the opinion that, whether the hopes which may have been indulged of a considerable revenue to the government from this source are realized or not, the incidental advantages of getting to market a reasonable supply of the products referred to would compensate any effort made by government in that direction.

A copy of the rules and regulations, as revised, together with those relating to abandoned lands, houses, and tenements, providing for the care and employment of freedmen, and for the purchase of products, are appended to this report.

The Secretary has great satisfaction in stating that all expenses connected with executing the several acts restricting commercial intercourse have been much more than paid by fees arising under the regulations heretofore adopted.

While the Secretary has great pleasure in stating that, so far as his personal knowledge extends, and so far as he is informed, the affairs of this department have been well and satisfactorily conducted during the past year, an incident has occurred of a painful character, involving a possible loss to the government, and tending to excite suspicion as to the integrity of some person or persons employed in conducting its operations.

On the fifth day of June last, Mr. C. P. Bailey, chief clerk and superintendent of the loan branch, connected with the Secretary's office, addressed a letter to the Secretary, stating that one hundred bonds, partially prepared for issue under the acts of July 17 and August 5, 1861, of \$1,000 each, were missing, and no trace of them could be found. The bonds were numbered from 34,301 to 34,400 inclusive, and were a part of one thousand transmitted by the National Bank Note Company, on the 26th of September, 1863.

In his letter to the Secretary, Mr. Bailey states: "I have exhausted all the resources at my command in endeavoring to find them, and nothing is left for me but to report the facts." A strict inquiry as to all the facts connected with the affair was immediately instituted, but no light was obtained, further than to show that, on the 29th of September previous, Mr. Bailey sent the bonds in an open basket, with a weight placed on them, by two messengers, one of whom was an old clerk of established character, to the Register's office, and there offered them to the clerk who usually received the coupon bonds in the Register's room, who objected to taking charge of them, on the ground that there was no place in the office where they could be safely kept, and requested that they might be taken back to the loan branch, where there were good safes. Mr. Bailey was sent for, and, after some consultation as to the proper place of deposit, consented that they should be taken back, and deposited in the safe in his office, and they were accordingly carried back by the same messengers, taken out of the basket, laid on the table, and in the course of the day placed in the safe, where they remained, as supposed, until called for by the Register. They were called for and delivered from time to time, from March 17 to June 5, 1864, when the loss was discovered. The character of all the parties concerned is reported as above suspicion, and nothing has since transpired to elucidate the matter or to furnish any indication as to what has become of the missing bonds.

As they had not been signed by the Register, or sealed, they cannot be negotiated. The coupons, however, were sealed and complete, and payable to bearer on January and July 1, in each year. A careful examination was made of the January coupons paid on bonds of that issue, but it does not appear that any of them had been paid. These would be known by their numbers. Instructions were given the assistant treasurers to watch carefully for these coupons, but nothing further has been elicited. No other steps have been taken, as none appeared likely to be attended with any effect. With this exception, I am not aware that any loss has occurred in the department.

For the detailed operations of the mint and its branches I respectfully refer to the report of the Superintendent of the Mint. The total value of the bullion deposited at the mint and branches during the last fiscal year is \$24,920,808 47, of which \$23,986,989 92 was in gold and \$933,818 55 in silver. Deducting the redeposits, there remain the actual deposits, amounting to \$24,012,741 49. The coinage for the year was, in gold coin \$21,649,345 00; gold bars, \$2,333,403 31; silver coin, \$548,214 10; silver bars, \$301,872 89; cents, \$463,800 00; total coinage, \$25,296,635 30. The number of pieces of all denominations coined was 46,983,396. Of this coinage \$3,560,436 40, in 45,114,276 pieces, was at Philadelphia; \$19,536,809 02, in 1,869,120 pieces, at San Francisco; and \$1,576,377 04, in gold and silver bars, at New York.

The branch mint at Denver has confined its operations to melting, refining, assaying, and stamping bullion. The number of bars thus stamped was 532, of the value of \$486,329 97. The cost of transportation from the Denver mint to the seaboard, coupled with the disturbed condition of the Indians on the route,

have operated thus far to prevent the full development of the usefulness of this branch mint. I have hopes that the efforts now making may prove successful, so far as to obviate in great part the difficulties referred to.

A question of title to the proposed site of the branch mint at Nevada, authorized by Congress, has intervened to prevent any further steps from being taken toward its establishment, and no further steps can be taken until Congress shall have perfected the title.

As soon as proper information can be obtained, the necessary measures will be taken for the establishment of a branch mint at Dalles City, Oregon, in pursuance of the act of July 4, 1864.

Preliminary examinations and reports have been ordered relative to a new building for the mint at San Francisco, authorized by the act of July 2, 1864.

As in preceding years, the great value of the coast survey is constantly impressed upon the government. While its operations upon the northern coast have been continued without interruption, details of its officers have continued to be furnished to the army and navy, who have rendered services of great importance in the conduct of the war, and contributed largely to the success of various military and naval operations, not only upon the coast, but in the interior, as frequently testified by the officers in command.

The light-houses and buoys in charge of the Light-House Board have been maintained at their recognized standard of excellence. Some suggestions are made by the board tending to render the system still more efficient, to carry out which estimates have been submitted. The restoration of lights, injured or destroyed by the rebels, has been proceeded with as rapidly as the territory has been brought within the control of the United States forces. And it is believed that the same unbroken chain which was exhibited before the war will soon be re-established along the whole coast of the United States.

The Secretary refers with satisfaction to the reports of the heads of the several bureaus and offices, as exhibiting the onerous duties devolving upon them, and the great amount of labor performed, all of which has been, with few exceptions, bestowed cheerfully and assiduously. An increase of force is required in the bureaus of the Second and Third Auditors, and the Second Comptroller, to prevent a vast accumulation of business, injurious to claimants and embarrassing to the government.

The lease of the premises now occupied as a custom-house in New York will expire on the first day of May next. It may, under the provisions of the contract of lease, be purchased by the government for one million of dollars, if notice to that effect is given three months before its termination. The premises are suitable and convenient for custom-house purposes, and of greater value than the sum named. If the purchase is to be made, the Secretary should be seasonably authorized to give the stipulated notice, and the necessary appropriation made before the adjournment of Congress. This purchase has been heretofore recommended in two successive reports, and in that recommendation the Secretary fully concurs.

In closing this report, the Secretary feels that he cannot but follow the example of his predecessor, in gratefully acknowledging the obligation he is under to the Assistant Secretaries and other officers of the Treasury Department, not only for the cheerfulness and devotion with which their own peculiar duties have been discharged, but for the kindness and zeal with which they have striven to lighten his labors, and enable him to sustain, however imperfectly, the weight of a most onerous and embarrassing position.

W. P. FESSENDEN,
Secretary of the Treasury.

Hon. SCHUYLER COLFAX,
Speaker of the House of Representatives.

No. 1.

Receipts and expenditures for the fiscal year ending June 30, 1864.

The receipts into the treasury were as follows:

From customs, viz:

During the quarter ending September 30, 1863.....	\$22,562,018 42	
During the quarter ending December 31, 1863.....	23,211,520 86	
During the quarter ending March 31, 1864	27,439,654 13	
During the quarter ending June 30, 1864	29,102,959 58	
		<hr/> \$102,316,152 99

From sales of public lands, viz:

During the quarter ending September 30, 1863	136,182 09	
During the quarter ending December 31, 1863	170,503 45	
During the quarter ending March 31, 1864	131,882 92	
During the quarter ending June 30, 1864.....	149,764 83	
		<hr/> 588,333 29

From direct tax, viz:

During the quarter ending December 31, 1863.....	14,035 06	
During the quarter ending March 31, 1864.....	397,166 68	
During the quarter ending June 30, 1864.....	64,447 22	
		<hr/> 475,648 6

From internal revenue, viz:

During the quarter ending September 30, 1863.....	17,599,713 59	
During the quarter ending December 31, 1863	27,262,631 26	
During the quarter ending March 31, 1864	27,685,212 45	
During the quarter ending June 30, 1864.....	37,193,576 80	
		<hr/> 169,741,134 10

From miscellaneous and incidental sources, viz:

During the quarter ending September 30, 1863	641,542 04	
During the quarter ending December 31, 1863.....	1,912,529 09	
During the quarter ending March 31, 1864	12,527,351 39	
During the quarter ending June 30, 1864.....	32,430,025 58	
		<hr/> 47,511,448 10
From United States fractional currency	8,169,721 25	
From six per cent. 20-year bonds, under act of July 17, 1861.....	30,565,875 45	
From 5-20 years bonds, under act of February 25, 1862	321,551,283 41	
From United States notes, under act of February 25, 1862.....	86,420,870 00	
From temporary loans, under acts of February 25, 1862, and March 17, 1862	169,218,044 81	
From certificates of indebtedness, under acts of March 1 and 17, 1862....	169,179,000 00

S. B. COLBY, *Register.*

Acts authorizing loans, and synopsis of same.	
Act of July 21, 1841, and April 15, 1842.	Authorized a loan of \$12,000,000, bearing interest at a rate not exceeding 6 per cent. per annum, and reimbursable at the will of the Secretary, after six months' notice, or at any time after three years from the 1st of January, 1842. The act of April 15, 1842, authorized the loan of an additional sum of \$5,000,000, and made the amount obtained on the loan after the passage of this act reimbursable after six months' notice, or at any time not exceeding twenty years from the 1st day of January, 1843. This loan was made for the purpose of redeeming outstanding treasury notes, and to defray any of the public expenses.
Act of Jan. 28, 1847.....	Authorized the issue of \$23,000,000 in treasury notes, bearing interest at a rate not exceeding 6 per cent. per annum, with authority to borrow any portion of the amount, and issue bonds therefor, bearing interest at a rate not exceeding 6 per cent., and redeemable after the 31st of December, 1867. The 13th section authorized the funding of these notes into bonds of the same description. The act limited the amount to be borrowed or issued in treasury notes and funded as aforesaid to \$23,000,000, but authorized the funding of treasury notes issued under former acts beyond that amount. The excess of the \$23,000,000 is made up of treasury notes funded under the 14th section.
Act of March 31, 1848 ...	Authorized a loan of \$16,000,000, bearing interest at a rate not exceeding 6 per cent. per annum, and reimbursable at any time after twenty years from the 1st of July, 1848. Authority was given the Secretary to purchase the stock at any time
Act of Sept. 9, 1850	Authorized the issue of \$10,000,000 in bonds, bearing 5 per cent. interest, and redeemable at the end of fourteen years, to indemnify the State of Texas for her relinquishment of all claims upon the United States for liability of the debts of Texas, and for compensation for the surrender to the United States of her ships, forts, arsenals, custom-houses, &c., which became the property of the United States at the time of annexation.
Old funded and unfunded debts.	Consisting of unclaimed dividends upon stocks issued before the year 1800, and those issued during the war of 1812.
Acts prior to 1857.....	Different issues of treasury notes
Act of Dec. 23, 1857.....	Authorized an issue of \$20,000,000 in treasury notes, bearing interest at a rate not exceeding 6 per cent. per annum, and receivable in payment of all public dues, and to be redeemed after the expiration of one year from the date of said notes.
Act of June 14, 1858	Authorized a loan of \$30,000,000 bearing interest at a rate not exceeding 5 per cent. per annum, and reimbursable at the option of the government at any time after the expiration of fifteen years from the 1st of January, 1859.
Act of June 22, 1860	Authorized a loan of \$21,000,000 bearing interest at a rate not exceeding 6 per cent. per annum, and reimbursable within a period not beyond twenty years, and not less than ten years, for the redemption of outstanding treasury notes, and for no other purpose.
Act of Dec. 17, 1860.....	Authorized an issue of \$10,000,000 in treasury notes, to be redeemed after the expiration of one year from the date of issue, and bearing such a rate of interest as may be offered by the lowest bidders. Authority was given to issue these notes in payment of warrants in favor of public creditors at their par value, bearing 6 per cent. interest per annum.
Act of Feb. 8, 1861.....	Authorized a loan of \$25,000,000, bearing interest at a rate not exceeding 6 per cent. per annum, and reimbursable within a period not beyond twenty years, nor less than ten years. This loan was made for the payment of the current expenses, and was to be awarded to the most favorable bidders.
Act of March 2, 1861....	Authorized a loan of \$10,000,000, bearing interest at a rate not exceeding six per cent. per annum, and reimbursable after the expiration of ten years from July 1, 1861. In case proposals for the loan were not acceptable, authority was given to issue the whole amount in treasury notes bearing interest at a rate not exceeding six per cent. per annum. Authority was also given to substitute treasury notes for the whole or any part of the loans for which the Secretary was by law authorized to contract and issue bonds, at the time of the passage of this act, and such treasury notes were to be made receivable in payment of all public dues, and redeemable at any time within two years from March 2, 1861.
Act of March 2, 1861....	Authorized an issue, should the Secretary of the Treasury deem it expedient, of \$2,800,000, in coupon bonds, bearing interest at the rate of six per cent. per annum, and redeemable in twenty years, for the payment of expenses incurred by the Territories of Washington and Oregon in the suppression of Indian hostilities, during the years 1855 and 1856.
Acts of July 17, 1861, and August 5, 1861.	Authorized a loan of \$250,000,000, for which could be issued bonds bearing interest at a rate not exceeding seven per cent. per annum, irredeemable for twenty years, and after that redeemable at the pleasure of the United States; treasury notes bearing interest at the rate of 7-30 per cent. per annum, payable three years after date, and United States notes without interest, payable on demand, to the extent of \$50,000,000. (increased by act of February 12, 1862, to \$60,000,000,) the bonds and treasury notes to be issued in such proportions of each as the Secretary may deem advisable. The supplementary act of August 5, 1861, authorized an issue of bonds bearing six per cent. interest per annum, and payable at the pleasure of the United States after twenty years from date, which may be issued in exchange for 7-30 treasury notes, but no such bonds to be issued for a less sum than \$500, and the whole amount of such bonds not to exceed the whole amount of 7-30 treasury notes issued.

of the United States, June 30, 1864.

No. 5.—*Statement of the indebtedness*

	Acts authorizing loans, and synopsis of same.
Act of February 25, 1862.	Authorized the issue of \$500,000,000 in six per cent. bonds, redeemable after five years, and payable twenty years from date, which may be exchanged for United States notes. Also, on
March 3, 1864.....	Authorized the issue of not over \$11,000,000 additional of similar bonds, to meet subscriptions already made and paid for.
Act of February 25, 1862.	Authorized the issue of \$150,000,000 in legal-tender United States notes, \$50,000,000 of which to be in lieu of demand notes issued under act of July 17, 1861.
Act of July 11, 1862....	Authorized an additional issue of \$150,000,000 legal-tender notes, \$35,000,000 of which might be in denominations less than five dollars; \$50,000,000 of this issue to be reserved to pay temporary loans promptly in case of emergency.
Resolution of Congress, January 17, 1863.	Authorized the issue of \$100,000,000 in United States notes, for the immediate payment of the army and navy, such notes to be a part of the amount provided for in any bill that may hereafter be passed by this Congress. (The amount in this resolution is included in act of March 3, 1863.)
Act of March 3, 1863....	A further issue of \$150,000,000 in United States notes, for the purpose of converting the treasury notes which may be issued under this act, and for no other purpose. And a further issue, if necessary, for the payment of the army and navy, and other creditors of the government, of \$150,000,000 in United States notes, which amount includes the \$100,000,000 authorized by the joint resolution of Congress, January 17, 1863.
Act of February 25, 1862.	Authorized a temporary loan of \$25,000,000 in United States notes, for not less than thirty days, payable after ten days' notice, at five per cent. interest per annum. (This was increased to \$100,000,000 by the following acts.)
March 17, 1862.....	Authorized an increase of temporary loans of \$25,000,000, bearing interest at a rate not exceeding five per cent. per annum.
July 11, 1862.....	Authorized a further increase of temporary loans of \$50,000,000, making the whole amount authorized \$100,000,000.
Act of June 30, 1864....	Authorized the increase of temporary loans to not exceeding \$150,000,000, at a rate not exceeding six per cent.
Act of March 3, 1863....	Authorized a loan of \$300,000,000 for this, and \$600,000,000 for the next fiscal year, for which could be issued bonds running not less than ten, nor more than forty years, principal and interest payable in coin, bearing interest at a rate not exceeding six per cent. per annum, payable in bonds not exceeding \$100 annually, and on all others semi-annually, the whole amount of bonds, treasury notes, and United States notes, issued under this act, not to exceed the sum of \$900,000,000. And so much of this act as limits the loan authorized therein to the current fiscal year is repealed by act of June 30, 1864, except so far as it may affect \$75,000,000 of bonds already advertised.
Act of March 3, 1863....	And treasury notes to the amount of \$100,000,000, not exceeding three years to run, with interest at not over six per cent. per annum, principal and interest payable in lawful money, which may be made a legal tender for their face value, excluding interest, or convertible into United States notes.
Act of June 30, 1864....	Authorizes the issue of and in lieu of an equal amount of bonds authorized by the first section and as a part of said loan not exceeding \$200,000,000 in treasury notes of any denomination not less than \$10, payable at any time not exceeding three years from date, or, if thought more expedient, redeemable at any time after three years from date, and bearing interest not exceeding the rate of 7-10 per centum, payable in lawful money at maturity, or at the discretion of the Secretary semi-annually; and such of them as shall be made payable, principal and interest, at maturity, shall be a legal tender to the same extent as United States notes, or their face value, excluding interest, and may be paid to any creditor of the United States at their face value, excluding interest, or to any creditor willing to receive them at par, including interest; and any treasury notes issued under the authority of this act may be made convertible at the discretion of the Secretary of the Treasury into any bonds issued under the authority of this act, and the Secretary of the Treasury may redeem and cause to be cancelled and destroyed any treasury notes, or United States notes, heretofore issued under authority of previous acts of Congress, and substitute in lieu thereof an equal amount of treasury notes, such as are authorized by this act, or of other United States notes; nor shall any treasury note bearing interest issued under this act be a legal tender in payment or redemption of any notes issued by any bank, banking association, or banker, calculated or intended to circulate as money.
Act of June 30, 1864....	Authorized the issue of \$100,000,000 of bonds redeemable at the pleasure of the government after any period not less than five nor more than thirty years, or, if deemed expedient, made payable at any period not more than forty years from date. And said bonds shall bear an annual interest not exceeding 6 per centum, payable semi-annually in coin. And the Secretary of the Treasury may dispose of such bonds, or any part thereof, and of any bonds commonly known as five-twenties, remaining unsold, on such terms as he may deem most advisable for lawful money of the United States, or at his discretion for treasury notes, certificates of indebtedness, or certificates of deposit, issued under any act of Congress.

of the United States, June 30, 1864—Continued.

No. 5.—*Statement of the indebtedness*

	<p style="text-align: center;">Acts authorizing loans, and synopses of same.</p>
Act of March 3, 1864....	Authorizes the issue of bonds not exceeding \$200,000,000, bearing date March 1, 1864, or any subsequent period, redeemable at the pleasure of the government after any period not less than five years, and payable at any period not more than forty years from date, in coin, bearing interest not exceeding six per centum a year, payable on bonds not over one hundred dollars annually, and on all other bonds semi-annually, in coin.
Act of March 1, 1862....	Authorized an issue of certificates of indebtedness, payable one year from date, in settlement of audited claims against the government. Interest 6 per cent.
Act of March 3, 1863....	Payable in lawful currency on those issued after that date. Amount of issue not specified.
Act of July 17, 1862....	Authorized an issue of notes of the fractional parts of one dollar, receivable in payment of all dues, except customs, less than five dollars, and exchangeable for United States notes in sums not less than five dollars. Amount of issue not specified.
Act of March 3, 1863....	Authorized an issue not exceeding \$50,000,000 in fractional currency, (in lieu of postage or other stamps,) exchangeable for United States notes in sums not less than three dollars, and receivable for any dues to the United States less than five dollars, except duties on imports. The whole amount issued, including postage and other stamps issued as currency, not to exceed \$50,000,000. Authority was given to prepare it in the Treasury Department, under the supervision of the Secretary.
Act of June 30, 1864....	Authorized issue in lieu of the issue under acts of July 17, 1862, and March 3, 1863, the whole amount outstanding under all these acts not to exceed \$50,000,000.

A.

OFFICE OF COMPTROLLER OF THE CURRENCY,

November 25, 1864.

In compliance with the requirements of the 61st section of the national currency act, I have the honor of making through you to the Congress of the United States the following report:

Since my last annual report two hundred and eighty-two new banks have been organized, and one hundred and sixty-eight State banks have been changed into national ones. Of the one hundred banks last organized, sixty-seven have been conversions of State banks, and nearly all the papers now being filed are for the change of State banks into national associations.

There are now in existence, under the national currency act, five hundred and eighty-four associations, which are located in the following States:

In Maine	18
In New Hampshire	9
In Vermont	10
In Massachusetts	67
In Rhode Island	2
In Connecticut	20
In New York	100
In New Jersey	16
In Pennsylvania	109
In Delaware	1
In Maryland	3
In District of Columbia	2
In Virginia	1
In West Virginia	2
In Ohio	84
In Michigan	15
In Indiana	34
In Illinois	38
In Wisconsin	15
In Minnesota	4
In Iowa	20
In Missouri	7
In Kansas	1
In Nebraska Territory	1
In Kentucky	1
In Tennessee	3
In Louisiana	1

The paid-in capital of the banks in the respective States and Territories, the currency delivered to them, (a considerable portion of which has not been put into circulation,) and the bonds deposited with the Treasurer to secure their notes, are as follows.

State.	Capital stock paid in.	Circulation.	Bonds.
Maine.....	\$2,749,800 00	\$1,887,880	\$2,244 500
New Hampshire.....	1,120 000 00	552,700	944,000
Vermont.....	1,490,000 00	1,311,800	1,636,000
Rhode Island.....	700,000 00	414,000	560,000
Massachusetts.....	25,909,040 00	12,536,850	16,888,650
Connecticut.....	5,176,638 00	4,084,050	4,525,500
New York.....	20,599,175 03	12,584,950	14,064,600
Pennsylvania.....	21,120,148 88	10,193,830	14,964,100
New Jersey.....	2,141,249 00	1,756,170	2,011,000
Delaware.....	300,000 00	200,000	250,000
Maryland.....	1,560,000 00	1,245,000	1,400,000
District of Columbia.....	600,000 00	477,000	534,000
Virginia.....	95,025 00	95,000	112,000
West Virginia.....	206,950 00	140,000	230,000
Ohio.....	10,035,165 86	7,505,880	8,749,850
Kentucky.....	200,000 00	162,000	184,000
Indiana.....	4,201,671 26	3,148,400	3,924,100
Illinois.....	4,147,837 25	3,396,560	3,794,600
Michigan.....	1,165,090 00	797,800	943,500
Wisconsin.....	1,040,277 00	774,500	903,050
Minnesota.....	590,000 00	442,000	603,000
Iowa.....	1,215,000 00	945,900	1,092,000
Nebraska Territory.....	40,000 00	27,000	30,000
Kansas.....	100,000 00	40,000	55,000
Missouri.....	1,621,530 00	722,000	865,000
Tennessee.....	340,000 00	234,380	263,000
Louisiana.....	500,000 00	180,000	200,000
Total.....	108,964,597 28	65,864,650	81,961,450

A detailed statement of the affairs of each bank on the first Monday of October last, with an abstract of the condition of all of them in the aggregate on that day, is herewith submitted, together with the names and compensation of the clerks, and the total expenses of the bureau for the fiscal year.

A large proportion of the circulating notes which have been furnished by the Comptroller was intended to take the place and is taking the place of the circulation of such State banks as have been converted into national ones, or of those whose notes have been voluntarily retired, or have been returned from those parts of the country in which the notes of the United States and of the national banks are alone current; so that the currency delivered to the national banks is not and will not be altogether an addition to the paper money of the country, but rather, to a considerable extent, the substitution of it for that of the State banks.

It is perhaps to be regretted that so many new banks have been organized in States where, before the passage of the act, there was no deficiency of banking capital. There would have been less cause for apprehension that banking capital in any of the States was being too rapidly increased, if, by suitable legislation of the States, State banks had been sooner authorized to avail themselves of the benefits of the national currency act, and the managers of banks, where the necessary legislation had been obtained, had more promptly discerned the inevitable tendency of the public sentiment, and co-operated with the government in its efforts to nationalize the bank note circulation of the country. It was not the intention of the originators and friends of the system, nor has it been the policy of the Comptroller, to swell, through the instrumentality of the national banks, the volume of paper money. On the contrary, the system was

designed to check overissues by requiring ample security for every dollar which should be put into circulation, and it has been the aim of the Comptroller so to administer the law as to prevent, instead of encouraging, an unhealthy and dangerous expansion of credits.

I am happy in being able to say that my apprehensions of a too rapid increase of national banks have been much lessened by the recent action of many State banks. The legislature of Pennsylvania, following the example of the legislatures of Massachusetts, Connecticut, &c., has recently authorized the banks of that State to reorganize under the national system, and the stockholders of so many of them are availing themselves of this authority, as to render it quite certain that at an early day there will be in this great central State, without a dangerous increase of its banking capital, but one system of banking. In fact, the indications are now unmistakable that the time is not far distant when the people of the United States will be everywhere relieved of a bank note circulation of limited credit and uncertain value, and supplied with one of uniform credit and as solvent as the nation. It has been the earnest wish of the Comptroller that this desirable result should be brought about through the agency of existing banks, rather than by the organization of new ones, so that the national circulation might be introduced with as little increase of banking capital as possible. A national bank note currency will be one of the compensations for the heavy debt which has been incurred in the terrible contest in which the nation has been involved. If it can be everywhere introduced, as now seems probable, without creating a dangerous bank note inflation, it will prove to be a compensation which more than anything else will reconcile the people to the burdens which the war must necessarily impose upon them. It will be so by its tendency to regulate domestic exchanges, by the stability it will give to trade, in preventing unsecured issues and bank note panics, by saving the people from losses in the use of paper money, and by its influence in securing and perpetuating that national unity which is the ark of our safety.

It is an interesting fact, that this great change is taking place—this great financial revolution, if I may so call it, is being accomplished, without disturbing the business of the country. State banks, whose conversions are facilitated by enabling acts, are being daily reorganized without a curtailment of discounts, or even a temporary derangement of their affairs. Nearly all the banking capital of Philadelphia has been recently nationalized, with scarcely an interruption of the business of the banks for a single day. In States where no enabling legislation has been obtained, the change from the State to the national system is attended with more difficulty. But even in these States, by the organization of national banks by the stockholders of State banks, and the transfer of the assets of the latter to the former, the change has been already, in many instances, effected without loss to the owners, and with very little practical inconvenience to the managers.

It is also an interesting fact, that the stock of State banks which have been changed into national associations has not been depreciated by the change; on the contrary, the shares of most of them have been appreciated, and I know of no instance in which their real or market value has been injuriously affected by it. This fact sufficiently refutes the charge, sometimes urged against the system, that it was being forced upon the country to the prejudice of the stockholders of State institutions.

It may be proper for me to state another fact in this connexion of interest to the public, which is, that the national banks are, without any known exceptions, in safe, although some of them are in inexperienced hands, and that the fears that the national banking system would be the means of filling the country with banks of fictitious capitals, and be a reproduction, on a large scale, of the stock banking systems of States in which they had proved to be a failure, if not a fraud, are, from present indications, without a real foundation.

The fact that such apprehensions were entertained or were professed to be entertained by the bankers of a State, in which a system similar in some of its main features was in practical operation, intimidated, for a while, the capitalists of other States, and retarded the reorganization of State banks, but worked no permanent injury to the national system. On the contrary, the expression of these fears has led to a thorough examination of the act, and a careful observation of its administration, and the result has been favorable to both. It has been discovered that in many important particulars the national system differs from, and is an improvement upon, the State system, which it the most closely resembles; that it restricts circulation to ninety per cent. of the bonds on deposit with the Treasurer, and prohibits the banks from issuing notes to an amount exceeding their bona fide paid up capitals, sworn to by their officers; that every interior national bank, in addition to redeeming its notes at its own counter, is compelled to redeem at par, at some commercial centre, thereby tending to prevent high rates of exchange between the different sections of the country, and that, in case of the failure of a bank to redeem its notes according to the provisions of the act, these notes, instead of being depreciated, would be at once redeemable in lawful money, at the treasury of the United States. It has been also ascertained that the Comptroller is requiring the most satisfactory references or credentials in regard to the standing and responsibility of the persons proposing to organize national banks, and is instituting a system of examinations which will do much to expose and check improper practices on the part of the bankers, and violations of the wholesome provisions of the law.

This examination of the act, and the observation of the manner in which it is being administered, have resulted in the entering up of a popular judgment in favor of the national banking system; a judgment, not that the system is a perfect one, nor free from danger of abuse, but that it is a safer system, better adapted to the nature of our political institutions, and to our commercial necessities, giving more strength to the government, with less risk of its being used by the government against the just rights of the States, or the rights of the people, than any system which has yet been devised, and that by such amendments of the act as experience may show to be needful, it may be made as little objectionable, and as beneficial to the government and the people, as any paper money banking system that wisdom and experience are likely to invent. It promises to give to the people that long existing "desideratum," a national currency without a national bank, a bank note circulation of uniform value without the creation of a moneyed power in a few hands over the politics and business of the country.

Of course this system depends for its success upon the maintenance of the faith and credit of the nation, which, in their turn, depend upon the preservation of the national integrity. If these fail, the national banking system will fail; but it will go down with all other important interests, and will be but a part of the general wreck. That such a calamity is not in store for us is the confident hope and belief of all true men of the loyal States. The anxieties and apprehensions which have existed heretofore on this point are rapidly disappearing as the loyal mind of the United States has hardened to the inexorable resolution that the Union shall be preserved, and the public credit shall be maintained, no matter what sacrifices and burdens the execution of this resolution may involve.

It is a common objection to the national banking system, on the part of some who favor a national currency, that it will deprive the government of the privilege it might safely use, and the field it might profitably occupy, by the continued circulation of its own notes. Why, it is asked, should not the government drive out of circulation all bank notes, and continue to issue, as it has done since the commencement of the war, its own notes, and thus save the interest which otherwise will go to the banks? In answer, I would remark:

The banking interest in the United States is an important one; it has grown with the business of the country, and has been largely instrumental in developing the national resources and in increasing the national wealth. Banks of issue, badly and dishonestly as many of them have been managed, and disastrous as have been the failures which bad management and dishonesty have produced, have still been of unquestionable advantage to the people. The capital of the country has been largely, and in good faith, invested in them, and thousands of stockholders depend upon the dividends upon their bank stock for support. It is an interest which has stood by the government in its struggles with a gigantic rebellion; and now, when it is indispensable that the government should control the issues of paper money, there has been created a national banking system, not to destroy the State banks but to absorb them, and that, too, without prejudice to their stockholders.

Governments should not be bankers. None has existed which could be safely trusted with the privilege of permanently issuing its own notes as money. Circulating notes have been issued under peculiar circumstances by other governments, as it is now being done by that of the United States, but the judgment of the world is against it as a permanent policy, and nothing but an overpowering public exigency will at any time justify it. Under popular institutions like ours no more dangerous, no more corrupting power could be lodged in the hands of the party in possession of the government; none more perilous to official probity, and free elections. Give to a party dominant in the legislative and executive branches of the government the authority of issuing paper money for the purpose of furnishing the country with its currency, subject as it would be to no restraint but its own pleasure, and what guaranty would there be that this authority would be honestly and judiciously used? If there were no risk in the preparation of the notes, and checks were provided to make fraudulent issues an impossibility, the power of issuing government promises as a circulating medium is too dangerous a one to be conferred upon any party, except under extraordinary circumstances.

The present issue of United States notes as lawful money, and the decisions of the courts sustaining the constitutionality of the issue, have been justified by the consideration that under a great public necessity, when the nation's life is in peril, policies must be framed and laws must be interpreted with a view to the preservation of the government. This is the paramount consideration to which all others must bend. Whatever opinions may have been, in times past, entertained in regard to the propriety of the issue of United States notes, and the expediency as well as the constitutionality of the law making them a legal tender, there are now, I apprehend, very few intelligent persons who are not persuaded that without these notes, and the character of lawful money given to them by Congress and confirmed by the courts, the credit of the nation would have given way at the very outbreak of the rebellion. When the war has been concluded, and the exigency which made the issue of government notes a necessity has ceased to exist, there will be very few to advocate the continued use of them on the ground of economy.

If, however, there were no objections of the kind alluded to, there are other objections to the permanent issue of circulating notes by the government, which must be apparent to all who have considered the object and uses of a paper currency.

Paper money has been found to be useful, or rather an absolute necessity in all commercial countries for the convenient transaction of business, and as a circulating representative of values too large to be represented by coin. Although the fruitful cause of great evils, by reason of its unregulated use, and of its uncertain and frequently deceptive character, the general utility of it can hardly be questioned. Now, what is needed in a paper circulating medium, is, that it should be convertible into coin; that it should be sufficient in amount to answer

the purposes of legitimate business; that it should not, on the one hand, by being overissued, encourage extravagance and speculation and give an artificial and unreliable value to property; nor, on the other hand, by being reduced below the proper standard, interrupt business and unsettle values. It should be supplied to just the extent of the demands of a healthy trade. It should be increased as the regular business of the country may require its increase, and be diminished as the proper demand for it is diminished.

It is not pretended that banks of issue have furnished this kind of circulation. Bank notes, with few exceptions, have been convertible into coin when there was no demand for coin, and inconvertible when there was. They have, too generally, been issued for the exclusive benefit of the bankers, and not for the convenience of the public, and they have encouraged speculation, when their true mission was to facilitate trade. It has been the bane of a bank note circulation, that it has been expanded by the avarice of the bankers, and contracted by the distrust that overissues have created.

Now, this objection to a bank note circulation applies with much greater force to government issues. There is always inducement enough for banks to keep up a full circulation, and against excessive issues there are the restrictions of law and the liability to redeem. Government notes, in the issue thereof, would be regulated only by the necessities of the government or the interests of the party in power. At one time they might be increased altogether beyond the needs of commerce and trade, thereby enhancing prices and inducing speculation; at another, they might be so reduced as to embarrass business and precipitate financial disasters. They would be incomparably worse in this respect than a bank note currency, because the power that should control circulation would be the power that furnishes it. Supplied by an authority not in sympathy with trade, they would not be accommodated to the requirements of trade. They might be the fullest in volume when there was the least demand for a full circulation, and the most contracted when there was a healthy demand for an increase. They would eventually become an undesirable circulation, because there would be no way in which the redemption of them could be enforced: they would be a dangerous circulation, because they would be under the control of political parties; an unreliable circulation, because, having no connexion with trade and commerce, they would not be regulated by their necessities.

There are objections to all kinds of paper money; but, in some form, it is a commercial necessity, and no form has yet been contrived so little objectionable as that which is authorized by the national currency act. Under this act the government performs its proper functions by exercising one of its constitutional powers for the regulation of commerce, by fixing the maximum of bank note circulation, securing its solvency, and giving to it nationality of character and uniformity of value. It takes the promises, which are to go among the people through the national banks, put its seal upon them, and guarantees *their* redemption, as it takes the precious ore from the mines—the property of individuals—coins it into money of the United States and fixes the value thereof. It thus performs the proper offices of government. In doing so it interferes with no State rights, meddles with no man's lawful pursuits. It stands between the bankers and the people, and while it protects the latter from imposition in the use of a bank note currency, it trespasses upon no privileges of the former. Without becoming a banker, and without, as in the case of the charter of the United States Bank, conferring peculiar if not dangerous privileges upon a single corporation, it provides a national circulation, indispensable for its own use and safety in the collection of its internal revenues, and suited to the circumstances of the country.

But while the national currency act is restrictive in its general provisions, and is expected, when generally adopted to prevent expansions, there is still danger that too much capital will be invested under it during the suspension of

specie payments, and in the existing unsettled condition of our political and financial affairs. When money is plenty, and fortunes are being rapidly acquired, the country is always in a feverish and unhealthy state. This is especially true at the present time. The enormous expenditures of the government, and the great advances in prices since the commencement of the war, have made many persons suddenly rich, and, upon fortunes suddenly acquired, have followed reckless expenditures, extravagance, waste. Speculation is taking the place of sober and persevering industry, and thousands are deluded with the notion that the wealth of the nation is being increased by the increase of its indebtedness. The inauguration of a new system of banking, under such circumstances, is peculiarly hazardous, and I have been, from the time of my appointment, more apprehensive that too many banks would be organized, than that the system would not be sufficiently attractive to induce capitalists to become connected with it. The government is the great borrower. Its obligations compose a large portion of the discount line of the banks, which are making large profits on government securities at little apparent risk, and the danger is, that the national banking system, with all its restrictions, may, during the suspension of specie payments, and the continuance of the war, add to the plethora of paper money; and that, when the war is over, the banks, deprived of the existing means of investment in government obligations, and finding no legitimate use for their capitals, may be tempted to use them in encouraging operations that will eventually prove to be as unprofitable to themselves, as they will be injurious to the country. For the double purpose, therefore, of keeping down the national circulation as far as it has seemed possible to do it, consistently with the establishment of the system throughout the country, and preventing an increase of banking capital, that might hereafter be instrumental in keeping up the inflation, and retarding the resumption of specie payments, or prove unprofitable to its owners, I have felt it to be my duty to discourage, in many instances, the organization of new banks, and in more instances to refuse my sanction to the increase of the capital of those already organized. In doing so, I may seem to have exercised a power not warranted by the act; but if not sustained by its letter, I have been by its spirit, and I am willing to let the future decide as to the correctness or incorrectness of my course.

But while I entertain the opinion that the currency of the country is already too much expanded, and that it would be a calamity if the national banking system should be the means of materially increasing it, I must not be understood as sanctioning the notion, so generally prevalent, that the high price of coin is to be altogether or chiefly attributed to it, or that gold and silver are, at the present time, the standard of value in the United States. When gold sold in Wall street, on the 1st of July last, at 185 premium, many of the best stocks, as well as productive real estate, were no higher than they have been upon a coin basis.

By referring to the gold market in New York during the three past years it will be perceived that its value has been regulated by other causes than the inflation of the currency.

In January, 1862, gold in New York was at a premium of $1\frac{1}{2}$ per cent. It soon fell to 1, from which it rose on the 10th of October to 37, and closed on the 31st of December at 34. On the 24th of February, 1863, it had advanced to 72 $\frac{1}{2}$, but on the 26th of March (favorable news having been received from the southwest) it went down to 40 $\frac{1}{2}$, but in twelve days, on the receipt of less favorable intelligence from that quarter, it went up to 59 $\frac{1}{2}$. A few days after, upon the report of the iron-clad attack upon Fort Sumter, it fell to 46, and on receipt of the intelligence of the surrender of Port Hudson to 23 $\frac{1}{2}$. On the 15th of October it rose to 54, but reached no higher point during that year.

On the 1st of January, 1864, it opened at 52, went up to 88 on the 14th of April, and fell to 67 on the 19th of the same month. On the passage of the

gold bill, June 22, it rose to 130, and fell the next day to 115. On the 1st of July it was forced up to 185, but on the day following (the gold bill having been repealed) it fell to 130. On the 11th of the same month it went up again to 184; on the 15th it fell to 144, and after various fluctuations dropped on the 26th of September to 87—thus rising between the 1st of January and the 1st of July, 1864, from 52 to 185, and falling between the 1st of July and the 26th of September from 185 to 87. None of these fluctuations were brought about by an increase or decrease of the currency; on the contrary, gold rose the most rapidly when there was no considerable increase of the currency, and fell in the face of large additions to it. Nothing can be more conclusive of the incorrectness of the opinion that gold is always the standard of value, and that the high price it has commanded in the United States during the progress of the war is the result of an inflated currency, than this brief statement of its variations in the New York stock market.

Hostility to the government has been as decidedly manifested in the effort that has been made in the commercial metropolis of the nation to depreciate the currency as it has been by the enemy in the field; and unfortunately the effort of sympathizers with the rebellion, and of the agents of the rebellious States, to prostrate the national credit has been strengthened and sustained by thousands in the loyal States, whose political fidelity it might be ungenerous to question. Immense interests have been at work all over the country, and concentrated in New York, to raise the price of coin, and splendid fortunes have been apparently made by their success. The loyal importer and manufacturer of the east and the produce and provision merchant of the west have locked hands with the enemies of the republic in a common effort, although for a different object, and sometimes have produced results which have created serious apprehensions that the Union might be lost for want of means to prosecute the war, or rather on account of the excessive and unnecessary costliness of the war. The government in its struggles with a gigantic rebellion has not only been contending with armed rebels in the field, but with unarmed rebels in the loyal States, backed by an immense interest in the hands of loyal citizens.

Gold has been a favorite article to gamble in. It has been forced up and down by those tricks and devices that are so well understood at the stock board. The reverses of our arms have been used by the operators for an "advance" to send it up, and our military successes have been turned to the advantage of those who were interested in a "decline." When the banks and the government suspended specie payments, and a new standard of value was created in the legal tenders, gold and silver, whose legal value had been fixed by the same authority, became an article of traffic, subject to the influences that have control of the market, and yet unfortunately everything necessary for use or consumption was made to follow their upward tendency, as if they were still the proper and only regulator of prices.

The effect of all this has been, not to break down the credit of the government, but to increase enormously the cost of the war and the expense of living; for however small may have been the connexion between the price of coin and our domestic products, every rise of gold, no matter by what means effected, has been used as a pretext by holders and speculators for an advance of prices, to the great injury of the government and the sorrow of a large portion of the people. It is unquestionably true that the abundance of money has facilitated the operations against the credit of the government, and that a more stringent market would have tended to check and restrain them, but it is a mistaken notion that the high price of coin is an evidence of an overissue of currency or of its depreciation. If it were generally believed that the war would be ended by the 1st of January, gold would fall before that time to 25 per cent. premium, if not lower, although the paper money in circulation might in the mean time be largely increased.

The expenditures of the government have created a great expansion of currency and of prices. There would have undoubtedly been an expansion, in a less degree it is true, but still an expansion, if the war had been carried on upon a specie basis. Prices of all the necessities of life as well as luxuries, and of everything which the government must purchase in the prosecution of the war, are enormously high, and the penalty is yet to be paid, for the inflation, in increased taxation, and the ruin which must overwhelm the thousands who believe, and act upon the belief, that the apparent prosperity of the country is real, and is not to be interrupted. Fortunate will the country be if the war can be closed and prices reduced to former standards without a collapse, which will as greatly excel in the extent of its disaster that which occurred at the close of the last war with England as the present war excels that in costliness and magnitude.

As long as there was any uncertainty in regard to the success of the national banking system, or the popular verdict upon its merits and security, I did not feel at liberty to recommend discriminating legislation against the State banks. It is for Congress to determine if there is any longer a reasonable uncertainty on these points, and if the time has not arrived when all these institutions should be compelled to retire their circulation. It is indispensable for the financial success of the treasury that the currency of the country should be under the control of the government. This cannot be the case as long as State institutions have the right to flood the country with their issues. As a system has been devised under which State banks, or at least as many of them as are needed, can be reorganized, so that the government can assume a rightful control over bank note circulation, it could hardly be considered oppressive if Congress should prohibit the further issue of bank notes not authorized by itself, and compel, by taxation, (which should be sufficient to effect the object without being oppressive,) the withdrawal of those which have been already issued. My own opinion is, that this should be done, and that the sooner it is done the better it will be for the banks themselves and for the public. As long as the two systems are contending for the field, (although the result of the contest can be no longer doubtful,) the government cannot restrain the issue of paper money; and as the preference which is everywhere given to a national currency over the notes of the State banks indicates what is the popular judgment in regard to the merits of the two systems, there seems to be no good reason why Congress should hesitate to relieve the treasury of a serious embarrassment, and the people of an unsatisfactory circulation.

Some important amendments are required to the act in order that it should be fully accommodated to the wants and business of the country.

The provisions in regard to the lawful money reserve and the distribution of the assets of insolvent banks require modification.

I am still of the opinion that the rates of interest to be charged by the national banks should be fixed by Congress, and not by the States.

There are too many points at which the banks may redeem their notes. All, with the exception of those in Philadelphia and Boston, should redeem in New York. The banks ought to be compelled by law to retain a part, if not all the coin received by them, for interest on their gold-bearing bonds, in order that they may be prepared to lend their influence in favor of a return to specie payments, and some provisions should be introduced by which, when specie payments are resumed, excessive importation of goods may be checked and dangerous exportations of coin may be prevented.

It is of the greatest importance that the national currency system should be independent of politics and freed from political influences. To effect this, and to facilitate the business of the banks with the Comptroller, I am clearly of the opinion that the bureau should be made an independent department, and removed from Washington to Philadelphia or New York.

I do not, however, recommend that any amendments be made by the present Congress. The act will do well enough as it is for another year. When the next Congress assembles, the defects in it will be better understood, by the practical working of the system, than they can be at the present time. The act can then be taken up, and, with the light which the experience of another year has thrown upon it, judiciously amended.

In reporting the names and compensations of the clerks employed in this bureau, I should neglect a duty to them and to the system if I did not respectfully suggest that a general increase of their salaries should be made, and that the increase of the salaries of those who occupy positions of high trust and responsibility should be liberal. This bureau is already an important one, and is not unlikely to be one of the most important in the department. There is not a desk in it which should not be filled by a man of intelligence, character, and good business qualifications. Without such men the affairs of the bureau cannot be safely or properly administered, and expensive as living now is in Washington, it is questionable if the services required can be secured without an increase of salaries. If there were no doubt, however, on this point, it is not right that honorable and competent men should be faithfully serving the government for such compensations as leave them, with rigid economy, in no better circumstances at the close of a year than they were at its commencement. There are undoubtedly, in the different departments at Washington, a great many drones and incompetent clerks who do not earn the salaries that are paid them, whose "attendance" should be dispensed with; but my observation, since I have been in Washington, has satisfied me that there are in all the departments a body of clerks who, for intelligence, ability, and hearty devotion to their duties have no superiors anywhere.

To them is the country indebted for the accuracy with which an immense business—a business which has increased ten-fold since the commencement of the war—is transacted. The expenses of the departments would be largely reduced if only such were employed, and they were paid respectable salaries. Cheap clerks are a costly article to the government—it is a poor economy that drives away or starves competent ones.

The Deputy Comptroller of this bureau holds an important and responsible position. In the absence of the Comptroller he possesses the power and performs the duties attached to the office of the Comptroller. The gentleman who has charge of the vaults and the currency holds also a place of great responsibility; and two or three other clerks are performing duties requiring rare qualifications. I am under great obligations to them, and so is the country, for the prompt and able manner in which they are doing their work, and the valuable services they have rendered in the organization of the bureau and systematizing its business. Important duties are devolved upon them, while they receive but a small portion of the credit which the proper performance of their duties secures to the bureau. In my judgment, the salaries they are receiving are wholly inadequate to the services they are rendering.

I respectfully recommend, therefore, in addition to a general increase of the salaries of the clerks, that the Deputy Comptroller be paid a salary of thirty-five hundred dollars per annum, and that the comptroller be authorized, with the approval of the Secretary of the Treasury, to employ three other clerks as heads of divisions, at salaries not exceeding twenty-five hundred dollars, respectively.

All which is respectfully submitted.

HUGH McCULLOCH, *Comptroller.*

HON. W. P. FESSENDEN,

Secretary of the Treasury.

B.

TREASURY DEPARTMENT,
Office of Internal Revenue, December 1, 1864.

SIR: In obedience to the provisions of the thirty-fourth section of the act of July 1, 1862, entitled "An act to provide internal revenue to support the government and pay interest on the public debt," which have been re-enacted by an act bearing the same title approved on the 30th day of June last, accounts have been kept in this office of all moneys received from internal duties in each of the respective States, Territories, and collection districts, exhibiting the amount collected from each source of revenue, and the sums expended as compensation and for allowances to the several officers of internal revenue employed in the collection and assessment districts. Tabular abstracts of these accounts have been prepared and are herewith submitted. They are somewhat more minute and specific than seem to be required by the act of Congress, but not more so, I apprehend, than is necessary to present, in convenient form for practical use, the information desired. They show—

First. Collections from each specific source of revenue—except stamps, salaries, and passports—in each collection district, State, and Territory, for the fiscal year ending June 30, 1864.

Secondly. Statements of sales and deliveries of stamps, exhibiting the number delivered monthly of each denomination, and the number and aggregate value of each kind delivered during the fiscal year ending June 30, 1864.

Thirdly. Receipts from salary tax for the fiscal year ending June 30, 1864.

Fourthly. Recapitulation for the fiscal year ending June 30, 1864, including receipts from passports through the Department of State.

Fifthly. Comparative table, showing the territorial distribution of internal revenue, population, and wealth in the United States.

Sixthly. Expenses attending the assessment and collection of the internal revenue during the fiscal year.

It will be seen that the amount of revenue produced by the act of July 1, 1862, and its supplements, considerably exceeded the estimates. Although the act of March 7, 1864, by which the tax on spirits was increased from twenty to sixty cents per gallon, added several millions to the revenue, the law as it stood, without that amendment, would have produced at least a hundred millions—twenty-two millions beyond the estimate of the Secretary of the Treasury, and fifteen beyond the minimum stated in my report. Even that result did not fairly represent the power of the laws then existing to produce revenue. A system of national taxation, so complicated in its details, and so unwieldy in its proportions, could not be made immediately operative, in all its provisions, throughout a continent. To apply it to all the interests it was intended to affect, and to familiarize the people with their duties and responsibilities under it, and the officers of the revenue with the modes of administration, were necessarily the work of time, and of more time than had, at the date of my last report, been afforded it.

The efforts of this office, earnestly directed to these ends, produced their proper results. The officers became more expert, the taxes were more strictly assessed, and the flow of revenue steadily increased. The average monthly product for the first six months was \$4,522,332 90. Up to the 1st of May, 1863, no separate monthly account of the receipts was kept, and no accurate statement can be made of them.

In May, 1863, the receipts were	\$4,963,595 02
In June, 1863, the receipts were	4,488,411 49
In July, 1863, the receipts were	5,298,967 18
In August, 1863, the receipts were	5,604,201 35
In September, 1863, the receipts were	6,136,205 43
In October, 1863, the receipts were	9,511,768 64
In November, 1863, the receipts were	7,953,983 08
In December, 1863, the receipts were	9,034,501 01
In January, 1864, the receipts were	9,177,765 25
In February, 1864, the receipts were	9,355,094 63
In March, 1864, the receipts were	8,149,953 14
In April, 1864, the receipts were	10,945,111 95
In May, 1864, the receipts were	12,098,402 16
In June, 1864, the receipts were	14,994,366 77

This rapid increase, though in part owing to the improved acquaintance which the revenue officers acquired by experience in their duties, and to their familiarity with the routine of administration by constant exercise of their official functions, is, in part, due to other causes. The general anticipation of the imposition of additional duties induced speculation, and imparted, for a time, a strong stimulus to the manufacture of several articles, especially spirits and tobacco, and materially affected the revenue during the months of May, June and July. We may properly attribute to such causes an additional yield of three and one-half to four millions during the last of those months, but I think not more, and I am well satisfied that, without any increase of duties, the law, as it stood on the twenty-ninth day of June last, would have yielded for the current fiscal year full one hundred and twenty-five millions of dollars, if it would not, as I incline to think it might, under certain favorable conditions of trade and business, have realized the estimate of my predecessor in office. If experience has not justified his expectations, it is because the allowance which he made for losses through the inexperience of the government officers, and fraudulent evasions on the part of disloyal tax-payers, are less than the event has proved necessary, though large enough to satisfy the doubts, *à priori*, of the most cautious calculator.

The act approved on the 30th day of June last has not thus far proved more productive than the laws which it repealed and supplied. This is owing to several causes. In some kinds of production the stock accumulated was large and considerably beyond the immediate demand. In the instance of cotton goods, the price of the raw material has advanced since July, while the market value of manufactured articles for a time suffered a marked decline, from which it has not wholly recovered. The increase of taxes has also had the usual effect of such a measure, to check production, at least temporarily, and to abate the activity of inland trade till business should become accommodated to the new circumstances. It has thus happened that the revenue collected in August was but \$15,712,066 84, against \$14,994,366 77 collected in June and \$16,570,548 39 in July; that in September only \$15,819,770 72* were re-

* The sum which was covered into the treasury during the first three months of the current fiscal year was \$46,562,869 92. The amount actually received during those months into the treasury as the proper internal revenue of the quarter, beyond all payments to collectors of salaries and commissions, and to assessors and assistant assessors for salaries and expenses, was \$48,265,850 16. The difference is merely nominal, and is of account only. It arises from the fact that notice of the payments to the national depositories is not in all cases given by them promptly to the Treasurer, and his books do not show the payments till the notice is received. Our books show the payments when the certificates of deposit reach the hands of the cashier.

ceived, and in October \$13,625,350 04. These sums, however, do not represent the average receipts which may be reasonably expected for the remaining eight months of the fiscal year. For example, the excise on distilled spirits, which is reasonably expected to prove very productive, has yielded scarcely anything during these months. The number of gallons distilled in June last, according to the returns of the collectors, was 10,463,976; in July, only 697,099. But now the stock of spirits on hand in July has been largely reduced, and an additional supply will soon be needed to meet the demand. The same may be said of tobacco. The manufacture of both of these articles must soon be actively renewed. The temporary check on other productions must cease to operate, and the growing demand for consumption must be supplied by a more spirited movement on the part of the producers. The revenue will increase as business improves. What the present law will yield within the current fiscal year it is difficult to estimate. Much depends upon conditions which are subject to contingencies. Whether our cereals shall be used in large or in moderate measure for distillation will be determined by the amount of the English and other European crops, and the consequent state of the grain market abroad. The supply of cotton will affect the manufacture of cotton cloths, and that of wool the manufacture of woollen cloths, and of course, proportionably, the revenue derived from such manufactures.

The experiences of the past two years will, however, furnish us with data for an estimate which, if not to be relied upon for entire accuracy, will approximate nearly enough to actual results for all practical purposes.

Among the sources of revenue supposed to be most prolific is the five per cent. income tax levied under the provisions of the joint resolution of the 4th day July last. Of that no part has yet been paid. I consider that the income tax collected during the last fiscal year, although part of it was of the assessment of the previous year, represents pretty fairly what a levy of three per cent. under the provisions of the late law should yield. The amount of that tax collected was \$23,666,033 98. Of this there was collected as tax on incomes less than \$10,000 the sum of \$7,944,153 51. Add to this two-thirds of the same sum, and we have as a total \$13,240,255 85, which, with the addition of the amount collected of incomes exceeding \$10,000, viz: \$6,855,160 37; that of citizens resident abroad, \$58,674 51; that to be obtained from the tax on United States securities, \$9,344,668 82; from dividends and interest on bonds, \$7,244,729 37; with the tax on salaries, \$2,848,541 05, make a total of \$34,986,035 21. This estimate will not be maintained as to the items of tax on dividends and salaries, because many persons will escape assessment who could not escape payment through banks, railroad corporations, and paymasters. But the duties on incomes will, in general, be assessed more exactly and collected more closely than heretofore. The assessors are armed with powers for investigation and discovery which have not heretofore been conferred, and they have become more thoroughly acquainted with their obligations under the law than at any prior period. This view is confirmed by an examination of the assessment returns from several collection districts, showing a large advance upon the income tax of last year. I am thus led to believe that the product of the five per cent. levy under this joint resolution will not be less than thirty-five millions of dollars.

Some expectation has been entertained that Congress might during the ensuing session reduce the tax on spirits. This, together with an apprehension that the stock on hand may be subjected to duty, is now exercising an unfavorable influence on production. Consumption, however, proceeds at its accustomed rate. In the city of New York alone, according to the statements of large dealers, six hundred barrels are consumed daily, Sundays not excepted. These statements may exaggerate the truth. However that may be, it is certain that a further supply will soon be needed to meet the demand, and the irrevocable laws of trade will compel the resumption of distillation. If those engaged in the man-

ufacture and sale of spirits were satisfied of the permanency of the law imposing the taxes, and that the market would not be unsettled by the agitation of the subject in Congress, the business would soon find its proper channels and become accommodated to the burdens cast upon it. It is important alike to the interests of the government and of the people that frequent changes in legislation, affecting the prices of articles that enter largely into consumption, should, if possible, be avoided. This observation, which applies indeed with less force to dispensable luxuries than to absolute necessities, is certainly true as to a commodity, the use of which, as a beverage, in some form or another, has become well nigh universal. A large amount of capital is invested in its production and in the trade, domestic and foreign, of which it is the subject, and the regular and steady employment of that capital accrues to the benefit of the country, while an unsettled and variable excise invites to speculation and creates irregular movements in business, demoralizing to the community of traders and injurious to the general weal. It is to be regretted, indeed, that the whole increase of duty was not imposed at once, instead of being made to take effect at different periods, for the inducement to accumulate stock to await the operation of the additional tax to be collected after the first of February still continues; and if the prospect of a market shall warrant an early resumption of distillation, the business will be stimulated into activity for a short period, accompanied by a full flow of revenue, to be followed by a corresponding period of languor and depression, and a revenue proportionably diminished. This inevitable effect of irregular taxation might be avoided by imposing the two-dollar tax at once, instead of allowing it to stand postponed for sixty days longer. But on the whole I submit, it would be as well that it be understood by the country that the expression of the will of Congress on the subject in the last act be accepted as final, and that no suggestion be made inviting further legislation affecting the rate of this particular tax. How far the production of spirits may be influenced by the increase of duty cannot be positively affirmed. We have yet no experience, which enables us to form a satisfactory opinion. The annual yield of our distilleries has been about one hundred millions of gallons, of which full ninety-four millions are consumed at home. Though substitutes may be found for the commodity in some of its uses, experience in other countries has proved that the rate of duty, unless far beyond the highest prescribed by our law, does not seriously affect consumption. There is no article made that constitutes a fairer subject of excise, and there is none that will produce so much revenue with so little suffering to the tax-payer. If the law shall remain untouched as to the rate of tax, we may reasonably expect to realize, within the remaining seven months of the current fiscal year, not less than forty millions of dollars from spirits, and in the course of the next year that sum will probably be doubled. However extravagant this estimate may now appear, I have no doubt that it will be sustained by the result. All that appears to be needed to render it almost certain is a few additional means for securing the collection of the tax on the whole product of the distilleries, and thus protecting the revenue against illicit distillation to which high duties afford so strong a temptation. I am happy in being able to say that I believe such means may now, with the consent of Congress, be placed within reach of the government by the adoption of a newly invented meter, so ingeniously contrived as to indicate to a revenue officer the quantity and proof of the liquid that passes over the still, beyond the power of the distiller to control or vary the certain result.

The amount of tax collected during the month of October was, as I have already stated, only \$13,625,350 04. The falling off of the revenue in that month is to be attributed to a previous depression of several important branches of business, and to the almost total suspension of the distillation of spirits since July. The receipts are below the monthly average, independently of the tax on spirits. Under usual conditions, that average ought to be not less than \$15,000,000.

The sum realized during the past four months of the current fiscal year,

without the tax on circulation and deposits paid by the national banks, is \$61,727,738 99, and from all sources \$61,892,200 20. Our receipts in November, influenced by the same causes as those in October, are, like them, still below the average. They amount to \$13,146,688 97. The sum of \$75,038,889 17 may be considered as the product of the new law operating under the disadvantage of greatly diminished production, arising from a large accumulation of commodities manufactured in advance of the increased duties. The next seven months cannot well fail to yield in the aggregate, exclusive of the tax on spirits and the five per cent. assessed on the incomes of 1863, \$115,000,000. The income tax, as already shown, will yield \$35,000,000, and spirits \$40,000,000. According to this estimate, our revenue from excise will be about \$265,000,000 for the year ending on the 30th day of June next, without a change in the rate of duties prescribed by the existing law. This result may be somewhat improved by judicious alterations in some of the administrative provisions of the late act, by which the modes of proceeding may be made more simple, uniform and consistent, unnecessary hindrances to trade removed, annoyances to honest tax-payers obviated, and the loop holes by which subjects of tax escape the grasp of the revenue officers effectually closed. By the aid of such alterations, without any material increase of duties, the capacity of the present system to produce revenue, under a firm, vigilant, and vigorous administration of it, will, I am satisfied, unless untoward events shall intervene, be equal to all that its framers expected of it. For the year ending on the 30th of June, 1866, it will yield full \$300,000,000. The product for the present year, as I have already shown, will fall \$35,000,000 short of that sum. For the balance of the \$300,000,000 demanded by your arrangements, resort must be had to additional taxes by way of excise, or to other expedients. The deficiency, whatever it be, may as a temporary expedient be supplied by a tax on sales. This tax, indeed, could not be properly added as a permanent supplement to our present scheme of taxation. If adopted as a fixed policy, justice would seem to require some changes in the present excise to harmonize it with this addition and equalize the burdens. Yet, for supplying immediate and pressing wants, it has advantages over any other plan hitherto proposed. I can find none which promises such a large yield of revenue, with so little disturbance to trade, and so slight a pressure upon the tax-payer. "Every tax," says Adam Smith, "ought to be levied at the time and in the manner in which it is most likely to be convenient for the contributor to pay it." When it is made payable out of money received and at the time of receiving it, the burden is most easily and most willingly borne. The seller adds the tax to the price, and thus anticipates the claim of the government; and the purchaser, when he buys to sell, is reimbursed by the consumer, who assumes the burden as a voluntary act, and proportions the weight to his ability to support it. It is also recommended by the facility with which its basis may be ascertained, and its freedom from the perplexing and complicated inquiries to which income and profits are necessarily subjected. If it was conveniently practicable that the whole burden of the duty should be placed on the last sales, it would be more consistent with policy and principle; as by such means the consumer, who is the final paymaster, would be brought into near connexion with the receiver, and the commodity taxed would be relieved from the weight of the taxes increased by interest for the delay of reimbursement. But such a plan, however desirable theoretically, is not practically possible. There is no means of determining in all cases when the final sale to the consumer takes place.

By an estimate based on the consumption of the country, and made a year ago, it appeared to me that the annual sales of articles in the States and Territories subject to the internal revenue laws might be fairly set down as somewhat exceeding in value ten thousand millions of dollars. The New York Chamber of Commerce, in a memorial to Congress, dated April 24, 1862, esti-

mated the amount of annual sales of goods and merchandise of all kinds in the United States at eleven thousand five hundred millions. I am informed by Dr. William Elder, of the Treasury Department, whom I esteem good authority for any statement relating to national statistics, that the production for the year 1860 amounted to three thousand eight hundred millions of dollars. This was for the whole Union, the calculations being based upon the census returns of that year. The National Almanac for 1864 states that the production of the loyal States in taxable articles in 1863 was three thousand seven hundred millions in the prices of 1860. The transit of agricultural productions from the producer to the consumer is usually much more direct than that of manufactured articles. Large quantities of grain, hay, pork, and beef are consumed without sale, and the surplus may be sold once, twice, or thrice, while textile fabrics are sold five, six, or seven times before being consumed. It has been assumed by competent calculators, that, on a general average, productions of the country are sold four times, and that three-fourths may be supposed to enter the market. By proceeding in this way our result will be that the amount of sales of merchandise and product in a year will be about eleven thousand millions, on which a tax of one-half of one per cent. will produce fifty-five millions of dollars. No addition has been made in consequence of the progressive increase in production, which has been steady and constant notwithstanding the war, and which, there is every reason to believe, will continue in an accelerating ratio, unless checked by financial difficulties. The tendency of the tax will be to diminish the number of sales, and this may be set off against the opposite tendency, arising from increasing production.

A tax on sales made by wholesale and retail dealers, by wholesale dealers in liquor, and by commercial brokers, is already levied by the present excise law. If all sales of merchandise shall be made taxable, the sums being paid by those classes of traders in the shape of license fees should be credited to them, that a double tax may not be imposed. A tax of one-half of one per cent. on the sales of merchandise, produce, and other articles of traffic, except real estate, stocks, securities for money, coin, and bullion, already provided for, to go into operation in time to embrace the transactions of January next, and to continue for one year, will supply, within the current fiscal year, the greater part of what will be needed to make up the total yield of excise to the three hundred millions required, and within the calendar year will, under conditions of trade and business ordinarily favorable, produce the whole balance and a surplus sufficient to secure the treasury against the recurrence, at the end of the fiscal year of 1865-'66, of a deficit similar to that for which it is necessary now to provide. Within the next six months the disturbing influences of the recent sudden and violent changes of rates in the excise will cease to be felt, and, if further changes be avoided, the current of revenue will have risen to its proper volume. No further need of expedients to bring up the total of the excise duties to three hundred millions of dollars is apprehended. I am clearly of the opinion that the tax on sales here suggested is greatly preferable to a supplementary duty on incomes. It is also preferable to a direct tax, which, being payable out of capital and not out of profits, is justly regarded as objectionable, and to be avoided if consistent with the stability of the public credit.

It is evidently advisable that whatever changes may be made in the present excise laws, they shall leave the frame-work of the system untouched, and shall be restricted to the object mainly of simplifying the mode of administration. Yet there are some provisions relating to the rates of taxation that require change. This is especially true of the rule prescribed for assessing the duty on cigars. By the late act of Congress the valuation of cigars, as subjects of tax, shall in all cases be the value of the cigars, exclusive of the tax. The tax on cigars valued over \$5 per thousand, and not over \$15 per thousand, is \$8 per thousand; on cigars valued over \$15 per thousand, and not over \$30 per thou-

sand, \$15 per thousand; on cigars valued over \$30 per thousand, and not over \$45 per thousand, \$25 per thousand; on cigars over \$45 per thousand, \$40 per thousand. It requires but little consideration to understand that, under those provisions, no schedule of values derived from actual sales can be devised which, in a majority of cases, will satisfy the requirements of the law. This must necessarily be so, since determinate values cannot be found for two unknown quantities in a single equation.

Take the case, for illustration, of a thousand cigars selling for twelve dollars. The sale ascertains the value, and the question is, What is the tax? It must be either three dollars or eight. If it is three dollars, then the cigars, exclusive of the tax, are worth nine dollars. But cigars valued over five dollars per thousand, exclusive of the tax, must pay eight dollars. Then put on the tax of eight dollars, and the value of the cigars we find to be four dollars, and it will not, therefore, bear the eight dollars tax. Neither tax is appropriate to the value—one is too little and the other is too great. The same difficulty obtains in relation to cigars selling at any price between eight and thirteen dollars, between twenty-two and thirty dollars, and between seventy and eighty-five dollars. The law furnishes no rule by which they shall be assessed, yet the assistant assessor must assess them. In doubtful cases, officers of the revenue must adopt that interpretation which imposes the lowest duty. A schedule of rates was therefore prepared, which, if it did not exact of the tax-payer all that the framers of the act contemplated, reconciled contradictions, furnished a safe, practical rule, and as nearly as possible carried out the purposes of the act. All other taxes than those on cigars being levied by the express provisions of the act on the value, as indicated by the sales, no reason is conceived why a rule so convenient, and of such easy application, should be abandoned in relation to this commodity.

Another result of this mode of taxation is, that it is more profitable for a manufacturer to sell his cigars at eleven dollars per thousand than at fifteen, at twenty-five dollars than at thirty-one, at sixty-nine than at eighty-five, and at eighty-four than at ninety-eight dollars. The sale's value is the basis of the specific tax, and the return of the maker is practically the assessor's evidence of value. The temptation to understate returns is evidently great; much greater than it would be if the amount of the tax followed all the gradations of value. A change in this part of the law seems to be imperatively demanded, and I suggest that if the tax on tobacco is to be laid, as heretofore, on the manufactured article, and not upon the leaf, it will be eligible to adopt an ad valorem scale. But it appears to me a question well worthy consideration, whether it be not advisable to tax the whole tobacco product in the leaf. By the adoption of such a measure, frauds can be more readily guarded against than now, and the annoyances to which the manufacturer is necessarily subjected, by any efficient scheme of assessment and collection, will be obviated.

Apprehensions of difficulty in assessing tax on the leaf have been entertained, but I think, without cause. Tobacco fields, even if the growers were disposed to concealment, could not readily escape the vigilance of assistant assessors, and assessments could be made of the product as it passed from their hands with much more facility and thoroughness than at any time afterwards. In England, according to the report of the commissioners of inland revenue, the duty on hops, which was made payable by the hop-grower, was, of all others, "the most easily collected, and in which frauds and evasions were the most rare." Our experience here as to tobacco would, I am persuaded, be similar to that of England in the article of hops, if the tax was laid on the grower; and much of the demoralization created by fraudulent contrivances to escape the tax, and of the expenditure necessarily incurred in efforts to detect and punish the perpetrators, would be avoided. A light duty on the leaf, accompanied by an ad valorem duty reduced below the present rates, would answer a good pur-

pose, and by lessening the temptation to evasion would facilitate collections. Either measure would be an improvement upon the present law. I may add that there is a general concurrence of opinion among collectors and assessors in these views. In country districts, where tobacco is grown and manufactured into cigars by men of small capital, and the manufactured article sold in parcels of a few hundred, or less, the provision for stamping cigars is not productive of sufficient advantage to compensate for the trouble it gives to assistant assessors, and the additional expense it occasions to the government. A retail dealer must, of course, destroy the stamp when he breaks the packages, and, in his hands, the want of a stamp is no evidence of fraudulent acquisition.

By the excise act of 1862 a duty of three cents and one-half per ton was laid on mineral coals. This was not a large tax, and, of itself, could produce but little effect on the course of trade, but, added to the expense of transportation, and the high price of the commodity in the market, it appears to have encouraged the importation of coal from Nova Scotia, whence, under the provision of the reciprocity treaty, it comes free of duty. In 1860-'61 the amount of coal imported from that province was but 204,420 tons, valued at \$702,165, while in 1862-'63 it has risen to 282,767 tons, valued at \$757,048, and in 1863-'64 to about 500,000 tons, worth more than \$2,500,000. The present tax of five cents will operate somewhat more decidedly in the same direction. If the impost laid on coal by the late act to increase duty on imports was made to apply to coal imported from the British Provinces, as it would on a rescission of the treaty, it would secure the market to our own producers, and add to the revenue of the government.

The export of Indian corn to Canada during the last three years, according to the tables of exports of foreign and domestic commerce, communicated by the Secretary of the Treasury to Congress, under the act of March 12, 1864, appears to have been as follows:

In 1860-'61.....	1, 891, 740 bushels, valued at	\$810, 346 00
In 1861-'62.....	3, 218, 438 bushels, valued at	1, 010, 243 00
In 1862-'63.....	4, 211, 897 bushels, valued at	1, 622, 825 00

This large amount, it is certain, was not needed for consumption in Canada, but for manufacture; for that country produces grain abundantly, and during the last year, while we exported the great quantity of corn already stated, we imported thence 806,153 barrels of flour. The corn was, it is presumed, for the most part, converted into spirits. It is difficult to conjecture what else became of it, and the business of distilling is known to be prosecuted there with much activity. The provincial excise duty being lower than ours, and the opportunities for illicit traffic being great, it can hardly be doubted that no inconsiderable portion of the product of Canadian distillation, the material for which was the growth of our own soil, crossed the line without paying duty, and was sold in our markets. Now that the excise on spirits in the United States is ten times greater than that imposed in the adjoining provinces, the stimulus to this manufacture, beyond the border, and to contraband importation, will operate with increased power. The information we receive from private sources gives point to this suggestion.

Under the reciprocity treaty the export of leaf tobacco to Canada has largely increased, while that of manufactured tobacco has proportionately declined.

In 1855 we exported thither leaf worth.....	\$69, 779 00
In 1860 we exported thither leaf worth.....	124, 115 00
In 1863 we exported thither leaf worth.....	1, 237, 840 00
Of manufactured tobacco we exported to Canada in 1859-'60, in value.....	1, 205, 684 00
In 1860-'61, in value.....	683, 875 00
In 1862-'63, in value.....	76, 026 00

It is apparent that, although before the treaty we manufactured largely of this staple for the people of Canada, they now manufacture it for themselves. It is scarcely doubtful that considerable quantities of manufactured tobacco, as of distilled spirits, find their way across the border. The facilities for transportation across a long and imperfectly guarded frontier are so great, and the temptation afforded by our high excise is so strong, that we may reasonably suspect a profitable trade to be driven, in fraud of the revenue. Sir Martin Peto, writing on the tobacco tax, says: "The smuggling of tobacco not only appears, in fact, to form a distinct kind of trade, but to be an occasional occupation of the great bulk of the sea-faring population of our seaports." This evidence of British experience is admonitory, and suggests precautionary means. Were the excise on distilled spirits, manufactured tobacco, and cigars as severe beyond as on this side of the Canadian line, there would be no temptation to smuggle these articles. The rescision of the reciprocity treaty would probably be quickly followed by an import duty on the tobacco that now enters Canada free. The effect would be to check the illicit border traffic, by which some hundreds of thousands of dollars are, doubtless, now lost to the revenue, and this government would be at liberty to place a proper impost duty on the coal from Nova Scotia, which, at present, pays us no duty, and competes to advantage with the productions of our mines which do.

By the late act, assayers of gold and silver are obliged to pay a license fee, varying from one hundred to five hundred dollars, according to the value of metals assayed; and a duty of one-half of one per centum ad valorem is laid on the product of the assay. It is worthy of consideration whether some change may not be made in the law relating to this subject, to the advantage equally of the producers of gold and silver, and of the government. Among the several suggestions that have been presented, none occur to me as more eligible than those which propose that the business of assaying shall be done at offices established by the government, wherever needed, and by officers appointed for the purpose. To this end the license fee may be raised to such a sum as to be virtually prohibitory to all assaying on private account. The offices ought to be sufficiently numerous, and so located as to accommodate conveniently the mining population. Perhaps the government might purchase the bullion at a discount only sufficient to constitute a reasonable tax. On receiving it the assay officer might be authorized to issue certificates representing its value, less the cost of assay, the expense of the transportation, and the tax, and payable in coin at the mint in San Francisco or Philadelphia. The owner of the metal would be furnished with a representative, at once, of the value of his deposit, capable of being converted into coin at the option of the holder, and the convenience of having its value in a form in which it would be capable of transportation with little risk or cost, and of being easily negotiated, would be an inducement to him to make the government his depository. Miners, who now frequently dispose of their crude gains at a large discount, might thus be afforded an opportunity of converting their unassayed product into negotiable securities, and the government would also profit by the arrangement. Perhaps, too, such an arrangement might exert a wholesome influence in tending to check the exportation of unassayed gold bullion, of which some \$40,000,000 in value have gone to England within a year.

I had the honor, last year, to suggest a duty on petroleum. A duty of twenty cents per gallon is now imposed on the refined product. Representations have been made, which I deem worthy of consideration, that it would be eligible to tax the oil in its crude state as well as when refined; and I have no doubt the revenue would be benefited by the measure, even if attended with a reduction of the present duty. I am persuaded that petroleum will bear a tax of two, or even three cents per gallon, without benefit of drawback, and no sensible injury accrue to our export trade, and that the tax on the refined being

reduced to fourteen or fifteen cents, the yield of the crude and refined together would considerably exceed the sum now realized from the refined alone. The revenue would gain by the increased home consumption of the refined article, as well as by the duty on the crude, and the tendency of the present tax to destroy small distilleries, and to throw the business into the hands of large operators, would be modified.

Among the provisions of the late excise act that seem to require some modification, are those which relate to the tax on printed books, magazines, reviews, and similar publications, on which a tax of five per cent. ad valorem is imposed. The tax, according to the 94th section, is "to be paid by the manufacturer or producer," but no rule is given by which the manufacturer or producer is to be determined; and it is often a point of no small difficulty to decide who, of the several persons engaged in the book-making process, is to be held responsible for the product. The variety of contracts and arrangements among the persons engaged in this very important branch of production is so great, and their relations so diversified, that they are themselves not agreed who should make the required returns, and assessors do not decide similar cases alike. Sometimes the printing is done by one party and the binding by another, under a contract with the publisher, who furnishes paper to the printer, and pays the binder for the binding. Sometimes one firm finds the materials and prints the book on contract with the publisher. Again, the publisher furnishes materials to the binder and receives the completed work from his hands for sale. Sometimes a publishing house, having its only place of business in one city, procures its printing and binding to be done in other cities, under various arrangements with the owners of plates and copyrights, and with printers and binders, having different kinds of contracts for every book they publish.

Amidst the perplexities which are occasioned by complications of this kind, and through which assistant assessors are not always able to see their way, it is not a subject of surprise that assessable duties sometimes escape assessment. The law would be simplified by laying the tax on the press-work and binding, with a provision that the printer and binder, when manufacturing on contract for an author or publisher, should take license and make returns as manufacturers, and pay the tax on the amount of their charges for printing and binding, and that they might collect and receive the amount of tax from the author, publisher, proprietor, or other person contracting for the work. Or if the publisher or person for whom the book is produced should be made liable to assessment, the same purpose would be answered, especially if it should be made the province of the assessor or the commissioner on appeal to determine finally the fact of liability.

In order to maintain the revenue derived from manufactures it is necessary that their permanence should be secured, and, wherever endangered, protected. The present tax on iron produced in the United States, in the complete forms of railroad and bar iron, will amount, when the coal consumed is taken into the account, to about seven dollars per ton; while other taxes which indirectly fall upon this production, as on the products of labor, on supplies, and on capital employed, will raise the actual tax to one or two dollars per ton more. During the two fiscal years preceding the last, little railroad iron was imported; but in the year ending in June, 1864, a rapid increase in such importation began, and nearly one hundred and twenty thousand tons, valued at four million eight hundred thousand dollars, were imported. This is equal to about half the entire quantity made in the United States, which is approximately stated at two hundred and eighty thousand tons.

It has now become certain that the whole demand for railroad iron can be supplied by American mills. The amount required for the repairs of existing railroads is about one hundred and fifteen thousand tons, and that for extensions does not usually exceed a hundred and sixty thousand tons more. The

aggregate is far within the limit of the productive capacity of our mills. Such being the case, it is a grave question whether the conditions which invite heavy importations for an article which gives employment so largely to our own skill and capital, do not demand legislative action in support of the interests of the internal revenue system, especially in view of the diminution of the home production which they indicate.

Many collateral sources of revenue are created or augmented by this domestic manufacture, and must rise or decline with it. Altogether, the direct and indirect receipts of the government are not materially less, per ton, from iron made in the United States than those derived from the tariff on iron imported, while there are other and urgent considerations which now induce the government to cherish every branch of domestic industry, and sustain it against foreign competition. In 1861 the duty on imported rails was twelve dollars per gross ton. In 1863 it was increased to thirteen dollars and fifty cents per ton, coincident with an imposition of an excise duty of one dollar and fifty cents per ton on domestic rails. In 1864 the customs duty was reduced to thirteen dollars and forty-four cents per gross ton, while the excise duty was increased, as already stated. The American manufacturer is now suffering from the reduction of the customs duty, and although he is not yet vitally injured, he owes his protection less to the sufficiency of that duty than to the differences between currency and gold and the high rate of exchange.

The best test of the yearly income derived from real estate is its rental value. A rule requiring such income to be assessed on that value would be conveniently practicable, and would obviate the necessity of the vexatious inquisition now required in ascertaining the comparative value of live stock at different periods of the year, the amount of butter, beef, mutton, pork, cheese, wool, hay, grain, and other products sold, or on hand. Estimates of these must needs be very unequal, and returns incomplete, so that the burden of the tax is unequally distributed. I am unable to see why a man who consumes his income should not be taxed for it as well as one who saves it, nor why one who lives in his own house should not be taxed on its rental value, as much as if he let it to another and put the rent in his purse. If it be deemed right to allow an occupant of his own homestead such a portion of its rental value unassessed as would suffice to pay the rent of a moderate dwelling, the excess of the annual value of such homestead above that sum might, with justice, be taxed. An allowance of three hundred, or, perhaps, of four hundred dollars, might not be unreasonable; and, to the same amount, the deduction to be allowed to a lesser or real estate for rent actually paid ought to be fixed, so that owners and renters should enjoy equal privileges under the law.

Efforts have been made to procure such a distribution of stamps as will bring them within the reach of all that may need to use them; and I think that the experience of the office fully warrants the statement, that a judicious enlargement of Schedule B, to embrace instruments of evidence not described in it, would be preferable to any other mode of taxation equally fruitful of revenue. The harmony of the system seems, indeed, to require a readjustment of this schedule by some slight alterations in its requirements as well as in its extension to new objects. A slight inspection discloses the fact that some instruments are made to demand stamps of considerable value, while others of an analogous character are not required to be stamped at all.

The want of a summary and inexpensive process for the recovery of small penalties, and for procuring judgment of forfeiture of small lots of contraband goods seized by collectors, is much complained of. Provisions for such cases can be made by enlarging the powers of the United States commissioners appointed by the circuit courts, so as to confer upon them jurisdiction in all cases relating to the revenue, when the sum in controversy does not exceed three hundred dollars. In contested cases, right of trial by jury may be secured by

providing for an appeal to the United States district court of the district. It is not the policy of the government to multiply suits, but it often happens that offenders deserving punishment escape the visitation of penalties prescribed by the statute, because the course of proceedings is too dilatory to be exemplary, and too expensive to be profitable to the government.

In order to relieve importers of the articles described in Schedule C from the necessity of affixing stamps to the bottles, boxes, or parcels contained in each package in which they were exported before disposing of them by wholesale, it was provided in the 169th section that when any such imported articles shall be sold in the original or unbroken packages in which the bottles or other enclosures were packed by the manufacturer, the person so selling said articles shall not be subject to any penalty for want of the proper stamps. But for this provision every importer would have been obliged to break each original package, and stamp every particular parcel contained in it, before he could have legally sold it, even to a wholesale dealer. Manufacturers of friction matches, in Canada and New Brunswick, have abused the privilege thus allowed them, and have made up packages of their wares, in convenient sizes, for sale by retail, and they are sold, unbroken, to the consumer. The impost duty on friction matches is too inconsiderable to protect the domestic manufacture, which is thus threatened with destruction by this sharp device. An increase of the import duty, so as to make it superior to the excise, accompanied by a provision aimed at this particular abuse, making it severely penal to sell the imported article in unbroken packages, without stamps, will afford a remedy. Lest, however, the manufacturers of other articles named in the schedule may follow the example of the foreign friction-match makers, and thus pervert the liberality of the law to fraudulent purposes, the repeal of the proviso is recommended.

The provisions for the removal of goods under transportation bonds and for warehousing for exportation operate advantageously, and seem to afford general satisfaction. It appears to me that those provisions may be eligibly extended to other products than spirits, oil, and tobacco. There is little risk of fraud in the exportation of dutiable merchandise from bonded warehouses under existing regulations, while, in the matter of drawbacks, it is very difficult, with the utmost exertion of vigilance, to guard the treasury against dishonest claims; and I am of the opinion that the government is often defrauded into repayment of duties alleged to have been paid on goods exported, on evidence so skilfully manufactured as to be difficult of detection.

Suits are sometimes instituted to recover money paid under protest to collectors on assessments, and payments are frequently made under protest to collectors without being followed by suits. It is recommended as expedient that a period of limitation be assigned by statute within which the right of action shall be asserted. There seems to be no good reason why a party having a claim against the government should not pursue it within a reasonable time, and it is certainly important to collectors who have relinquished office that their responsibilities should be determined, and their accounts with the government closed without unnecessary delay. I suggest that the period of limitation ought not to be longer than one year from the day of payment of the duty to the collector.

The provisions of the existing law, with regard to the time and manner of making returns by tax-payers, are such as seriously to complicate the accounts in the offices of assessors and collectors, and, in many cases, to put the tax-payers to much inconvenience. It is important that the merely formal portions of the internal revenue system shall be simple and uniform, so that the tax-payer may understand his duty, and that the least possible time of the assessor and collector may be absorbed in attention to the forms or modes of procedure.

A reference to the time for making returns and the subsequent proceedings now required in assessments and collections will enable us to perceive the inconvenience and uselessness of much that is now contained in the statute.

And, first, with regard to the annual list. The 11th section of the act passed at the last session makes it the duty of any person liable to an annual tax to make return to the assistant assessor on or before the first Monday of May in each year. The following sections provide for a canvass of the district by the assistant assessor, and the completion of his list within thirty days. As the assistant assessor is not authorized to call upon any person to make returns before the first Monday in May, and as no penalty attaches except upon failure to make return within ten days after being notified, it follows that but few returns will be received by the assistant assessor before the tenth day of the month. The twenty days remaining are entirely insufficient for the careful examination of the returns and the preparation of the list, and I am not aware of a single instance where the list has been returned to the assessor within the thirty days prescribed by law. After the assessor receives his lists from the several assistants, he is required to advertise and hold appeals in each county in his district, and for this, and the necessary revision of the assessments which must be made by him, thirty days is generally found to be an insufficient time. The result is that the list can hardly be completed and delivered to the collector before the first of August. As the annual licenses are assessed upon this list, the effect is, that every business man in the country is forced to violate the law, and to incur the penalty of imprisonment imposed on all who fail to take a license, which is rendered impossible to procure for three months after their liability has commenced. This delay, which is necessarily incident to the proceedings prescribed by the statute, has been productive of much dissatisfaction, especially in the large cities, and it delays the payment to the government of large sums of money. I would recommend such a change in the law as shall obviate this objection. I also suggest that the formal holding of appeals, as required by the 19th section, be abolished, as experienced as shown, in the completion of three annual assessments, that tax-payers scarcely ever avail themselves of the privilege. As a part of the direct tax law of 1861, from which it was transferred to the internal revenue law, the provision was doubtless important, as the assessor was engaged but a small portion of the year in the discharge of his duties, and it was fitting that a time should be publicly designated when he would receive appeals from the action of his subordinates. But as a part of the present system under which the assessor is constantly employed, and may at any time be found by a tax-payer, it has proved entirely useless, while it is the occasion of considerable expense and delay. But the provisions for the return of taxes not in the annual list are still more confused. As a general rule, those who are subject to an excise tax upon manufactures and productions must make return on or before the tenth day of the month, and all such taxes are returned to the collector, on a monthly list, by the twentieth of the month. The manufacturer of tobacco, snuff and cigars is required to make a weekly return every Wednesday. The distiller of spirits and coal-oil is required to make his return on the first, eleventh, and twenty-first of each month. The brewer is required to make return and to pay the tax within the first ten days of every month. For the duties on cotton and spirits of turpentine, immediate assessments are to be made whenever either article is brought from any insurrectionary district. The auctioneer makes his return and pays the tax upon his sales within the first ten days of the month, in the same manner as the brewer; while the broker may delay his returns of sales until the thirtieth, and his payment until the tenth of the succeeding month. The tax upon the gross receipts of railroads, steamboats, &c., is returned and paid at the same times as the tax upon brokers' sales. The lottery manager must make his return by the tenth and pay the tax by the twentieth of the month. The newspaper publisher must make return of his receipts from advertising on the first of the month, and pay the tax by the tenth, and this must be done quarterly.

To the confusion thus arising is added still further complexity from the dif-

ferent penalties attendant upon a non-compliance with the law. In some instances a failure to make return at the time specified in the statute renders a party liable to a penalty of fifty per centum, and in others to a penalty of two per centum, while in other instances a penalty attaches only upon failure to make return within ten days after the service of a notice to that effect. There is a similar variety in the conditions under which penalties attach upon failure to pay the duties at the proper time; in one case the liability accruing upon failure to pay on a day specified; at another only upon failure to pay for a certain time after demand, and in others the imposition of a penalty depending upon either or both delinquencies.

It is not to be expected that a system embracing so varied subjects of taxation, and extending over so wide and so diversified a country, should be perfect in its details, after having been in operation for so short a period. Its simplification and harmony must be the result of time and the persistent efforts of the officers charged with its administration in adapting it to the wants of the several classes of the community. The experience of this office, and the almost universal testimony of assessors and collectors, show that many of the provisions of the existing law are annoying to the tax-payers, while they do little or nothing for the protection of the government. From the inauguration of the internal revenue system until the month of July last, manufacturers of tobacco, snuff and cigars made their returns and paid their taxes monthly; and five months' trial of the present practice fails to show any benefit from the change. On the other hand, as it costs the small manufacturer the loss of nearly a whole day in each week, it adds an inducement to fraud, while it materially increases the labor of the officers of the government. In the large and sparsely settled country districts the collector cannot be expected to make the tour of his district more than once in each month, and in the city districts the assessor and collector must each employ a larger clerical force. The loss of revenue or the failure to collect the taxes upon these articles when such failure occurs is, in nearly every case, due to the fact that the liability is not detected by the assessor, or is placed at too low a rate.

The failure to collect the amount assessed is very rare. It has been the practice since the first passage of the law, indeed, to require tri-monthly returns from distillers of spirits and coal-oil, so that both officers and manufacturers have become familiar with the routine, and are therefore less annoyed than is the case with regard to tobacco. I do not hesitate to say, however, that the *monthly* collection of these duties would be much less expensive, and sufficiently secure for the government. In a large majority of instances distillers are possessed of abundant means, and, in all cases, they are under heavy bonds to secure their compliance with the law. Very little revenue has been lost to the government through the inability of the distiller to pay the duties, but much from false and fraudulent returns. The multiplication of returns in no way facilitates the detection of error, but makes it the more difficult, from the greater intricacy of the calculations.

I recommend such an amendment of the law as will require no tax-payer to make return oftener than once in each month.

In addition to what has been said above of the system of appeals in the preparation of the annual list, which has been adopted from the direct tax law of 1861, I would call attention to the radically different functions of the list under that law and under the present. By the act of 1861 a gross sum was imposed upon each State, and by means of the list the amount was apportioned among the several tax-payers. If any man was assessed for too heavy a tax, all others were released from their just share of the national burden; while, if any man's property was undervalued, an additional tax was imposed upon all other citizens of the same State; and if these irregularities were allowed to creep into the list, their subsequent correction was impracticable. It was, therefore, requisite

that the fullest means should be provided for insuring the entire accuracy of the list before it was returned to the collector. Had the machinery of that law ever been called into operation, the holding of appeals would undoubtedly have proved useful. But, under the present internal revenue system, the annual list contains the taxes upon incomes, licenses, and articles enumerated in Schedule A—*i. e.*, plate, carriages, &c. Here each assessment is independent of all others, and in no degree affected by the total of the list. If any error is discovered after the completion of the list, it can be readily corrected, as the tax to be paid by each is determined upon grounds relating to the particular case alone. I would therefore earnestly urge the repeal of so much of the law as requires the holding of formal appeals by the assessor; and if this is done, there will be no sufficient reason for continuing to require a separate list for the annual taxes.

The income tax and the tax upon enumerated articles are conveniently and appropriately assessed and collected at the same time; but the license tax is of an entirely different character, and is scarcely ever paid by the same person, at the same time with either of the others. As the law now requires these several taxes to be assessed simultaneously, it is generally necessary to appoint an additional number of assistant assessors for the months of May and June, and thus much of the work is done by officers of less experience than the regular corps of assistants, while the expense of assessment is increased. If the annual list is dispensed with, I would therefore suggest the propriety of making the taxes upon income and upon enumerated articles payable at a time different from that fixed for the tax upon licenses. The license tax falls principally upon the business carried on in the large cities, and in the most populous of these the yearly leases mostly terminate on the first of May. That date, therefore, which is the one now fixed by the statute, is especially appropriate for the assessment of the license tax. On the other hand, it is so customary for our wealthy citizens to spend the summer elsewhere than in their legal residences, that the collection of the taxes upon income and upon enumerated articles would be much facilitated by an earlier assessment.

A careful study of the whole subject, aided by the suggestions of revenue officers in all parts of the country, has led me to the conclusion that the return of income and of articles in Schedule A should be made on or before the tenth day of March; the application for license, on or before the tenth day of May; and that all other taxes, except those which are paid directly to this office, should be returned monthly, and on or before the tenth day of each month. If this is done, and if all taxes are made payable on or before the last day of the month in which the return is required, the result will be a great simplification of accounts, and a considerable reduction in the expense of assessment and collection.

The rights of the tax-payer being secured by a statute designation of the time for the return and the payment of the tax, the mode and time for the completion of the list being a mere matter of account between the assessor and the collector, may be left to be determined by regulation of this office.

As the law now stands, any person who neglects to make return for ten days after being notified so to do is liable to be assessed with a penalty of fifty per centum of the amount of the tax. This is a salutary provision, and I would by no means advise its repeal; but I would call especial attention to its insufficiency, as a remedy, and the consequent unfairness in its practical application. He who manages to escape the eyes of the assessor at the proper time may avoid the payment of the tax perhaps for months, and when his delinquency is discovered, if he responds promptly to the call of the assessor, no penalty can be inflicted. I would therefore retain the penalty of fifty per centum in the case of refusal or neglect to make return, after being duly notified so to do;

and I would recommend a further penalty, not exceeding four per centum of the amount of the tax, for each month for which a return shall be delayed beyond the time prescribed by law.

In considering what modifications of existing provisions it is proper to suggest, I have studiously abstained from venturing upon any subject which would affect the integrity of the system of taxation as prescribed by the late act of Congress. I have regarded that system as permanently established, and assume that no changes in its principles or its general arrangement would be desirable. The suggestions which I have ventured to make are such as I deemed proper, to give effect to the general purposes of the act, and to render more perfect and complete, in the combination of the parts, what has been so wisely designed as a whole. As has already been experienced, no radical changes can be made without prejudice to the revenue, dislocation of present arrangements, inconvenience to the assessing and collecting officers, and irritating and vexatious annoyance to tax-payers. Particular provisions, however, may be modified without serious detriment to any interest, and propositions for such modifications are entitled to favor where directed to the end of producing harmony in the operations of the machinery of the law, and simplifying the modes of proceeding, so as to be easily comprehended by their subjects as well as their administrators.

In reviewing the late act, some inconsistencies are discovered which it will be advisable to remove, and some omissions appear which it will be well to supply. I will notice a few of these, to which I invite particular attention.

By section 94, it is enacted that "there shall be levied, collected, and paid on all *uncompounded chemical productions*, not otherwise provided for, a duty of five per centum ad valorem."

By section 165, after imposing certain penalties, it is provided "that nothing in this act contained shall apply to *any uncompounded medical drug or chemical*," &c. The contradiction would be removed by substituting "*section*" for "*act*," in the proviso to the last mentioned section, and a consistency of intention preserved.

The 160th section directs that no stamp duty shall be required on certificates of the measurement or weight of wood, coal, or other articles.

In schedule B, stamp duties are laid "on measurers' returns, if for a quantity not exceeding one thousand bushels, twenty-five cents."

The 105th section imposes a duty upon the gross receipts of premiums by insurance companies, and directs that, in the account or return to be rendered, they shall state the amount insured, renewed, or continued, the *gross amount of premiums received* and assessments collected, and the duties by law accruing thereon, *for the quarter then next preceding*, while, in section 109, the gross amount of the receipts of insurance companies is required to be rendered within twenty days of the end of each and every month, "*for the month next preceding*." The proper correction will be made by striking from the 105th section the words "*for the quarter then next preceding*."

Sections 41 and 179 are not consistent as to the disposition to be made of penalties. If the words "*who, if a collector or deputy collector*," were stricken from the last section, the inconsistency would be removed. In cases in which the cause of action is confessed by the delinquent party, and the penalty paid without suit, it is recommended that where more than one person claims a moiety as informer the right may be determined by the commissioner.

Section 74 provides for the seizure of the horse and wagon or pack of a peddler omitting or refusing to exhibit his license on demand, but confers no authority to dispose of the property seized.

In section 79, in the first paragraph, the obvious meaning would be expressed by striking out the clause "*carrying on such business in copartnership*," and inserting in its place "*may carry on business in copartnership and*."

In section 38, reference to section 35 should be section 36.

In section 81, the reference to section 73 should be to section 74.

In section 84, the reference to section 84 should be to section 85.

In section 109, the reference to section 102 should be to section 103.

In section 125, near the end, the word "*and*" should be "*any*."

In section 158, the word "*effected*" should be "*affected*."

In section 135, the word "*extension*" should be "*extinction*."

Section 119 provides for the collection of income by distraint and sale of stocks, securities and evidences of debt, if need be; but there is no distinct provision for distraint for any other tax. Such a provision might be inserted in section 28, and made to apply to the collection of taxes of whatever description; and in order to render the provision for distraint of securities effective, the officers of all corporations should be required to exhibit their books, when called upon by a collector or deputy collector.

I may be permitted here to request your attention to a subject relating to the internal economy of this office, in which some reform seems to be demanded. I allude to the inadequacy of the salaries now paid to my subordinates. The deputy commissioner, cashier of internal revenue, chief clerk, and the heads of several divisions, as those which have charge of general correspondence, of the correspondence on manufactures, of the claims for drawbacks, of the proceedings relating to detective operations, and of claims for abatement of taxes erroneously assessed, hold offices of great labor and responsibility. For many of these gentlemen there are no office hours, save as limited by necessary rest. I take pleasure in testifying to the faithfulness and self-sacrifice with which their duties are generally performed. Justice to them requires that their salaries be increased, so as to be more nearly commensurate with their services than at present. I venture to suggest that an addition to those of the deputy commissioner and cashier of one thousand dollars would leave their compensation below that usually allowed by private corporations for services of a similar character. Several of the heads of divisions fully earn, according to any reasonable standard for the valuation of their labors, not less than twenty-four hundred dollars, and a provision which should authorize you to make an allowance of that sum to clerks of the highest class in this office, and of increased compensation to others, would, I am satisfied, inure to the benefit of the government. A number of valuable clerks have resigned their places during the past year in consequence of the insufficiency of their salaries for their support.

The aim of Congress in imposing duties on foreign imports, and on domestic productions, is to support the national credit. During a great war the excess of expenditure over income imperils this credit, in a degree greater or less, according to the extent and probable duration of such excess, and to the untouched resources of the country. The financial policy of the government must be to reduce the excess, and it is commonly thought to be well, if possible, to remove it altogether, and meet each year's expenditure by its own revenue. But this policy is often impracticable, and may be abandoned without danger wherever a nation is young and rapidly growing—when each year multiplies the fruitfulness of the preceding, yet is but an earnest of greater prosperity to come.

The necessity for a permanent system of internal taxes in the United States may be best understood by supposing the war ended, the currency restored to a normal basis, and the business of the country again flowing in peaceful and regular channels. The annual outlay to be met by taxation will then consist of the sums needed for the support of the several departments of the government, and for the payment of the interest of the public debt, with perhaps a small surplus to be used for the redemption of a portion of the principal. For example, if we suppose our war ended, leaving us a debt of four thousand millions of dollars, and an annual expenditure fifty per cent. greater than of the years pre-

ceding the war, yet our present tax laws would yield us enough to pay the current expenses of the nation, including interest at six per cent. on the whole debt, and would leave a surplus which would extinguish the debt in about ninety years. Taking into account our prospective increase in production and population, the result would be accomplished in half the time.

This taxation is cheerfully endured by a patriotic people during the great struggle for the nation's life; but, on every reasonable theory of the future, it is far beyond all probable needs, and may, with safety, be considerably reduced when the war is ended. Our present debt is but a moiety of that on which our estimate is based; and even this includes a large amount—some twenty per cent. of itself—on which no interest is paid, nor need be, perhaps, for years to come. If, therefore, the war should end at this time or within a few months, the present rates of taxation might be very largely reduced, and still yield enough to afford every possible guaranty to the creditors of the nation.

Your obedient servant,

JOSEPH J. LEWIS,
Commissioner.

Hon. WM. P. FESSENDEN,
Secretary of the Treasury.

C

TREASURY OF THE UNITED STATES,

Washington, November 21, 1864.

During the year, the business of this office has again largely increased, as appears by the following report:

The statement of the accounts and the business transactions of the treasury, during the fiscal year ending June 30, 1864, were as follows:

Balance from old account.....	\$5, 329, 044 21
Trust funds.....	88, 554 11
Repayments.....	15, 013, 216 94

RECEIPTS.

From loans.....	\$1, 136, 361, 787 70
From internal revenue.....	110, 216, 783 06
From customs duties.....	102, 316, 152 99
From miscellaneous.....	47, 511, 448 10
From Navy Department.....	6, 578, 678 29
From War Department.....	4, 613, 024 66
From Interior Department.....	288, 026 42
From public lands.....	588, 333 29
	<hr/>
	1, 408, 474, 234 51

Total of balance, trust funds, repayments, and receipts	<hr/> <hr/> 1, 428, 905, 049 77
---	---------------------------------

Payments during the same year were, on account of and

For public debt.....	\$489, 746, 113 42
War Department.....	695, 404, 867 63
Navy Department.....	92, 304, 672 96
Interior Department.....	7, 901, 809 60
Civil, diplomatic, and miscellaneous...	27, 800, 409 33
	<hr/>
	\$1, 313, 157, 872 94

Trust funds.....	\$3, 994, 054 16
Repayments.....	15, 013, 216 94
Balance to new account, July 1, 1864.....	96, 739, 905 73

Total expenditures, trust funds, repayments, and balance.....	1, 428, 905, 049 77
---	---------------------

The receipts were covered into the treasury by 3,762 warrants, and the payments were made by 25,158 drafts, issued on 24,336 warrants.

The following figures show the movement of the office during the last four years. It is noticeable, however, that nearly *five hundred millions* of the payments within the last fiscal year were on account of the *public debt redeemed*.

Receipts to June 30 for the preceding year of—

1861.....	\$88, 694, 572 03
1862.....	589, 197, 417 72
1863.....	888, 082, 128 05
1864.....	1, 408, 474, 234 51

Payments to June 30 for the preceding year, including in the last named \$489, 746, 113 42, on account of the redemption of the public debt, viz:

1861.....	\$90, 012, 449 79
1862.....	578, 376, 242 79
1863.....	895, 796, 630 65
1864.....	1, 313, 157, 872 94

Showing the transactions of the past fiscal year to have been fifteen and a half times as great as the corresponding year, ending with June 30, 1861.

The receipts on account of the War Department consist, mainly, in repayments into the treasury by disbursing officers, and proceeds of confiscation.

The receipts on account of the Navy Department were, mainly, repayments by disbursing officers, and from captures.

The receipts and expenditures on account of the Post Office Department during the fiscal year ending with June 30, 1864, were as follows, viz:

Balance from old account.....	\$221, 488 42
Warrants cancelled.....	3, 085 31
Receipts from postmasters and others.....	3, 718, 635 76

Total balance, cancelled warrants and receipts.....	3, 943, 209 49
---	----------------

Payments on 2,705 warrants.....	\$2, 868, 914 52
Balance to new account.....	1, 074, 294 97

Total payments and balance.....	3, 943, 209 49
---------------------------------	----------------

The aggregate business transactions at the principal office, in the city of Washington, for the last four years, show the following results:

In 1861.....	\$41, 325, 339 20
1862.....	929, 630, 814 38
1863.....	2, 696, 059, 087 86
1864.....	3, 889, 171, 151 00

Being more than ninety-four times as much in the last as in the first-named year.

Certificates of indebtedness were issued of the denominations and amounts as follows:

48,991 of \$1,000 each	\$48,991,000
24,608 of \$5,000 "	123,040,000
Total issue.....	<u>172,031,000</u>

Being about \$12,000,000 more than the issue of last year.

Certificates of indebtedness, with accruing interest thereon, were redeemed of the kinds as follows:

Gold interest certificates.....	\$115,439,233 50
Currency interest certificates.....	59,093,162 52
Total redemptions	<u>174,537,396 02</u>

National banks organized as per last report.....	26
National banks organized within the year ending June 30, 1864.....	447
Total number.....	<u>473</u>

There was deposited in this office by the first named, as per last report, in security for circulating notes.....	\$1,185,750,00
Deposited during this year \$43,263,150, less \$182,000, withdrawn.....	43,081,150,00
Two hundred and four of these banks were designated as depositories of public moneys and financial agents of the government. These deposited for the safe-keeping and prompt payment of the public moneys, in government securities, \$11,096,050, less \$399,000 withdrawn.....	10,697,050,00
Personal securities, \$19,729,900, less \$417,200 withdrawn....	19,312,700,00

Total amount of securities deposited by national banks, 74,276,650,00

There has been received from these banks for duty on—

Circulation.....	\$53,031 27
Deposits.....	93,082 21
Capital stock.....	18,347 73
	<u>\$164,461 21</u>

In this is not included the amount due from the First National Bank of New Orleans, the statement from said bank having been returned for correction.

Currency in kinds and amounts has been issued as follows, in—

One-year five per cent. notes.....	\$44,520,000 00
Two-year five per cent. notes.....	16,480,000 00
Same with coupons.....	150,000,000 00
Three years six per cent. compound interest notes.....	6,060,000 00
Legal tender United States notes.....	84,050,870 00
Fractional currency.....	8,169,527 10
	<u>309,280,397 10</u>

Currency was redeemed and destroyed in kinds and amounts as follows:

Old issue demand notes	\$2,517,962 50
New issue legal tender notes	19,992,221 90
One-year five per cent. notes	13,262 00
Two-year five per cent. notes	1,197 50

Two-year five per cent. notes, with coupons	\$38,379,450 00
Three-year six per cent. compound interest notes	50 00
Postage currency	5,373,300 00
Fractional currency	664,400 00
Amount discounted for parts of all kinds of notes not returned	11,393 93
Total	<u>66,953,237 83</u>

To facilitate disbursements the sum of \$775,276,970 71 was transferred during the year, by 1,340 transfer orders, from various government offices to others, being an increase of sixty per cent. over last year.

Payments by transfer checks, on the offices at New York, Philadelphia, Boston, and San Francisco, have been made to the amount of \$309,821,882 53 by 60,779 such checks, being nearly twice the amount and twice the number of checks as last year. The number of open accounts at the Washington office was 482, against 368 in 1863 and 232 in 1861, having increased over 100 per cent. in two years.

The number of official manuscript letters written and copied, exclusive of the much greater number written and printed forms, was 7,847, against 4,182 last year.

These statements and figures show an enormous increase of transactions and amounts received and disbursed, and a consequent increase of labor required to conduct the public business with correctness and despatch.

The force of the office, although greatly assisted by temporary appointees, is still inadequate, and the pay of the employes as fixed by law is so small, and the risk so great, that it is very difficult to obtain the talent and proved probity of character required.

The room which is allotted to this office is so restricted, and the number of accounts required to be entered in particular books so great, that it will require extra clerks to be employed in hours when the office is vacated by the ordinary force.

But for the employment of females, whose compensation is low, and in most cases too low, it would have been impossible to have carried on the business of the office with the compensation allowed.

During the year many clerks who were employed in this office have been obliged, in justice to themselves, to resign their positions, in order to enter into business for themselves, or to take places with moneyed and other corporations, or in business houses, where their talents and services were better appreciated and rewarded.

As the law for the employment of temporary clerks is now construed, not more than twelve hundred dollars per annum can be paid to any one of this class of clerks. Unless this restriction is removed, or the number of regular clerks of the higher grades is increased, it will be difficult, if not impossible, to conduct the office in a manner that will be safe to the incumbent, and satisfactory to the public doing business with it.

It is, however, a subject for gratulation that, notwithstanding all these difficulties, and with the immense receipts and expenditures of this office since the commencement of the rebellion, involving thousands of millions of dollars, thus far not one cent has been lost to the government.

I have the honor to be, very respectfully, your obedient servant,

F. E. SPINNER,

Treasurer of the United States.

Hon. WILLIAM P. FESSENDEN,
Secretary of the Treasury.

SCHEDULE A.

*Receipts and disbursements at the office of the Assistant Treasurer at New York
for the year ending June 30, 1864.*

RECEIPTS.

On account of customs.....	\$77, 602, 212	21

D.

TREASURY DEPARTMENT,
Register's Office, November 15, 1864.

SIR: I have the honor to submit a statement of the transactions of this office during the fiscal year ending June 30, 1864. My own connexion with the office commenced on the 10th day of August last; consequently the proper limits of this report embrace only the affairs administered by my predecessor.

1. First in magnitude are presented the results of very industrious and highly intelligent labor in the *Loan Division*:

During that year the issues of bonds have been as follows:

Whole number of coupon bonds, 697,798; amount of same, \$372,105,600.

Whole number of registered bonds, 35,255; amount of same, \$80,597,100.

Whole number of registered bonds issued for assignments, 6,505; amount of same, \$29,888,600.

Whole number of registered bonds issued in exchange for coupon, 448; amount of same, \$2,773,850.

Classified by their respective loans, the issue of bonds has been as follows,
viz:

COUPON BONDS, DIRECT ISSUE.

Loans.	No. of cases.	No. of bonds.	Amount.
1861, acts July 17 and August 5.....	2,997	20,029	\$17,407,500 00
1862, act February 25, 5-20	17,263	559,717	293,238,150 00
1863, act March 3.	38	5,850	5,647,500 00
1864, act March 3, 10-40.....	14,770	112,202	55,812,450 00
	35,068	697,798	372,105,600 00

REGISTERED BONDS, DIRECT ISSUE.

Loans.	No. of cases.	No. of bonds.	Amount.
1861, acts July 17 and August 5.....	721	3,369	\$7,922,000 00
1862, acts February 25, 5-20	6,583	25,930	57,077,100 00
1864, act March 3, 10-40.....	2,150	5,956	15,298,000 00
	9,454	35,255	80,597,000 00

REGISTERED BONDS, ISSUED FOR TRANSFERS OR ASSIGNMENTS.

Loans.	Number of cases of transfer.	Number of bonds transferred and cancelled.	Number of bonds issued for same.	Amount.
1847.....	99	345	356	\$879,350 00
1848.....	31	81	83	175,250 00
1858.....	24	137	114	570,000 00
1860.....	29	101	115	381,000 00
1861, act February 8.....	119	619	632	1,716,000 00
1861, acts July 17 and August 5....	318	963	963	3,793,500 00
1862, act February 25, 5-20.....	1,044	5,130	3,978	21,245,700 00
1864, act March 3, 10-40	82	370	264	1,127,800 00
	1,746	7,746	6,505	29,888,600 00

REGISTERED BONDS ISSUED IN EXCHANGE FOR COUPON BONDS.

Loans.	No. of registered bonds issued.	Amount.
1861, acts July 1 and August 5.....	143	\$605,150 00
1862, act February 25, 5-20.....	236	1,639,200 00
1864, act March 3, 10-40	69	529,500 00
	448	2,773,850 00

Thus it will be seen that in the issue of four hundred and eighty-five million three hundred and sixty-five thousand one hundred and fifty dollars, there have been entered on books, filled out, signed, and transmitted to the proper parties, seven hundred and forty thousand bonds.

The number of letters signed and transmitted with these bonds was forty-six thousand five hundred and sixty-three, and the same number of copies were made and placed on record.

Six thousand one hundred and fifty pages were occupied in journalizing these bonds.

The counting, entry, and destruction of the fractional and postal currency redeemed, and of treasury notes retired from circulation, has become a laborious duty of this office.

During the year thirty million nine hundred and ninety-five thousand four hundred and fifty-four pieces, right halves of fractional and postal currency, have been counted and burned, amounting to the sum of five million seven hundred and seventy-five thousand seven hundred and forty-seven dollars.

One million one hundred and thirty-six thousand two hundred and forty-seven upper halves of treasury notes were counted and burned, amounting to seventy-six million eight hundred and sixty-one dollars and ninety-nine cents.

2. RECEIPTS AND EXPENDITURES DIVISION.

The amount of business done in this division during the fiscal year shows a considerable increase over the preceding year. This is owing to the augmented receipts and expenditures of the year.

The number of warrants issued for the civil, diplomatic, miscellaneous and public debt expenditures in the year ending June 30, 1864, was..	12, 645
In the previous year.....	10, 077

Increase.....	2, 568
---------------	--------

Showing an increase of about twenty-five per cent.

The number of warrants for receipts from customs, sales of public lands, internal revenue, and miscellaneous, for the fiscal year, was	2, 870
In the previous year.....	2, 058

Increase.....	812
---------------	-----

Showing an increase of about forty per cent.

The number of warrants issued during the year, for payments and repayments in the War, Navy, and Interior, (Pension and Indian) Departments, was 12,600—a small increase in the year preceding.

The number of journal pages filled with entries of accounts and warrants relating to civil, diplomatic, miscellaneous and public debt receipts and expenditures during the year was:

Treasury proper.....	1, 129
Diplomatic.....	529
Interior, civil, &c.....	355
Customs.....	563

Total.....	2, 576
------------	--------

The number of drafts registered was 27,106.

The number of certificates given for the settlement of accounts was 6,300.

The number of accounts received from the First and Fifth Auditor's offices and General Land Office was 12,707.

At least three-fourths of these accounts were copied for warrants to issue; all were registered, and about one-half entered in the journals and posted in the several ledgers.

Some progress was made in the first part of the year in balancing the ledgers. This work is still several years in arrears.

In this division nine ledgers are kept, containing personal accounts from journals, and seven appropriation ledgers.

There is a great amount of labor performed in the division, of which a detailed account cannot be given. The preparation of the statement of the receipts and expenditures, published annually, occupies nearly the whole time of two clerks.

The care of filing of records, copying accounts for suit, preparing quarterly, for settlement, of the Treasurer's accounts, a list of all the receipts and expenditures, warrants issued during the quarter, involve much labor. The current business of the division has been done promptly.

3. COMMERCE AND NAVIGATION DIVISION.

To this division is assigned all that relates to the statistics of the internal commerce of the United States, the preparation and issue of forms and instructions under the several tariff acts, both for the record of entries and clearances, and the return to the Treasury Department of monthly or quarterly statements of all trade and shipping movements, inward and outward. From these returns the annual report of commerce and navigation is prepared; also the statements and tables for the financial report of the Secretary of the Treasury.

A further duty of preparing annual statements of duties paid, and the quantities and value of all merchandise actually paying duty, has hitherto been in charge of this division. It is now suspended, by reason of the imperfect character of the returns which were employed in the compilation, but will be resumed.

The report on the commerce and navigation of the United States for the year ending June 30, 1862, has just issued from the press. The causes of this delay were set forth in the last annual statement of my predecessor, and are also explained in the preface to the report. There are many improvements in the form of the tables, as now published, which it is believed may compensate, in some measure, for the delay. The chief purpose has been to render the statistics clear and readily accessible. Condensation has been successfully carried out as required by Congress, at its session of 1862-3. Comparative tables, exhibiting the trade to and from each foreign country for a period of years, will be attached to the next forthcoming report, 1862-3. In these tables the trade to and from each distinguishable division of every foreign country is given in a list of articles embracing all of consequence or significance as elements of trade.

The preparation of these statistics, in *comparative tables*, has involved an immense labor, and rendered it impossible to attach them to the delayed report for 1861-2, and they will, therefore, appear in that of 1862-3, now in the printer's hands, and will embrace a comparison of four years, instead of three years, as was at first designed.

I remain, sir, very respectfully, your obedient servant.

S. B. COLBY, *Register*.

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

E.

TREASURY DEPARTMENT,
Solicitor's Office, November 22, 1864.

SIR: I have the honor herewith to transmit eight tabular statements showing, in part, the operations in charge of this office for the fiscal year ending June 30, 1864. They are as follows:

1st. A statement of suits on transcripts of accounts of defaulting public officers, contractors, &c., adjusted by the accounting officers of the Treasury Department.

2d. A statement of suits for the recovery of fines, penalties, and forfeitures, under the customs revenue laws.

3d. A statement of prize cases and suits under the acts of July 13 and August 6, 1861, and May 20, 1862.

4th. A statement of fines, penalties, and forfeitures, under the internal revenue laws.

5th. A statement of suits in which the United States were interested, not embraced in any of the other tables.

6th. A statement of libels filed under the confiscation act of July 17, 1862, and the non-intercourse act of July 13, 1861.

7th. A statement of warehouse and transportation bonds reported for suit by collectors of customs.

8th. A general summary or abstract of the foregoing tables.

This summary shows that the whole number of suits, of all descriptions, brought during the year was 2,604, of which 26 were of class 1, for the recovery of \$74,725 10; 200 of class 2, for the recovery of \$105,096 05; 336 of class 3; 886 of class 4; 891 of class 5, for the recovery of \$133,138 54; 277 of class 6, for the recovery of \$538,099 45; and 8 of class 7, for the recovery of \$5,585 20.

Of these suits 737 were disposed of during the year in the following manner, viz: 664 were decided for the United States; two were decided against the United States; 43 were settled and dismissed, and 28 were remitted by the Secretary of the Treasury, leaving 1,866 still pending.

Of the suits pending at the beginning of the year, 449 were disposed of in the following manner, viz: 340 were decided for the United States; 24 were decided against the United States, and 85 were settled and dismissed.

The total number of suits, of all descriptions, decided or otherwise disposed of during the year was 1,186. The gross amount for which judgments were obtained, exclusive of judgments *in rem*, was \$67,842 82, and the whole amount collected, from all sources, was \$7,985,532 91.

In the report which I had the honor last year to submit to your predecessor, I had occasion to call especial attention to the great disparity in the number of old as compared with recent suits decided in favor of the United States, and to remark that a favorable result in cases which had been more than a year pending was only to be anticipated, if at all, as the result of extraordinary effort.

It is with much gratification that I now point to the marked improvement in this particular, as well as in the general results of the litigation under the

charge of this office, as shown in the following tables, presenting a comparative view of the litigation of the last and the next preceding years.

Year.	Total amount reported sued for.	SUITS BROUGHT DURING THE FISCAL YEAR.						
		Total amount of judgments for United States.	Total amount reported collected.	Decided for United States.	Decided against United States.	Settled and dismissed.	Remitted.	Pending.
1863	\$1,066,939 05	\$74,966 94	\$1,376,151 74	598	11	339	51	1,052
1864	856,644 34	30,670 82	4,267,945 65	664	2	43	28	1,866
								2,604

Year.	SUITS BROUGHT PRIOR TO FISCAL YEAR.						Whole number of judgments in favor of the U. S. during fiscal year.	Whole amount of judgments in favor of the United States during the fiscal year.	Whole amount collected from all sources during the fiscal year.
	Am't of judgments in old suits.	Decided for United States.	Decided against U. States.	Settled and dismissed.	Total number disposed of.	Amount collected in old suits.			
1863..	\$60,151 18	96	247	64	407	\$1,621,557 71	694	\$135,118 12	\$2,997,709 45
1864..	37,172 00	340	24	85	1,186	3,717,588 26	1,004	67,842 82	7,985,532 91

In addition to the superintendence of suits in which the United States are a party or have an interest, the results of which are exhibited in the tables to which reference has been made, there are two other important branches of duty devolved upon the Solicitor of the Treasury, to which it is proper that I should call your attention.

The first is that arising under the act of March 3, 1863, which provides that the Solicitor of the Treasury, under the direction of the Secretary of the Treasury, shall take cognizance of frauds upon the revenue, and shall exercise a general supervision over the measures for their prevention and detection.

To enable the Solicitor to perform the duties thus enjoined upon him, the Secretary of the Treasury was authorized to appoint three clerks in addition to those already attached to the office. No appointment has, however, been made under the authority thus conferred, except that of one clerk for about one month, the additional labor thus devolving upon the office having been performed by the Solicitor with the aid of the clerks already assigned to him.

By the twentieth section of the act to provide internal revenue, &c., approved March 3, 1863, the Secretary of the Treasury was authorized to appoint three revenue agents to aid in the prevention, detection, and punishment of frauds upon the revenue, and, under the power thus given, two revenue agents were appointed and placed under the direction of the Solicitor, one to reside in the city of New York, and to be employed in that and other domestic ports, and the other to be employed in Europe.

I do not deem it necessary to enter into a detailed statement of the operations of the revenue agent at New York, as they have all been heretofore communicated in the several reports of his action which have been from time to time made by him or myself. I will say, however, that, in my judgment, they have been of very great importance, and will redound to the signal advantage of the revenue, and I take great pleasure in testifying to the ability and energy with which they have been performed.

In this connexion I beg to call the attention of the Secretary to what I deem the very inadequate compensation allowed to that officer, and respectfully to recommend its material increase.

The agent employed in Europe sailed from New York in the latter part of July, 1863, and arrived in Paris early in the following month, when he at once entered upon the discharge of his duties. He has resided chiefly at Paris, but has made visits to nearly all the important portions of France and Germany, and has exhibited great zeal, industry, and ability in the performance of his duties. He has collected a large amount of information respecting prices and usages of trade affecting exports from those countries designed for the markets of our own, and has communicated the result in a series of highly interesting and important reports. The statements of these reports are sustained and corroborated by despatches to the State Department from several of our consuls residing in France and Germany, which reports have been transmitted by order of the Secretary of State for the information of this department, and have been referred by the Secretary of the Treasury to this office.

They indicate that fraudulent undervaluation in the invoices of merchandise exported to this country prevails in many districts of Europe to an extent which materially affects the revenue of the United States. As soon as practicable after the receipt of the first reports of Mr. Gibbs communicating the results of his inquiries, I commenced the adoption of measures designed to test the correctness of his conclusions and to detect and punish the supposed violations of our revenue laws, if they were found to exist. Before, however, these measures had produced any decided results, a disclosure was made to the revenue officers at San Francisco, by a person who had just been excluded from a firm engaged in the importation of champagne and other wines at that port, of extensive frauds in the invoicing of wines imported by that firm. This led to the seizure of the books and papers of several parties engaged in the importation of wines, and among these was found not only evidence which the revenue officers deemed conclusive of fraud on the part of some of those parties, but also proof which convinced them of the existence of very general and material undervaluation of wines imported from France and Germany.

These developments being communicated to the revenue officers at New York, measures were taken by them resulting in the discovery of evidence strongly corroborating that which had been developed at San Francisco, both in regard to the particular cases which had arisen at the latter place and as to the general prevalence of undervaluations of imported wines.

Under these circumstances it was deemed improper to admit to entry, at the invoice valuation, any of the wines appearing by the reports of Mr. Gibbs and the despatches of our consuls to be grossly undervalued, and most of those wines remaining under the control of the collectors of customs at New York and San Francisco, consisting chiefly of champagnes, and amounting to many thousand baskets, have been seized, and proceedings have been instituted for their condemnation. Commissions to take testimony in Europe have also been issued, and the naval officer at San Francisco has been despatched thither to superintend their execution. The proceedings thus instituted will be pressed forward as rapidly as practicable.

But it is by no means with respect to wines alone that the reports to which I have referred indicate that frauds are practiced. They are alleged to exist in

regard to large classes of merchandise imported from continental Europe, and the statements in relation to them are of the most positive and circumstantial character, and are supported by the transmission of a great variety of samples, with the prices at which they are invoiced, and also those at which they are said to be actually sold in the principal markets of the countries from which they are exported. These samples, and the statements accompanying them, have been forwarded to the revenue officers at New York and San Francisco, and it is hoped that they will there receive such attention and be so used as materially to aid in ascertaining the true dutiable value of the merchandise to which the samples relate, and thus detecting the frauds in question, if they really exist, of which it is perhaps proper for me to say there can be no doubt, if any reliance can be placed upon the statements to which I have so often referred.

The experience which has been thus far had of the operation of the act of March 3, 1863, for the prevention of frauds upon the revenue warrants the belief that it will, in a very high degree, answer the expectations of those by whose recommendation it was adopted. I am of opinion, however, that one additional provision is requisite in order to make its operation perfectly satisfactory.

It will be perceived by an examination of the act that the safeguard against fraud provided by it consists in the means of detection furnished by the deposit of a triplicate of each invoice with the consular officer residing in the district from whence the merchandise is brought, thus enabling the consul or the agent of the department to compare the prices stated in the invoice with those which the commodities actually bear in the foreign market. The law as it now stands requires no verification of the invoice by or before the consular officer, so that he is not warranted in demanding any evidence whatever that the matters set forth in the invoice are true, except the mere declaration required by the act to be indorsed thereon, which has no other sanction than that arising from the danger of forfeiture of the goods in case the declaration shall be proven to be false.

Now, the safeguard thus provided would probably be sufficient were there any means of compelling the production of definite as well as true invoices. But, unfortunately, this is not the case, and the truth is that the invoices presented are so indefinite and vague that, in perhaps a majority of instances, no one can form any correct idea of the character of the goods from the description therein given of them. There can be little doubt that this indefiniteness is often the result of design, and is resorted to for the purpose of covering false valuations in the invoice, and of throwing difficulties in the way of a proper classification at the time of entry.

An attempt was made by some of our consuls to remedy this difficulty in some degree by requiring exporters to furnish samples of the goods invoiced, whenever it was practicable for them to do so, but this requirement not being sanctioned by law, and meeting with great resistance, was necessarily abandoned. Such a requirement would not, it is evident, even if sanctioned by law, provide a complete remedy for the inconvenience in question, and perhaps it would be impracticable to frame a law which should provide effectually and in detail for every case, and at the same time place no undue obstructions in the course of trade. I think a more practicable course will be to give some discretion in the premises to our consular officers, guided and limited by instructions from the proper authorities here.

With this view I would recommend the enactment by Congress of a provision authorizing our consular officers to require, before certifying invoices, satisfactory evidence, either by the oath of the person presenting them or otherwise, that such invoices are correct and true, and directing that, in the exercise of the discretion thus given, such officers shall be governed by such general or special

regulations or instructions as may, from time to time, be established or given by the Secretary of State. Under the authority of such a provision I think that measures can be devised which will at once protect the revenue, and save importers from any serious annoyance.

The other subject to which I have alluded is that of the suppression of counterfeiting the treasury notes and other securities and of the coin of the United States. By an act of Congress passed at its last session one hundred thousand dollars was appropriated for the purpose of meeting any expenses in detecting and bringing to trial and punishment persons engaged in such counterfeiting. By a previous act twenty-five thousand dollars was appropriated for the like purpose. The late Secretary of the Treasury placed the direction of the measures contemplated by these acts under the control of this office, and during the past year they have been prosecuted with vigor and success.

There have been arrested, by those acting under the direction of the Solicitor, about fifty persons, chiefly those immediately connected with the manufacture of counterfeit money, together with a considerable number of presses and plates employed by them, and a large quantity of spurious notes and material for their manufacture. Several of the persons arrested have been tried and convicted, and others are now in custody awaiting trial; most of the latter have been recently arrested.

I am not able to state the precise amount of the expenses incurred in these operations, as all the accounts therefor have not yet been rendered, but I think it will prove to be not far from forty thousand dollars; and, as it is impracticable to estimate with any great accuracy the expenditures of the next fiscal year, I think that an additional appropriation should be asked of Congress equal to that made at the last session.

I have the honor to be, very respectfully,

EDWARD JORDAN,
Solicitor of the Treasury.

HON. W. P. FESSENDEN,
Secretary of the Treasury.

F.

TREASURY DEPARTMENT,
Comptroller's Office, October 10, 1864.

SIR: I respectfully submit the following detail of the business operations of this office for the fiscal year terminating June 30, 1864.

The following described warrants of the Secretary of the Treasury have been examined, countersigned, entered in blotters, and posted, to wit:

Diplomatic warrants.....	2, 006
Stock warrants.....	2, 136
Quarterly salary warrants.....	1, 997
Treasury (proper) warrants.....	2, 016
Treasury Interior warrants.....	2, 317
Treasury customs warrants.....	1, 987
Treasury internal revenue warrants.....	941
War pay warrants.....	9, 116
War repay warrants.....	516
Navy pay warrants.....	2, 213
Navy repay warrants.....	384
Interior pay warrants.....	961
Interior repay warrants.....	213
Treasury appropriation warrants.....	28
Treasury Interior appropriation warrants.....	13
Interior appropriation warrants.....	48
Customs appropriation warrants.....	13
War appropriation warrants.....	19
Navy appropriation warrants.....	22
Land covering warrants.....	181
Customs covering warrants.....	563
Internal tax covering warrants.....	61
Miscellaneous covering warrants.....	1, 306
	<hr/>
	29, 057
	<hr/>

Accounts described as follows, reported to this office by the First and Fifth Auditors and the Commissioner of the General Land Office, have been revised, and the balances arising therefrom certified to the Register of the Treasury:

I. From the First Auditor:

<i>Judiciary.</i> —Embracing the accounts of marshals for expenses of the United States courts; of United States district attorneys; of clerks of the United States circuit and district courts; and of United States commissioners, for per diems and fees.....	716
<i>Public debt.</i> —Embracing accounts for redemption of United States stock and treasury notes; the interest on the public debt; the United States Treasurer's accounts; United States assistant treasurers' accounts; temporary loans; and all matters pertinent thereto.....	1, 562
<i>Mint and branches.</i> —Embracing accounts of gold and silver bullion; of ordinary expenses, repairs, wages of employés, &c.....	43
<i>Territorial.</i> —Embracing accounts of governors of the Territories for contingent expenses; of the secretaries of the Territories for legislative and contingent expenses, &c.....	38
<i>Salaries.</i> —Embracing accounts of salaries of United States and territorial judges; of officers of the executive departments, marshals, attorneys, &c.....	1, 152

<i>Public printing.</i> —Embracing accounts for public printing, binding, and paper.....	91
<i>Miscellaneous.</i> —Embracing accounts of the United States Coast Survey; of the Commissioner of Public Buildings; for the suppression of the slave trade; for horses and other property lost in the military service of the United States, &c.....	713
<i>Congressional.</i> —Embracing the accounts of the secretary of the United States Senate and the Clerk of the House of Representatives.....	82

II. From the Fifth Auditor:

<i>Diplomatic and consular.</i> —Embracing the accounts of foreign ministers for salary and contingent expenses; of secretaries of legations for salaries; of consuls general, of consuls and commercial agents for salary, and for disbursements for the relief of destitute American seamen; of United States commissioners under reciprocal treaties; of accounts under treaty for foreign indemnity, and of contingent expenses of consuls, &c.....	1, 561
<i>Patent Office.</i> —Embracing accounts for contingent and incidental expenses, for salaries, &c.....	18
<i>Agricultural Department.</i> —Embracing accounts for salaries and expenses, &c.....	10
<i>Census office.</i> —Embracing accounts of the disbursing clerk thereof.....	4
<i>Internal revenue.</i> —Embracing accounts for drawback; accounts of United States assessors, and United States tax commissioners, &c.....	732

III. From the General Land Office:

Embracing accounts of receivers of public money, and as acting as United States disbursing agents; of surveyors general and deputy surveyors; accounts of the States for percentage on lands sold within their respective limits; of lands erroneously sold, &c.....	1, 367
Aggregate of accounts revised:	
From First Auditor.....	4, 397
From Fifth Auditor.....	2, 325
From Land Office.....	1, 367
	<hr/> 8, 089

Bonds entered, filed, and indexed.....	313
Letters written upon matters belonging to or arising from the business of the office.....	4, 516
Internal tax receipts registered, posted, and filed.....	2, 716

There have been also regularly entered, filed and indexed, with the proper briefs indorsed thereon, all letters and communications received in the office. The emolument returns which the law requires should be made semi-annually by all United States marshals, district attorneys, and clerks of United States courts, have been examined, entered, and properly filed; and all requisitions made from time to time for advances of public money to United States marshals, territorial officers, to treasurers of mint and branches, to disbursing agents, &c., have been examined, entered, and duly reported upon.

Much other business which it is impossible here to particularize, arising necessarily in the operations of the office from day to day, has been despatched, and I take pleasure in commending to you the gentlemen connected therein for the promptness and fidelity they have at all times evinced in the discharge of their public duties.

Very respectfully,

WM. HEMPHILL JONES,
Acting Comptroller.

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

G.

TREASURY DEPARTMENT,
Second Comptroller's Office, October 6, 1864.

SIR: I have the honor to submit the following report of the operations of this office for the fiscal year ending June 30, 1864:

The number of accounts of disbursing officers and agents received and finally adjusted were, on reports of the

Second Auditor.....	4, 866
Third Auditor.....	2, 339
Fourth Auditor.....	400

There have been examined and acted upon 79,496 certificate accounts from the Second Auditor for arrears of pay and bounty due deceased and discharged soldiers, and 10,320 for salaries of contract surgeons.

The number of certificate accounts from the Fourth Auditor's office revised and settled in this office was 1,620.

There were adjudicated and prepared for distribution, on reports from the Fourth Auditor, the proceeds of 304 prizes, amounting to \$3,884,692 91; and the accounts of 9,489 discharged and deceased sailors for prize money were revised and settled.

The number of requisitions upon the Secretary of the Treasury examined, countersigned, and recorded in this office, were, from the

Interior Department:

Pay or advance requisitions.....	970
Refunding requisitions.....	69
	<hr/> 1, 039

War Department:

Pay or advance requisitions.....	8, 330
Refunding requisitions.....	516
	<hr/> 8, 846

Navy Department:

Pay or advance requisitions	2, 859
Refunding requisitions.....	410
	<hr/> 3, 269
	<hr/> 13, 154

The number of official letters received during the year was 2,503, and of those written 1,860, the latter filling 827 pages of the letter-books. Besides this a very large amount of correspondence is conducted by this office in the form of indorsements made directly upon papers referred here for decision. Such cases are entered on a reference book with a brief digest of the decision only, though much time and labor are expended in their investigation.

The several reports exhibiting the expenditures made during the fiscal year, and the state of the appropriations under the control of the Interior, War, and Navy Departments, have been prepared and transmitted in duplicate to the several Secretaries of those departments, to be laid before Congress in compliance with the act of May 1, 1820.

Notwithstanding the enormous increase in the business of this office, I take pleasure in saying that none of it is in arrears, and that the persons employed in it have performed their duties with industry, intelligence, and punctuality. For a month or more, the pressure of business was so great that night-work was rendered indispensable to avoid an accumulation of arrears; and the call upon the clerks for this extra labor met with an efficient and cheerful compliance.

Since an augmentation of force has been granted by Congress, the ordinary office hours suffice for the prompt transaction of business, with the exception

that so much of the time of the Comptroller is consumed in signing his name to official papers, that with all the rapidity that long experience and familiarity with his duties enable him to exert, he cannot, by possibility, keep his table moderately clear of undecided cases without working nearly every day till dark, and occasionally at night.

A new edition of the "Digest of Decisions" in this office has been prepared, and will be immediately issued for the use of accounting and disbursing officers. All the numerous decisions from 1852 to the present time have been added, and the book will furnish a complete summary of the Second Comptroller's decisions on the questions submitted to him since the organization of the office in 1817.

As far back as 1854, in my report to one of your predecessors, Secretary Guthrie, I suggested what I thought would be an improvement in making appointments to this office; and as I have seen nothing to change my opinion, as then expressed, but much to confirm it, I respectfully submit to your better judgment what I then said upon the subject:

"It is, in my opinion, a serious defect in the organization of this office, (and other revising offices,) that the clerks appointed to it are not selected from the various Auditors' offices, whose statements of accounts they are to examine and submit for the final action of the Comptroller.

"When the great variety and number of statutes and regulations bearing upon the admissibility of vouchers, and the legality of claims, are taken into view, it is evident that an inexperienced clerk, taken from other pursuits, however strict his fidelity, cannot pass an intelligent judgment upon the accounts that may be assigned to him for revision. By diligence and study, if of good natural ability, he may, in time, become competent; but in the meanwhile the head of the office must personally investigate the details of accounts, doing the work which the clerks were provided to perform, or sanction results in which he can have no confidence, except what he may derive from the previous examinations in another bureau. Some who are thus appointed will inevitably prove destitute of the desire or the capacity to improve, and will pass accounts with the smallest of information, labor, and scrutiny that will save them from dismissal. In such cases the public interests are more or less in peril, for the final action of the office must generally be based upon the examination and report of the revising clerk, and an erroneous allowance once passed will not be brought to light unless by accident.

"The errors that may be made in an Auditor's office are comparatively unimportant, if a corps of thoroughly educated, experienced, and faithful clerks in the Comptroller's office are to reinvestigate the work. The liability to confirm an error in principle or calculation would then be small; but where the natural process is reversed and men wholly uninstructed are appointed to revise the action of clerks—some of whom have great experience and ability, and all of whom are at least partially educated in their official business—it is easy to see that an error unnoticed or committed in one office will be likely to pass without detection through the other.

"The true policy would be to make no original appointments in the Comptroller's office, but as vacancies occur there, to fill them by transfers from the Auditors' offices, of capable clerks who have served an apprenticeship to the business they would be called upon to revise.

"To carry out this policy, the salaries in the Comptroller's office should be sufficiently large to make such a transfer *a promotion*. * * * *

"I feel great confidence that if this plan be adopted, it will prove economical to the government, notwithstanding the increase of salaries; and it seems so advantageous in other respects, that I urgently recommend it to the favor of the Secretary."

I have the honor to be, respectfully, your obedient servant,

J. M. BRODHEAD, *Comptroller*.

Hon. WM. P. FESSENDEN,

Secretary of the Treasury.

TREASURY DEPARTMENT,
First Auditor's Office, September 26, 1864.

SIR: I have the honor to submit the following report of the operations of this office for the fiscal year ending June 30, 1864.

ACCOUNTS ADJUSTED.

T. L. SMITH, Auditor.

Hon. WILLIAM P. FESSENDEN,
Secretary of the Treasury.

I.

TREASURY DEPARTMENT,

Second Auditor's Office, October 5, 1864.

Statement of the operations of the Second Auditor's office during the fiscal year ending June 30, 1864, showing the number of money accounts settled, and the amount of the expenditures embraced therein, and, in general, the other duties pertaining to the business of the office; prepared in obedience to instructions of the Secretary of the Treasury.

The number of accounts settled is 99,898, embracing an expenditure of \$159,917,380 83, under the following heads, viz:

Pay department.....	\$88,944,415 39
Indian affairs.....	2,242,154 74
Ordnance department of the army.....	47,103,047 71
Quartermaster's department, expended on account of contingencies of the army, &c.....	9,946 68
Medical and hospital department, including supplies, &c., for prisoners of war.....	8,076,034 34
Contingencies of the army.....	209,785 12
Secret service fund.....	91,491 08
Purchase of books, &c.....	23,217 50
Artificial limbs for soldiers and seamen.....	10,485 00
Providing comfort for discharged soldiers.....	7,213 79
Preparing register of volunteers.....	1,356 19
Collecting, drilling, and organizing volunteers.....	1,436 15
Contingent expenses of Adjutant General's department.....	133 94
Relief of certain musicians and soldiers at Fort Sumter, S. C.	190 00
Miscellaneous claims.....	5,200 14

Expenses of recruiting.....	130,483 66
Collecting, drilling, and organizing volunteers.....	\$1,165,180 14
Pay of bounty to regulars and volunteers.....	453,295 00
Enrolment and draft.....	471,785 35
Arrears of pay, bounty, &c., to discharged and deceased officers and soldiers.....	10,970,528 91
Total.....	<u>159,917,380 83</u>

Property accounts examined and adjusted.....	29,745
Requisitions registered, recorded, and posted.....	5,410
Letters, claims, &c., received, briefed, and registered.....	254,690
Letters written, recorded, and mailed.....	108,373
Names of soldiers, dead and discharged, recorded.....	47,618

In addition to the foregoing, various statements and reports have been prepared and transmitted from this office, as follows :

Annual statement of disbursements in the department of Indian affairs, for the fiscal year ending June 30, 1863, prepared for Congress.

Annual statement of the recruiting fund, prepared for Adjutant General of the army.

Annual statement of the contingencies of the army, prepared in duplicate for the Secretary of War.

Annual statement of the contingent expenses of this office, transmitted to the Secretary of the Treasury.

Annual report of balances on the books of this office, remaining unaccounted for more than one year, transmitted to the First Comptroller.

Annual report of balances on the books of this office, remaining unaccounted for more than three years, transmitted to the First Comptroller.

Annual statement of the clerks and other persons employed in the office during the year 1863, or any part thereof, showing the amount paid to each on account of salary, with the place of residence, &c., in pursuance of the 11th section of the act of August 26, 1842, and resolution of the House of Representatives of the 13th January, 1846, transmitted to the Secretary of the Treasury.

Monthly reports of the clerks in this office, submitted each month to the Secretary of the Treasury, in compliance with his instructions of the 17th of August and 11th of September, 1861, together with a tabular statement showing the amount of business transacted in the office during the month, and the number of accounts remaining unsettled at the close of the month.

Statement containing the names of the permanent and additional clerks attached to this office, with the rates of compensation, transmitted to the Secretary of the Treasury.

Statement showing the name, place of birth, residence, date of appointment, and annual salary of each person employed in this office on the 30th of September, 1863, transmitted to the Register of the Treasury.

Estimate of the expenses of this office for the fiscal year ending June 30, 1865, transmitted to the Register of the Treasury.

All the ledger accounts confirmed by the Second Comptroller have been regularly journalized and posted.

All payments and refundments have been regularly entered and posted in the appropriate books.

The payments made to officers by paymasters of the army, have been entered in the officers' and company pay-books of both the regular and volunteer service.

The property accounts of the Indian department have been posted upon the Indian property books.

In addition to the above, numerous letters, estimated at two hundred thousand, at least, have been written, acknowledging the receipt of claims, and embracing correspondence generally with claimants and agents in relation to claims.

A comparison of this report with that for the preceding year, shows an increase in the amount of money accounts settled during the past year of \$68,252,913 07, and in the number of 66,314; yet the labor employed has not been equal to the current demands upon this bureau. The increase of business has been unprecedented, much beyond reasonable anticipation. It is attributable mainly to the activity and energy that have characterized military operations during the period, and to the very large number of officers who have been mustered out by reason of the expiration of their term of service, disability, and for other causes.

The examination of the property returns of such officers, embracing ordnance and ordnance stores, clothing, and camp and garrison equipage, with which they have been charged, and the adjustment of their accounts, to enable them to secure pay for their services, has become a branch of great importance and labor within the past year. It has been impossible to detach a single clerk from any other branch to increase the force upon this, and want of room has prevented the employment of additional clerks. The new building recently assigned to this bureau, and to which the officers' property branch will be transferred, permits the employment of all the clerks allowed by existing laws, but is not large enough to accommodate the number necessary to perform the labor imposed upon this single branch, which will require at least one hundred men. It is understood that more than twice this number is employed in making the administrative examination of property returns before they are transmitted to this bureau.

A similar disability exists with reference to the settlement of paymasters' accounts, and the interests of the government require that sufficient room, in a suitable fire-proof building, shall be furnished at an early day for the accommodation of a force of competent clerks, large enough to secure a prompt settlement of these accounts.

In presenting an estimate for an additional force to be provided, for the fiscal year ending June 30, 1865, regard has been had only to the existing necessities of this bureau—what is absolutely required to meet present demands upon it. The number of second and third class clerkships asked for seems to be large, but relatively the proportion of such grades will be found to be much smaller than is usual in accounting offices, where capacity, industry, and fidelity are required. In view of the character of the duties to be performed when but twenty-one clerks besides the chief clerk were sufficient to execute the work of this bureau, there were eleven of the third class, seven of the second, and but three of the first; and the compensation then given was regarded as but a fair equivalent for the services to be rendered. In a time of peace, when the business to be settled and adjusted in the office was transacted mainly by officers thoroughly educated and trained in their duties, and when there were no unusual inducements to fraudulent practices, no more integrity was required and less acuteness, industry, and patient investigation were needed, than the public interests now demand of those employed in settling the army accounts. The government needs the most faithful, intelligent service, and should pay a sufficient compensation to secure it. It cannot afford to be outbid by private enterprise in the employment of clerical ability. This bureau has suffered the loss of several valuable gentlemen, because merchants, bankers, and others were willing to pay them more than they could receive in the highest grade clerkship, or would employ them where their expenses of living would be materially diminished. Unless some remedy is provided, it is to be feared that others will follow their example, especially some of those having families to support, many of whom are now filling but first class clerkships.

While it is apparent that the demand for experienced accountants is in-

creasing, and that owing to the increased expenses of living and other causes the actual compensation now paid to a clerk is of less value to him by one-half than it was two years ago, it seems to be both just and necessary that a temporary increase of pay should be allowed to all clerkships, and it is respectfully recommended to your consideration, in the hope that the measure will meet your approval and recommendation to the attention of Congress.

I am, sir, with great respect, your obedient servant,

E. B. FRENCH, *Auditor.*

The SECRETARY OF THE TREASURY.

J.

TREASURY DEPARTMENT,
Third Auditor's Office, October 20, 1864.

SIR: I have the honor to submit the following report of the business transacted in this office during the fiscal year ending June 30, 1864.

The total amount of requisitions drawn on the Secretary of the Treasury in favor of sundry persons during the fiscal year ending June 30, 1864, is..... \$431, 857, 105 15

REPAYMENTS.

Amount of counter requisitions.....	572, 546 57
	<hr/>
	431, 284, 558 58
	<hr/>

The following is a summary statement of the amount involved in the accounts and claims which have been adjusted and settled during the year, viz:

Quartermasters' accounts.....	\$108, 319, 460 78
Commissaries' accounts.....	95, 084, 540 77
Pension agents' accounts.....	1, 642, 748 69
Engineer accounts.....	1, 258, 070 43
State claims for reimbursement.....	5, 076, 236 02
Miscellaneous claims..	1, 048, 293 96
Oregon Indian war claims.....	233, 576 61
Steamboat claims.....	447, 583 31
Horse claims.....	41, 652 57
	<hr/>
	213, 152, 163 14
	<hr/>

It will appear from the above that the amount drawn through

this office from the treasury was.....	\$431, 284, 558 58
And the amount of accounts settled.....	213, 152, 163 14

Showing an excess of.....	218, 132, 395 44
---------------------------	------------------

unsettled over amount drawn from the treasury—more than one-half the amount drawn through this office during the year being still unsettled.

The rapid accumulation of accounts and claims will more fully appear from the following detailed statement of the business in the several divisions of the office:

QUARTERMASTERS' DIVISION.

From the 1st of July, 1863, to the 30th of June, 1864, there were received and registered 3,548 quartermasters' accounts, involving an expenditure of \$228,621,606. During the same period 1,046 accounts were settled, involving an expenditure of \$103,319,460 78, leaving at the end of the fiscal year, June 30, 1864, 2,977 unsettled accounts, as follows, viz :

Remaining unsettled June 30, 1863	475
Received during the fiscal year	3,548
Total	4,023
Deduct the number settled as above	1,046
Total number unsettled	2,977

involving \$182,381,782 34.

Nearly all the above accounts are accompanied by property returns, showing the purchase, application, and expenditure of the public property in the military service, which are settled conjointly with the money accounts. 3,978 additional property returns, unaccompanied by money accounts, have been received during the year, of which 1,951 were settled, leaving 2,577 unsettled at the close of the fiscal year ending June 30, 1864, as follows, viz :

Remaining unsettled June 30, 1863	550
Received during the fiscal year	3,978
Total	4,528
Deduct the number settled as above stated	1,951
Total number unsettled	2,577

COMMISSARIES' ACCOUNTS.

From the 1st of July, 1863, to the 30th of June, 1864, there were received and registered 6,586 commissaries' accounts, involving an expenditure of \$124,393,717 79. During the same period 1,458 accounts were settled, involving an expenditure of \$95,084,540 77, leaving at the end of the fiscal year, June 30, 1864, 6,309 unsettled accounts, as follows, viz :

Remaining unsettled June 30, 1863	1,181
Received during the fiscal year	6,586
Total	7,767
Deduct the number settled as above stated	1,458
Total number unsettled	6,309

involving \$49,469,715 27.

Nearly all of the above accounts are accompanied by provision returns, which are settled conjointly with the money accounts, showing the receipt and disposition of the provisions used in the public service.

PENSION AGENTS' ACCOUNTS.

From the 1st of July, 1863, to the 30th of June, 1864, there were received and registered 366 accounts of agents for paying pensions, involving an expenditure of \$2,975,213 48. During the same period 290 accounts were settled, involving an expenditure of \$1,642,748 69, leaving at the end of the fiscal year, June 30, 1864, 120 unsettled accounts, as follows, viz :

Remaining unsettled June 30, 1863	44
Received during the fiscal year	366
Total	410
Deduct the number settled as above	290
Total number unsettled	120

involving \$1,465,203 48.

In addition to the above, 204 pension claims were received, and 146 settled, involving \$10,400 22. Sixty-seven claims were returned for amendment.

ENGINEER ACCOUNTS.

From the 1st of July, 1863, to the 30th of June, 1864, there were received and registered 311 accounts, involving an expenditure of \$1,160,286 37. During the same period 175 accounts were settled, involving an expenditure of \$1,258,070 43, leaving, at the end of the fiscal year, June 30, 1864, 162 unsettled, as follows, viz:

Remaining unsettled June 30, 1863	28
Received during the fiscal year	311
Total	339
Deduct the number settled as above stated	175
Total number unsettled	164

involving \$441,872 32.

STATE CLAIMS.

Under the act of July 27, 1861, to reimburse the States for expenses incurred by them in "enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting" their troops "employed in aiding to suppress the present insurrection against the United States," the amount of the claims unsettled at the end of the last fiscal year was \$18,107,921 66. From the 1st of July, 1863, to 30th June, 1864, there were received and registered thirteen additional claims, involving \$1,564,970 40, and during the same period there were audited and reported to the Second Comptroller claims of New Hampshire, Ohio, Connecticut, Massachusetts, and Maine, admitting to their credit an aggregate of \$5,076,236 02. The claims of New York, Kentucky, Minnesota, Iowa, and Indiana are undergoing examination, and will be reported to the Second Comptroller as early as practicable. Others have been temporarily laid aside, awaiting additional information or evidence from the State authorities.

MISCELLANEOUS CLAIMS.

From 1st July, 1863, to 30th June, 1864, there were received and registered seven hundred and fifty five claims, in six hundred and twelve of which the aggregate amount claimed is \$1,447,324 34, and in the remaining one hundred and forty-three no sums are stated. During the year, forty-four were referred elsewhere for adjudication, fifty-nine were withdrawn or returned to claimants, three were disallowed, and four hundred and fourteen settled, involving an aggregate of \$1,058,039 62.

OREGON WAR CLAIMS.

The number of claims filed under the special act of Congress approved March 2, 1861, was eight hundred and one, in four hundred and seventy-nine of which the sum of \$124,967 80 was claimed, and in three hundred and twen-

ty-two the amount claimed was not stated. The number of claims acted on was two thousand three hundred and twenty-one; number of awards made, eight hundred and eighty-two; amount awarded, \$232,694 01.

STEAMBOAT CLAIMS.

The number of claims for the loss or destruction, while in the military service of the United States, of steamboats and other vessels, and railroad engines and cars, under 2d section of act approved March 3, 1864, and 5th section of act approved March 3, 1863, filed during the fiscal year, was eighty-four, being for thirty steamers, one ship, two brigs, two schooners, forty-seven barges, five freight cars, and one carriage. The amount claimed was \$1,023,424 26. The number of claims acted on was fifty-two, on which thirty-eight awards were made, being for one locomotive, five freight cars, twenty barges, sixteen steamboats and one schooner. The amount claimed was \$598,673, and the amount allowed was \$445,053 31. Fourteen claims, amounting to \$109,002 04, being for three steamboats, fourteen barges, one ship and one brig, were rejected, as not coming within the provisions of the law.

HORSE CLAIMS.

From July 1, 1863, to June 30, 1864, there were received and registered 2,453 claims, involving the sum of \$388,487 21. During the same period 209 awards were made, involving an expenditure of \$41,652 57. The sum of \$6,052 85 was disallowed on these claims. Eighty-six claims were rejected, on which \$13,048 was claimed. The number of unsettled claims is as follows:

Remaining unsettled June 30, 1863.....	1, 678
Received during the fiscal year.....	2, 453
Total.....	4, 131
Deduct the number settled, as above stated.....	295
Total number unsettled.....	3, 836

involving \$625,000.

COLLECTION DIVISION.

The duties of this branch are to prepare transcripts for suit, superintend the collection of balances due from officers who have ceased to disburse, and conduct the correspondence connected therewith.

During the year considerable correspondence has been had with sureties and delinquents, but no suits have been commenced. The cases of resignation, &c., notified from the War Department, and registered, number 940, and the total amount of indebtedness outstanding on June 30, 1864, is \$61,420,458 09. In many cases the sums which go to make up this aggregate will be largely reduced by the official statements which will be prepared and sent to the Second Comptroller as early as practicable. In some cases of delinquency, correspondence has been had with the sureties of the delinquent party, and settlements made.

RECAPITULATION.

¹ It will be seen from the foregoing that the number of unsettled accounts on June 30, 1864, was as follows:

Quartermasters', "money".....	2, 977	\$182, 381, 782 34
Quartermasters', "property".....	2, 577	
Commissaries', "money".....	6, 309	49, 469, 715 27

Pension agents,' "money".....	120	\$1, 465, 203 48
Engineers,' do.....	164	441, 872 32
State claims		14, 596, 656 04
Miscellaneous claims.....	486	425, 682 27
Steamboat claims.....	54	749, 829 67
Horse claims.....	3, 836	625, 000 10
	<u>16, 523</u>	<u>250, 155, 741 49</u>

Sixteen thousand five hundred and twenty-three unsettled accounts and claims, amounting to two hundred and fifty million one hundred and fifty-five thousand seven hundred and forty-one dollars and forty nine cents.

On the 30th of September last the number of unsettled accounts and claims was largely increased, as will be seen by the following statement. There were at that date—

3,585 quartermasters' money accounts.....	\$258, 365, 386 74
4,571 quartermasters' property returns.....	
1,251 signal property returns.....	
6,649 commissary accounts.....	67, 412, 643 57
168 pension agents.....	1, 734, 764 21
113 engineer.....	1, 415, 310 78
State claims.....	14, 925, 727 84
630 miscellaneous claims.....	1, 011, 540 74
4,249 horse claims.....	692, 896 47
48 steamboat claims.....	884, 092 34
<u>21,274</u>	<u>346, 442, 362 69</u>

Twenty-one thousand two hundred and seventy-four unsettled accounts and claims, involving the sum of three hundred and forty-six million four hundred and forty-two thousand three hundred and sixty-two dollars and sixty-nine cents.

The act of July 17, 1862, "to provide for the more prompt settlement of the accounts of disbursing officers," requires accounts to be rendered monthly to the treasury within ten days after the expiration of each successive month.

Under this act there were received at this office 7,017 quartermasters' accounts, 9,416 commissary accounts, 661 signal accounts, and 71 engineer accounts. This act provides that in case of the non-receipt at the treasury of any accounts within a reasonable and proper time, the officer whose accounts are in default shall be required to furnish satisfactory evidence of having complied with the provisions of the act. In case of failure to transmit his accounts he shall be deemed a defaulter. During the year, 3,391 quartermasters, 2,998 commissaries, 63 engineers, and 27 pension agents were reported to the Second Comptroller as delinquent. It is not exactly correct to say that this number of officers have been reported as delinquent, the same officers having been reported for successive months. Nearly all of those who have been reported have rendered satisfactory explanations. In many instances it was shown that during active operations in the field it was impossible for disbursing officers to have necessary leisure to make up and forward their accounts within the period required by the law. During the quarter ending September 30, the number of monthly accounts received, under this act, was 2,965 quartermasters', 3,155 commissary, 455 engineer, 117 pension agents', 30 provost marshal, 18 signal, and 8 secret service accounts. These accounts, except those of agents for paying pensions, have been referred to the appropriate military bureaus for adminis-

trative examination, and will be ultimately returned to this office for settlement, thereby increasing the number of unsettled accounts on our already overloaded shelves. A number of these accounts, especially those of quartermasters, are quite large, containing many vouchers, each of which requires careful scrutiny before being passed to the credit of the disbursing officer.

In view of the steady increase of accounts and claims filed in this office, and the importance of effecting early settlements, not only to the government, but as a matter of strict justice to faithful and laborious disbursing officers, I respectfully recommend that Congress grant authority to add five clerks of class four, fifteen clerks of class three, thirty clerks of class two, and fifty clerks of class one to the force of this office, to enable it to clear off accumulations and keep up the current business of the office. The importance of early settlements will be understood, when it is known that disbursing officers are constantly resigning and being dismissed from the service, with large balances of government funds in their hands, a considerable portion of which is liable to be lost to the government unless this office has sufficient clerical force to keep up with the work as it comes in.

The increased force asked for is not deemed too great to accomplish this desirable result. Should it be granted, the appropriation for contingent expenses of the office will necessarily have to be proportionately increased to provide the additional desks, furniture, &c., required for their use.

Respectfully submitted.

ELIJAH SELLS, *Third Auditor.*

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

K.

TREASURY DEPARTMENT,
Fourth Auditor's Office, October 4, 1864.

SIR : I respectfully submit a statement of the operations and business of this office during the fiscal year ending June 30, 1864. Immense as was the increase of the transactions of the bureau over all former periods during the fiscal year of 1863, it will be seen that during the fiscal year of 1864 they have been very much greater in amount and importance. They relate, too, to an arm of public service which, under the direction of such men as Farragut, and other naval heroes, whose fame the world will not "willingly let die," has contributed inestimable benefits to the republic during the vile and causeless warfare waged upon it by traitors and slavemongers. Such being the paramount character of the business of the office, I shall endeavor to give as complete a view of its transactions during the last fiscal year as can be done with a due regard to brevity.

There has been transmitted to the Second Comptroller for his revision and approval 11,504 accounts, comprising every species of naval expenditure, from the rations of a marine and the prize money of a sailor, to the pay of an admiral and the cost of a monitor.

The correspondence of the office has been very large. The number of letters received during the past fiscal year was forty-five thousand two hundred and fifty-five, (45,255,) and the number of letters sent out amounted to forty-eight thousand three hundred and forty-nine, (48,349.) The distribution and increase of this correspondence is exhibited by the following tabular statement :

Number of letters received and sent out during the fiscal year ending June 30, 1864.

	Letters received.	Letters sent.
July, 1863.....	2, 578	2, 497
August, 1863.....	2, 683	3, 319
September, 1863.....	2, 968	3, 180
October, 1863.....	3, 501	3, 645
November, 1863.....	3, 513	3, 294
December, 1863.....	3, 878	4, 158
January, 1864.....	3, 876	4, 081
February, 1864.....	4, 145	4, 009
March, 1864.....	4, 521	4, 527
April, 1864.....	4, 611	5, 383
May, 1864.....	4, 458	4, 875
June, 1864.....	4, 523	5, 381
Total.....	45, 255	48, 349

The number of requisitions drawn on the treasury was two thousand six hundred and sixteen, (2,616,) covering an amount of \$96,497,071 74. The refunding requisitions were three hundred and twenty-two, (322,) covering an amount of \$2,133,233. The number of transfer requisitions were one hundred and sixty-six, (166.)

The number of general claims on hand July 1, 1863, were five hundred and fifty, (550,) and the number received during the year were two thousand two hundred and twelve, (2,212,) making a total of two thousand seven hundred and sixty-two, (2,762.) The number of claims adjusted were one thousand eight hundred and twenty, (1,820,) leaving on hand July 1, 1864, nine hundred and forty-two, (942.) The aggregate amount of claims adjusted was \$212,947 85.

Reports have been made upon eleven (11) bounty land cases.

Thirty-three (33) pension cases have been adjusted.

Eight (8) applications for admission to the Naval Asylum have been carefully investigated and decided.

The adjustment of all these claims is difficult and intricate. This arises from the fact that they are of almost every conceivable character, and that they are controlled by a vast number of laws passed by Congress for the government of the navy, at different periods and under different circumstances, the enactments being often modified, repealed, and sometimes again re-enacted, so as to require, on the part of those engaged in this duty, not only competent experience, but good judgment, quick perception, and a faculty to seize on all those circumstances which can facilitate the business and lead to the prevention of unwarrantable allowances. It has been the aim of the office to exercise the greatest care in giving to all its maritime defenders their utmost dues, but at the same time to protect the government from all spurious and unfounded claims.

The number of navy pension agents' accounts settled was one hundred and twelve, (112,) the disbursements aggregating \$175,146 59.

There were twenty (20) reported accounts under the act of April 6, 1838, and August 23, 1842, for unclaimed pensions, amounting to \$3,111 16.

There have been registered seventy-one (71) requisitions for navy pensions, embracing \$184,345 48.

There have been journalized and posted one hundred and thirty-two (132) pension accounts.

Seventy-three (73) general accounts, deceased officers' and men's accounts of the United States marine corps, amounting to \$8,667 52, have been adjusted.

In the very important division devoted to the settlement of the accounts of navy agents, the average number of clerks employed was four. (1.) the number of accounts reported to the Second Comptroller twenty-five, (25.) embracing an amount of expenditures reaching the sum of \$19,416,737 45 for the seven officers engaged in these disbursements. But the accounts are not only enormous in amount, but of very great extent in their items, and of extraordinary complexity in their character, requiring for their correct adjustment an amount of experience, knowledge, patience, care, and industry which can only be appreciated by those employed in the labor, or by those who give it the most careful supervision. In order to examine and adjust the accounts named above, as an instance of one item of labor, I may mention that the vast number of one hundred and fifty thousand nine hundred and sixty-eight (150,968) vouchers had to be critically scrutinized and passed.

The settlement of paymasters' accounts, like those of navy agents, is another very important branch of the service performed in this office. The following tabular statement will exhibit the operations of this division during the past fiscal year:

Total number of accounts received and settled in the Paymasters' department from July 1, 1863, to June 30, 1864, with the amount of cash disbursed in those settled, and the number of letters written in relation to the same.

	Number of ac- counts received.	Number settled.	Cash disbursed.	Number of letters written.
1863. In July.....	18	6	\$165,045 47	248
In August.....	19	5	181,404 23	230
In September.....	20	14	2,383,912 17	210
In October.....	32	10	427,349 84	323
In November.....	24	13	3,908,568 66	283
In December.....	24	19	786,963 31	288
1864. In January.....	32	15	954,828 57	334
In February.....	32	21	2,163,176 16	325
In March.....	24	14	339,728 52	264
In April.....	27	15	1,290,445 22	241
In May.....	22	17	1,343,479 89	183
In June.....	18	35	1,688,689 67	207
Total.....	292	184	15,633,291 71	3,136

I beg leave respectfully to remark, that the simple statement as shown by this tabular exhibit affords really but a very superficial view either of the amount of labor required in the settlements made as reported, or of the money involved in the business. The amount of cash reported in this statement is simply that which is *paid out* by the paymasters; but over and above what is strictly a cash disbursement, there are other sums embraced in the settlement of every account, in many cases greatly exceeding the amount of cash payments, all of which have to be properly arranged and disposed of in the settlement. These arise

from advances and allotments paid by navy agents, overpayments to and from other paymasters, clothing and small stores received, issued, and transferred, hospital fund, &c., &c.

It is also a matter of much importance in reaching anything like a just estimate of the labor and care necessary in the settlement of a paymaster's account, to consider the fact that in a single settlement there is also embraced the settlement of each man's account whose name is borne upon the rolls of the vessel or station being settled, ranging from one hundred to four thousand, and that in the examination of each one of these accounts there are twenty-two columns, in which entries of debit and credit are made, each one of which has to be examined as to its correctness, and to be balanced. The adjustment of the allotments, which occupy but one of the twenty-two columns on the pay-roll, require much labor and investigation. Each quarterly account of the navy agents paying the allotments has to be examined, and the monthly payments to the persons in whose favor they are granted carefully selected out from entries ranging sometimes from one to twelve thousand vouchers. When these things are considered, it will be apparent that the proper settlement of paymasters' accounts of the navy requires the very best clerical ability which can be obtained, and that none but good and reliable men ought to be employed upon them. Such men, of course, it is difficult to procure, unless the compensation is sufficient to secure them.

The labor of the clerk devoted to marine accounts is exhibited in the following statement:

Accounts of the paymaster of the marine corps.

Fourth quarter 1862, amount involved.....	\$57,591 08
First quarter 1863, do.	76,464 00
Second quarter 1863, do.	81,242 40
Third quarter 1863, do.	112,097 87
Fourth quarter 1863, do.	85,904 92

Accounts of the quartermaster of the marine corps.

Fourth quarter 1862, amount involved.....	113,347 64
First quarter 1863, do.	68,179 58
Second quarter 1863, do.	83,658 23
Third quarter 1863, do.	134,970 69
Fourth quarter 1863, do.	101,996 37

Total.....	915,452 78
------------	------------

These accounts embraced not less than five thousand individual accounts of officers and privates, each of which required a separate examination and calculation.

In the allotment division there were received and registered eight thousand three hundred and sixty-four allotments. As it is by these the sailor makes provision out of his wages for his family, dependents, and creditors, the accuracy and promptitude with which the business is conducted affects many a mother and many a wife, as well as widows and children. In attending to these accounts, therefore, as well as *all* the accounts of sailors, every effort and every appliance of the office has been assiduously and unremittingly employed. As a proof of the beneficent operation of this important provision for sailors, I give the following table of the amount so disbursed during a year—the disbursement carrying comfort and gratitude to households scattered all over the Union:

Statement of amount paid for allotments by the several navy agents for the year 1863.

Isaac Henderson, navy agent, New York.....	\$590, 532 95
E. L. Norton, navy agent, Boston.....	452, 002 12
James S. Chambers, navy agent, Philadelphia.....	324, 936 95
W. Pinkney Ewing, navy agent, Baltimore.....	74, 379 55
S. P. Brown, navy agent, Washington.....	59, 051 78
T. L. Tullock, navy agent, Portsmouth.....	55, 841 25
Richard Chenery, navy agent, San Francisco.....	2, 728 50
	<hr/>

	<hr/> <hr/>

The captures and brilliant exploits of our gallant navy have made the division of prize money, in this office, one of vast importance and of vast extent. The number of claims received were twenty-one thousand two hundred and thirty-four (21,234,) and the number settled were nineteen thousand seven hundred and thirty-seven (19,737,) amounting to \$2,999,951 10. The number of lists made up for distribution were four hundred and ninety-six, (496,) amounting to \$3,843,517 64.

I am pleased to say that in disbursing the very large sum of prize money which has been distributed by this office, I have yet to learn of one dollar being paid to the wrong party. This is a great satisfaction, for it seldom happens that there is distributed in a single year, without some loss to the government, three millions of dollars, in sums of such various amounts and to so large a number of persons. The distribution of this money exerts such a salutary influence upon sailors, and is such an incentive to enlistments in the navy, that the government should exert all its power and influence to make the settlement of prize accounts as prompt as possible. No effort for that purpose has been spared in this office, and a cordial co-operation will continue to be given to those departments having charge of the earlier processes of the business. It is a fact that sailors are unwilling to re-enlist so long as they have prize claims unadjusted; and at this time, when confederate pirates are roving the seas in vessels built and armed in Britain, and sometimes even manned from thence, the full complement of men in our own navy is most desirable.

During a considerable portion of the last half of the year ladies have been employed in this office as copyists. They have discharged the duties assigned to them with intelligence, industry, and commendable zeal. In all these respects they have given entire satisfaction, and, in my judgment, their employment is attended with economy to the government, while, at the same time, it affords to a large and worthy class of persons that employment and compensation which are due to industry and merit.

The office fully realizes the necessity, and has made every reasonable effort to secure prompt and complete returns from disbursing officers, and, so far as it is within its jurisdiction, to guard against inefficiency or carelessness. I have endeavored, in cases of death, dismissal, or resignation, to have the accounts of such disbursing officers settled with as little delay as practicable, for the double object of security to the government as well as to sureties. In consequence of the expansion of the navy, and the unavoidable inexperience of many of those intrusted with disbursing public moneys, this latter class of accounts must continue to receive a large amount of attention from this office.

Among the additional labors of the office is the settlement of the accounts of naval storekeepers, the ascertainment of unpaid balances due to the government by its various maritime officers, and the adjustment of the property accounts of the marine corps. These are all matters which have been commenced during the closing portion of the past fiscal year, and are not yet in a state to

be reported. The work will be prosecuted with diligence, and both its amount and importance will greatly add to the already extensive labors of the office.

On the 1st of September, 1863, I issued a new digest of "Rules in regard to the transaction of business at the office of the Fourth Auditor of the Treasury." These rules were all thoroughly revised and re-written, and received many additions growing out of new exigencies and new demands of business. The same requirements already make it necessary to prepare a new edition, in which the whole matter will be recast and made commensurate with the present wants of the service. I hope soon to issue these rules more conveniently arranged, more complete in contents, and more explicitly written than they have ever yet been. To execute this work well is no easy task; but no endeavors will be spared to perform it in a useful and satisfactory manner.

The number of official reports furnished from the office during the past fiscal year is forty-seven.

In the internal working of the office many improvements have been instituted during the year, and it is not too much to say that in no department of the government has there been more promptitude in the transaction of business, or a greater amount of labor performed by a similar number of clerks. It gives me pleasure again to bear testimony to the loyalty of the clerks, and also, with *very* few exceptions, to their fidelity, industry, and ability. I desire, likewise, to mention particularly the assistance I have received from my chief clerk in endeavoring to manage its affairs so as to make it most conducive to the welfare of the government and all those having business with it. It is to be hoped that the enormous expenditures which have now to be examined and adjusted will soon be lessened by that final victory of freedom over slavery, and by that triumph of government and law over rebellion and anarchy, which is now so brightly promised, and on which the advancement and prosperity of this nation not only depend, but likewise those of the whole world.

In view of the faithful and competent services of the clerks of this office, and in view of the increase of expenses of all kinds and the state of the money market, I hope I shall be excused for suggesting that it would be a just exercise of congressional power to increase their rates of pay during the continuance of the war and the exigencies of the present times. I beg leave also to say, that after carefully observing the operation of the force of clerks of this office as now organized, and being more impressed with the justice of increased compensation for certain duties requiring eminent ability and fitness, I desire to suggest the propriety of a still further modification of the permanent corps of the office as follows: *twelve* fourth-class clerks; *twenty-five* third-class clerks; *twenty-three* second-class clerks; and *fifteen* first-class clerks.

I would not advise an increase of the *permanent* corps of clerks, as the present number will probably be found sufficient for times of peace; but if the war should continue, or if the operations of the office should increase in the same ratio as during the past fiscal year, additional aid from temporary clerks will undoubtedly be necessary.

In conclusion, permit me to state, that impressed as I am with the deserts of the meritorious class of persons whose accounts are settled in this office, and knowing the dangers to which Jack is exposed as soon as he comes ashore, I wish to have it known that every facility the office can afford will be given to sailors who either personally, or by letter, apply for payment of their wages or prize money. If there is any special solicitude in favor of any, I desire it may be for the humble, and for those who have neither power nor place to enforce their claims, but must rely on that beneficent and impartial justice which a great republic owes alike to all its citizens.

I have the honor to be, very respectfully, your obedient servant,
STEPHEN J. W. TABOR, *Auditor.*

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

L.

TREASURY DEPARTMENT, FIFTH AUDITOR'S OFFICE,

October 5, 1864.

SIR: During the fiscal year ending June 30, 1864, there were adjusted in this office, and transmitted to the Comptroller for his decision thereon, four thousand five hundred and ninety-three (4,593) accounts, and the number of letters written in relation to the business of the office was five thousand four hundred and thirty-one, (5,431.)

I have the honor to submit herewith the usual tabular statements exhibiting somewhat in detail the operations of the office.

In submitting this report, I cannot refrain from saying that, so far as the business of this bureau is concerned, the public service is deeply indebted to the gentlemen employed in the office for the ability, fidelity and despatch with which they have severally discharged the duties devolving on them.

I have the honor to be, sir, very respectfully, your obedient servant,

CHARLES M. WALKER, *Auditor.*

Hon. WILLIAM P. FESSENDEN,

Secretary of the Treasury.

SCHEDULE A.

Statement of expenses of all missions abroad for salaries, contingent expenses, loss by exchange from the 1st July, 1863, to the 30th June, 1864, as shown by accounts adjusted in this office, other than which may have been paid by the disbursing clerk of the Department of State.

* \$16 30; amount erroneously paid at settlement of last fiscal year.

NOTE.—Commissions due to assessors on the assessment of the previous fiscal year, and not included in the last annual report, are included in the foregoing statement so far as they have been adjusted. In many districts the receipts not having been ascertained, the claims for commissions could not be adjusted.
In some districts the assessors have purchased considerable amounts of stationery, which have been paid by collectors on drafts of the Commissioner of Internal Revenue without being audited, and hence, to the extent this has been done, the expenses for stationery are deficient as above given.

SCHEDULE G.

Statement of disbursements for salaries and contingent expenses in collecting taxes, &c., in insurrectionary districts from the passage of the act to June 30, 1864.

M.

OFFICE OF THE AUDITOR OF THE TREASURY FOR THE
POST OFFICE DEPARTMENT, *October 31, 1864.*

SIR: Inasmuch as all that relates to the financial transactions of the Post Office Department, during the fiscal year ending June 30, 1864, will be fully presented in my report to the Postmaster General, I deem it requisite to submit to you only the subjoined brief statement of the principal labors performed in this bureau.

SUMMARY OF PRINCIPAL LABORS.

The postal accounts between the United States and foreign governments have been promptly and satisfactorily adjusted.

Five thousand five hundred and one accounts of late postmasters requiring the final adjustment of their accounts.

Twenty-four thousand eight hundred and seventy-two accounts of late postmasters prior to June 30, 1863.

Nineteen thousand nine hundred and seventy-six accounts of present postmasters.

Seventy-eight thousand three hundred and thirty quarterly accounts of postmasters, adjusted, audited, and registered.

Fifteen thousand eight hundred and twenty-four accounts of mail contractors audited, and reported to Postmaster General for payment.

Five thousand and two accounts of route agents audited and reported for payment.

One hundred and ninety-nine accounts of special agents audited and reported for payment.

Fifteen thousand eight hundred and forty accounts of special mail carriers, mail messengers, and local mail agents, audited and reported for payment.

One hundred and twelve miscellaneous accounts audited and reported for payment.

Forty-one accounts of United States attorneys, marshals, and clerks of courts adjusted, stated, and reported for payment.

One hundred and thirty-two suits instituted for the recovery of sums, amounting to an aggregate of \$20,755 73.

Fifty-six judgments obtained in favor of the United States within the fiscal year.

Fifty-six accounts for advertising audited and reported for payment.

Fifty-five thousand six hundred and seventy-nine collection orders issued to mail contractors.

Thirteen thousand three hundred and sixty collection drafts issued.

Thirteen thousand nine hundred and ninety-nine department drafts countersigned and registered, amounting to \$2,470,024 83.

Two thousand seven hundred and nine department warrants countersigned and registered, amounting to \$2,857,736 17.

One hundred and one thousand two hundred and thirty-three letters received, indorsed, and properly disposed of.

Sixty-three thousand nine hundred and twenty letters prepared, recorded, and mailed.

Two thousand eight hundred and eighty-one folio-post pages of correspondence recorded in collection letter-book.

Two hundred and sixty-five pages of correspondence recorded in suit letter-book.

Four hundred and thirty-six pages of correspondence recorded in the miscellaneous letter-book.

Two hundred and twenty-one pages in the report letter-book.

Fifty-nine thousand three hundred and twenty-four accounts on the ledgers.

Twenty thousand three hundred and seventy-two corrected quarterly accounts of postmasters copied, restated, and mailed.

One thousand seven hundred and five accounts of letter-carriers, amounting to \$317,591 41, were settled and paid.

Seventy-nine thousand nine hundred and sixty-one stamp and stamped envelope accounts examined, compared, and restated.

One hundred and ninety-two thousand nine hundred and eighty-two dollars and five cents collected on drafts issued by this office on late postmasters.

One hundred and thirty-four thousand five hundred and eighty-one dollars and forty-four cents collected on drafts issued by this office on present postmasters.

Two million three thousand nine hundred and fourteen dollars and eighty-nine cents collected on orders issued in favor of mail contractors.

Thirty-seven thousand nine hundred and sixty-nine dollars and seventeen cents collected on drafts issued by this office on mail contractors.

Twenty-seven thousand eight hundred and thirty-five dollars and sixty-one cents collected by suit.

Fourteen thousand three hundred and sixty-two dollars and sixty-seven cents collected on drafts issued by this office in favor of mail contractors.

REMARKS.

Much pains have been taken to give method and order to the business of the bureau; and by an equal distribution of duties among the clerks, and the incentives to zeal and exertion arising from promotions, as opportunities occurred, I have been enabled to maintain the regular current of business, and to carry it to its present prosperous condition.

The degree of interest manifested by a large majority of the clerks, and their exertions to meet the requirements of the bureau, in the prompt transaction of its business, thereby preventing the derangement and loss consequent upon permitting any part of the business to be in arrears, demands the highest commendation.

The labors of what is termed the "Examiners' division" have already been decreased to some extent, and will be still further diminished after the termination of the current quarter, in consequence of the radical change made in the method of settling the quarterly accounts of postmasters, by the provisions of the act of Congress entitled "*An act to establish salaries for postmasters, and for other purposes*," approved July 1, 1864. But the excess of clerical force thus produced in the division named will be required for the proper discharge of the additional duties imposed by the 123d section of the act approved June 30, 1864, entitled "*An act to provide ways and means for the support of the government, and for other purposes*."

I beg leave, in conclusion, to commend to your favorable regard the clerks employed in the various divisions of the office, by whose varied skill and unflagging zeal and perseverance the foregoing favorable results have been accomplished.

I have the honor to be, very respectfully,

ELIJAH SELLS, *Auditor.*

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

N

TREASURY DEPARTMENT,
OFFICE OF COMMISSIONER OF CUSTOMS,
October 8, 1864.

SIR: In compliance with your letter dated September 20, 1864, I have the honor to present to you my annual report for the current year.

The business of this bureau has been greatly increased during the past year by transfers to it from the Secretary's office, and by the assignment to the Commissioner of Customs of new duties. Among those alluded to is the charge of keeping the accounts of captured and abandoned property under the acts of Congress of July 31, 1861, May 20, 1862, and March 3, 1863, and of commercial intercourse with States and parts of States declared in insurrection; also, the devising and carrying into effect a system for the prevention of smuggling. The latter has required much thought, correspondence, and care, as well as a very extensive journey and personal attention to the matter, along the north-eastern, northern, and northwestern frontier of the United States, performed under your instructions. Though it is my purpose to make a special report upon the latter subject, namely, the detection and prevention of smuggling, I deem it proper to say here, that, in making a personal examination of a considerable extent of our eastern, northern, and northwestern frontier and seacoast, and noting the facilities for carrying on illicit trade as they have heretofore existed, I can only wonder that smuggling has not been carried on to a much greater extent than I have reason to suppose it has.

There is reason, however, to apprehend that increased efforts will be, and indeed are being made, to push goods into the United States without the payment of duties, and those usually engaged in that kind of business are by no means likely to overlook any facility for carrying it out successfully.

In consequence of these facilities and the temptation which high rates of duty on foreign goods afford to smugglers, I have deemed it my duty to recommend the appointment of a considerable number of aids to the revenue, some of whom are to act as secret detectives, and to move about among those suspected of being engaged in such illicit trade, as well as to watch by-places, where it may be expected that goods will be run into the United States in an illegal manner.

It will be impossible, however, to entirely prevent smuggling under the present laws and with so exposed a frontier as that which separates the United States from the British provinces; further legislation by Congress will be necessary to effect the purpose desired, and without which the amount of revenue from customs at our various Atlantic ports must be comparatively small.

We have reason to suppose that no inconsiderable amount of foreign goods are smuggled into the United States in vessels arriving from foreign ports. If such be the fact, I know of no way to prevent it entirely but by the enactment of a law compelling every package of imported goods to carry with it a custom-house certificate showing that the proper duties upon it have been paid.

I respectfully submit that a repeal or a modification of the 7th section of the act of June 17, 1844, limiting the number of inspectors, &c., has become necessary. With the number now allowed and limited by law it will be impossible for collectors of customs to exercise that strict scrutiny and careful inspection of foreign importations which is necessary to prevent the introduction of goods without the payment of duties.

The greatly altered ratio between the rates of compensation heretofore allowed to officers and employes of the customs service, and the expense of living, heretofore and at the present time, has occasioned numerous applications for increase of pay by deputy collectors, inspectors, and others, setting forth that, in consequence of the increased expense of living, they could not subsist themselves and families on the compensation heretofore received.

In many cases those applying for additional compensation could not be retained in the service without a compliance with their request, nor could other competent persons be obtained to supply their places at the same rate of pay. Under these circumstances it has been deemed necessary to recommend, as I have done in many instances, an increase of pay to those employed in the customs service.

Having lately visited, by order of the Secretary of the Treasury, most of the custom-houses along the coast of Maine and the northern and northwestern frontier, it gives me pleasure to bear testimony to the general efficiency, capacity and fidelity of the officers of the customs whom I met, among all of whom I did not meet a single man given to intoxication, and I believe I may say, who was not a temperance man.

When some of the collectors along that frontier were appointed, in 1861, they found many instances of men holding the office and receiving the pay of inspectors of customs, who resided many miles from the places where their services were to be performed, if at all, but who were seldom, if ever, called on to perform any other duty than to sign receipts for their monthly pay. It is unnecessary to say that the business of the various custom-houses where such practices prevailed was done in a loose and improper manner. This evil practice has, I am glad to inform you, been wholly reformed; so far as I know, there is not one idler in the customs service; it is not easy, however, to disabuse the minds of many of the idea that appointments in custom-houses have been (and indeed they have been in too many instances) and are to be bestowed as political rewards, and not for the purpose of securing competent, faithful, and efficient service in the discharge of public duties. This idea has become so imbedded in the minds of certain classes of men, from long party usage, that it has been a source of much annoyance to collectors of customs, and their refusal to continue such a practice has undoubtedly caused much complaint to be made by their own political friends.

By the French customs system, which is probably the most perfect in existence, no person once admitted into the service can be affected by any political change, nor even by any revolution of the government. Men enter that service in France at the foot of the ladder, and every advancement is made to depend on merit and faithful service; demerit only can remove him. The result is a most faithful, efficient, intelligent, and reliable corps of public servants, among whom fraud and speculation are rarely known.

Our revenue laws are exceedingly intricate and puzzling, even to the best lawyers and judges, and to suppose that any one can become familiar with them so as to administer them without perplexity, except by long experience, is to suppose an impossibility. But we are, nevertheless, continually trying the experiment.

Herewith I transmit a statement, marked A, exhibiting the business transacted at the several ports of the United States, under the laws and regulations in relation to the "internal and coastwise commercial intercourse," from the first transaction to the 30th of June, 1864. Also a statement, marked B, similar to the above, as furnished to the Secretary of the Treasury on the 5th of December, 1863. Also a statement, marked C, exhibiting the transactions in cotton; and a statement, marked C C, exhibiting the transactions in miscellaneous articles found abandoned, voluntarily abandoned, and captured. These statements, it is believed, will be found interesting and important.

Upon the transfer to this bureau, about the 1st of September, 1863, of the charge of the internal and coastwise trade, a division was established to which the duties of directing and instructing the officers appointed to execute the laws and regulations in relation thereto, and to receive and keep the returns made by them to exhibit the result of their operations, were assigned; since which time

the division has been constantly employed in the discharge of their duties. These duties were new, and the returns from the several officers appointed to execute the laws and regulations then in force were imperfect and without system, and had, moreover, been accumulating for nearly two years prior to being transferred in bulk to this office. By persevering labor, however, chaos was reduced to order and a proper system established.

On the 5th of November, 1863, the Secretary of the Treasury placed this bureau in charge of all matters pertaining to "captured and abandoned property," and subsequently general instructions in relation to such property, with the forms of returns required, were forwarded to the several supervising and assisting special agents appointed to receive and collect such captured and abandoned property. This transfer greatly increased the duties of the division having charge of internal and coastwise intercourse, to which the subject was referred; but those duties have been faithfully performed, as the statements herewith transmitted will in part show.

Since the transfer of this bureau, on the 9th of November, 1863, of the business relating to return duties, the number of claims for return of duties examined has been 594; number of claims allowed and paid, 218; amount refunded, \$239,051 48.

The whole number of accounts received at this office from the First Auditor, from the 1st of July, 1863, to the 30th of June, 1864, was 2,457. Number passed in the same time, 2,442.

The duty of keeping a record of the statistics of commerce, so far as they relate to merchandise in warehouse and in transit in bond from one port to another within the United States, was assigned to this bureau some two years ago. A record is kept of all warehouse and transportation entries and withdrawal entries for transportation in the United States, to which is added the returns of all merchandise brought into each district, after having been entered and warehoused in another district; the former entries representing the debits against each port, and the latter the credits. These, placed in juxtaposition, constitute a safeguard against any irregularities that might occur in the transactions of any of the collection districts in the United States. The statistical table of merchandise which usually accompanies the Secretary's report is carefully prepared from the monthly returns from each collection district, collated, and, where necessary, corrected by the collector from recomparison with entries registered in his office.

Should no other business be transferred to this bureau, (and there are some branches that more properly belong here than where they now are,) the present clerical force is sufficient. But as the business of the bureau is generally of a character requiring mental and legal as well as clerical capacity, an order of talent which cannot be procured for the pay allowed to the lower classes of clerks, I would respectfully submit that instead of seven clerks of the first class and nine clerks of the second class, they should be reclassified thus: four of the first class; six of the second, and six of the fourth class. The third class to remain as at present.

I have the honor to be, respectfully, your obedient servant,

N. SARGENT,

Commissioner of Customs.

Hon. WM. P. FESSENDEN,

Secretary of the Treasury.

TREASURY DEPARTMENT,

Office of Commissioner of Customs, November 21, 1864.

SIR: Having received instructions from the department to visit a portion of the eastern and northeastern coast, and also the custom-houses along the line separating the United States from the Canadian provinces, with the view of making a personal examination of the facilities for smuggling, and devising means to prevent it, I left Washington on the 15th of August, and proceeded first to Burlington and St. Albans, Vermont, thence to Boston, New Bedford, Portland, proceeding down the coast of Maine among the islands as far as Eastport; then returning to Portland, from whence I proceeded along the northern and northwestern frontier as far as Chicago and Milwaukee. From thence I returned to Buffalo, where, on the 28th of September, I met the collectors of the northern and northwestern frontier, for the purpose of general consultation, and adopting a more systematic and uniform mode of doing business than has heretofore prevailed among them, and also for the purpose of enforcing upon them the necessity of zeal, energy and watchfulness on the part of their employés in detecting and preventing smuggling.

My observations during this tour only confirmed my previous impressions as to the very great facilities which a frontier of several thousand miles affords to those who, unrestrained by any sense of moral obligation, carry on an illicit trade between the British provinces and the United States. The coast of Maine, as you personally know, is everywhere indented by bays, and fringed with innumerable islands, some of which are sparsely inhabited, and many of them only by a class of people not likely to resist very strong temptations to evade or violate the laws relating to commerce. These islands, bays and numerous rivers entering the ocean, afford very great facilities for evil-disposed persons to smuggle goods from New Brunswick and Nova Scotia into the United States; and it requires the utmost vigilance to prevent illicit commerce being carried on to a considerable extent along the coast. And I must here remark that the collectors along this coast are very poorly supplied with the means of detecting and preventing such trade. They need more and faster boats, and men to man them, to run in frequently, night and day, among these "thousand islands," and the many thousand inlets, harbors, rivers and hiding-places which are to be found in that locality.

Before leaving Maine, I deem it proper to say, that if the facilities for smuggling are great along the coast, they are still greater far in the interior, where either the not very broad St. John's river is the line separating the United States and the British provinces, or the line is only an imaginary one, running through a wild country, sparsely settled in some places, and with no inhabitants in others, for hundreds of miles, but crossed by roads very good in the summer and excellent in the winter. I have reason to believe that no inconsiderable amount of goods has been run into the United States over these roads during the past year, and have not been neglectful in endeavoring to check, if not entirely stop, this illicit and very profitable traffic. That the officers of the customs in this State are not negligent of their duties, the fact that over \$16,000 has lately been paid into the treasury, the proceeds of seizures of goods made by them, is pretty good evidence. They are also entitled to commendations for ferreting out fraudulent claims for fishing bounties, and saving the government some thousands of dollars heretofore wrongfully obtained for vessels purporting to be engaged in fishing, but which were wholly unseaworthy.

From Maine, the line separating the Canadian provinces from the United States runs through a country mostly wild and unsettled, or sparsely settled, though in some parts densely settled on both sides, and it is not easy to say which affords the greater facilities for carrying on illicit trade, the wilderness or the thickly settled portions. I have reason to believe that this trade has

been carried on to a considerable extent between Canada and Vermont; but I feel confident that the collector of the district of Vermont has, under my directions, taken such precautions, and is exercising such vigilance and caution as will cause the heretofore successful operator to acknowledge that the Vermont roads are hard to travel. It gives me pleasure to state that Mr. Clapp, the collector of customs of that State, has made several important seizures, as have also his deputies at Island Pond.

I found Rouse's Point, New York, a very exposed point, and have reason to believe that very considerable amounts of goods, of various kinds, have passed that place in boats, bateaux, and other small craft, into the lake, destined, it may be, for Troy, Albany, or New York, during the past year. Having once passed this point, boats found no obstacle in the way to New York, where they could unload and return without reporting to the collector or other officer of the customs, no one knowing of what their cargoes consisted.

I have, I believe, effectually stopped this unrestricted traffic; and in doing this, I have been efficiently aided by Mr. Clapp, collector of Vermont, who stationed two inspectors at the east end of the draw of the bridge crossing the Richelieu river, at the foot or outlet of the lake, who have made quite a number of seizures of small craft attempting to run into the lake in the night.

It is due to Mr. Dunn, lately appointed collector of the Champlain district, which includes Rouse's Point, to say that he has not been wanting in vigilance or zeal in enforcing the laws since he entered upon the duties of his office; and I feel quite sure that this highway for smuggling is now effectively closed, though there are in this quarter, and all the way to Ogdensburg, many byways that require close watching.

From the point where the line separating Canada from the United States strikes the St. Lawrence river, up to Oswego, a distance of over a hundred miles, the facilities afforded for running goods across the river and landing them unseen upon our side are very great, especially among the "Thousand islands;" and it will be impossible to prevent it entirely, or in any considerable degree, without the employment of numerous inspectors, and the use of convenient boats; indeed, these would be inadequate without resorting to other means of obtaining information and of detection.

The collectors at Ogdensburg, Cape Vincent, and Oswego are, and have been, doing all in their power to prevent the introduction of goods without payment of duties, and the two first have made some important seizures, a portion of the proceeds of which have been, or soon will be, paid into the treasury. It is to be hoped that these will serve as a caution to evil-doers.

The act to prevent smuggling, passed the 27th of June last, makes such provision as it is hoped will prevent smuggling across the lakes; but it has been and will be attempted on the Niagara, Detroit, Huron, and St. Marie's rivers, where additional force may be required to prevent it. Upon the two last-mentioned rivers I think it will be necessary to place small propellers or tug-boats, which can pass up and down, run into convenient hiding-places, and ferret out the small craft crossing the river night and day, when not watched.

At some places in the British provinces I have information that warehouses have been built near the frontier line, which contain goods undoubtedly placed there to await a favorable opportunity to be run clandestinely into the United States. In some instances these warehouses are situated upon small lakes, or ponds, through which the line runs. In summer, boats of small tonnage can convey goods from these warehouses into the United States, where they are unloaded into wagons, and carried into the interior. In the winter these lakes or ponds are frozen over, and are crossed by horses and sleighs, which also pass into the interior, and scatter the goods among country traders, or take them to some railroad to be transported to one of our cities. It is stated that warehouses

of this kind are to be found on the Canadian side of the St. Marie's river, the outlet of lake Superior.

Since my tour along the frontier, I have noticed the exhibition of increased zeal and earnestness on the part of those employed in the customs service. For many years past, previous to the incoming of the present administration, there was very great laxity in the execution of the laws on this northern and north-western frontier, and great abuses had grown up in the custom-houses; places were given and held, in some instances, without the least expectation on the part of the collector or his subordinate that any service whatever would be required of the latter, other than that of signing monthly receipts for pay; and so common was the custom that several of the collectors now holding office have found it difficult to convince importunate applicants that they could not appoint inspectors *ad libitum*, simply in payment of political services, and without requiring them to perform any duty whatever.

Such ideas, I am glad to believe, have been effectually checked, and every man employed understands that he has duties to perform, and that negligence therein will not pass unnoticed.

Owing to the delay in appointing consuls to reside at certain points in the British provinces, and also in the manufacture of presses, seals, and other articles required to be used in sealing boats, cars, &c., the act of the 27th June last, to prevent smuggling, has not been carried into full effect, but I can see nothing to prevent the system adopted by this department, under that law, from being carried into effect in part this winter, and fully at the opening of navigation in the spring; and I hope from it the most favorable results.

I have the honor to be, sir, your obedient servant,

N. SARGENT,
Commissioner of Customs.

HON. WM. P. FESSENDEN,
Secretary of the Treasury.

N. SARGENT, Commissioner of Customs.

O.

OFFICE SUPERVISING ARCHITECT,

September 30, 1864.

I have the honor to submit the following report of operations during the year ending September 30, 1864, upon the various public buildings, (constructed or in course of construction,) under the direction of the Treasury Department, and committed to the charge of this office.

Several appropriations for new custom-houses, marine hospitals, and court-houses, made prior to the war, remain available, but no new works have been commenced during the past year. The operations were confined to the continuation of buildings in course of construction, the alteration of others to suit the emergencies of the present service, the necessary and unavoidable repairs of others, and the settlement of accounts and claims by works now completed. A statement of the expenditures will be found under the proper heads, as also a statement of the condition of the respective buildings, as far as known to this office.

I cannot but reiterate the remarks I made in my last report relative to the worthlessness of the corrugated galvanized-iron roofs. A large proportion of the amount expended for repairs was for repairing these roofs. Several of them are in such bad condition that they ought to be replaced entirely without delay, and a heavy item for repairs of them may be expected for the coming year.

Another source of annoyance and expense has been caused by the utter insufficiency of the system of heating (introduced in former years) by hot-air furnaces. In almost all the buildings heated by these furnaces, the officers (occupying these buildings) were obliged to abandon their use, and to heat their rooms by means of cast-iron stoves. The hot-water heating system having proved eminently successful in the treasury extension building, and in some of the extremely northern custom-houses, its use has been adopted for all the new buildings, or those in course of construction. It is also proposed to introduce it gradually into those buildings where the hot-air system had to be abandoned; and I would recommend that an appropriation be asked for this special purpose.

An appropriation of \$50,000 for a new building exclusively for the revenue service at Portland, Me., was made by the last Congress, but at such a late date that it will probably be impossible to commence operations this season.

The repairs of the government warehouses and wharves on Staten island have been nearly completed, and will be completed before the coming winter. A portion of the revenue depot grounds has been transferred to the light-house service.

In conformity to the act of Congress approved June 20, 1864, the Chicago marine hospital property was sold to J. F. Joy, president of the Michigan Central Railroad Company, for the sum of \$132,000. This sum is considered a fair price for the property, and sufficient for the purchase of a more eligible site, and the erection of a more commodious hospital.

On the 1st of October, 1863, the aggregate balance of appropriations not withdrawn from the treasury, together with the amounts in the hands of disbursing agents, amounted to \$1,333,181 59. The appropriations becoming available during the year amounted to \$1,423,879 02, making an available amount at the control of this office of \$2,762,060 61, for the year ending September 30, 1864. The expenditures during the year amounted to \$1,064,436 57, leaving an aggregate balance on the 30th September, 1864, of \$1,697,624 04.

TREASURY EXTENSION.

The work upon this building progressed favorably during the past year. The whole of the west section, the northwest portion of the north section, and all the attic stories are completed and occupied or ready for occupa-

tion. Though a large amount of room was thus added to the building, it is yet far from being large enough to afford accommodation for all the officers of the department, and in this connexion, the failure to obtain apartments for the State Department, and consequent postponement of the continuation of the north section of the building, is much to be regretted.

In table B will be found a synopsis of the disbursements made during the year. As will be seen from it, a large amount of work not properly belonging to the construction of the building was done for the National Note Bureau. It was done by order of the Hon. S. P. Chase, for the purpose of facilitating and expediting the operations of that bureau, and with a view that the expenditures thus made would be refunded to the work of the treasury extension. A large amount of work is yet done for the above bureau under the order alluded to. As the necessities which caused the order no longer exist, and as a reduction of the force employed on the treasury extension is very desirable on account of the postponement of operations on the north section, I would respectfully recommend the revocation of the order; also that directions be issued for the refunding of the expenditures.

Another large item of expense is the furnishing of the building; the outlays under this head amounted to \$66,911 53 during the past year. Several attempts were made to reduce this expenditure, but as yet with little success.

Within the past year the four large iron vaults (fire and burglar proof) for the Treasurer of the United States and the Comptroller of the Currency were completed. Two of them are twenty feet by twelve feet eleven inches by thirteen feet ten inches, and two eighteen feet seven inches by twelve feet eleven inches by thirteen feet ten inches. Each vault is provided with a double door, and each door with two locks of different patents. Their total cost amounted to \$62,981 88. Two of them are located in the entrance story and in the cashier's room of the Treasurer of the United States, and two immediately over them in the second story are for the banking-room of the Comptroller of the Currency.

The rear rooms of the third story of the old treasury building were improved by enlarging their window-openings, and by removing and replacing the old groin ceilings by iron beams and segment-arches; these rooms, formerly very dark, were thus rendered comfortable, and far more serviceable.

I would again call attention to the recommendations made in my last report relative to the widening of the areas, and the reconstruction of the Fifteenth street front, and which as yet have not been acted upon. They are fully shown by a large and accurate model of the whole building now exhibited in the entrance vestibule of the west wing. The widening of the areas, by which alone the basement and cellar stories of the west and north sections of the building can be well lighted, I deem a great desideratum. I cannot too urgently recommend that I be authorized to proceed with that work, together with the lowering of the level of the ground in front of the north section.

The heavy granite balustrade of the south section, and which it was contemplated to continue on the other portions of the extension, has been replaced on the west section by a galvanized iron acroteral ornament, of light and elegant design. The cornice is thus rendered tight, and those unsightly stains from percolation through joints, which disfigure the cornice of the south wing so often, are thereby prevented. It would be advisable to remove the balustrade of the south wing also, and to replace it by the above finish.

REMODELLING OF MERCHANTS' EXCHANGE AND CUSTOM-HOUSE AT NEW YORK.

As stated in my last report, the cost of this work very much exceeded the amounts originally contemplated for the same. Congress, at its last session, made an appropriation of \$80,000 for the payment and settlement of outstanding bills and claims against these works. The whole of them, except one, have been settled and paid for, leaving an available balance of appropriation of \$6,644 80.

BOSTON CUSTOM-HOUSE.

The alterations and improvements in the approaches and steps to this building have been completed, and prove to be very satisfactory and convenient to the public. The whole of this work has been done by Messrs. Blaisdell & Emerson, at an expenditure within the amount of the appropriation made for that purpose. The interior of the building has been cleaned and some of the painting renovated.

BUFFALO CUSTOM-HOUSE.

This building, like most of the other custom-houses, was provided, at its erection, with hot-air furnaces thought sufficiently powerful to heat it. They proved entirely inadequate for the purpose the first winter they were used, and recourse was had to stoves. Complaints and petitions of the officers of the building for a better system of heating were repeated almost every year. A considerable balance of former appropriations for the construction of the building remaining unexpended and available, it was thought advisable to remedy the evil, and arrangements were made accordingly with Messrs. Hayward, Bartlett & Co. for introducing their hot-water heating apparatus. The cost of the same will be less than the amount of the available balance of appropriation.

CINCINNATI CUSTOM-HOUSE.

Soon after the approval of the act of Congress appropriating \$25,000 for the alterations of the Cincinnati custom-house, (in March last,) the plans for the same were perfected and approved, and early in the month of April last arrangements were made for starting the work.

Its cost will considerably exceed the appropriation which was made in accordance with an estimate prepared in this office, and which was based on the prices of labor and materials of over a year ago. As already stated elsewhere, prices of building materials and labor have since advanced enormously, and perhaps nowhere more so than at Cincinnati. Not only was it difficult to procure mechanics, but they also failed to perform their work as efficiently as in former times in consequence of a spirit of carelessness and recklessness engendered by the repeated strikes all over the country.

Had it been in my power to visit the work oftener than I did, I would have made various and considerable savings. I cannot too strongly urge, in this connexion, that the supervising architect should be disembarassed as much as possible from routine duties at Washington, (which may be intrusted to an assistant,) and that he should spend considerable portion of his time in inspecting works in progress of construction, or in making arrangements for starting new ones. The annual amount saved by such a course would be very considerable, while at the same time better work would be obtained. However careful the selection of superintendents may have been made, these gentlemen very frequently lose sight of economy, under the excuse that the government is rich enough to pay for any work; and very often they lack the requisite mechanical talent and experience.

This work cannot be completed in less than two months, and an additional appropriation of \$12,000 will be required to pay for it.

DUBUQUE (IOWA) CUSTOM-HOUSE.

The work of completing this building, for which an appropriation of \$30,000 was made by the last Congress, has been progressing favorably. The roof is ready for the tin covering and the copper gutters, and the interior is ready for the plastering as soon as the roof may be completed. The work has been well done, and managed for the interest of the government. The cost of the com-

pletion, like the cost of all the buildings or works for which appropriations were made, based upon estimates made one year ago, will exceed the appropriation. It is thought the building can be completed in course of the coming winter.

LOUISVILLE CUSTOM-HOUSE.

The alterations of this building, for which an appropriation of \$15,000 was made, have been deferred until next spring. Some temporary rooms are now being partitioned off in the second story hall for the most pressing needs of the collector.

MILWAUKIE CUSTOM-HOUSE.

This building is in good condition. As in the case of the Buffalo custom-house, and others, the hot-air furnaces furnished or put up at the time of the erection of the building were abandoned the very first winter of their use, and the various rooms were ever since heated by stoves.

PORTLAND CUSTOM-HOUSE.

The business of Portland has been increasing so rapidly for several years past that the accommodations assigned to the revenue department in the present custom-house and post office have become utterly insufficient for the service, though the above building has been completed but a few years since. In accordance with the directions of the Senate Finance Committee, several plans were prepared by this office for the erection of a new building exclusively for the use of the revenue service. In preparing these plans, the exigencies of the case, the views of the collector of the port, and the locality (property of the United States) on which the building is to be erected, were consulted and considered as much as possible. They, together with estimates of cost, were submitted to the committee, and subsequently Congress made an appropriation of \$50,000 for the purpose. It is to be regretted that this sum is entirely inadequate for the erection of the building contemplated and required. The plans have since been perfected, and arrangements are now making for beginning with the work.

PROVIDENCE (R. I.) CUSTOM-HOUSE.

The new roof for this building has been completed, and the building is now in good order. It became necessary to relay the flagging around the building, which had much and unevenly settled. Proposals for the work were invited by advertisements, which were considered exorbitantly high. However, no lower rates were to be obtained from the Providence mechanics, and I concluded to send the master-mason of the Treasury extension (with assistance) to perform the work. The result was an excellent job, and a saving of several hundred dollars.

PHILADELPHIA CUSTOM-HOUSE.

The work of alterations of this building has but shortly since been started. The progress made so far has been favorable.

ST. LOUIS CUSTOM-HOUSE.

This building, which was never properly finished, needs various repairs, as well as some alterations which would render it more convenient for the present service. After due consideration and consultation with the collector, it was thought best, however, to postpone the matter for more favorable times.

NEW ORLEANS CUSTOM-HOUSE.

This building was used for manufacturing gun-carriages during the time it was in possession of the rebels. After the surrender of New Orleans to the Union forces it was used for some time as a prison by the United States military authorities, who had sometimes as many as six hundred confined in the finished rooms. In March last the building was turned over by the military authorities to the agents of this department, and since then a good, though temporary, roof has been put on. The building also was cleaned of a huge amount of dirt and rubbish which had been accumulating for a number of years, and was thus rendered habitable for some bureaus. The vast extent of the building, and the high prices of labor and materials, have swelled the expenditures for these temporary improvements to \$30,348 37. The large amount of old lumber, iron work, and machinery which was on hand to no use, and fast deteriorating, was sold for the sum of \$12,632 53. It is also proposed to finish the flight of rooms designated for the use of the United States court of Louisiana in such a temporary manner that they may be occupied by the court.

I beg leave to especially direct your attention to the deplorable condition of three marine hospitals, viz., of that at Evansville, (Indiana,) Louisville, (Kentucky,) and San Francisco, (California.) The marine hospital at Evansville is well built and in good condition, but is gradually having all its ground swept away by the Ohio river. The encroachments of the river are such, and so rapid, that protection ought to be afforded without delay, or else the building itself may be irretrievably lost. The marine hospital at Louisville is so badly drained, and had been so neglected, that it became necessary to board the patients in the city hospital, and to close up the building. As there were never more than seven or eight patients in this hospital, and as the marine hospitals at Evansville and Cincinnati are so near by, there seems to be very little necessity for a marine hospital at Louisville, and I would respectfully recommend that Congress be asked for authority to sell the property.

The marine hospital at San Francisco, built at a time when good building materials could not be obtained at that place, is in such a dilapidated and unsound condition, and so awkwardly situated in consequence of the lowering of the surrounding streets by some twenty-five to thirty feet by the city of San Francisco, that I consider it bad policy to expend any large amount of money for repairs of the same. In fact, I would recommend that the same be taken down and rebuilt on the properly graded premises, and that Congress be asked for an appropriation of \$50,000 for that purpose.

BURLINGTON MARINE HOSPITAL.

I again would call your attention to this building, and recommend that Congress be asked for authority to sell the property. There never was any demand for a hospital at that point.

CHICAGO MARINE HOSPITAL.

In accordance with the act of Congress approved June 20, 1864, the marine hospital, situate on Michigan avenue, between South Water street and the Chicago river, has been sold to J. F. Joy, esq., president of the Michigan Central Railroad Company, for the sum of \$132,000. The price obtained is considered a fair one, and will be sufficient for the purposes of the above act. I have been inspecting, together with the collector, various sites for the erection of a new hospital, and was able to select a very eligible one. No definite action has, however, as yet, been taken on this subject. Meanwhile the plans for a new building are being completed and perfected.

BALTIMORE COURT-HOUSE.

The work upon this building has progressed very favorably during the past year, and it is expected that it will be completed in course of the coming winter. It is now under roof, and would be finished sooner if it were not for the difficulties of procuring the granite work for the porches; in fact, the building would have been completed some time ago if it had not been for this difficulty of procuring granite work. It is built of Maryland granite up to the top course of the cornice; this top course and the portico granite work are, or will be, of Dix island granite, which differs very little in appearance, and is furnished far more promptly. The whole of the work is done in superior manner. A change of the Fayette street portico steps became necessary in consequence of a change of grade of Fayette street, made by the city of Baltimore; it is thought, however, that a decided improvement has thus been introduced.

INDIANAPOLIS COURT-HOUSE.

This building remains still without proper approaches and sidewalks, no appropriation ever having been made for that purpose. It is otherwise in good condition except the roof. I would recommend an appropriation of \$5,000 for the proper improvement and finish of lot, sidewalks, and approaches.

WINDSOR COURT-HOUSE.

Arrangements have been made, and are now in progress, for re-covering the roof of this court-house with slate. The roof was found in such wretched condition that it was thought unadvisable to use merely temporary repairs. The sheathing for the slate will be laid on top of the old corrugated galvanized iron, and fastened to the iron trusses. A very permanent roof will thus be gained without exposing the building to any injuries from weather during the time of the construction. The cost of the work will not exceed the amount of the appropriation made for the purpose.

STATEN ISLAND.

An appropriation of \$30,000 was made by the 37th Congress for the repair of the wharves and warehouses of the revenue depot at Staten island, New York. This property was found in a very dilapidated state, and the sum appropriated insufficient to improve the whole of the extensive grounds. In consequence of this, it was thought advisable by the Hon. S. P. Chase to cede a portion of the grounds to the light-house establishment, who were selecting suitable sites for the erection of a light-house depot in the vicinity of New York, in conformity to the act of Congress approved March 3, 1863, on the condition of a transfer of \$32,000 from the fund for the erection of such depot to the Treasury Department. This sum, together with the \$30,000 appropriated for the repair of the property, was to be applied to the improvement of the whole, (including the portion ceded to the light-house establishment,) and more especially to the erection of a sea-wall and wharves for both branches of the service. A contract was accordingly entered into with Messrs. Blaisdell & Emerson for the repair of the warehouses, the erection of a sea-wall, the filling up and grading of the grounds, the erection of a wharf on cast-iron piers, the erection of a causeway to old ice-breaker, and the erection of boat-houses.

The work was begun in the fall of 1863, and some of it completed before the setting in of the ensuing winter. It was resumed in the early season of the current year, and is now nearly completed. The contractors had to contend with unusual difficulties. Since the time the contract was awarded to them the prices of labor and materials advanced to an unprecedented degree, and could only be procured slowly even at the advanced rates. In sinking the cast-iron piers at

a depth of water of over thirty feet, they met with rocks and a substratum which had not been foreseen nor expected. Notwithstanding all these difficulties, the work was pushed on vigorously, faithfully, and substantially. The sea-wall, it is true, does not present a finished appearance, and a committee of the Light-house Board even doubted its stability. The latter, however, was tested during one of the severest storms ever experienced in that latitude; wherever the wall had been completed, it stood the test perfectly. It was impossible (with the limited available means) to erect a more showy sea-wall of the extent required. As to durability and stability, I am satisfied that it will answer for all the purposes of the service for a long period of time.

Sundry other improvements have become necessary, and I recommend that an additional appropriation of \$25,000 be asked for.

Appended to this report will be found a table showing the amounts available for each work on the 30th of September, 1863; the additional appropriations made and becoming available; the disbursements made during the year ending September 30, 1864; the balances available September 30, 1864; and the additional appropriations required; also a synopsis of disbursements made on the Treasury extension.

All of which is respectfully submitted.

I have the honor to be, very respectfully, your obedient servant,

ISAIAH ROGERS,

Supervising Architect.

HON. W. P. FESSENDEN,

Secretary of the Treasury.

SCHEDULE A.—*Tabular statement of custom-houses, marine hospitals, court-houses, post offices, and miscellaneous buildings, showing the amount available for each work September 30, 1863; the additional appropriations made by the 38th Congress, 1st session; the amount available September 30, 1864; and the disbursements made from September 30, 1863, to September 30, 1864.*

SCHEDULE B.

Schedule of disbursements made on the treasury extension from September 30, 1863, to September 30, 1864.

Balance in treasury September 30, 1863.....	\$110,420 64
Balance in hands of disbursing agent September 30, 1863 ...	41,221 56
Appropriations for refunding amounts paid for furniture, &c..	150,000 00
Appropriations for continuation of north wing, &c.....	750,000 00
Appropriations for furniture.....	50,000 00
Amount refunded from War Department.....	40,599 10
Amount received from sale of old materials.....	5,933 00
Amount received from Commissioner of Public Buildings.....	500 00

1,148,674 30

Amounts paid for materials and labor:

Granite, marble, and other stone work.....	\$84,986 34
Iron and copper work.....	96,194 53
Brick, cement, and sand.....	7,396 96
Lumber.....	37,059 37
Glass.....	7,596 14
Plumbing materials.....	3,854 08
Gas-pipes and fixtures.....	9,477 22
Plastering.....	14,489 73
Night-watch.....	5,147 28
Hardware.....	13,337 18
Heating apparatus.....	18,642 50
Furniture.....	31,131 63
Vaults and vault-locks.....	67,247 73
Freight and wharfage.....	7,125 86
Miscellaneous.....	19,200 11

\$422,886 66

Carpenters.....	50,690 85
Brick and stone masons.....	18,640 60
Iron-workers and plumbers.....	31,472 12
Riggers.....	5,656 17
Painters and paints.....	20,896 05
Cabinet makers.....	35,779 90
Labor and teaming, &c.....	61,890 14
Contingent pay-roll.....	16,988 79

664,901 28

Error in amount reported available September 30, 1863.....	9,693 60
Balance in hands of disbursing agent September 30, 1864....	31,177 06
Balance in treasury September 30, 1864.....	442,902 36

1,148,674 30

Amounts included above to be refunded, viz:

Furniture and cabinet work.....	\$16,911 53
Work for note bureau.....	66,946 71

83,858 24

TREASURY DEPARTMENT,
Office Light-house Board, Washington City, Oct. 5, 1864.

SIR: I have the honor respectfully to submit a report of the operations and condition of the light-house establishment for the fiscal year ending 30th June, 1864.

In the first light-house district, embracing the coasts from the northeastern boundary of Maine to Hampton harbor, New Hampshire, (44 lights,) the various light-house structures have received careful and intelligent supervision, and their condition gives assurance of faithful discharge of duty on the part of the employes.

The stations have been renovated, and such repairs made as opportunity and the exigencies of the service would allow. Repairs more or less extensive have been made at the following stations, viz: Manheigin, Whitehead, Boon island, Martinicus, Saddleback, Owl Head, Deer Island Thoroughfare, Hendrick's Head, Negro island, Libby island, Eagle island Point, West Quoddy Head, Moose Peak, Nash's island, Narraguagus, Petit Menan, Mount Desert Rock, Bear island, Edgemoggin, Pumpkin island, Tenant's harbor, Seguin, Fort Point, Cape Elizabeth, Isle of Shoals, Portsmouth, and Whale's Back.

Every station in the district has been visited by officers or agents of the board within the year, and all indispensable requisites supplied. Under a system of constant supervision, all defects, needs, &c., are at once discovered and remedied.

The following stations yet require attention to bring them to a condition of the highest efficiency: Portland Head, Cape Elizabeth, Wood island, Goat island, Boon island, Little River, Libby island, Mount Desert Rock, and Moose Peak.

The light-keepers have been generally faithful to their trust, and in all cases the lights, so far as this board is advised, have given satisfactory aid to navigation.

An appropriation of \$20,000 was made at the last session of Congress "for additional aids to navigation to facilitate the entrance to Portland, Maine, by suitably marking Alden's Rock and Bulwark Shoal, or otherwise." After a careful investigation of the case, it is the opinion of the board that the proposed end will be best subserved by increasing the height of the tower at Portland Head and placing therein a light of the second order, which will have a range of visibility beyond Bulwark Shoal, and, in conjunction with the present lights at Cape Elizabeth, by giving to an entering vessel her exact position enable the master to avoid Alden's Rock. This plan has been adopted and the necessary instructions given for its immediate execution.

The buoyage of the district (comprising 290 buoys) has been maintained in an efficient condition, and the tenders have been usefully employed during the year. The severity and continuance of storms during the last spring carried from their stations many of the buoys, but they have been promptly replaced.

The Coast Survey has, at the request of this office, made examinations of several localities in this district for which buoys had been required, and it is expected that the necessary buoys will be placed upon the opening of the next working season.

The second light-house district embraces the coasts from Hampton harbor, New Hampshire, to Gooseberry inlet, Massachusetts, (53 lights.)

Important and needful repairs have been in progress at Cuttyhunk, Cape Ann, Marblehead and Point Gammon light-houses; and at the following stations renovations, reported as in progress at the date of the last annual report, have been completed: Wing's Neck, Edgartown, Narrows, Eastern Point, Long Island Head, Ipswich, Great Point, Boston, Monomoy, Long Point, Cape Poge, Chatham, Sandy Neck, Eishop and Clerks, Plymouth, Palmer's island, and Brant Point.

At Newburyport, in addition to repairing the works constructed for the pro-

tection of the site, it was found necessary, in order to conform to a change of channel over the bar, to remove the Bug Light to a new position. The buoys have been shifted so as to conform to the change.

The general state of the various aids to navigation in the district furnishes substantial evidence of the zeal and fidelity of the officers charged with the service.

The duties of repairing and of supplying deficiencies of illuminating apparatus and appliances have been performed with commendable assiduity and intelligence.

The iron beacon on Black Rock (Gloucester harbor) was run into by a vessel and seriously damaged. It was promptly repaired and re-established.

The wooden spar-beacon on Hardy's Rock was carried away and destroyed by the sea. A new beacon of a similar character has been provided, and will be placed in position at the first suitable opportunity.

The stone beacon at Great Fawn bar having become injured by exposure to heavy storms, instructions for its complete repair have been given.

Needful repairs to the fog-signals (bells) at Eastern Point, Cape Ann, and Race Point have been made. The signal at Cape Ann (whistle sounded by caloric engine) has been reported as being inefficient from want of power.

Minor repairs are yet required at a few stations, which, completed, will leave the district in a state of high efficiency.

The engineer reports that not a single case of neglect of the illuminating apparatus has yet reached his knowledge—a fact attesting the thorough instruction of the keepers.

The several light-vessels of the district (except Cross Rip) have remained almost continuously at their stations, the removals by stress of weather having been but of a very temporary character. The Cross Rip vessel was driven ashore at Cape Poge and lost. Her station has been occupied by the relief vessel of the district until within the past few weeks, when a new vessel becoming available, was sent to permanently occupy the station.

The buoyage and beaconage (518 buoys) have been well attended to, and seem to have given general satisfaction.

The duty of inspecting and testing oil and other supplies—the greater portions of which, for the whole establishment, are procured and distributed from this district—has been faithfully and satisfactorily performed.

The third light-house district embraces the coasts from Gooseberry Point, Massachusetts, to Squam inlet, New Jersey, including Lake Champlain and Hudson river, (92 lights.)

The various aids to navigation in this district have been zealously cared for, and a rigid and constant supervision has shown them to be in a state of great usefulness.

Upon securing the site at Staten Island as a depot for light-house purposes, measures were immediately taken to push forward to completion the buildings necessary for the reception of stores, supplies, &c. The storehouse is now well advanced in construction, and it is proposed to remove thither a large portion of the costly illuminating apparatus now stored at New York, thus saving high rent, and avoiding much risk of damage from fire, &c.

The embarrassments that have arisen in the prosecution of the work necessary to complete the arrangements for the transfer of this property from the revenue marine bureau to the Light-house Board have been submitted to the honorable Secretary, and it is hoped may receive his early attention.

The work of repairs at Princess Bay light-house, in progress at the date of the last annual report, has been completed in a satisfactory manner. The keeper's dwelling is very old, and its replacement at a suitable moment by a new structure is proposed.

The lantern glass at Sandy Hook east beacon having been frequently shattered by the firing of the guns at the neighboring fort, it is proposed to remove,

at some future time, the beacon to a position nearer to the point of the Hook, which it is intended to mark, and which is steadily making to the northward.

Repairs and renovations, more or less extensive, have been made at the following light stations: New London, Robbin's Reef, Sand's Point, Brockway, Black Rock, Great Captain's island, Norwalk island, Old Field Point, Faulkner's island, North Dumpling, Morgan's Point, Gull island, Plum island, Horton's Point, Saybrook, Watch Hill, Point Judith, Prudence island, Bristol ferry, Nayat Point, Dutch island, Gardiner's island, and Eaton's Neck. Other repairs, &c., will be made as time and opportunity offer, and will be duly reported.

Extensive renovations at Warwick, Sand's Point, and Nayat Point light-stations are indispensably necessary, and special appropriations to meet the expense are asked of Congress.

The special appropriation for beacons at Connimicut Point and Bullock's Point, in Providence river, having been found insufficient for the erection of suitable structures, an estimate is submitted of additional funds required.

Extensive renovations are found to be required at Split Rock light-house, in Lake Champlain, and a special estimate of funds necessary to meet the expense of putting it in good condition is submitted.

The light-vessels have proved of great service, and have been maintained constantly at their stations during the year, none having gone adrift, and no accident or damage having occurred to any.

The Stratford Point light-vessel, for the rebuilding of which a special appropriation was, at the last session of Congress, asked but not granted, has undergone extensive and costly repairs from the general appropriation fund, and was, in May last, replaced upon her station. She is now in an efficient condition.

The Succunnet Shoal light-vessel having been judged to be in need of repairs, was taken into New London, and an examination showed that immediate and extensive overhauling was required. This was authorized and is now under way.

A fog-bell at Stratford Point, for which a special appropriation was made by Congress, has been erected, and is now in useful operation. The signal consists of a bell, worked by clock-work machinery.

The buoyage of the district (396 buoys) has been creditably performed. It is scattered over a considerable area, and requires unremitting vigilance; yet every requirement of navigation in this respect has been fully met, so far as this board is advised.

The bell-boat which had been repaired with the intention of replacing it at Shagwong reef has not been so placed, the experience of this board tending to discourage any attempt at using such vessels, especially in high latitudes, where the driving spray in winter soon aggregates into such a mass of ice as to insure the foundering of the boat.

The day-beacons in Bridgeport harbor need some repairs, which have been authorized and are now in progress. Saybrook beacon is also in need of some minor repairs, which will be attended to next summer.

The other beacons and spindles are in good order.

The two tenders of the district have been constantly and usefully employed.

The fourth light-house district embraces the coasts from Squam inlet, New Jersey, to Metomkin inlet, Virginia, including Delaware bay and tributaries, (18 lights.)

The aids to navigation within its limits have been kept in an efficient condition, with but few casualties or unusual expenses.

Congress having at its last session appropriated \$17,500 for rebuilding the beacon-light at Cape Henlopen, the old site being unsuitable by reason of the beach at that place having made out some 400 yards since 1842, vigorous measures to complete the work at the earliest practicable day have been taken, and it is now making good progress.

Considerable apprehension was experienced in consequence of the reported encroachment of the sea at Absecum, which it was stated would, in a short time, imperil the existence of the light-house structure at that point. The alarm seemed to be well grounded but it was, and is, the settled conviction of the board that the encroachment had, from natural causes, reached its extreme limit, and that henceforth the water would recede. To determine this point a series of tests was inaugurated, surveys and measurements being made every two weeks, and thus far they have confirmed the previous conviction of the board as to the cessation of encroachment.

The necessity of works of protection to the light-house site at Cohansey, which is in danger from the steady encroachment of the water, and for which a special estimate was submitted at the last session of Congress, still continues, and an item to cover the expense is again submitted.

The Five Fathom Bank light-vessel, which occupies a position of great exposure off Cape May, was by stress of weather, in April last, driven from her moorings. She was taken to Wilmington, and after having new chain and anchor provided, was returned to her post.

The buoyage of the district (91 buoys) has received careful attention, and has given general satisfaction.

The fifth light-house district embraces the coasts from Metomkin inlet, Virginia, to New River inlet, North Carolina, including Chesapeake bay and tributaries, Albemarle and Pamlico sounds, (65 lights.)

In those portions of the district which have been brought permanently within the control of the government, the lights and other aids to navigation have been maintained in an efficient condition.

The remainder of the district is at present not in a condition to receive the attention of the board.

The fine first-order light-house at Cape Charles, which had progressed at the breaking out of the rebellion to a height of 80 feet, has been completed in a substantial manner, fitted with a first-order lens apparatus of the most approved pattern, and a light exhibited therefrom on the evening of the 7th ultimo. Owing to the liability of this important light to an attack from the enemy, a competent military guard for its protection has been asked for. Congress at its late session made an appropriation of \$20,000 for completing the work, but in consequence of the unprecedented rise in the price of labor and materials of all kinds, it was found that the expense overran the amount. An appropriation to cover the deficiency is submitted.

Repairs and renovations more or less extensive have been made at the following stations: Hog island, Blakiston's island, Piney Point, Pool's island, and North Point. Upon the last four, new lanterns have been placed.

The light-house at Sharp's island, in Chesapeake bay, is in imminent danger of being destroyed by the washing away of the bank on which it stands. The district engineer is of opinion that it cannot possibly remain during the coming winter. He has therefore made arrangements to have a temporary light shown, on the destruction of the light-house. An estimate of the amount necessary to meet the expense of erecting a new structure, in a secure position, is submitted.

The light-houses at Clay island, Fog Point, Watt's island, Tuckey Point, Fishing Battery, and Havre-de-Grace, being at present fitted with lanterns of an old and exceedingly defective character, the interests of commerce demand that steps be taken to remedy the evil. An estimate to cover the cost of furnishing new lanterns of proper plan is submitted.

The fine cut-stone tower at Cape Henry (built in 1791, and yet in excellent order) is liable to injury from fire, in consequence of having an old-fashioned wooden stairway, greatly decayed and insecure. It is deemed advisable to provide a cast-iron spiral stairway for this tower, and an estimate to cover the cost is submitted.

The light-house at Wade's Point, whose destruction for the second time was alluded to in the last annual report, has not been re-established, the danger of a recurrence of injury from the rebels not yet having been entirely removed. The interests of commerce at this time will not materially suffer from its not being lighted.

At the date of the last annual report, a temporary light-vessel marked Brant Island shoal. Since then a screw-pile light-house has been erected on the point of the shoal, and lighted, and the vessel removed to Newbern, where in March last she was sunk by order of the military authorities, as an obstruction to rebel naval movements in Neuse or Trent river.

The light-stations at Cape Hatteras and Cape Lookout being fitted with wooden steps, and liable from that cause to accidents from fire, estimates for proper stairways of cast iron are submitted.

The absence of any special pressing necessity for re-establishing at this time the lights at Body's island, Pamplio Point, and Bogue Banks has induced the board to abstain from any action in the premises.

The light-vessel service of the district has been carefully attended to.

Two of the light-vessels which were mentioned in the last annual report as being detained in New Bedford, under the lien law of the State, for debts due by the contractor, have been placed upon the stations on Upper and Lower Cedar Points in the Potomac river, for which they were originally designed. A competent guard for their protection has been detailed from the army.

Extensive repairs have been made to the Willoughby spit light-vessel.

The light-vessel which formerly marked the Tail of the Horse Shoe being, by the re-exhibition of Cape Henry light-house, rendered unnecessary, was placed to mark an obstruction in Elizabeth river, upon the recommendation of the military authorities.

Upon application of the War Department, in May last, a light-vessel was placed to mark a spit off the entrance to York river, Virginia, where she remained until August 2, at which time, her services being no longer desired as a means of facilitating the movements of army transports, she was removed. She has since been placed on Wolf Trap shoal.

The light-vessel formerly marking Royal shoals, North Carolina, was removed by the rebels in 1861, and sunk as part of the barricade in Neuse river; but after the capture of Newbern by the United States forces, she (with two others) was raised. She was subsequently brought to Baltimore, thoroughly repaired, and is now employed as a relief vessel for the district.

The light-vessel on Frying-Pan shoals, North Carolina, was driven from her station during a severe storm and put into Port Royal, South Carolina. Her services being indispensable elsewhere, she has not been returned to her station, but the board hopes soon to be able to replace on the Frying-Pan shoals a new vessel now building under contract.

In May, 1864, a raiding party of the enemy crossed the Potomac and effectually destroyed the lantern at Blakiston's Island light-house, besides committing other depredations at the station. The necessary repairs, including the furnishing of a new lantern, are in progress.

Upon the movement of the army of the Potomac to the south side of James river, necessitating the use of that highway as a medium for transporting stores and supplies, the lights at Point of Shoals, White shoals, and Deep Water shoals, were re-established, and have been, up to this time, continued in operation. Their permanency will depend upon their protection from the enemy.

The excavation of iron ore at Lazaretto Point, near Baltimore, has been continued during the year, as weather and other circumstances would permit, and about 700 tons have been obtained and sold, the net amount accruing therefrom, \$1,042, having been paid into the treasury of the United States. The

general appearance of the place of excavation gives assurance of a much larger yield as the work progresses.

The advantages expected to arise from the storehouse and wharf belonging to the light-house establishment at that place have not been enjoyed to the full extent anticipated, for the reason that the greater part of the storehouse has been appropriated by the military authorities for storing ordnance materials.

The buoy service of the district (548 buoys) has been satisfactorily performed, though under great embarrassment from scarcity and high prices of labor and materials.

The rebels having, in July, destroyed a part of the railroad bridges over Bush and Gunpowder rivers, gunboats have been stationed as a guard against a recurrence of the damage. To facilitate the movements of these vessels, the channels have been suitably marked by buoys.

In the sixth light-house district, embracing the coasts from New River inlet, North Carolina, to Cape Canaveral light-house, Florida, inclusive, (36 lights,) the limited amount of territory recovered to the authority of the United States has, as reported last year, resulted in but few measures for restoring lights and other aids to navigation.

The new lights established to facilitate entrance into Port Royal harbor have proved of immense benefit to the large commerce seeking that port. The vessel at Fishing Rip, a part of the system of ranges for this entrance, was furnished the board by the Navy Department, but was found to be too old and unseaworthy to contribute as effective service as was desired. She was accordingly removed and converted into a hulk for storing light-house materials and supplies, and the light-vessel formerly marking Frying-Pan shoals, North Carolina, which had been driven into Port Royal by stress of weather, was stationed at Martin's Industry, in place of the vessel formerly there, and which was deemed to be too small for so exposed a position, while the latter vessel (Martin's Industry) has been placed on Fishing Rip. This exchange has been found to be of great benefit to the service.

The Rattlesnake Shoal light-vessel, off Charleston, was, during a severe storm, driven from her station, with loss of moorings. She was supplied with new chains and anchors, and replaced at her post.

On the inauguration of the military movement into Florida, by way of St. John's river, in February last, the general commanding represented to the board the absolute necessity of suitably marking the changeable and narrow channel of that river. Prompt measures were taken to comply with the request of the military authorities, and as soon as possible the necessary buoys were placed in position, and the lights exhibited from the old tower at the mouth of the St. John's.

Steps have been taken, also, upon the recommendation of the military authorities, to re-establish the light formerly in operation at Amelia island; the necessary repairs and renovations were made, and its re-exhibition at an early day is confidently looked for.

The buoyage of the district, (272 buoys,) so far as practicable, has received careful attention, the following localities having been properly marked: Charleston bar, St. Helena sound, Port Royal, Tybee bar, Calibogue sound, and Nassau sound.

The seventh light-house district embraces the coast of Florida, from St. Augustine to Egmont key, (12 lights and 79 buoys.)

The lights and other aids to navigation, so far as they are under the control of the board, have been kept in useful operation, and it is hoped that the recent successes of the United States forces in the Gulf will have the effect to bring within the range of restoration other lights and buoys.

When it becomes advisable to do so, the board will re-establish these aids as rapidly as safety, time, and other circumstances will permit.

In the eighth and ninth light-house districts, embracing the coasts from Egmont key to Rio Grande, Texas, (50 light-stations,) the various aids to navigation, so far as they have been recovered to the custody of the United States, have been carefully attended, and their condition, under the peculiar circumstances of the case, is highly satisfactory.

Upon the occupation of the southern portion of Texas by the United States forces, application was made by the military authorities for the re-establishment of the lights at Point Isabel, Ship shoal, Point de Fer, Timballier, Aransas Pass, and Padre island. Measures were promptly inaugurated to ascertain the condition and necessities of these stations, and suitable illuminating apparatus has been sent out to be put in position when the requisite repairs shall have been completed.

The investigation on this occasion developed the following state of facts :

The light-house on Southwest reef was found to have sustained much damage from the rebels.

At Matagorda the foundation has been in a great measure blown out and the tower partially thrown down. The keeper's dwelling is gone.

Matagorda Swash light-house has been entirely destroyed.

Padre Island light-house has been entirely destroyed.

Saluria light-house has been partly destroyed.

The re-establishment of the light at Barrataria (discontinued in 1859) having become a measure of considerable importance to the army and navy, by reason of the occupation of Fort Livingstone, and the consequent frequent intercourse between that point and other stations on the coast, was authorized. This light is, moreover, a convenient point of departure for the numerous transports, &c., going westward by the inside passage at Ship shoal.

Upon the capture by the United States forces of the approaches to Mobile bay, immediate steps were taken to re-establish such lights in that vicinity as might be assured of permanent security. The necessary examinations have been made with a view to determine the extent of repairs required, and the lights will be re-exhibited whenever it is deemed advisable.

The tower at Mobile Point, standing in close proximity to Fort Morgan, was completely riddled by heavy shot during the bombardment of that work. It will eventually have to be entirely rebuilt. A temporary light of a small class has been established upon the highest point of the southwest bastion.

The magnificent tower at Sand island was blown up by the enemy early in the commencement of the rebellion. It will have to be entirely rebuilt. Meanwhile steps have been taken to establish temporarily a fourth-order light at this point.

The bell-boat formerly stationed to mark the entrance to Pass à l'Outre, and which had been removed from its station, has been recovered and taken to New Orleans.

The bell-boat which marked Mobile bay entrance was found partially buried in the sand on Dauphin island. Instructions for its recovery have been given.

The day-beacons at Pass à l'Outre were, during a very severe storm, destroyed, but measures were adopted to replace them by approved wooden structures.

The two tenders of the district have been constantly and usefully employed in attending buoys and in transporting workmen and materials for the repair and re-establishment of lights, &c. They have received considerable renovation during the year.

On the 19th of July last the tender Martha, while engaged in the performance of her duties, was captured in Chandeleur sound by a party of rebels. After stripping the vessel of fixtures, rigging, furniture, and cargo, she was burnt, and her master and crew taken prisoners. The master subsequently escaped and returned to New Orleans.

The buoyage of the district (124 buoys, &c.) has received as much attention as the difficulties of the case would permit.

The tenth light-house district embraces all lights, &c., on Lakes Erie and Ontario, and St. Lawrence and Niagara rivers, (33 light-stations.)

The several aids to navigation are generally in good order, but few extensive repairs having been found necessary. The inspector states that no reports unfavorable either to the lights or keepers have been brought to his notice, and that, so far as known, general satisfaction has been given to navigators and others interested in commerce.

On the night of the 1st of January last the light-house at Green island, Lake Erie, was destroyed by fire. Measures were taken to provide temporary expedients for the exhibition of the light during the season of navigation, and an estimate of funds required for the erection of a new structure is submitted.

Various and extensive repairs and renovations having been found to be necessary at Galloo Island and Turtle Island light-stations, special estimates of appropriations required to cover the expense of these works are submitted.

The light at Port Clinton, which was discontinued in 1859, having been represented to be necessary to the commerce of the lakes, the question was investigated, and the result was such as to warrant the board in recommending to the honorable Secretary of the Treasury the re-establishment of the light. The necessary authority having been given by the department, the light was re-exhibited August 1, 1864.

The buoyage of the district (72 buoys) has received careful attention, and these aids to navigation have been maintained in an efficient condition with less than the usual number of casualties.

Representations having been received to the effect that the channel formerly used in Sandusky bay had again become practicable, and that the old ranges which had been discontinued on account of uselessness should be re-established to facilitate the commerce of the locality, the necessary surveys to verify the report were ordered and made, and resulted in its confirmation. The work of re-establishing these ranges will be commenced as soon as practicable, plans and estimates for permanent works being now in course of preparation. Meanwhile a temporary range has been established.

The eleventh light-house district embraces Lakes St. Clair, Huron, Michigan, and Superior, and Green bay and tributaries, (48 lights.)

The aids to navigation within its limits have been carefully attended, and many important works of renovation have been completed during the year, or are now in progress.

Under authority of the department, the light at Round island, (river Ste. Marie, above the Sault,) discontinued in 1859, has been re-established, and the light will be re-exhibited in a few days.

In consequence of a reported difficulty in distinguishing the small light at St. Joseph's from other lights in the vicinity, the color of the light has been changed from white to red, which it is hoped will effectually remove the cause of complaint.

The light-house at La Pointe was found to be in danger in consequence of the loose sand on which it is built having been by the action of the wind removed from around the foundation timbers. Stone piers sunk in the sand, and supporting cast-iron columns, have been erected, and on these the building has been placed. Should experience prove that the movement of the sand is not arrested, the surface of the ground will be coated with gravel.

The work upon the structures at Kenosha, Racine, and Milwaukie, for which special appropriations were made, has not satisfactorily progressed during the year. Notwithstanding every effort on the part of this board, it has been found impossible to secure from the contractors the necessary deliveries of timber, as agreed upon; and after exhausting every means to induce a performance of their

obligations, the board has felt itself called upon to order its engineer to declare the contracts forfeited for non-fulfilment, and to procure the requisite materials in open market. A scarcity of lumber has prevented, up to this time, any large quantity of timber being obtained. The purchases will be continued, as opportunity offers, during the autumn and winter, and it is hoped that a sufficient amount will have been collected during that time to warrant the commencement of framing in the spring. A considerable portion of the stone and iron work has been procured, and is now ready for use.

The fog-signal authorized by Congress for Port du Morts has been completed and put in operation. The signal consists of a trumpet blown by means of a caloric engine.

Renovations, more or less extensive, have been made at Fort Gratiot, Cheboygan, Tail Point, and Raspberry Island light-stations.

Much yet remains to be done to bring the various aids to navigation in this district up to a condition of the fullest efficiency, but no efforts will be omitted to push forward all works of indispensable necessity as time and means permit.

Extensive repairs are required at Copper Harbor, Eagle Harbor, Grand Island, Marquette, Ontonagon, and Windmill light-stations, for most of which works special appropriations are recommended.

The buoyage of the district (37 buoys) has been maintained in a satisfactory condition, but it has been found that many of the buoys have been dragged from their stations by passing tow-boats, an evil which seems to demand the interference of the law officers of the government.

The twelfth light-house district comprises the entire Pacific coast of the United States, (18 lights.)

The light-house structures in this district were mainly erected or largely rebuilt, under the direction of this board, and the benefits of original construction upon scientific principles are strongly manifested in the small amount of repairs they require annually.

The temporary light at Ediz Hook is yet continued. Difficulties have arisen to delay the construction of the permanent work authorized for this place. During the last spring a remarkable freshet destroyed the settlement of Port Angeles, and so complete was the destruction of the town that for a time it was believed that some other place would be selected as a port of entry, which would have lessened the necessity for the light. Owing to the advance in the price of labor and materials, the expense of the permanent work will overrun the appropriation, but the completion of the structure has been ordered, and the excess will be defrayed out of the general appropriation fund.

During a severe storm in October, 1863, the foundation of the light-house at Umpqua river was washed away to such an extent as to cause serious apprehension that the structure would be destroyed on the recurrence of a storm. The lens was accordingly taken down and removed. While the workmen were engaged in taking down the lantern, preparatory to removing it, the tower began to exhibit symptoms of tottering, and soon afterwards fell. The board is of opinion that the interests of commerce will be best subserved by establishing a new light upon Cape Arago, instead of re-erecting at Umpqua, and a special estimate to cover the cost is submitted.

The work of removing the light at Fort Point to a position over the stair-way of the fort, which was in progress at the date of the last annual report, has been satisfactorily completed and the new light exhibited.

A suitable building, to accommodate the buoys and appliances stored at Mare island has been erected, and great benefit is anticipated from the increased protection to this species of property.

New iron buoys having been found to be required for service on this coast, it was deemed advisable, in view of the enormous expense of freight from the

Atlantic seaboard, to have them constructed at San Francisco. A contract for their manufacture, on highly advantageous terms, has been concluded.

The general condition of the various aids to navigation is very satisfactory.

On application of this board, an appropriation was made at the last session of Congress for providing additional light-vessels for general service. Upon opening the bids obtained in response to the public advertisement, it was found that the prices were such as to admit of the construction and equipment of but three vessels, (two of 1st class and one of 2d class,) within the amount appropriated (\$150,000.) Contracts for such vessels were accordingly entered into, and the work is making good progress. It is proposed to place one of these vessels at Frying-Pan shoals, in place of the boat transferred from that station to Martin's Industry.

Under the circumstances of unprecedented advance in prices of all materials and labor and the great scarcity of workmen, the board feels that it has reason to congratulate itself on having accomplished so much as has been done during the year. It avails itself of this occasion to acknowledge valuable assistance and facilities received from the War and Navy Departments and the Coast Survey.

The necessity for seeking for an economical and abundant illuminating material for the lights under its charge was pressed upon the attention of the board at its first establishment by the rapidly increasing price of sperm oil and the progressive increase of lights required to meet the demands of a constantly developing commerce. These lights now amount in the aggregate to about 500.

Accounts having been received of the introduction of colza or rape-seed oil into the light-houses of France with favorable results, measures were taken to import some of the oil for experiment and a quantity of the seed for distribution. Both the imported oil and that of home production have been used in some of our light-houses, and there is good reason to expect that, when circumstances shall admit of its more extensive cultivation, and experience shall perfect its purification, some reliance may be placed on this source of supply. One thousand gallons were purchased in May, 1864.

Careful experiments have been made and are still in course of prosecution with lard-oil. The results so far have been very favorable, both as to illuminating power and fluidity at low temperature, and the board has strong reason to expect that it may ere long look to this material for an economical and unfailing supply.

In the last annual report some statement was made of the relative cost of these illuminating materials which will apply substantially at this time.

Fifteen thousand gallons of lard-oil were purchased in April and distributed for use during the winter.

Since the last annual report the board has been called upon to lament the loss of one of its original and most useful members, in the death, on the 22d of April, of Major General Joseph G. Totten. A member of the special board to inquire into the condition of the light-house establishment, and then of the present board, he took an important part in all their duties, and the engineering operations of the establishment bear testimony to his professional industry, and especially is the splendid light-house on Minot's ledge a monument of his engineering skill.

I am, very respectfully,

W. B. SHUBRICK,

Rear-Admiral, Chairman Light-house Board.

HON. W. P. FESSENDEN,

Secretary of the Treasury.

WASHINGTON CITY, *October 22, 1864.*

GENTLEMEN: I have expended a considerable portion of my vacation in the further investigation of the subject of the materials used for light-house illumination, and in studying the phenomena of sound in their relation to fog-signals.

The previous investigations in regard to the properties of lard-oil clearly indicated that this material could be advantageously substituted for sperm oil in the Fresnel apparatus and in the Franklin lamps, in which the combustion is carried on at a high temperature, while, from its greater specific gravity, less fluidity and less ascensional power at lower temperatures, it would not be as applicable to smaller lamps, in which the oil is supplied at a lower temperature, and in a considerable degree by what is called capillarity.

These conclusions have been fully borne out by experiments on a larger scale during the past year. The lard-oil has been found to succeed in the coldest weather, and to be capable of yielding more light with the same lamp than sperm oil, and with not more than a corresponding amount of consumption.

It is true that a number of complaints have been made against lard-oil by light-house keepers, but these complaints have in every case been found similar to those which have been made from year to year by incompetent keepers against the sperm oil, with which they were previously furnished. The difficulties complained of have arisen from carelessness or ignorance in the management of the lamps.

This remark does not apply to the complaints of the keepers of light-vessels, since the lard-oil, as was shown by my experiments, is not well adapted to burning in lamps of the kind which are employed on board these vessels, and I regret that, contrary to my oral directions, this kind of oil should have been supplied for use in this branch of the light-house service.

My attention has, during the last month, been especially devoted to the lamps and the material for the use of light-vessels, and I think the results of the investigation thus far bid fair to introduce improvements of some importance.

Though petroleum oil cannot be used in the Fresnel or Franklin lamps, or any of the larger lamps, yet I think it may be employed with advantage in those of smaller size, and particularly in those on light-ships. I have obtained a fountain lamp with a circular wick, which burns petroleum in great perfection, and which, I think, can be adapted to the lamps used with the reflectors on board light-vessels.

I have also made some experiments on the different kinds of wick to be used with lard-oil, and in this case, as in others, have endeavored to introduce scientific methods in the improvement of the materials and operations of the light-house service, instead of the loose empirical modes which are frequently employed for arriving at practical results.

The experiments on sound, which have been commenced, are not in a condition to warrant an account of them at this time. I may mention that a committee of the British Association has been charged with the investigation of the subject of fog-signals, and that it might be well to confer with this committee on the subject. It is a question of some importance to ascertain whether the steam-whistle, actuated by atmospheric air, cannot advantageously be substituted for the trumpet, and whether there is a preference in the different notes of a sounding apparatus as to the penetration of the air when filled with fog.

I am sorry to learn that the small appropriation asked from Congress for defraying the expenses of experiments was not granted. The committee of Congress to which the subject was referred were probably unacquainted with the fact that the result of the experiments on oils have saved the government in the purchase of light-house materials at least forty thousand dollars, and that the continuance of investigations of this kind will always tend, not only to lessen the cost, but also to increase the efficiency of the light-house service.

Although the members of the light-house board are willing to give their services gratuitously, they cannot be expected to defray the cost of the investigations.

Respectfully submitted.

JOSEPH HENRY,

Chairman of Committee on Experiments.

THE LIGHT-HOUSE BOARD.

UNITED STATES COAST SURVEY STATION,

Near Danbury, Connecticut, September 30, 1864.

SIR: In conformity with the regulations for the Coast Survey, I have the honor to submit my estimates for the fiscal year 1865-'66, and would respectfully request that, if approved, they may be included with your estimates for appropriations.

A brief statement of the progress made during the year will be appended, showing the adaptation of the survey in all parts of its organization to the present requirements of the government service in connexion with military and naval operations.

The estimates now presented agree in amount with the appropriations of last year, which, like that for the preceding year, was much less than the appropriation for 1861-'62.

They conform to the plan of working approved by the department, being designed to keep the survey in progress in its regular work, to render active aid in co-operating with the fleets and armies of the Union, and to continue the publication of maps and charts now rendered so important as adjuncts in prosecuting the war. The evidence as to the value of our field and office work in that connexion has been made conclusive by the uniform tenor of communications from officers of high position in the army and navy.

The war has not essentially changed the distribution of the working parties. About the same number as heretofore assigned to duty on the southern coast has been in surveying service with the national forces in the rebellious States. Four parties have acted under the orders of Admiral Lee, three with as many vessels under Admiral Dahlgren, and two under Admiral Porter. For the military service in Eastern Virginia and Maryland, six parties have been employed during parts of the season: in West Virginia, three parties; at Knoxville, two parties; at Nashville, two; at Chattanooga, five; previous to and during the movement on the rebel works at Missionary ridge two parties accompanied the army in Louisiana and Texas, and one was attached to the Florida tax commission.

From the several officers in whose commands the parties have been associated, warm acknowledgments have been reiterated as to the importance of the services rendered and their bearing on the success of military and naval operations.

My annual report will contain, as usual, notices of the work in detail. Very brief mention will here be made of the localities and nature of this class of operations, and after it, mention of the advance made in the regular progress of the survey of the coast.

The survey has been kept in full co-operation with the blockading squadrons and with the armies of the Union, as heretofore. In the vicinity of Baltimore the survey of ground connected with the defences has been continued by Sub-Assistant Iardella, and during part of the season by Assistant C. M. Bache.

The topography of the approaches to the capital has been further extended beyond the northeast boundary of the District of Columbia by Sub-Assistant Ferguson. A minute topographical survey has been made of Arlington Heights by Messrs. Hergesheimer and McMath for the War Department, and special determinations for the effective use of heavy artillery at Washington, New York,

and Boston, by Assistant Schott. Sub-Assistant Donn is now engaged in surveying the approaches to the fords of the Potomac above and below Harper's Ferry. In West Virginia the latitude and longitude have been determined at eleven military posts by Assistant Dean and Sub-Assistant Mosman, and the magnetic variation of most of them by Mr. S. H. Lyman. At Clarksburg, Virginia, Mr. Lindenkohl assisted in compiling the military map of West Virginia, and computed the latitude of numerous points from the sextant observations of Lieutenant J. R. Meigs, chief engineer. Sub-Assistant Rockwell, before making a plane table survey of Strawberry Plains and of the city of Knoxville and its defensive works, in which duty he was associated with Mr. R. H. Talcott, was engaged in similar service at Sewall's Point, Virginia. Assistant West, after reconnaissance duty, which terminated with the battle of Missionary ridge, Tennessee, was in the same way employed at Bermuda Hundred, Virginia. Sub-Assistants Dorr and Donn made plane-table surveys of the environs and defences of Nashville, and of Chattanooga, Tennessee, previous to the repulse of the enemy from the south approach to that city; and Mr. Donn, in conjunction with Mr. Marindin, afterwards rendered similar service for the army near Petersburg, Virginia. Sub-Assistant Boyd has made a complete survey of the battle-field of Chickamauga, Georgia, and is now under orders to rejoin the army at Chattanooga.

In connexion with the North Atlantic blockading squadron, Mr. Strausz, and subsequently Mr. Cordell, have made resurveys of the bar and channel into Beaufort, North Carolina. The last-named officer sounded the harbor and the entire channel which leads from Beaufort through the straits and through Core sound, marking its course by buoys and stakes. The same parties reset the buoys between the bar and Fort Macon to conform to the resurveys. Mr. Strausz also made a resurvey of Hatteras inlet and sounded out a stretch of six miles of the Neuse river below Newbern, marking the channels in both localities by buoys. The triangulation of the Neuse river was at the same time continued by Assistant Fairfield. Sub-Assistant Halter made a triangulation and shore-line survey of Croatan sound and of Roanoke river, North Carolina, above and below Plymouth. These waters were thoroughly sounded by Sub-Assistant Bradford, and the channel through the latter was marked by spar buoys. He has since sounded and made a chart of Trent's Reach, in James river, Virginia, and is now engaged in the survey of Bogue sound. A careful reconnaissance of the Cape Lookout shoals has been made by Lieutenant Commander Phelps, with the surveying steamer Corwin.

Attached to the South Atlantic blockading squadron, and for service also with the military forces, three parties, with the surveying steamer Vixen and schooners Bailey and Caswell, were assigned. Assistant Boutelle, besides the complete development of the channels at present leading into Charleston harbor, in which, also, Assistant Edwards was engaged during part of the season, reset the buoys and prepared new sailing directions. Under his direction Folly river and Light-house inlet have been sounded by Sub-Assistant Weber, the hydrography of Wassaw sound has been completed, and a resurvey made of the bar and channel of the St. John's river to a point near Mayport Mills. As heretofore, his party in the Vixen, in charge of Acting Master Platt, rendered the pilot service required for the vessels of the whole South Atlantic squadron.

Sub-Assistant Dennis made surveys for defensive works at Pilatka, Florida; extended the survey of the St. John's river above Jacksonville, and, during the military movements in that vicinity, made a reconnaissance of the roads leading towards St. Augustine, Picolata, and Mayport Mills. At Port Royal he surveyed Bay Point and Land's End for naval purposes, and on Morris and Folly islands traced the shore-lines of the inland passage between Light-house inlet and Folly river.

Mr McMath was on service with the United States tax commissioners for Florida, at Fernandina, and at St. Augustine. He also furnished for military use a copy of the county map, showing the interior of Florida beyond Jacksonville.

In the military department of the Gulf, Assistant Oltmanns served on the staff of Major General Franklin, and made surveys along the route of the 19th army corps, including the environs of Vermilionville, Opelousas, Washington, and Franklin, Louisiana.

Sub-Assistant Hosmer was present with the army detachment at Aransas Pass, Texas, and located the position of the rebel works on a map, after determining the changes that had taken place in the depth of water on the bar of that pass. He performed similar duty at Pass Cavallo, traced and marked the changes which had occurred at the eastern end of Matagorda island, and buoyed the channel into McHenry bayou. After joining the staff of Brigadier General Grover, in January, Mr. Hosmer made surveys at Madisonville and Morganza, Louisiana, and at Fort Adams, Mississippi. Both of these officers accompanied the army of Major General Banks through the Red river campaign.

On the Mississippi river, and for the use of the squadron under Admiral Porter, Assistant Gerdes made a topographical survey of Grand Gulf and its vicinity, and sounded the channel abreast of that post. This was followed by a reconnoissance, which included the shore and channel of about fifty miles of the course of the Mississippi, between Rodney and Vicksburg. He made, also, a minute survey of the Ohio river and its shores from Mound City to Cairo, Illinois, with soundings relative to inquiries concerning a navy yard site. Sub-Assistant Fendall assisted in this important survey, and was afterwards on duty with the gunboats which passed up Red river to act in concert with the land forces.

The transfer of some of these parties from one locality to another, as service required, has been noticed in the abstract just given; the transfer of others therein mentioned for prosecuting the usual work of the survey will appear in the short summary which follows.

In the northern sections of the Atlantic coast the regular operations of the survey have been continued, and the parties here enumerated are now at work. Sub-Assistant Dennis, in the topography of the lower part of Passamaquoddy bay, Maine; Assistant Fairfield, in coast triangulation near Mount Desert island, and Assistant McCorkle in similar duty in Penobscot river, near Bangor; Sub-Assistant Dorr, in the topography of the islands at the entrance of Penobscot bay; Sub-Assistant Ferguson, at the entrance of St. George's river, Maine; Assistant West, on the shores of Booth bay, Maine; Mr. McMath, on the east side of the Sheepscot river; Assistant Adams is completing plane-table work on the shores of the water-passages which enter the Kennebec near Bath, Maine; Assistant R. M. Bache, on the shores of the Kennebec above Bath, and Sub-Assistant Longfellow, in the survey of islands on the east side of Casco bay; Sub-Assistant Webber has sounded the St. George's river, Maine, and its approaches; Mr. Strausz, the waters of Quohog bay, and Lieutenant Commander Phelps has extended the hydrography eastward of the approaches to Portland entrance. Assistant Mitchell has examined the known dangers to navigation in Eastport harbor and Muscle Ridge channel, (Penobscot bay,) and indicated the position of desirable aids to navigation. He has also continued work connected with the special survey of Boston harbor for the United States commissioners.

Estimates for the fiscal year 1865-'66, and the appropriations for the fiscal year 1864-'65.

Object.	Estimates for the fiscal year 1865-'66.	Appropriated for fiscal year 1864-'65.
For survey of the Atlantic and Gulf coasts of the United States, including compensation of civilians engaged in the work, per act of March 3, 1843	\$181,000 00	\$178,000 00
For continuing the survey of the western coast of the United States, including compensation of civilians engaged in the work, per act of September 30, 1850.....	100,000 00	100,000 00
For continuing the survey of the Florida reefs and keys, including compensation of civilians engaged in the work, per act of March 3, 1849	11,000 00	11,000 00
For publishing the observations made in the progress of the survey of the coast of the United States, including compensation of civilians engaged in the work, per act of March 3, 1843.....	4,000 00	4,000 00
For repairs of steamers and sailing schooners used in the survey, per act of March 2, 1853.....	4,000 00	4,000 00
For pay and rations of engineers for three steamers used in the hydrography of the coast survey, no longer supplied by the Navy Department.....	6,000 00	*9,000 00
Total	306,000 00	306,000 00

*Formerly included in estimates of Navy Department.

Very respectfully, yours,

A. D. BACHE,
Superintendent United States Coast Survey.

Hon. W. P. FESSENDEN,
Secretary of the Treasury.

R.

Annual report of the Board of Supervising Inspectors of Steamboats.

WASHINGTON, November 1, 1864.

SIR: The board of supervising inspectors of steam vessels met in annual session at the city of New York, pursuant to adjournment, on the 12th day of October, 1864, and having considered the various subjects presented to them, have the honor of submitting their twelfth annual report.

An important act of Congress was passed on the 29th of April, 1864, "fixing certain rules and regulations for preventing collisions on the water." Whether these rules and regulations were intended to apply to steamers navigating the rivers and lakes of the United States as well as to those navigating the ocean, must be inferred from the nature of the cases which may arise, no less than from the language of the law itself. In some cases of inland navigation they cannot be applied with any degree of safety. To the ocean they are universally applicable. The 19th article of the act seems to provide for the continuance of the discretionary powers of this board, appropriately provided for by rules and regulations, as authorized by the act of Congress approved August 30, 1852; and therefore, while article 2 prohibits the carrying of any other lights than those prescribed, article 29 provides for construing those rules with due regard to all

the dangers of navigation, and to special and sudden exigencies which may arise in any particular case.

Upon narrow and crooked rivers the range of red and green lights upon the sides of steam vessels, as required by the act of April, 1864, is not accurate enough to enable pilots to determine the change of course or position which may be made by boats steaming in opposite directions in time to prevent collisions; and the same is true as to the Hudson and East rivers of New York, and like waters; while the range of the head and stern lights in late or present use is so much greater, owing to their further separation from each other, that the least change of direction can be seen by the pilots of such boats, so as to enable them to determine with great accuracy even the intentions of each other at a time when the side lights would give no indication whatever. Therefore, in view of this difficulty, and of the urgent remonstrance of owners and pilots, the board of supervising inspectors have regarded it as their duty to exercise the discretionary powers vested in them in such cases, and to set forth the harmony of the act of August 30, 1852, which grants those powers, with the provisions of the act of April 29, 1864, in view of the well-known dangers of the navigation in question.

The board has therefore passed the following resolution:

Resolved, That the very great danger involved in navigating the inland waters of the United States by steamers without the light heretofore usually carried at the stern, requires such a construction of the 2d article of the act of Congress of April 29, 1864, as will permit such light to be carried as before, in addition to the head and colored lights required by the rules of this board and of said act; the authority for such construction being found in article 19 of said act.

On the lakes, also, the attempt to carry out the rules of the act of 1864, without reference to the peculiar circumstances attendant upon the navigation of those waters, has already involved the loss of life and property, as in the cases of the steamer Ogdensburg, the steamer Sciota, and the steamer Arctic. Therefore the board has expressed its opinion of the necessity of adhering to the established rules of Congress, and of the board, in view of the "special circumstances" of that navigation, and in view, also, of the dangers resulting from the application of the general rules of the act of 1864 to such navigation. And it is hoped that if the board has erred in the exercise of the discretion which the law seems in its view to confer upon it, suitable provisions may be made by Congress to harmonize more perfectly the existing regulations on the subject.

The act of Congress passed June 8, 1864, in relation to the inspection of tow-boats, ferry-boats, and canal-boats, very largely increases the duties of steam-boat inspectors, and makes additional local inspectors necessary in such districts as contain a great number of such vessels, and in some localities the erection of new inspection districts. The act largely extends the operation of previous beneficent provisions of law for the safety of life and property, and will also bring a corresponding increase to the revenue of the government. It will also operate usefully in obtaining more full statistical information than has hitherto been procurable, as to the tonnage, operative force, and other particulars of the steam marine of the United States.

Two assistant inspectors for the district of New York, and a new local board for the port of Galena, Illinois, will be required, in addition to those already authorized by law. A committee of the board has been appointed, with full power on its part, in regard to these necessary additions to the force under its control, and to the increase of the salaries of inspectors, demanded by the great advance in the cost of living and the multiplication of duties created by the increase of the steam marine of the country, and by the duties imposed by the act of 1864.

The board finds that the duties of the inspectors in the several local districts have been performed with notable faithfulness, and in many cases under great embarrassments caused by the war.

The following are statements of the important occurrences which have been brought to the notice of the board during the past year :

Total number of steamers inspected during the year 1864.....	1, 471
Tonnage of steamers inspected during the year 1864.....	1, 105, 084
Number of pilots licensed during the year 1864.....	2, 880
Number of engineers licensed during the year 1864.....	3, 621
Number of boilers found defective in construction during the year 1864.....	34
Number of boilers which would not bear hydrostatic test during the year 1864.....	37
Number of violations of law investigated.....	40
Number of lives lost by explosion.....	13
Number of lives lost by foundering or beaching.....	169
<hr/>	
Total number of lives lost.....	182
Total number of lives saved by life-saving apparatus, as required by law.....	52
Loss of property by explosion.....	\$95, 000
Loss of property by fire.....	162, 000
Loss of property by wreck or foundering.....	60, 000
<hr/>	
Total loss of property on inspected steamers.....	317, 000
<hr/>	
Estimated value of steamers inspected in 1864.....	\$165, 762, 600
Estimated value of steamers inspected in 1863.....	110, 135, 057
<hr/>	
Increase in value from 1863 to 1864.....	55, 627, 543
<hr/>	

The reports from supervising districts, herewith annexed, together with the tabular statements furnished, will show in detail what statistics are upon the records of the several districts.

All which is respectfully submitted.

P. B. STILLMAN,
President pro tem.
JAMES N. MULLER,
Secretary.

Hon. WM. P. FESSENDEN,
Secretary of the Treasury.

S.

MINERAL LANDS AND MINES OF THE UNITED STATES.—DISTRIBUTION OF THE GOLD PRODUCT.

The tenure under which the mines and mineral lands of the United States have been held has been generally similar to that of European countries, the superior claim of the national sovereignty having been always maintained. There has been no royalty or tax of importance collected in any case, however, and with the exception of a small amount paid under leases of lead mines and salt springs, no revenues have been received from mineral reservations, nor from the mines when worked. The care and custody of the mineral lands of the United States was with the War Department, until, by the act of March 3, 1847, they were transferred to the Secretary of the Treasury. Finally, on the organization of the Interior Department, by act of March 3, 1849, they were transferred from the Secretary of the Treasury to that department.

Special acts of Congress at various times directed the sale, or gave the title to States in which they were located for sale, of reservations of salt springs and mineral lands. An act of March 3, 1829, directed the offer for sale of lead mineral lands in Missouri, after a descriptive advertisement should be issued, and six months' notice given. The act of March 3, 1847, by which the leases of lead mines were transferred from the War Department to the Treasury Department, established a general system of sale for the lead mineral lands, then the only important mineral lands worked on the public lands of the United States, at a minimum of five dollars per acre, subject to requirement of complete clearance under the lease, and to specific regulations as to the subdivisions, and proofs of mining title. The option of the mining occupant to continue under any existing lease was especially reserved.

This act was urgently called for by the people of Wisconsin and Iowa, in which States the lead-mine reservations had become a serious obstacle to the general improvement of the country. The area covered by these reservations was all valuable for agricultural purposes as well as for mining, although not large in the aggregate.

The discovery of gold mines on the Pacific coast was not accompanied by any action of the general government directed toward the raising of revenue from them, nor by the establishment of any system of supervision or superintendence constituting a practical possession by the United States. On the discovery of gold some years later in the district of Frazer's river, in British Columbia, a system of taxation was attempted by the British authorities, but its injurious consequences caused the abandonment of its principal requirements after a very brief trial.

In California the authority of the United States has never been exercised over the mineral lands further than to reserve them from sale and to throw them open to the public for mining, without tax or charge of any kind. No system of mining superintendence has been established, as in Australia. The local law, originally established by the miners themselves, was for some years the only law known, the State laws ultimately recognizing and establishing the principal parts of this mining code. The State of California has also imposed a lease tax of four dollars per month on mining claims held by aliens, the act being especially directed against the Chinese.

The production of gold in California, Oregon, Nevada, Arizona, Washington Territory, and British Columbia, all enters into the trade of San Francisco, with the exception of some exports direct to England from British Columbia. The

commercial statistics of that port, carefully and regularly compiled for some years past, show that the aggregates were, for—

1862	\$50,000,000
1863	55,000,000

Of these sums the annual product of British Columbia was nearly \$2,000,000, and the products of 1863 other than this were divided as follows:

California	\$31,500,000
Nevada	12,500,000
Oregon, Idaho, and Arizona	6,000,000
	<hr/> 53,000,000 <hr/>

One-fourth of this sum is the estimate of gold brought to San Francisco by private hands, three-fourths only, or \$39,700,000, being open to commercial examination and statement from the records of business houses and the mint.

The export statement at San Francisco, made up by commercial authorities, covers all sent to both the coastwise ports of the east and to foreign ports. The sums for several years are as follows:

For 1854	\$52,045,633
For 1855	45,161,731
For 1856	50,697,434
For 1857	48,976,697
For 1858	47,548,026
For 1859	47,640,462
For 1860	42,325,916
For 1861	40,676,758
For 1862	42,561,761
For 1863	46,071,920
For 6 months to July 1, 1864	28,993,711
For fiscal year 1863-'64	51,264,023

This statement includes an average of \$750,000 annually of foreign gold and silver coin, and recently from \$1,500,000 to \$2,000,000 the produce of British Columbia. The average of five years' export, 1859 to 1863 inclusive, would thus give \$41,000,000 only to which a duty or tax could be applied, as in Australia. At 2 per cent., the Australian rate for 1863, nearly, the proceeds of such tax or duty would be \$820,000 yearly.

To this account of production there are now to be added the sums realized in Colorado and Montana, or such portions of Idaho and Montana as do not send to San Francisco. The amount produced in these Territories is not definitely stated by any authority, and it can only be estimated. For 1863 it was less than \$5,000,000, the greater part, however, passing through no positive official or commercial record. In the last three fiscal years the coinage and assay of Colorado gold have been:

1861-'62 ending June 30, 1862	\$2,035,416
1862-'63 " " 1863	2,893,337
1863-'64 " " 1864	2,136,686

Gold of Idaho Territory was assayed and coined at New York and Philadelphia in the fiscal year 1863-'64 to the value of \$1,049,070. The entire coinage and assay of gold produced east of the Rocky mountains in 1863-'64 was about \$3,000,000, which represents all the available product of mines not taken into account at San Francisco.

The sums of treasure within reach of taxation on assay, or as the product of mines within reach of a system of mining superintendence, would, at the highest, be for the year 1863-'64—

On the Pacific coast	\$40,000,000
Colorado and the east	3,000,000
Total	<u>43,000,000</u>

The highest estimate for the next fiscal year 1864-'65 would not reasonably exceed \$45,000,000 in all. In both cases it is assumed that the entire product of the mines is reached, not alone the portion now coined and assayed in the mints.

The extent of the present reservation of gold and silver mineral lands in California is about 10,000,000 of acres, and when surveys are completed for the entire State, the quantity will be somewhat greater, most of these lands being capable of occupation. The whole area of the State is 121,000,000 of acres, of which one-half, at least, is wholly incapable of occupation, as mountains or deserts. Assuming 60,000,000 of acres as being in some way available for occupation, the mineral reserve becomes one-sixth of the surface capable of use.

The proportion of reserved mineral lands in other States and Territories cannot be stated, except by estimate. But for the purpose of examination the following areas may be assumed:

	Whole area.	Mineral reserve.
California.....	121,000,000 acres.	10,000,000 acres
Oregon.....	61,000,000 "	2,500,000 "
Washington.....	38,400,000 "	500,000 "
Dakota	62,500,000 "	1,500,000 "
Idaho.....	62,525,000 "	2,500,000 "
Montana	83,375,000 "	500,000 "
Colorado	67,725,000 "	5,000,000 "
Arizona.....	78,550,000 "	2,500,000 "

The entire probable reserve out of California thus becomes 15,000,000 of acres, and the whole 25,000,000 of acres.

The extent of this reserve of lands, in many cases capable of cultivation as well as containing minerals, has created much discontent in California, since no title can maintain possession but one dependent on actual mining. When abandoned as mines they cannot be occupied for cultivation, except at the risk of dispossession at any moment by an actual miner.

There is, and will continue to be, undoubtedly, a strong pressure for a disposition of a portion, at least, of the mineral lands in California, on the same principle and for the same reasons as the sale of lead-mine reservations in Wisconsin and Iowa in 1847. When mining becomes too expensive to remunerate the miner, he must abandon the lands, and cannot remain as a cultivator. It is said that a considerable area, once profitable for surface mining, is now so unoccupied, and that the interests of the people demand that it be put on sale for permanent title.

The bill (of Senator Conness) introduced into the Senate June 29, 1864, (S. 340,) of the last session, provides that on the memorial of the legislature of California, Oregon, or other State or Territory, the President may order survey and sale, under direction of the Secretary of the Interior, and according to the rules of the General Land Office. The minimum price is not named in this bill, but private memorialists urge that the minimum be thirty dollars per acre. The right of pre-emption and the security of mining titles are guaranteed in the bill.

THE DESTINATION OR DISTRIBUTION OF THE GOLD PRODUCT OF THE UNITED STATES.

The distribution of the gold mined in the United States, and its final destination require to be stated, with as near an approximation as may be practicable, to estimate its availability as a source of revenue.

The gold product of the Pacific coast was, for the first five years, nearly all brought to the mints at the east, Philadelphia and New Orleans, for coinage; but on the establishment of the branch mint at San Francisco, in 1854, the greater part was coined or assayed there. It was still shipped to the Atlantic cities as its commercial destination, however, until 1862, when the risks of transit in American vessels caused a large diversion to be made direct to England from the Isthmus, instead of coming to New York, as before. The establishment of the mint at San Francisco had some influence, apparently, in favoring this diversion, as sums of considerable magnitude then began to be shipped to England and China direct from San Francisco. The average of three years, 1856, 1857, and 1858, was nine millions to England, but for the three years following it fell to four millions each year. To China, the average treasure shipment was three millions, about half in silver, and this chiefly of Mexican or other foreign origin, for each year subsequent to 1857.

The following are the sums of California gold deposited at the eastern mints and the San Francisco branch mint, from 1848 forward.

Calendar years.	Eastern mints.	San Francisco mint.	Total.
1848.....	\$45,301	\$45,301
1849.....	6,151,360	6,151,360
1850.....	36,273,106	36,273,106
1851.....	55,938,232	55,938,232
1852.....	53,794,700	53,794,700
1853.....	55,127,012	55,127,012
1854.....	46,091,650	\$10,842,281	56,923,931
1855.....	28,124,958	20,860,437	48,985,395
1856.....	18,340,943	29,209,218	47,550,161
Half year 1857 to June 30..	10,601,350	12,526,827	23,128,177
Fiscal year 1858 to June 30..	21,492,352	19,104,367	40,506,719
1859.....	12,750,898	14,098,564	26,849,462
1860.....	6,793,900	11,437,012	17,230,912
1861.....	19,772,398	12,432,064	32,204,462
1862.....	13,080,594	16,501,814	29,582,408
1863.....	494,234	18,100,480	18,594,764
1864.....	1,521,953	14,841,350	16,362,303

From 1860 forward this statement includes silver produced on the Pacific coast, not combined with gold, amounting to from \$150,000 to \$850,000 each year. Silver parted from gold, and subsequently coined, is included in the value of the gold deposited, it is supposed, as those deposits are stated in the mint reports.

From this table it appears that the highest average product was from 1851 to 1854, reaching \$55,500,000 each year. The next three and a half years, to June 30, 1858, average \$45,763,000 annually, but immediately after this the amount falls off greatly. Four fiscal years, 1859 to 1862 inclusive, average but \$26,456,811 annually, and the last two fiscal years average but \$17,500,000 each.

What direction the gold product takes to avoid assay and coinage it is not easy to state, the supposed extent of private assaying being insufficient to account for the deficiency.

In the sums named above most of the Idaho gold is included, but none of that of Colorado. The Nevada gold and silver also are included, so far as coined or assayed in the United States, but most of the silver of Nevada is exported to England without being refined, and often in the ore. The distinction observed in constructing the previous table is to embrace all the products of the mines of the interior finding outlet at San Francisco. The following is the coinage of gold and silver of the Colorado and other interior mining districts, exclusive of the small amount mined in Virginia and Georgia:

Fiscal year 1859-'60.....	\$649,548
1860-'61.....	2,114,333
1861-'62.....	2,057,645
1862-'63.....	2,846,976
1863-'64.....	1,659,121

The additions from these eastern interior mines is therefore small, and it is apparent that the portion actually coined or assayed is short of the entire product, for the last two years, at least; perhaps because of dust retained in the Colorado district, and also on account of private assays.

Notwithstanding the great decrease shown to have taken place in the sums of gold coined or assayed since 1858, there has been no essential diminution in the shipments from San Francisco to various markets in the Atlantic cities and in foreign countries. In a previous table these annual exports from California have been given, from 1854 to 1864, and though a decline to \$42,000,000 yearly occurred from 1860 to 1862—three years—yet in 1863 \$46,000,000 was sent out, and in the year ending June 30, 1864, the export was \$51,264,000. Of this sum the total assayed or coined at all the mints and offices was but \$16,362,000.

Assay and coinage at the mints and public assay offices cannot, therefore, be now assumed to embrace more than one-third of the annual product of the mines.

The destination of the gold leaving San Francisco has greatly changed within three years past, as regards the proportion sent primarily to the Atlantic cities. The actual sums to each country can be given only from 1854 forward, the account being for calendar years.

Treasure sent from San Francisco to—

Year.	New York.	England.	China.	Panama.	Other countries.	Total.
1854.....	\$46,533,166	\$3,781,080	\$265,887	\$204,592	\$560,908	\$52,045,633

1861.....	32,628,011	4,061,779	3,541,279	349,769	95,920	40,676,758
1862.....	26,194,035	12,950,149	2,669,754	434,508	322,324	42,561,761
1863.....	10,389,330	28,467,256	4,206,370	2,503,296	505,667	46,071,920
1864 to Oct. 1..	8,745,277	28,364,870	5,813,208	277,382	571,822	43,772,559

The countries not named are the Hawaiian islands, Manilla, Mexico, British Columbia, and small amounts to Havana, Guatemala, &c. In 1862 a peculiar movement began, primarily as a measure of security against pirates, in the transit from the Isthmus on the Atlantic. This was the sending of large sums

to England not cleared or recorded as exports, but declared to be on account of eastern holders, and ultimately intended to be returned to New York. Not being entered as exports at the custom-house at San Francisco, the extent of the movement was not observed until it had been carried through most of two fiscal years. The following were the reported and the actual exports of coin and bullion to foreign ports from San Francisco :

	Reported.	Actual.	Unusual export.
Fiscal year 1862-'63.....	\$3, 529, 755	\$21, 737, 634	\$18, 207, 879
Fiscal year 1863-'64.....	6, 285, 055	42, 020, 000	35, 734, 945
Quarter ending September 30, 1864	2, 876, 000	11, 640, 612	8, 764, 612

This diversion of treasure from its usual course to New York is large, and it does not, so far at least, return in any form of remittance of precious metals back to New York from England. Much of it may be, and probably is, held as undrawn deposits abroad, or used when the market favors to create exchange, and thus pass as absolute sale. It is not, however, a commercial remittance in any ordinary sense, not being sent in the adjustment of balances, or in any way for the account of foreign owners.

No important or decisive effect on the stock of specie in the Atlantic cities, resulting from this movement, appears in the current statements of the stock of coin and bullion in the banks and government depositories at New York. The best calculation of this stock, derived from official statements as far as they can be made available, gives the following aggregates on November 1, 1864, and at the same date for five years previous.

Specie in banks and sub-treasury at New York.

November 1, 1859	\$25, 300, 000
November 1, 1860.....	27, 900, 000
November 1, 1861.....	50, 700, 000
November 1, 1862.....	40, 801, 000
November 1, 1863.....	38, 370, 251
November 1, 1864.....	33, 958, 867

The stock of the precious metals was thus greater in November, 1864, than in any year previous to 1861, and it was eight millions greater than the average of 1859 and 1860.

Including the above-named sums of unusual export of specie from San Francisco to England, the four fiscal years, 1860-'61 to 1863-'64, show an annual average going to foreign countries of \$42,168,669, in excess of the quantities imported; while the four previous years, ending June 30, 1860, gave an average export of \$51,120,625 in excess of all imports. The annual excess of specie exports, in other words, was less in the last four years than in the like period ending in 1860 by \$9,951,956—nearly ten millions of dollars—annually.

A proof of the absence of any undue commercial drain of specie to Europe is afforded in the rates of exchange prevailing in the New York market, which were, when quoted in gold, constantly below the par from June to October, 1864. The average nominal rate was 108½ to 109, as is shown in the appended table, the par being nearly 109½.

It is a remarkable fact, also, that for part of 1863, and particularly during 1864, extreme difficulty has been experienced in retaining the usual stocks of bullion and coin in the Bank of England and other national banks of Europe. The drain to the continent and to the east has taken all the available supplies received from America and Australia as fast as brought, many of the shipments, indeed, being sold for export before their arrival. The Bank of England raised its rate of discount no less than eight times during the year, for the sole purpose of stopping the drain of specie from its vaults. The very unusual dis-

count rate of 9 per cent. was maintained for two and a half months, and 8 per cent. for three months; the average for a year, from November, 1863, to November, 1864, being $7\frac{1}{2}$ per cent. The Bank of France had difficulties scarcely less; its rate of discount having been frequently raised to 8 per cent, and special purchases of gold being several times made to maintain the bank. A like condition prevailed in every capital and monetary centre of Europe, the average rate of discount at the national banks having been maintained at nearly or quite double the usual rates.

Generally the rate of interest for current commercial purposes has been much higher in Europe for the year referred to, and particularly in England, than in the United States; whereas it is usually but little more than half the prevailing rates here. The purpose of the high rates established by the Bank of England and other national establishments being the retention of gold against an exhausting drain, which would otherwise deplete their vaults so as to render the maintenance of specie payments impossible, the above facts are directly pertinent to the question of the retention and control of our own production of gold.

In Europe the cause of the drain appears chiefly to be the unusual extent of purchases of cotton and other raw materials for manufactures in Egypt, India, China, and other distant countries, to which the return of manufactured goods is insufficient to pay for these purchases. Cotton and other of these raw materials advanced greatly in price, and therefore large sums were required to move them; and, in addition, an unusually active speculative movement in them has been continued for a long period.

The general result of the movement in gold has, therefore, been to reduce the stocks held in reserve in England and France quite as much as the reserve has been reduced in the United States. As compared with 1860 the reduction in London is greater than in New York, and the relation of gold to general commerce and finance is in ampler proportions and on a safer footing in the United States than in either England or France, at the close of 1864. Tables are appended showing the rates of exchange on England prevailing at New York, and the rates of discount or interest both in the United States and Europe.

The only country presenting conditions analogous to the gold-mining interests of the United States is Australia; the next in magnitude being the Russian mines, which are, however, altogether unlike either the Australian or American, and whether paying royalty or not, would not illustrate the modes or consequences of raising revenue from them in any form. In Australia the first occupation was without law or regulation other than the miners established for themselves; but a system of superintendence was finally established, under mining surveyors and registrars for defined districts, the whole constituting a mining department in each of the great colonies, Victoria, New South Wales, and South Australia. There are mining leases granted, but no revenues of consequence can be defined as accruing at the mines under this superintendence. An export duty was laid, however, in 1856, of 2s. 6d. per ounce troy on all gold or bullion shipments out of Australia. This export duty has been vigorously opposed since its establishment, and, whether from that cause in part, or from other causes, an important decline has taken place in the gold product of Australia.

At the standard price of gold per ounce troy, £3 17s. 6d., the export duty of 2s. 6d. is near $3\frac{2}{10}$ per cent. In 1863 the export duty of the colony of Victoria (Australia) is stated to have been 1s. 6d. per ounce, which is less than 2 per cent.; but the revenue yielded by it in that year was £121,508, (\$588,100). Positive information as to other colonies or other proceeds of mining taxes in Australia is not accessible, but it is evident that the rate of export duty first established has been reduced, and that vigorous opposition was developed to this or any other mode of taxing the mines. The British home government has received no revenues from the Australian mines.

In California it has been attempted to continue the gold standard of currency notwithstanding any changes in the price of gold in the Atlantic States, and the result has been that a severe monetary pressure, and great embarrassments to business, have constantly prevailed there. A reduced production of gold in 1863, with short crops in 1863 and 1864, have combined to reduce the resources of all classes there below the average condition for several years previous. Many mining locations have been abandoned in consequence, and the power of the miners to bear taxation has been much lessened.

Without a surplus of gold or other products so great as before for exportation, the effect of the eastern currency in competition with gold has been to increase the cost of doing business there, and to add to their expenses without compensating addition to their proceeds or profits.

Respectfully submitted.

LORIN BLODGET.

TREASURY DEPARTMENT,

November 16, 1864.

APPENDIX.

Rates of sterling exchange at New York, as quoted in gold.

The class quoted is best bankers' 60 day bills; bankers' short sight being one per cent. higher, and commercial bills one per cent. less, on the average. The par is nearly 109½, calculated at the mint price of the sovereign, which is now \$4,86 34.

May 30, 1864.....	109 a109½	September 22 to 26, 1864..	108½a109¼
June 21, 1864.....	110	September 27 to 29, 1864..	108½a109½

September 16 to 21, 1864..	109 a109½		

In August, and again in October, the market is quoted as enabling gold to be imported from Europe at a profit.

Rates of interest prevailing in Europe; November, 1863, to November, 1864.

BANK OF ENGLAND RATES OF DISCOUNT.

- November 15, 1863, rate continuing at 6 per cent.
- December 3, 1863, rate raised from 6 to 8 per cent.
- December 24, 1863, rate reduced from 8 to 7 per cent.
- January 20, 1864, rate raised from 7 to 8 per cent.
- February 11, 1864, rate reduced from 8 to 7 per cent.
- May 2, 1864, rate raised from 7 to 8; May 5, from 8 to 9* per cent.

* "A 9 per cent. rate of discount has not been known since November 5, 1857. The rate was raised November 10, 1857 to 10 per cent., when the government found it necessary to relax the Bank Act."—*London Times*, May, 1864.

May 19, 1864, rate reduced from 9 to 8; May 26, from 8 to 7 per cent.

June 16, 1864, rate reduced from 7 to 6 per cent.

July 25, 1864, rate raised from 6 to 7 per cent.

August 4, 1864, rate raised from 7 to 8; September 9, from 8 to 9 per cent.

November 15, 1864, rate continuing at 9 per cent.

Standing at 6 per cent. 2 months; at 7 per cent. $4\frac{1}{2}$ months; at 8 per cent. 3 months; at 9 per cent. $2\frac{1}{2}$ months; average for the year, $7\frac{1}{2}$ per cent.

BANK OF FRANCE RATES OF DISCOUNT.

November 12, 1863, rate advanced from 6 to 7 per cent.

March 23, 1864, rate reduced from 7 to 6 per cent.

May 5, 1864, rate advanced from 6 to 7 per cent.

May 10, 1864, rate advanced from 7 to 8 per cent.

May 18, 1864, rate reduced from 8 to 7 per cent.

May 25, 1864, rate reduced from 7 to 6 per cent.

September 15, 1864, rate advanced from 6 to 7 per cent.

October 13, 1864, rate advanced from 7 to 8 per cent.

November 15, 1864, rate continuing at 8 per cent.

Rates of discount at the Bank of France standing at 6 per cent. 5 months; at 7 per cent. 6 months; and at 8 per cent. 1 month; average for the year, $6\frac{2}{3}$ per cent.

T.

REVENUE FROM MINERAL LANDS.

COMMUNICATION OF JAMES W. TAYLOR TO THE SECRETARY OF THE TREASURY

SAINT PAUL, November 23, 1864.

SIR: I submit herewith, in pursuance of your verbal instructions, some observations upon (1) the disposal of mineral lands with a view to revenue, and (2) the reorganization of assay offices in mining districts.

The Commissioner of the Land Office in 1862 said: "The great auriferous region of the United States in the western portion of the continent stretches from the 49th degree of north latitude and Puget sound to the 30° 30' parallel, and from the 102d degree of longitude west of Greenwich to the Pacific ocean, embracing portions of Dakota, Nebraska, Colorado, all of New Mexico, with Arizona, Utah, Nevada, California, Oregon, and Washington Territories. It may be designated as comprising seventeen degrees of latitude, or a breadth of eleven

hundred miles from north to south, and of nearly equal longitudinal extension, making an area of more than a million square miles.*

Within this district mining will always be the leading industry, and gold and silver the principal productions. East of the mountain ranges which form the eastern boundaries of California and Oregon, and west of the 100th meridian of longitude, agriculture is limited by aridity of climate and the necessity of irrigation. The grasses are rich and nutritive—very favorable to stock-raising; but immense tracts will never be cultivated. Hence, gold, silver, and other metals, with probably herds of cattle, will be the staples of production, while breadstuffs, manufactures, machinery, &c., will be transported for a very long period from the older States in greater proportion than is usual in our domestic exchanges.*

In these interior districts the occupation and use of the soil by the miner is the great interest of *reality*—real estate—and, in the matter of taxation, asks to be treated by the national government as land and its cultivation are regarded and treated in the agricultural States. The miner, digging, washing, and blasting the soil for an annual product of gold or silver, regards himself (and is it not a correct view?) as in the same situation as the farmer of an eastern State, who works the soil for an annual product of grain. We impose an income tax on the *profits* of the farmer; the miner is willing to pay the same, but protests against an appropriation of a percentage of his *gross* production.

If farming lands and other real estate are left in the Atlantic and Mississippi States, as a proper, if not an exclusive subject of State taxation, why should not the mineral lands of the Territories be left to meet the exigencies of territorial revenue? The nation occupies other grounds and subjects for the purpose of revenue.

Still the title of mineral lands is in the nation. They are excepted as yet from survey; they are not subject to pre-emption. It has become necessary to recognize individual rights and interests in mineral lands. Here is an opportunity for revenue. How shall it be obtained? Shall government take the position of a landlord, granting leases, reserving rents, and enjoining future revaluations with new terms of leasehold? Or shall government adhere to the system of absolute sales, with proper modifications, and give patents in fee simple?

The question is not new. In 1823, when the disposition of valuable mineral lands in the State of Missouri was under discussion in Congress, T. H. Benton, senator from that State, demanded their sale with allodial tenure, and opposed the relation of landlord and tenant between the government and citizen. When the lead mines near Galena were first occupied, the leasehold system, enforced by military authority, was tried, but the industrial, social, and even financial results were not satisfactory, and Congress at length abandoned the experiment, and directed the survey and sale of the Galena mineral lands as usual. (See Abridged Debates of Congress for 1823, vol. 7, p. 364, for Mr. Benton's speech advocating sales of mineral lands. Extracts from it are copied and annexed, appendix No. 1. I submit also, as appendix No. 2, a communication from Major John P. Sheldon, of Wisconsin, who had charge, as an officer of the government, of the Galena lands.)

The iron and copper lands of Lake Superior were first leased, but afterwards Congress directed their absolute sale, which is the present policy.

The Commissioner of the Land Office furnished the Committees on Public Lands in both houses, at the last session of Congress, with the draught of a bill which proposes to retain the government title, but permits the occupation of

* See papers "Commerce of the Pacific Coast" and "Overland Trade and Communications between the Pacific Coast and the Mississippi States," in a report of the Secretary of the Treasury on the foreign and domestic commerce of the United States made to the Senate June 25, 1864.

"mineral lands" on the payment of annual sums in the nature of licenses or rents. The measure was opposed by the senators and representatives from the mining States and Territories, and failed to become a law. It is annexed, for the purpose of reference, as appendix No. 3.

The Commissioner of the Land Office advocated at the last session the sale of a very important class of mineral lands, namely, coal-bearing lands, and a bill was drawn by him which became a law. It is annexed,* (appendix No. 4.)

* See also Session Laws, 1864, p. 343.

Another bill for the disposal of mineral lands was presented to the Senate by Mr. Conness, of California, but at so late a date in the session (June 29) that no action occurred. This bill received the approval of senators and representatives from the Pacific States and mining Territories, so far as it was practicable to consult them. Mr. Conness afterwards (July 4) reintroduced the bill with some amendments, especially one which made the action of the bill independent of State or Territorial legislation. This amended bill follows as appendix No. 5. * * * * *

It proposed only to extend the right of pre-emption (the price was not named in the bill, but \$30 per acre has been suggested) to parties, both individuals and associations, who occupy and improve claims to mineral lands in accordance with the local mining codes. The exploration of the mining districts by prospectors, and the occupation of claims, was not to be interfered with—on the contrary, was to be encouraged and legalized; but whenever the miner desired the fee-simple, and was willing to pay the advanced rate named, then government would hold itself ready to survey and sell as elsewhere on the public domain. The claims first entered would, of course, be those which had been fully tested and found valuable; but soon every discoverer would consider it his interest to get in the title from the government as the most essential preliminary to the trial or development of a claim, either by co-operative labor or with the aid of capital. Parties practically familiar with the western mines have warmly approved Mr. Conness's proposition, not only as conducive to private interests and the welfare of society, but as certain to afford a material increase of revenue.

It is submitted that the price of gold and silver lands should be required to be paid in gold or silver coin, or bullion. * * * *

The legislature of Colorado Territory, at the session of 1863, enacted a law providing for the reservation of one claim on each quartz lode that might be discovered after its passage, for the purpose of creating a school fund; and Governor John Evans, in his message of February 3, 1864, to the Colorado legislature, recommended measures to obtain the sanction of Congress to its provisions. Hon. J. N. Goodwin, governor of Arizona Territory, in his first message, (September, 1864,) recommended the taxation of "the proceeds of all dividend-paying mines," and also suggested "that hereafter the discoverers of mines which are taken up and recorded be required to locate next to the discovery claim one claim which shall be the property of the Territory." These practical suggestions may indicate an additional measure for the consideration of Congress. It might be made a condition of title to mineral lands, that every tenth claim should be reserved to the government, without liability to assessment or forfeiture. The national treasury might thus, as a stockholder or claimant, share in the future development of the mines.

There is another subject to which I desire to recur.

The national government would greatly advance the interests of miners and mining, by establishing at every well-defined centre of gold or silver production an assay office—multiplying those offices very liberally, and creating no more

* This act prescribes the manner of obtaining title to sites of towns projected on the public domain—details which may suggest a method of selling fractional claims or shares in a mine.

branch mints. I estimate that if an assay office was made accessible to every mining district, which, during the year 1865, will produce \$10,000,000 of bullion, their locations geographically would be as follows:

1—3. Three in California: one with the mint at San Francisco, one at Marysville, or central to the northern mines, and one at ———, or central to the southern mines, representing the collection and assay of treasure at.....	\$30, 000, 000
4. One for the State of Oregon and Territory of Washington, with the branch mint at Dalles City.....	10, 000, 000
5. One central to the Territory of Idaho—say at the Boise mines.	10, 000, 000
6—7. Two in Nevada: one at Virginia City, and another near the eastern boundary, or central to the Reese River mines, (for assay of silver).....	20, 000, 000
8—9. Two in Arizona: one central to the Colorado gold field, and one central to the Gila silver region.....	20, 000, 000
10—11. Two in Colorado, where the gold product of 1865 will not be less than.....	20, 000, 000
12. One near Fort Benton, in Montana Territory, central to the mines of the Upper Missouri.....	10, 000, 000
Total treasure product for 1865.....	<u>120, 000, 000</u>

But there remain four more great interior districts, where the precious metals are known to exist, but on account of Indian hostility, &c., have not been developed, namely, New Mexico, Utah, (here the Mormon organization opposes mining,) the territory near Fort Laramie, transferred to Dakota by the bill organizing Montana on the north, and the Territory of Dakota. Before the year 1865 has elapsed, these localities will be added to the gold and silver producing territories. They should, therefore, be included in a comprehensive reorganization of national assay offices, as follows:

13—16. One at Santa Fé, in New Mexico; one at Great Salt Lake City, in Utah; one at Fort Laramie, in "the territory transferred to Dakota;" and one near the Black Hills gold field, reported by Lieutenant Warren, and soon to be relieved from Indian hostility, in Dakota.

There are sixteen central positions, where now, or very soon, an assay office should be opened by the national government to the mining population of the vicinage. Those situated in New Mexico, Utah, the "territory transferred to Dakota," and Dakota, will be required as soon as the arrangements for them can be completed. I anticipate a production of gold and silver for the year 1866 of \$200,000,000.

These assay offices established, their annual expenses would be defrayed by an assay duty of one per cent., and the next step by the government to the custody and virtual control of our gold and silver product could be easily taken. Let the assay officers be authorized to offer an option to the miners to take their bars of bullion, or to receive gold notes—yellow notes—payable at the mints in gold coin, less a percentage, which would be the minimum of expense for transporting and coining the bullion thus deposited with the government. How rapidly would the mountains, and even the sea-coasts, be filled with such a government issue of treasure-notes, powerfully contributing to a general restoration of specie payments.

In submitting the above estimates of the annual production of gold and silver, I concur with the Commissioner of the General Land Office, who computed "the yield of the precious metals" in 1862 at one hundred million dollars, although I am not unaware that the computations of the San Francisco press greatly reduce the aggregate. The transportation of the ore of gold and silver

through commercial channels does not fully indicate the extent of its production, nor can we depend upon mint statistics for this purpose. Immense amounts are hoarded by the miners, are absorbed in the local demands of business, or secretly transported from the country. In presenting the foregoing schedule of mining districts with their probable production for 1865, I have been governed by the following considerations:

1. California cannot have less than a population of 30,000, who are actually engaged in mining, averaging \$1,000 per annum, (less than \$3 per day,) or an annual aggregate of.....	\$30, 000, 000
2. Nevada has a population of 60,000, of whom one-third, or 20,000, are practically miners, averaging \$1,000 per annum...	20, 000, 000
3. Of the population of Oregon and Washington, 10,000 are also receiving \$1,000 each per annum as miners.....	10, 000, 000
4. Of the 20,000 people in Idaho, probably one-half are miners, averaging \$1,000 per annum.....	10, 000, 000
5. Montana has 20,000 population, half actually mining...	10, 000, 000
6. Colorado has a population of 60,000, of whom 20,000 must be receiving \$1,000 from mines.....	20, 000, 000
7. Arizona, if Indian hostilities are suppressed, will probably reach an annual product during 1865 of.....	20, 000, 000
	<hr/> 120, 000, 000 <hr/>

The ratio between the mining and other population, observed by the census of 1860, was as follows:

	Total Population.	Miners.
California.....	365,439.....	82,573
Nevada.....	6,857.....	2,905
Colorado.....	34,270.....	22,086

As to the average production of each miner, I cannot suppose that \$1,000 is too large; indeed, it may be questioned as too small, since, in most of the mining districts, \$4 to \$5 per day is paid to laborers by the proprietors of claims, and surface mines are usually relinquished if yielding less than \$5 per hand as a daily average.

Observations at different points on the Missouri river, during the summer of 1864, establish an emigration of 150,000, destined for the mining districts of the mountains, with but few women and children. As this population is now constituted, probably one-third, or 50,000, will be directly engaged in the production of gold and silver; and if so, the result will not only correct any error in the foregoing estimate, (perhaps in the instance of Arizona,) but may swell the aggregate treasure product of 1865 to \$150,000,000. If, during 1865, a similar exodus shall add an equal population to the Territories of the interior, (which may be reasonably expected,) the estimate of \$200,000,000 as the production of 1866 will not prove excessive.

The prospective population and production of the mining districts, as here anticipated, will impress every thoughtful mind with the necessity of a more vigorous and systematic administration of the Territories. Especially must the government adopt measures adequate for the fullest security of persons and property, if Congress shall provide for an increase of revenue, in either of the methods suggested, from the mining communities. Events are rapidly establishing the necessity of a new and comprehensive policy in regard to the immense auriferous districts of the Rocky mountains, and which should now be matured, to take effect immediately upon the successful termination of the war, perhaps previously. The permanent welfare of the country demands that the nation should reach by roads and seize by settlements the inexhaustible repositories of gold and silver over which it is proposed to extend the collection of

internal revenue. Nor must this be left exclusively to accident, to the caprices of the squatter and prospector. The great interest of revenue, as well as the national unity, will require the organized and omnipresent agency of the government in the new communities of the mountains.

In the midst of the present war the central route of a Pacific railroad was first recognized by Congress, and its prompt construction assured by a liberal loan of public credit in addition to a grant of lands. This preference results from the concentration of population in Nebraska and Kansas, in Colorado, at Great Salt Lake, and in Nevada—four leading landmarks of the overland line between St. Louis and San Francisco. These settlements, with the adjacent discoveries of gold, silver, iron, and coal, are a warrant for the increase of population within ten years to aggregates adequate to support a railroad by its way traffic and travel alone, leaving the whole through business for the net profits of the line. All this is now recognized as practicable—as no longer visionary. But what if the Territories along the southern frontier shall advance to the same position in population, mineral discovery, &c., which existed on the central route in 1862, when the Pacific railroad received the aid of congressional legislation? Or suppose, in the course of a single year, that the population of Idaho and Montana shall mount to 100,000 souls, with an annual gold export of \$30,000,000, and the whole basin of the Yellowstone river, with the entire line of the Black hills, shall be discovered to be so rich in the precious metals as to assure the speedy organization of Dakota, Montana, and Idaho as States of the Union before the year 1868. Certainly, these new communities, with all the migrations of people and commodities inseparable from their settlement and future intercourse, will not be forced into the circuitous transit by the Union Pacific railroad. Direct routes will be necessary, and it will be the part of wise statesmanship at Washington to anticipate the location and prosecution of direct communications on the general routes, north and south, as well as central, which were indicated ten years ago by the first appropriation for a Pacific railroad survey. When that clause was inserted in 1854 in the military appropriation bill, all western men anticipated that three great thoroughfares from the Mississippi to the Pacific—one from the lakes to the Columbia river, one from St. Louis to San Francisco, and a third between the Gulf of Mexico and California—were certain of final consummation; and now, when we witness the inevitable progress of mining adventure and population southward, in Arizona, and northward, in Idaho, is it not palpable that the success of the Union Pacific line will be immediately followed by the prosecution of similar enterprises on the parallels of 35° and 45° , recognized as the latter already is by a congressional grant of lands at the session of 1863-'64 to a Northern Pacific Railroad Company?

Given anywhere a permanent and productive population, and the railroad immediately becomes a social necessity, which asserts itself, according to experience in America, in the proportion of one mile of railroad to every thousand of population.

Still it is not expected, nor is it in any sense desirable, that Congress should hasten to advance the national credit to other Pacific railroads. The communities of the northern and southern frontiers, in the present financial situation, must await, with patience and confidence, the results of the experiment which is in progress through Nebraska, Kansas, Colorado, Utah, and Nevada. Although that line has more engineering difficulties to encounter, wider and more sterile areas to traverse, and less facilities of navigable streams in aid of construction, than either the northern or southern line, yet there is little doubt that the great work will be justified by results. If the English colony of Victoria (in Australia) could build 350 miles of railroad at an expense of £9,900,000, and yet receive into its treasury a net revenue, in 1863, of £433,615, discharging within £106,385 the entire interest account at six per

cent. on the cost of construction, what may we not expect from a continental trunk road, which shall concentrate the transportation of the Central States between the Missouri river and the bay of San Francisco? I do not doubt that it will be the disposition as well as the duty of the northern and southern frontiers to await the construction and practical success of the Central railway, and to postpone overtures for equal legislative aid until the financial solution is complete and apparent. By that time, also, they will each exhibit a cordon of settlements which will present the same assurance of prospective wealth and population as existed in 1862 on the parallel of 40°, and which justified (as all now admit) the congressional intervention in behalf of the Union Pacific railroad.

But, in acknowledgment of such forbearance, as well as for the sake of vital national interests, Congress should immediately designate, construct, and protect emigrant or colonization roads, anticipating by their location the future railway communications, which population will finally demand and establish. Let this be done, not nominally, but effectually—not merely designating as a borderer blazes his way through a forest, but *constructing* and *protecting*, in the fullest sense of those words, such highways for the emigrant from the Mississippi, to and through the Rocky mountains, and the pioneers of the future States on our northern and southern frontiers will (I repeat) postpone all application for further railway legislation, (except an appropriation of lands in behalf of a southern line, similar to the act of July 2, 1864, organizing the Northern Pacific Railroad Company,) at least for a decade of years. They will be fully content with measures ample and adequate for the security of overland emigration. They would be very unreasonable, grossly exacting, if they were not satisfied. For what is involved in the construction and protection of an emigrant or colonization road? This, and nothing less—that a single family of man, wife and children, may leave a home in an eastern or Mississippi State, and follow such a road through the solitudes of plains and mountains, with full security in making a farm or staking a mining claim, at every stage of his journey. Such a proposition implies that the government at Washington is seen and known and respected over the remote districts of the national territory, as never before; that savage hostility is suppressed everywhere; that barbarous tribes are firmly secluded upon reservations; that the surveyor is ever ready to define the occupation of land; in a word, that the power and protection of the nation pervades all the space of the nation. How little this seems in the statement; how vast it will be found as a stage of social and political progress over full half of the map of the United States.

This will appear from a brief summary of the situation of the overland routes so often mentioned—the Central, the Northern, and Southern.

Even on the overland stage route, the central, with all the advantages of long and permanent settlements of whites, we hear of frequent Indian attacks upon emigrants, although lately repressed with a firm hand by Colonel Conner and his California command.

On the northern route, the traverse of the Territories of Dakota, Montana and Idaho, the government has been engaged with 5,000 men and an expenditure, during the years 1862, '63, '64, of at least \$20,000,000 in the subjugation of hostile Sioux Indians who are massed upon the Upper Missouri to the number of 5,000 warriors, and who resist all communications overland from Minnesota, or by the navigable channel of the Missouri river, with the gold fields of the Upper Missouri and Yellowstone rivers.

On the southern route the formidable tribes of Apaches and Comanches make emigration insecure, and we have recent intelligence from Arizona of the massacre of miners in the newly discovered placers of the Colorado valley.

A safe wagon road—an emigrant road—is a proposition which imposes upon the government no slight task; and yet there can be no evasion of the duty to establish such security of communication.

What is the policy of the English government under similar circumstances? The colony of New Zealand is engaged in a war with the Maoris, a native population, about as numerous as the Sioux Indians, and even more formidable as warriors. For their conquest a force of 15,000 troops, two-thirds regulars, have been employed. Already the question of future security to the colonists is mooted, and the proposition which is received with favor in New Zealand and by the home government is the construction of military roads, at least 1,000 miles in length, commanding every part of the Maori country, with the establishment of military settlements upon these roads consisting of 20,000 volunteers with their families. The New Zealand government proposes a loan of \$20,000,000 for the purpose of constructing the roads and colonizing their occupants and defenders, and reserves the confiscated lands of the Maori tribes as a fund for the final discharge of the colonial debt.

Upon the disbandment of the army of the Union, there will be thousands who would prefer to receive the land bounties, which Congress will doubtless provide, in eligible situations on emigrant or colonization roads, as these may be hereafter designated through the unsettled districts of the western Territories, and who would be a reliable agency, both for constructing these highways in the first instance, and defending them afterwards. The establishment of civil order and the collection of national revenue, would be advanced by some such system of military colonization.

The concentration of the Indian tribes upon limited reservations, with strict government surveillance, is another public necessity. Emigrant trains are now moving in all directions. As gold discoveries multiply, the demand increases for civilized occupation of every locality suitable for agriculture and grazing, and collisions between white settlers and the savages should no longer be suffered.

The organization before the year 1875 of the Great Plains and the Rocky mountain region into States of the Union may be expected. The present course of legislation indicates that these central States will each be double the area of the average Mississippi State; and there is no problem of the future which has greater interest to the statistician than to determine whether great mineral resources will compensate these new States for their limited capacity of agriculture. All our present information suggests an affirmative of such an inquiry; and that the internal commerce of the bread-producing and manufacturing States of the Union, with the future central States, whose staples will be precious metals, animals, hides and wool, is destined to a development at least equal to the exchanges of eastern communities.

No considerable revenue can be anticipated from the mining districts until these measures are accomplished. With strong local government, Indian pacification, emigrant roads, surveys and registry of lands and quartz lodes, and a definite system of title to mineral lands, that degree of mutuality will exist between the government and citizen as will invigorate and support whatever policy, on the subject of revenue from mines and mining, Congress may ultimately approve. But in no respect will the national authority prove itself so beneficent as by assuming the whole function of the assay of the precious metals; by extending its assay offices to every well-developed centre of mineral production; by issuing its gold notes or mint certificates in exchange for the miners' bullion, and by assuming the relation of a gold escort from the wilderness to the mints. Such a reorganization and extension of the assay and coinage system of the national government would virtually make the treasury of the United States the depository of three-fourths of our annual production of gold and silver.

Respectfully, &c.,

JAMES W. TAYLOR.

HON. W. P. FESSENDEN,

Secretary of the Treasury.

APPENDIX TO J. W. TAYLOR'S COMMUNICATION ON MINERAL LANDS.

I.

Senator Benton's views, in 1823, upon the sale of mineral lands. Extract from Abridged Debates of Congress, vol. 7, p. 364.

The national government by these acts, having concentrated into our hands the possession of the mines and salines, undertook, in the year 1807, to reap the fruit of its able policy. For this purpose the luminous idea was adopted of converting itself into a national landlord, the miners into national tenants, and deriving a revenue from salt-water boilers and lead-ore diggers. This system was adopted in 1807. Fifteen years have since elapsed, and certainly fifteen years of annual experience is sufficient to test the vice or virtue of all money-making schemes. What has been the fruit of all this monopolizing and leasing system? Have any leases been taken? Yes, many. Has any lead been dug? Yes, millions of pounds weight. Have any rents been paid? No, not a dollar—not one cent. But perhaps it may be thought that valuable improvements have been made, the benefits of which will inure to the republic, and compensate for the loss of rents. I answer, none. No improvements can be made at salines, except by sinking wells or boring holes some hundred feet to strata of salt, or streams of strong water which lie below, neither of which has been done at a public saline. No improvement can be made at a mine except by sinking shafts, opening galleries, providing ventilators and hydraulic engines, and constructing permanent furnaces; not one of which things has been done at a public mine, or ever will be done by a tenant or lessee for years.

The spirit of tenantry is everywhere the same; it is a spirit adverse to improvement, always bearing towards the injuring of the property in possession, and always holding back from the payment of rent.

This spirit has had its free range with the mineral lands of the United States, where no improvement has been made, no rent paid, and a great injury done in the destruction of timber and in ravaging the ground in search of minerals. Not even a mine discovered. Of the fifty or sixty public mines enumerated in the report from the War Department, not one was known as a mine at this time. They were nothing but superficial diggings, exhausted or abandoned in a few weeks or months after their first discovery.

The veins and masses of ore which approached the surface have alone been tenanted. Miners call this "picking at the eyes of the mine," while the body lies at the distance of some hundred or a thousand feet below. In fine, the fruit of this whole system has been injury to the national treasury, and a resource to foreign powers to supply us with the articles of which God, in his providence, has given us more than he has to them.

To continue the system will be to perpetuate the relation of landlord and tenant throughout the vast extent of the mineral districts of the vast republic; that landlord being the federal government, and holding its domain and body of tenantry within the limits of a sovereign State. I deny such a power to the federal government. I take my stand upon the words of the Constitution, and deny to the federal government to hold land in any State except upon grants made, and cases enumerated, and purposes specified in the Constitution. I speak of permanent ownership, not of the transient trustee possession which is necessary to a fair distribution of the property, and which is recognized in the compacts with the new States, by an agreement not to tax the public land before it is sold, and for five years thereafter. I deny to the federal government capacity to hold to a body of tenantry within the limits of any State.

The monarchies of Europe have their serfs and their vassals, but the genius of the republic disclaims the tenure and the spirit of vassalage, and calls for

freemen, owners of the soil, masters of their own castles, and free from the influence of a foreign power. But if a doubt can be entertained of the right to hold lands and tenantry within the bosoms of the States, none can exist as to the evils of such a practice. Even if confined to minerals and salines, the mischief must be great.

But what is the effect to the States in which these things shall be done? Population retarded, the improvements of the country delayed, large bodies of land held free of taxation, and their elections more or less influenced by the presence of men holding their leases at the will of the federal government. All this is bad enough, but the worst is yet to be named. The foundation of the whole is a monopoly odious of itself, and aggravated in this instance from the nature of the articles monopolized.

I trust that enough has been said to show the bad policy of leasing. Shall we then adopt the alternative proposed by the bill, and deliver up the mines and salines of the republic to the pursuit of individual enterprise, to the care of individual interest, guided and sustained by the skill and capital of those who may choose to hold them? I maintain it to be our true policy to do so, and that the government will find its indemnity in the price which will be paid for them, and the increased wealth of its citizens; which is, in fact, the wealth of the government itself. Besides, without a freehold in the soil, the experience of all countries proves that the riches of the mineral kingdom can never be discovered or brought into action.

All this is now proved on the mineral lands of the United States in Missouri. Fifty or sixty mines have been opened, exhausted, and abandoned. Yes, within the space of a few months a mine is exhausted, while in England mines are now worked which were opened two thousand years ago. The reason is obvious. The English miner, having the freehold of the soil, husbands and improves his property, and follows the vein downward, even to the distance of two thousand feet. The American lessee can only take what he finds on the surface of the ground.

All over the world mineral wealth has been discovered either by accident or by the persevering labor of the *owner* of the soil. It is needless to multiply examples to prove the assertion. Every senator's reading will furnish him with a multitude. Two only will I mention—the discoveries of the great copper mines of Anglesea, and the salt mine in Chelsea. The former, though the richest in the world, and furnishing at this day more copper than all the mines of Europe put together, and seated in the bosom of a country settled for several thousand years, was only discovered at the beginning of the last century, though known as a saline by the Roman soldiers when Britain was a province of the Roman empire. This vast salt mine is only one hundred and twenty feet below the surface of the earth, and then commences in strata sixty feet thick, and yet was never discovered till the earth was penetrated by *the owner* of the soil.

But change the tenure, create a fee-simple in the soil, and what may not be found?

The example of England presents itself to us. In the early ages her base metals were considered as too precious for the people, and were reserved as crown property. Her mines were leased out, and the great tin mines of Cornwall brought the imposing sum of one hundred marks per annum, and the rest in proportion. In the reign of Philip and Mary this policy was changed. The mineral kingdom, by an act of Parliament, ceased to be a monopoly in the hands of the crown. It was given up to the skill, and capital, and industry of individuals, and the result has been that the iron, lead, copper, tin, coal, and salt of England have carried the wealth and power of the British empire to a height to which the mines of Peru and Mexico can never exalt her. And let us follow her example. Not the example of her dark ages, but of that enlightened period which has made of a small island in the sea one of the richest and most powerful empires upon the face of the globe.

II.

The Galena lead mines.—The experience of the national government in disposing of them.—Letter to the Secretary of the Treasury from Maj. Sheldon.

ST. PAUL, Minnesota, November 12, 1864.

SIR: At the request of J. W. Taylor, esq., I have written and forward to you, by Captain R. Blakeley, of this city, some recollections relative to incidents in the mining districts of Wisconsin and Dubuque, (Iowa.) Mr. T. was impressed with the belief that these recollections might possibly be of some use to you and others in framing a just policy for the management of mineral lands on the public domain.

In 1832 several miners from Wisconsin and Illinois went to the lead ore lands in the vicinity of Dubuque, and commenced digging. The treaty with the Indians who owned those lands had not been completed, and the government, not deeming it proper that rich veins of lead ore should be found *before* the purchase was made, directed General Taylor, (afterwards President,) then stationed at Prairie du Chien, to remove the miners from the Dubuque diggings. In complying with this order General Taylor sent Lieutenant Jefferson Davis, (now President of the Confederate States,) with a force of thirty dragoons, to Dubuque. The miners left their diggings, I believe, without any coercion, being assured that the country would be open to them the next summer.

Sometimes (but not often) quarrels occurred among the miners, respecting claims to mineral lots, which terminated with the death of one or more of the contestants. I think these quarrels caused the death of about six persons in the Dubuque, and two or three in the Wisconsin mines.

Respectfully, your obedient servant,

JOHN P. SHELDON.

Hon. W. P. FESSENDEN,

Secretary of the Treasury.

Recollections and remarks relative to the mining country in Iowa, Wisconsin, &c.

In June, 1833, as an agent of the government, I opened the lead mines at Dubuque, Iowa, and, in conformity to the "regulations" which then prevailed, (and which were intended to yield a revenue to the government,) I proceeded to give out licenses or permits to miners and smelters, on their subscribing to the regulations. The smelters were also required to enter into an agreement by which they bound themselves to pay to the government, through the agent, five pounds of lead for every hundred smelted, and this payment secured to them a tract of timbered land, which was surveyed and its bounds marked. By subscribing to the regulations, the miner bound himself to sell his mineral to a licensed smelter, to work upon his mineral lot a given number of days in a week, to submit to the decisions of arbitrators duly appointed in all matters relative to claims to mineral lots, &c., &c.

On receiving his permit, the miner would seek, in what was deemed to be the mineral range, a place upon which to commence work. He would usually measure and mark his lot, (say 100 yards square,) and commence "prospecting," or searching for mineral. Should he succeed in striking a fair "prospect," in a few days or weeks after commencing his digging he would erect a cabin upon or near his lot and continue his labors, or (what often happened) he would sell his "prospect" to another miner. All mineral lots were to be worked according to the regulations, or they were to be abandoned by those who had laid them off, and the stakes and marks which designated their bounds were

to be removed. A miner could own or claim two or more lots, if he would employ men to work upon each for the time required by the regulations.

Among the most important duties which devolved on me as the government agent was the collection of the rent lead, and securing it for the government. This duty I performed monthly. My visits to the furnaces of the smelters, and to the diggings of the miners, were frequent; and they became necessary in order to secure the rent lead which the smelters had agreed to pay. In the course of the summer of 1833 some of the smelters told me that Major Legate, the government agent on the east side of the Mississippi, had ceased to collect rent lead from the smelters there, and that I need not call upon them for any further payments. I told them that it had been evident to me from the first that the policy of taxing the miner for the ore which he discovered in the earth and raised to its surface was a very erroneous one, and that the government should rather encourage the miner by a bounty on every ton of ore that he raises, (for the miner paid the tax through the smelter.) Nevertheless, I would not permit any smelter to evade his agreement with the government, and said I would, with the assistance of the miners, place every smelter on the east side of the Mississippi who refused to abide by his agreement.

From the time the smelters commenced their operations in June, 1833, to the month of July, 1834, the value of the rent lead collected by me was about twenty or twenty-five thousand dollars. In August or September following I was appointed register of a land office in Wisconsin. The land district embraced all the lead mine region on the east side of the Mississippi, except that portion which lies in the county of Jo Daviess, Illinois. During the time that I held the office of register (five or six years) I became confirmed in the opinion which I entertained while acting as agent at Dubuque, that it was an error of the government to require of miners a tax on the production of their labor, and embraced every opportunity to urge a relinquishment of the tax, and the sale of the lands to the miners who occupied and worked them. While at Dubuque it was ascertained, by pretty correct data, that the profits arising from all the diggings, when divided among all engaged in mining and those employed by the smelters, would not give them but a fraction over $37\frac{1}{2}$ cents a day; and I have heard old miners, who have tried their fortunes in California, say that the "*chances of making a raise*" in the lead mining lands of Wisconsin and Dubuque were just as good, and as many, as in any portion of California.

Every pound of gold and ton of galena adds so much to the wealth of the country; the perseverance and hard labor of the miner gives this increase of wealth, and if dug out of the public land, so far from diminishing its value, the price of the land when brought into market will be enhanced from the fact that it has been proven to be mineral or gold land.

In mining among the lead ore diggings of Wisconsin, Illinois, or Iowa, and also in the gold regions bordering the Pacific, few of the very many who venture get paid for even a small portion of their labor and hardships; and yet the success of the few serves as a fascination to draw on thousands to try their fortunes in the lottery. In the galena region of Wisconsin, &c., mining, even to the experienced miner, is truly a lottery; and at this day, notwithstanding the high price of mineral, there is but very little done in "*prospecting*," all the miners preferring to work upon old diggings rather than risk the loss of time and money in searching for veins or "*leads*" of ore. Some valuable discoveries, however, are made from time to time by chance or unexpectedly, when sinking walls, digging cellars, &c., and among old diggings new veins are sometimes struck, which yield a rich reward to the miner.

Miners and many others who are willing to hazard their time, means, and labor, commenced prospecting and digging in Wisconsin and Jo Daviess county, Illinois, as early as 1825. They made, and with considerable strictness adhered to, certain rules relative to the rights of each to lots, mineral discoveries, &c.,

and disputes and adverse claims were usually referred to arbitrators. The miners in the Pike's Peak region and in other places where gold has been found upon the public lands have followed a like plan to secure their rights and claims.

When, in the fall of 1834, a portion of the land in the mining region of Wisconsin was brought into market, directions were given by the General Land Office to reserve from sale all tracts upon which discoveries of mineral had been made which warranted mining. These directions were intended, no doubt, to protect the miners and the government from speculators seeking valuable mineral lands. For a knowledge of these discoveries of mineral, the land officers were instructed to inspect the maps or township plats, upon which it was supposed the surveyors had marked the proper location of all the diggings. They were also instructed to consult the agent of the lead mines at Galena, Major Th. Legate. The inspection of the maps showed that many tracts containing the most valuable discoveries and diggings were not noted or designated upon them, while many other tracts, noted as diggings, were really worthless for mineral, but quite desirable for agricultural purposes. This condition of the maps does not prove that the surveyors were remiss or careless in their duties, for doubtless their chain often crossed old and worthless diggings, which had been made by the men who, to a considerable number were engaged in prospecting over a large portion of the country from 1824 to 1830-'31; the worthless diggings would be noted, while a large portion of the land in the interior of the section would not be seen by the surveyors.

The communications from the agent at Galena, Major Legate, were of no use to the land officers to enable them to ascertain the location of diggings or mineral discoveries, for they consisted merely of lists of numerous sections of land within the boundaries of what was deemed to be the mineral country, and on which the agent supposed mineral would be found whenever miners would seek for it. These sections, embracing many which contained timbered land, which were deemed necessary for the use of smelters, the agent recommended to be reserved from sale. Of the whole number of tracts thus recommended, perhaps not one in twenty or thirty contained a mineral discovery or a mining lot; and the land officers did not consider themselves authorized by the President's proclamation, nor by the instructions from the General Land Office, to reserve from sale the lands designated in the lists of the agent. They deemed it proper, however, whenever application was made for a tract found upon the lists of the agent, to require satisfactory proof that the tract was devoid of mineral discoveries and diggings, or mineral lots.

The General Land Office appeared to be destitute of information as to the true condition of things in the mineral region of Wisconsin at the time the lands were brought into market, and no proper measures had been adopted to ascertain the true location of miners' lots and valuable diggings, nor were the land officers authorized to supply themselves with that knowledge by any instructions from the General Land Office. Under these circumstances, and the officers being strangers in the land, it can be well conceived that many embarrassments arose from the continual attempts of unprincipled and greedy men to enter lands which were proven to be valuable for mineral. The land officers endeavored by every means in their power to prevent the entry of mining lots and diggings, and by doing so made themselves obnoxious to the hostility of all who strove to enrich themselves by purchasing discoveries and lots belonging to the hard-working miner. To add to these embarrassments, the person who was appointed to select the reservations granted to the half-breeds of the Winnebago tribe of Indians by the treaty made at Prairie du Chien in 1829, departed from the instructions given him by the government, and made those selections within the boundary of the mineral region as it was then known—all the tracts (some thirty-five or forty sections) were to have been selected outside of that region. This occurred in 1835. The person who made the selections was required to report his pro-

ceedings to the register of the land office at Mineral Point, who was instructed to give his views to the General Land Office touching the correctness of those proceedings. The statement of the register (made to the Indian bureau or to the General Land Office) was conformably to facts, and that, with a single exception, all the selections were made without regard to the terms of the treaty and the instructions to the person who made them. Some time after, I think about two years, it was decided by the proper department of the government that the register had taken the correct view of the matter, and another person was appointed to make the selections, whose proceedings were approved.

Owing to the limited personal knowledge of the land officers of the location of valuable discoveries of mineral and of mining lots, many were entered, some by false testimony, some by connivance of the miners who owned lots upon the tracts entered, and some were purchased as ordinary farming land, there being no evidence that mineral was ever found upon them. The land officers, when they were informed of such entries, transmitted the proof to the General Land Office that such tracts, when purchased, contained valuable discoveries of lead ore, &c.

When General Shields was Commissioner of the General Land Office I had a long conversation with him upon the subject of putting into market the reserved mineral lands of Wisconsin. Our views coincided, and in his next annual report he recommended their sale. His recommendation was adopted by Congress.

Previous to the sale of the mineral reservations, I urged the appointment of a commissioner with instructions to visit the mineral region of Wisconsin for the purpose of taking testimony and deciding upon all cases of entries of mining lots and valuable discoveries of mineral, and report his decisions, &c., to the General Land Office. Such appointment was made, and the commissioner remained in the mining district for some months, giving very extended notice to all interested. According to the best of my recollection he reported only about twenty or twenty-five entries as fraudulent and void; and in what manner the tracts, so reported, were disposed of I do not know, but presume the miners and others having an interest in them managed so as to repurchase them from the government.

The sale of the mineral lands, or of the reservations in the mineral region, was not detrimental to the rights of the miners to their lots. The tract, or subdivision of a section which embraced the lots claimed by miners, would be entered jointly by them, or, what was more usual, they would permit the entry of the tract by a single person, on condition of receiving from him a warrantee deed for their mining lot, and perhaps their cabin and garden. All claims were thus equitably and peaceably settled.

After leaving Dubuque, in 1834, a person by the name of Tanner was appointed in my place to collect from the smelters the rent-lead; but he remained there only six or eight months, when he resigned his agency for the reason that he was unable to collect an ounce of rent for the government, and he deemed it dishonest to receive a salary from government when it was not possible to render any service therefor. Major Legate, the agent at Galena, had not collected any rent for a long period before I left Dubuque, and I think I turned over to him the last lead that the government received for rent. In 1833-'34 the lead-mine district of Dubuque was not within the jurisdiction of any courts of law; there was no "suing and being sued;" and having secured the good-will of a vast majority of the miners, I found no difficulty in persuading the smelters that it would be to their interest to fulfil their engagements to the government.

A short time before the reservations of mineral land were brought into market, a government agent was appointed and sent to the lead-mine region in Wisconsin, Illinois, and Iowa, with instructions to collect from the smelters the rent (lead) which they had refused or neglected to pay to the proper agents of the government (amounting in all to several hundred thousands of pounds.) This agent, after one or two years' labor, and all in vain, was recalled, or relinquished

his occupation in despair, I know not which, nor do I know the obstacles which were thrown in the way of the agent, and which rendered it impossible for him to collect the rent-lead due the government by the terms of the licenses given to the smelters. The reports of the agent, if he made any, will perhaps elucidate the matter. At the date of his labors I was not in the mining country.

In this place it will be proper to state another source of trouble and expense to the government, originating in the Wisconsin mining district. The hostility of certain unprincipled men to the land officers (and more particularly to the register) led them to accuse the officers of gross frauds upon the government, and of selling many tracts of land in a fraudulent manner; some were represented as never having been offered at public sale; some as being well-known mining lands, and some as having been applied for and refused, and not sold until applied for by a favorite of the land officers, &c. These men, aided by the person who was first appointed to make the selections of land for the Winnebago half-breeds, (before alluded to,) succeeded in persuading or inducing the proper department at Washington to commence some thirty or forty suits in chancery against citizens of Wisconsin who had purchased lands in the mining district; the suits were for the purpose of making void the sale and ousting the purchasers, one of whom was the register of the land office, whose case stood first on the list. It is only necessary to say that not a single case was decided against the purchaser, and yet the government was at the expense of employing an able lawyer in the State of New York to aid the United States attorney of Wisconsin in conducting the suits.

To the trouble and expense to the government, originating in the system of rents from the smelters of lead ore, I will add to the preceding detail one other fact within my recollection. Colonel Henry Gratiot commenced mining and smelting in Wisconsin at a very early period, and paid a large amount of rent-lead to the government agent at Galena. In 1844-'45 his petition was before Congress praying for relief, on the ground that a large portion of the mineral was dug and smelted on lands belonging to the Winnebago tribe of Indians, to whom he made large payments in goods, &c., for the privilege of mining and smelting on their lands. The committee of the House of Representatives, to whom the petition was referred, reported a bill for his relief which became a law, providing a repayment to him of some fifteen or twenty thousand dollars, being the value of the lead which had been exacted from him illegally or improperly.

In respect to the subdivisions of sections in Wisconsin, within the bounds of the mineral discoveries, it may be truly said that not five tracts in a hundred have yet been dug upon or "proven" for lead ore; the same may be said of the lead-ore region in Illinois and Iowa; and centuries, perhaps, will pass before that region will be fully developed as a rich mining country. To open the rich veins of galena which are now hid from the most experienced seeker, (for there are no surface indications that can be depended upon,) it will require the union of capitalists who are willing to hazard their money in the search.

The true policy of the government is to encourage the development of all its mineral and metal lands; and while every proper facility and aid should be given to persons who desired to mine, there could be no just reason for exempting the *fortunate* miner from paying to the government a tax which other citizens are now, and for a long time will be, required to pay—a tax on his yearly income or clear profits. And this tax could be as easily assessed and collected by competent officers in a mining country as in our farming districts and towns. Lands known to be valuable for minerals or metals should be surveyed and sold, being first offered in the market to the highest bidder. The longer such lands are withheld from sale, the greater will be the liability of the miners and settlers to quarrels and litigation.

JOHN P. SHELDON.

III.

Mr. Bennett's bill, presented to House of Representatives March 18, 1864, recognizing the permanent title of government to mineral lands, and a right of occupation by the miner.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the mines and minerals in the public domain shall be held as the property of the nation, open to the occupation of all loyal citizens, subject to such regulations, conditions, and restrictions as are hereinafter stipulated, or may hereafter be prescribed by law, and subject also to the miners' laws, regulations, or local usages of the several mining districts, so far as the same may not be in conflict with the laws of the United States, or such executive regulations as may be made in pursuance thereof.

SEC. 2. *And be it further enacted,* That the discoverer of any mine, placer, or lead shall be entitled to hold, subject to such regulations as may be prescribed as to occupancy and improvement, one discovery claim, and to pre-empt and hold one additional claim in the same mining district to the extent and upon the terms allowed to other miners, which other miners are hereby restricted to one claim each of the same kind, until such claim shall be worked out or abandoned by a recorded relinquishment.

SEC. 3. *And be it further enacted,* That any miner may hold one hill, one flat, one bar, or river bed, one quartz or lead claim, in the same district: *Provided,* That each shall be worked in good faith in its proper season within each year, and in such manner as may be prescribed by the local mining laws of the proper district, or by any law of Congress, or executive regulation as aforesaid.

SEC. 4. *And be it further enacted,* That it shall be the duty of the collector or deputy collector of internal revenue nearest to or in the proper mining district to receive and account for all moneys paid to him for the use of the United States under the requirements of this act, and according to such regulations as may be prescribed by the Treasury Department, and whose general bond shall cover all such liabilities. And it shall be the duty of the internal revenue assessor or assistant assessor for the proper mining district to make returns to the collector, and to the General Land Office, of the names of all parties working mines within his jurisdiction, with specific designations as to localities, and further, from time to time, so to report the names of any person or persons working without proper written authority to do so, as hereinafter required; and any party who shall be working a mine after the publication of regulations pursuant to this act shall, in default of payment, be liable either to a fine of ——— dollars or forfeiture of product, in the discretion of the court.

SEC. 5. *And be it further enacted,* That a declaratory statement may be filed with the recorder for the mining district upon any quartz, silver, or copper ore lead to the extent allowed by the local mining laws for any one claim: *Provided, however,* That the party shall first present to the collector or deputy collector officiating for the mining district a certificate from said recorder that such declaratory statement has been filed, and shall thereupon pay to said collector or deputy collector the sum of ——— dollars for the use of the United States; and the official receipt of the collector or deputy shall be the evidence of the party's right to hold the claim for one year, and no longer, from date of such receipt, in order to test the value of the claim.

SEC. 6. *And be it further enacted,* That where any party falling within the provisions of the foregoing section shall fail, within thirty days after the expiration of his year, to obtain from the said recorder a certificate showing that he has established, to the satisfaction of said recorder, by due proof, the fact that he is in actual occupancy and improvement of said claim, and also showing by his written declaration his intention permanently to work his claim as a mine, such

party failing shall ipso facto forfeit all right to use the same; but when the party shall obtain from said recorder a certificate stating that such proof and declaration have been filed, he shall thereupon pay to the collector or deputy collector, as aforesaid, the sum of ——— dollars per foot for a permanent license or permit, which license or permit to be issued by said collector or deputy, shall stipulate for the payment of a like sum of ——— dollars per foot annually thereafter, the successive payments to be shown by indorsement or otherwise of said collector upon such permit; but upon the failure of the party for the space of thirty days to make such payment, the claim shall be absolutely forfeited to the United States.

SEC. 7. *And be it further enacted*, That the privilege allowed by the fifth section of this act shall be extended to persons desirous of working placer mines or other than quartz or ore leads, with this difference as to time, that the period for testing shall be restricted to thirty days; and if, at or before the expiration of that time, the party shall desire a permanent permit or license, he shall present to the collector a certificate from the recorder, showing that due proof has been filed with the latter of the occupancy and improvement by the party, who shall thereupon make payment of ——— dollars to said collector, to be renewed annually by the payment of a like sum, the collector's or deputy's receipt to be evidence of the miner's right: *Provided*, That in default of payment at any period stipulated for payment, forfeiture shall ensue.

SEC. 8. *And be it further enacted*, That the product of all mines shall be subject to such monthly, quarterly, or annual tax or percentage upon such product as shall be prescribed from time to time by law.

SEC. 9. *And be it further enacted*, That it shall be the duty of the Commissioner of the General Land Office to prepare proper regulations for giving full effect to the foregoing law, except so far as the accountability of the collectors or deputies for receipts is concerned, the regulations in that respect to be prepared by the Treasury Department. And it shall be the duty of each collector to cause to be prepared, and transmit it to the General Land Office, a topographical map of the mining districts falling within his jurisdiction, designating, as near as may be, the boundaries of the districts, with the localities, position, and extent of each claim.

IV.

AN ACT passed July 1, 1864, (Session Laws 1863-'64, p. 343,) "for the disposal of coal lands and of town property in the public domain."

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That where any tracts embrace coal beds or coal fields, constituting portions of the public domain, and which as "mines" are excluded from the pre-emption act of eighteen hundred and forty-one, and which under past legislation are not liable to ordinary private entry, it shall and may be lawful for the President to cause such tracts, in suitable legal subdivisions, to be offered at public sale to the highest bidder, after public notice of not less than three months, at a minimum price of twenty dollars per acre; and any lands not thus disposed of shall thereafter be liable to private entry at said minimum.

SEC. 2. *And be it further enacted*, That in any case in which parties have already founded, or may hereafter desire to found, a city or town on the public

lands, it shall and may be lawful for them to cause to be filed with the recorder for the county in which the same is situated a plat thereof, for not exceeding six hundred and forty acres, describing its exterior boundaries according to the lines of the public surveys where such surveys have been executed; also giving the name of such city or town, and exhibiting the streets, squares, blocks, lots, and alleys, the size of the same, with measurements and area of each municipal subdivision, the lots in which shall each not exceed four thousand two hundred square feet, with a statement of the extent and general character of the improvements; the said map and statement to be verified under oath by the party acting for and in behalf of the persons proposing to establish such city or town; and within one month after such filing there shall be transmitted to the General Land Office a verified transcript of such map and statement, accompanied by the testimony of two witnesses that such city or town has been established in good faith; and when the premises are within the limits of an organized land district, a similar map and statement shall be filed with the register and receiver and at any time after the filing of such map, statement, and testimony in the General Land Office, it shall and may be lawful for the President to cause the lots embraced within the limits of such city or town to be offered at public sale to the highest bidder, subject to a minimum of ten dollars for each lot; and such lots as may not be disposed of at public sale shall thereafter be liable to private entry at said minimum, or at such reasonable increase or diminution thereafter as the Secretary of the Interior may order from time to time, after at least three months' notice, in view of the increase or decrease in the value of the municipal property: *Provided*, That any actual settler upon any one lot, as aforesaid, and upon any additional lot in which he may have substantial improvements, shall be entitled to prove up and purchase the same as a pre-emption, at said minimum, at any time before the day fixed for the public sale.

SEC. 3. *And be it further enacted*, That when such cities or towns are established upon unsurveyed lands, it shall and may be lawful, after the extension thereto of the public surveys, to adjust the extension limits of the premises according to those lines, where it can be done without interference with rights which may be vested by sale; and patents for all lots so disposed of at public or private sale shall issue as in ordinary cases.

SEC. 4. *And be it further enacted*, That if within twelve months from the establishment of a city or town, as aforesaid, in the public domain, the parties interested shall refuse or fail to file in the General Land Office a transcript map, with the statement and testimony called for by the provisions of the second section of this act, it shall and may be lawful for the Secretary of the Interior to cause a survey and plat to be made of such city or town, and thereafter the lots in the same shall be disposed of as required by said provisions, with this exception, that they shall each be at an increase of fifty per centum on the aforesaid minimum of ten dollars per lot.

SEC. 5. *And be it further enacted*, That effect shall be given to the foregoing act, according to such regulations as may be prescribed by the Secretary of the Interior. The act entitled "An act for the relief of the citizens of towns upon the lands of the United States under certain circumstances," approved May 23, anno Domini eighteen hundred and forty-four, and all other acts and parts of acts inconsistent with this act, be, and the same are hereby, repealed.

V.

Mr. Conness's bill, presented to the Senate July 4, 1864, "to provide for the survey and sale of the mineral lands, and to extend the right of pre-emption thereto."

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the President of the United States shall, as soon as may be after the passage of this act, order a survey of the public lands hitherto designated as "mineral lands," and the surveyor general of the United States in each State and Territory containing such lands shall proceed to survey or subdivide said mineral lands into townships, sections, quarter sections, sixteenths of sections, and tracts of ten and five acres each, and such lesser fractions of a section as the Secretary of the Interior shall direct. Or whenever, in the opinion of the Secretary of the Interior, a departure from the rectangular mode of surveying and subdividing the public lands would promote the public interest, he may direct such change to be made in the mode of surveying and designating the said lands as he may deem proper with reference to the existence of timber, mountains, mineral deposits, and the advantages of water privileges; and after a plat of said survey and subdivision is returned to the office of the register of the land office in any district where mineral lands are situated, any person or association of persons, having previously occupied and improved a claim or claims, according to the local custom or rules of miners in such district, and in regard to whose possession there is or shall be no controversy or opposing claim, may enter either of said subdivisions, not exceeding ——— acres in any single entry, upon the payment to the receiver of the land office of ——— dollars per acre, and shall be entitled to receive a patent for the same, subject to the approval of the General Land Office; and thereafter mineral lands remaining unsold, and in regard to which there is no controversy or opposing claim, may be in like manner entered by individuals, or associations of individuals, who shall prove to the satisfaction of the local land office the facts as aforesaid of actual possession and improvement, according to the local custom or rules of miners: *Provided*, That the laws and regulations of the General Land Office now and hereafter in force governing the disposition of public lands shall be applicable in the disposition of mineral lands, when not inconsistent with the provisions of this act: *And provided, further*, That the mineral lands in the public domain prior to appropriation and sale, both surveyed and unsurveyed, are hereby declared to be free and open to exploration and occupation by all citizens and those who have declared their intention to become citizens, subject to such regulations as may be prescribed by law, and subject also to the local custom or rules of miners in the several mining districts, so far as the same may not be in conflict with the laws of the United States, or such executive regulations as may be made in pursuance thereof.

SEC. 2. *And be it further enacted*, That wherever, prior to the passage of this act, upon the lands heretofore designated as mineral lands which have been excluded from survey and sale, there have been homesteads made by citizens of the United States, or persons who have declared their intention to become citizens, which homesteads have been made, improved, and used for agricultural purposes, and upon which there have been no valuable mines of gold, silver, cinnabar, platinum, or copper discovered, or which are properly agricultural lands, the said settlers or owners of such homesteads shall have a right of pre-emption thereto, and shall be entitled to purchase the same at the price of one dollar and twenty-five cents per acre, and in quantity not to exceed one hundred and sixty acres.

SEC. 3. *And be it further enacted*, That where, by priority of possession,

rights to the use of water for mining, agricultural, manufacturing, or other purposes have vested and accrued, and the same are recognized and acknowledged by the local customs, laws, and decisions of courts, the said possessors and owners of such vested rights shall be maintained and protected in the same; and the right of way for the construction of ditches and canals for the purposes aforesaid are hereby acknowledged and confirmed.

SEC. 4. *And be it further enacted*, That upon the survey of the lands aforesaid the Secretary of the Interior may designate and set apart such portions of the said lands as are clearly agricultural lands, which lands shall thereafter be subject to pre-emption and sale as other public lands of the United States, and subject to all the laws and regulations applicable to the same. And the sum of ——— dollars, or as much of the same as may be necessary, is hereby appropriated, out of any moneys in the treasury not otherwise appropriated, for the purpose of defraying the expenses incident to this act.

U.

MINT OF THE UNITED STATES, *Philadelphia, October 3, 1864.*

SIR: I have the honor to submit the following report of the operations of the mint and its branches for the fiscal year ending June 30, 1864:

The coinage of the late fiscal year, although not so large as in some former years, exhibits, notwithstanding the disturbed condition of the country, a satisfactory increase over the coinage of 1863.

The amount of bullion, in value, received at the mint and branches during the fiscal year was as follows: gold, \$23,986,989 92; silver, \$933,818 55; total deposits, \$24,920,808 47. From this total a deduction must be made for the bullion re-deposited, or bars made at one branch of the mint and deposited at another for coinage. Deducting the re-deposits, the amount will be \$24,012,741 49. The coinage for the same period was as follows: gold coin, \$21,649,345; imported and fine gold bars, \$2,333,403 31; silver coin, \$548,214 10; silver bars, \$301,872 89; cents coined, \$463,800; total coinage, \$25,296,635 30; numbers of pieces of all denominations coined, 46,983,396. The distribution of bullion received at the mint and branches was as follows: at Philadelphia, gold deposited, \$3,002,287 19; gold coined, \$2,580,945; fine gold bars, \$307,322 07; silver deposits and purchases, \$223,695 77; silver coined, \$200,714 10; silver bars, \$7,655 23; cents coined, \$463,800; total coinage, \$3,560,436 40; number of pieces, 45,114,276; total deposits of gold and silver, \$3,225,982 96.

At the branch mint, San Francisco, the gold deposits were \$18,913,547 70; gold coined, \$19,068,400; silver deposits and purchases, \$418,570 80; silver coined, \$347,500; silver bars, \$120,909 02; total coinage of gold and silver, \$19,536,809 02; number of pieces, 1,869,120.

The assay office in New York received during the year, in gold bullion, \$1,584,825 06; and, in silver, \$291,551 98; fine gold bars stamped at that office, 1,812—value, \$1,539,751 27; silver bars, 1,947—value, \$173,308 64; total value of gold and silver bullion, \$1,876,377 04.

The branch mint at Denver, Colorado Territory, has been, during the past year, successfully engaged in melting, refining, assaying, and stamping gold bullion, returning the same to the depositor in the form of unparted bars, bearing the government stamp of weight and fineness. The number of bars stamped was 532—value, \$486,329 97.

The efficiency and usefulness of this branch would be greatly increased if a safe and expeditious mode of transportation could be secured. An overland

route of six hundred miles is a formidable obstacle in the way of commercial intercourse with our eastern cities and markets. In addition, the hostility of the Indian tribes along the route, doubtless instigated by rebel emissaries and bad white men, has increased the difficulty and dangers of inter-communication and the transportation of bullion to the Atlantic markets. These difficulties will probably be obviated in due time, and that institution will then assume her proper position as a branch mint.

Efforts have been made to introduce a system of purchases and exchanges, by which the government will assume the risk of transporting bullion from Denver to places where it may be needed for coinage or purchase. The government, by purchasing the bullion at Denver, and paying therefor by draft in specie on the treasurers in the Atlantic States, would relieve the owners of all responsibility and enable them to convert their bullion into eastern funds with but little expense. The act of Congress establishing a branch mint at Denver provides "that the superintendent of said branch mint be authorized, under the direction of the Secretary of the Treasury, and on terms to be prescribed by him, to issue in payment of the gold-dust and bullion deposited for assay and coinage, or bars, drafts or certificates of deposit payable at the treasury or any sub-treasury of the United States, to any depositor electing to receive payment in that form." This provision embodies the true policy of the government in relation to the deposits of bullion in branch mints or assaying offices distant from our great commercial centres. Its accomplishment would not only benefit the hardy miner and the gold regions of Colorado, but the general commercial interests of the country and government. Renewed efforts ought to be made to introduce this system, and when the difficulties now in the way are removed, and the overland stage-route to Denver in full and successful operation, satisfactory arrangements can be made with that company and others by which the bullion purchased by the government will be safely brought to the eastern cities and depositories.

GOLD MINING REGIONS.

The reports from the gold and silver regions of our country are very satisfactory, and indicate an abundant and increasing production. The places whence the deposits were obtained, and the amount from each locality, are set forth in the tabular statements attached to this report. These tables contain nearly all we have to say on the subject of our gold mining regions. There is occasionally an uncertainty as to the origin of a deposit of gold, and Idaho may have obtained some credits which belong to Colorado. Every precaution, however, is taken to have the deposit credited to its proper locality, and when an uncertainty arises it is credited to the region which the nature of the bullion indicates it to belong. In relation to Idaho it may be stated that the production of the last has largely exceeded that of the previous fiscal year, and the indications of a still larger yield are most encouraging. The statistics found in this report prove the correctness of these remarks. For the fiscal year ending June 30, 1863, the amount of gold bullion received from Idaho was \$1,816 97; during the past year the amount reached \$2,306,568 10; an increase of more than two millions in one year. Indian hostilities, and the troubled state of the country generally, have affected to some extent the operations in our gold-producing localities; still our mining regions are the scenes of activity and excitement, and enterprise and capital are fast taking possession of them. In some places, especially where the mining is superficial, individual enterprise is sufficient; but in others, and especially in Colorado, the force of companies with large resources is necessary. Such organizations, under prudent and proper management, cannot fail to be successful, realizing large profits for themselves, and at the same time developing by associated capital and labor the material resources and wealth of our nation. Within the past year, large investments in that

region have been made by parties in New York, Philadelphia, and elsewhere. From Nova Scotia we receive some gold, and occasionally small deposits from Canada. A report from the latter region, in pamphlet form, received some months ago, does not afford much encouragement as to paying returns; but more recent discoveries render it not improbable that a new and successful gold region will be there developed. Australia and New Zealand continue to be very productive, and doubtless Liberia also, although we have no direct information from that quarter. The past fifteen years has been an era of wonderful activity in gold mining, and the effects of this addition of gold to the wealth of the world, upon industrial pursuits, commerce, and civilization, are everywhere manifested. But wealth alone cannot secure the peace and prosperity of a nation. Virtue and truth, more than gold and silver, can make a nation great, and its people prosperous and free.

SILVER OF NEVADA.

The history of the development of any mining region is a romance, full of surprising incidents, and none is more so than that of Nevada Territory. From the first discovery of silver, in June, 1859, to the present moment, that country has been a scene of excited search, toil, and speculation, of rapid fortunes, severe losses and disappointments. It would be out of place in this report to enter into details, which may be found elsewhere; but to inquire what becomes of all this vast yield of silver, and what benefit is to inure to our country from its production, is certainly alike proper and instructive. In a time of peace shall we have a share of the gold and silver of our own mines for our currency and use, or must it be carried off to the p'ethoric vaults of European banks and capitalists? This latter is precisely the direction all the silver has taken thus far. Among the injuries inflicted upon us by the rebellion, not the least serious is the banishment of silver. None of the Nevada silver is coined here, and but little at San Francisco, where it first goes. Our correspondents at that port inform us that it is all shipped to England, partly in rich ores, which can more economically be smelted there, and partly in metallic bars. We have also some information from London as to the receipt of this bullion, but not comprehensive enough to serve as a statistical return. In fact, we do not know how much silver is raised from those mines; they are rich and valuable. We know that some of the best of them sell in the market at \$2,500 to \$5,000 specie for one foot frontage, and have yielded from two to four per cent. monthly on such prices. These mines are not held by British capitalists, nor worked by British subjects, although many of the miners are from Cornwall and Ireland. They are held and controlled by our own citizens, changing owners frequently, as the stock market is extremely active and prices very fluctuating. The reasons for the disappearance of this silver are very obvious, particularly in this crisis of our country's history. The war in which we are now engaged has compelled a resort to paper currency to meet the increased taxation and expenditures of the nation. This currency supplies the place of specie, which increases in value commercially in proportion to the increase of the paper circulation. Its commercial value being thus increased it ceases to be a circulating medium, and is either hoarded at home, or sent abroad in payment of foreign importations. Again, the diminished export of our leading products, especially cotton, and the continuance of extravagant and unnecessary importations (often forced upon our market by unfriendly foreign importers) have caused the balance of trade to be largely against us, requiring the export of our precious metals to pay a debt which ought, from every motive of interest, every consideration of patriotism, to have been avoided. War has affected our currency and commerce, has driven our specie from present circulation, and poured it into the coffers of the foreign merchant and capitalist.

Peace will restore what war has destroyed, the untiring energy of the American people will regain what has been lost, and make our commerce and currency rival that of the most favored nations. Our nation lives, and in the exercise of patience, perseverance, patriotism, and a real confidence in the sentiment recently stamped upon some of our coinage, "In God we trust," we may hope for a speedy restoration of peace and union—a higher national life, and a more perfect and enduring nationality.

ASSAY OFFICES.

The rapid development of our gold mining regions and the discovery of new and rich deposits of the precious metals, render it incumbent upon the government to provide facilities for melting, assaying, and stamping of bullion in those Territories in which the mines are located. These mines afford a wide field for well-directed enterprise and profitable investment of capital. Already large and well-conducted private refining and assaying establishments have been put in successful operation. They will doubtless be increased in number and capacity when demanded by an increased production of the precious metals; and whilst the business of refining and parting by private enterprise should be encouraged, the true national policy is to provide government assay offices, which will afford the mining and commercial interests of those regions every practicable facility that can be desired. Neither public nor private interests, national or local considerations, require the multiplication of branch mints for coinage. When located far from our great commercial centres, the difficulties and expense necessarily attending their operations greatly outweigh every advantage that can be derived from their establishment. The mints now in operation are sufficient for the coinage of all the gold and silver that can be produced in the United States. San Francisco is the commercial and economical point for the coinage of the precious metals produced from the mines of the States and Territories west of the Rocky mountains. The parent mint in Philadelphia occupies the same position in reference to the Atlantic States. These two great central institutions, in their capacity for coinage, can abundantly meet any governmental or commercial demand. These for coinage, and the establishment of assay offices by the government in our mining regions, for melting, refining, assaying, and stamping bullion, will secure to the mining interests of the country every facility that can be desired and every encouragement that can with propriety be expected.

BRONZE COINAGE.

The substitution of the bronze alloy for the nickel mixture, as authorized by Congress, has been highly successful. The demand for the one and two cent pieces has been unprecedented, and every effort has been made to meet it. The demand still continues, although the number daily issued largely exceeds that of any former period. Large quantities are hoarded and thus kept from circulation. They have also been bought and sold by small brokers at a premium. This has induced individuals to collect them for the purpose of sale, thus producing a scarcity and inconvenience to the public that ought not to exist. The proportion of the three metals in the bronze alloy has been steadily maintained, as shown by the constant trials in the assay department, and regularly, as required by law, reported to me. The two-cent piece is a most convenient and popular coin. Its size and weight contribute to its usefulness. The motto—"In God we trust"—stamped upon this coin, has been highly approved by the public, not only as improving the artistic beauty of the piece, but also expressive of our nation's reliance upon the "God of nations" in this hour of peril and danger. Why should this distinct and unequivocal recognition of the sovereignty of God, of Him who is "the King of kings and Lord of lords," be con-

fined to our bronze coinage? The silver and the gold are His, and upon it should be impressed, by national authority, the declaration of our nation's confidence and trust in Him "who maketh war to cease unto the ends of the earth," and "who stilleth the raging of the sea and the tumult of the people." Let our nation in its coinage honor Him, in whom is our strength and salvation.

ALUMINUM BRONZE.

During the past year some interesting experiments were made with aluminum as an alloy for coins; not with a view to displace the bronze coinage, but to propose a system of tokens for five and ten cents. More than two years ago experiments were made in aluminum alloys, to try their fitness for *medals*. Information was received from Paris that the introduction of only one per cent. of aluminum into fine silver would resist the sulphuretted tarnish which is so apt to attack that metal in certain exposures. The experiments made here did not confirm that statement; on the contrary, a slip of this alloy (99 silver, 1 aluminum) suffered more discoloration from the vapor of sulphuretted hydrogen than a slip of fine silver. The alloy was also much harder. An alloy of thirteen parts copper with one of aluminum was then tried, and another of nineteen parts copper to one of aluminum. The former gave a pale gold color, the latter the color of standard gold coin—both beautiful, but too nearly resembling the precious metal. Under the press, however, they were both found to be so hard and stubborn, in spite of repeated blows, as to be quite impracticable. The question, however, was still open, whether a different proportion, and the low relief used for *coin*, would not give a satisfactory result. In fact, we had specimens of aluminum bronze coinage, effected by European manufacturers of aluminum, which proved that the striking was at least practicable, if not easy. A further series of experiments was therefore undertaken here, at the desire of the Secretary of the Treasury and a committee of scientific gentlemen. The latter forwarded to the mint a bar for this purpose, which, by assay, was found to contain the proportion of nine parts copper to one of aluminum. Their directions were closely followed, and the principal results may be briefly stated as follows:

The aluminum bronze, in the proportion just stated, is very rigid under the rolls, requiring many annealings, and liable to crack and break into plates of oblique fracture. It may, however, be gradually brought down to the gauge of one cent coin; but in the coining press it is so hard that it will not take a perfect impression, at least not such as can be given to the present legal alloy. The comparative ductility of the aluminum bronze and of pure copper will be shown by this result; to draw a wire from the former from $\frac{1}{10}$ inch diameter down to $\frac{1}{20}$ inch required twenty-one draughts and four annealings, while the latter required seven draughts and no annealings after the initial one. This hardness gives it a great advantage in wear. Coins of the cent size were made of this alloy of legal bronze and pure copper. The three varieties placed in boxes and rapidly shaken for a long time, treated equally in all respects, lost by attrition in the following ratio: Assuming the aluminum bronze as the standard of comparison, the legal bronze lost about three times, and the copper about six times as much. This property, however, is of no great consequence in coins of little value.

A point of much greater consideration is the avoidance or mitigation of the tendency to change color and become foul from the usual causes, viz: the action of oily and saline excretions of the hand; the chemical agencies which are met with in market-stalls and the slops of drinking saloons, and the mere exposure to air and moisture. If any metal or alloy could be found that would look well, and keep clean with the usage to which our small coins are generally subjected, it would be deservedly popular. This can scarcely be expected. A

silver coin can be deprived of its original beauty and become of such a hue as to have its genuineness called into question. Pure aluminum, white at first, assumes a bluish tint by atmospheric action; and aluminum bronze, although closely resembling gold at first, was found, after being held in the sweaty hand for a few hours, to have received an ugly tarnish which destroyed the last argument for employing it in currency.

After these experiments were concluded others were started, in hope of finding a binary or ternary alloy which would answer the required conditions, especially as to ductility and keeping color for coins of a grade a little above the cent and two cent pieces. After some progress had been made, it became evident, from the fact that cents were hoarded to such an extent as to keep them out of circulation, that in the present state of the currency it would be futile to attempt to carry out the project. More than this: we believe the end of our nation's troubles is nigh, and that peace will soon bless our country. With peace we may confidently expect an influx of silver, always more acceptable than any substitute, which will supply every want and furnish a currency of "small coins" equal to any demand. Our country is full of the precious metals—the supply inexhaustible. Peace will restore prosperity, and gold and silver will soon resume their proper channels in the currency of the country.

THE SILVER DOLLAR.

Permit me again to refer to the anomalous character of the silver dollar of the United States, and to the observations on this subject in former reports. The whole dollar should be made in weight and value the exact multiple of our fractional silver currency, and the gold dollar should be by law declared the unit of value of our money.

STATEMENT OF FOREIGN COINS.

The statement of foreign coins, as required by law, will be found appended to this report. We have no change to make in these tables, except in the single item of the average fineness and value of the British sovereign. Heretofore we have reported *new* coins at 916½ thousandths fine, the weight 256.7 thousandths of an ounce, and the value before deduction \$4 86¾. Their standard of fineness is 916⅔, but our mode of reporting is to the half thousandth, and the above is the nearest estimate we can make of the American value of a pound sterling in perfect condition. At the same time, in consequence of the usual admixture of old coins in any lot, we have been reporting the *average* of weight, fineness and value at lower figures, making about two cents less per sovereign or pound. The skilful and exact methods of assaying and alloying which have been pursued in the British mint have brought up the average fineness to such a measure that we might report them as of full standard, if it were not that there are still a good many old pieces to be met with whose fineness is not over 915½. We *might* call the average, even with these, 916¼, but in accordance with our method we cannot put them higher than 916. The corrected statement will be found in the table of gold coins. It is necessary to add that the "value after deduction" means simply after deducting the mint charge of one half per cent. If brought to the mint for re-coinage, a government tax of one half per cent. will further be deducted, which holds true of all coins except old gold coins of the United States, prior to the change of standard in 1834.

The medal department of the mint is in successful operation and its productions duly appreciated by the government and the public.

Some valuable additions have been made to the cabinet by purchases or gift during the past year. This department of our institution is very attractive, and the multitude of visitors attests the value and usefulness of this collection of coins and medals.

LIST OF TABLES IN APPENDIX.

A.—Statement of bullion deposited at the mint of the United States and branches during the fiscal year ending June 30, 1864.

B.—Statement of the coinage at the mint of the United States and branches during the fiscal year ending June 30, 1864.

C.—Statement of gold and silver of domestic production deposited at the mint of the United States and branches during the fiscal year ending June 30, 1864.

D.—Coinage of the mint and branches from their organization to the close of the fiscal year ending June 30, 1864.

E.—Gold of domestic production deposited at the mint of the United States and branches to June 30, 1864.

F.—Statement of the amount of silver coined at the mint of the United States and branches, at San Francisco and New Orleans, under the act of February 21, 1853.

G.—Statement of the amount of silver of domestic production deposited at the mint of the United States and branches, from January, 1841, to June 30, 1864.

H.—Cents of old issue deposited at the United States mint for exchange for the nickel cent to April 22, 1864.

I.—Statement of the weight, fineness and value of foreign gold coin.

J.—Statement of the weight, fineness and value of foreign silver coin.

Very respectfully, your obedient servant,

JAMES POLLOCK,

Director of the Mint.

Hon. W. P. FESSENDEN,

Secretary of the Treasury, Washington, D. C.

SCHEDULE A.

Statement of deposits at the mint of the United States, the branch mint, San Francisco, assay office, New York, and branch mint at Denver, during the fiscal year ending June 30, 1864.

Description of bullion.	Mint of United States, Philadelphia.	Branch mint, San Francisco.	Assay office, New York.	Branch mint, Denver.	Total.

Total.....	4,324,820 50	2,241,988 49	25,722 00	1,245 00	41,888 00	128,241 90	8,224 00	6,771,429 98

SCHEDULE II.

Statement of cents of former issue deposited at the United States mint for exchange for cents of new issue, to June 30, 1864.

Period.	Value by tale.
1857	\$16,602
1858	39,404
1859	47,235
1860	37,500
1861	95,245
1862	53,365
1863	6,185
1864	490
Total	<u>296,026</u>

A statement of foreign gold and silver coins, prepared by the Director of the Mint, to accompany his annual report, in pursuance of the act of February 21, 1857.

EXPLANATORY REMARKS.

The first column embraces the names of the countries where the coins are issued; the second contains the names of coin, only the principal denominations being given. The other sizes are proportional; and when this is not the case the deviation is stated.

The third column expresses the weight of a single piece in fractions of the troy ounce, carried to the thousandth, and in a few cases to the ten thousandth of an ounce. The method is preferable to expressing the weight in grains for commercial purposes, and corresponds better with the terms of the mint. It may be readily transferred to weight in grains by the following rule: Remove the decimal point; from one-half deduct four per cent. of that half, and the remainder will be grains.

The fourth column expresses the fineness in thousandths, *i. e.*, the number of parts of pure gold or silver in 1,000 parts of the coin.

The fifth and sixth columns of the first table express the valuation of gold. In the fifth is shown the value as compared with the legal content or amount of fine gold in our coin. In the sixth is shown the value as paid at the mint after the uniform deduction of one-half of one per cent. The former is the value for any other purposes than recoinage, and especially for the purpose of comparison; the latter is the value in exchange for our coins at the mint.

For the silver there is no fixed legal valuation, the law providing for shifting the price according to the condition of demand and supply. The present price of standard silver is 122½ cents per ounce, at which rate the values in the fifth column of the second table are calculated. In a few cases where the coins could not be procured the data are *assumed* from the legal rates, and so stated.

SCHEDULE I.

NOTE.—The exports of American gold for the years 1863 and 1864 have been corrected from the returns first published to embrace a large unusual shipment from California to England on account of New York and other eastern holders, taking that direction for safety of transit. The sums were \$18,207,879 in 1863-'63, and \$35,735,265 in 1863-'64.

S. B. COLBY, Register.

TREASURY DEPARTMENT, December 1, 1864.

* Cases and hales converted to hogsheads, at 5 to 1.

† These are the recorded quantities and values without correction for the omission to return the actual exports for nearly three quarters at the leading southern ports. The actual total exports were not less than those of 1859-'60, and may be assumed at 1,720,000,000 pounds; value \$185,000,000.

‡ Petroleum not reported. The total export of petroleum was nearly 22,500,000 gallons; value \$6,800,000, nearly.

TREASURY DEPARTMENT, December 1, 1864.

S. B. COLBY, Register.

Statement exhibiting the value of leading articles of manufacture exported during the fiscal years ending June 30, from 1847 to 1864.

EXECUTIVE MANSION,
Washington, July 30, 1864.

The following regulations of the Secretary of the Treasury, having been seen and considered by me, are hereby approved; and commercial intercourse, in the cases and under the restrictions described and expressed in the regulations, is licensed and authorized; and all officers and privates of the regular and volunteer forces of the United States, and officers, sailors, and marines in the naval service, will observe the said regulations and the provisions of the several acts of Congress appended thereto, to which they relate, and will render all assistance, not incompatible with military or naval operations, to officers and agents of the Treasury Department executing the same.

ABRAHAM LINCOLN.

GENERAL REGULATIONS.

These regulations, and the several acts of Congress authorizing them, shall be executed and carried into effect, under direction of the Secretary of the Treasury, by the following officers:

- A general agent.
- Supervising special agents.
- Assistant special agents.

Local special agents.

Agency aids.

Officers of the customs designated by the secretary, and

Superintendents of freedmen.

All officers appointed under these regulations are authorized to administer oaths required in the performance of their official duties.

The general agent and the supervising and assistant special agents will be appointed by the Secretary of the Treasury; local special agents and agency aids will be appointed by the supervising special agents or assistant special agents, as under Regulation XXVII, subject to the approval of the Secretary.

It shall be the duty of the general agent, under the direction of the Secretary of the Treasury, to cause these rules and regulations to be properly and uniformly enforced in all States and parts of States declared in insurrection, and all officers and agents, appointed to perform duties under them, will comply with the instructions of the general agent in regard thereto until otherwise directed by the Secretary of the Treasury.

To facilitate the execution of the annexed regulations, insurrectionary States and parts of States are hereby divided into districts called special agencies, distinguished numerically, and described as follows:

The first special agency comprises that part of the valley of the Mississippi lying west of the Alleghany mountains and east of the mouth of the Tennessee river, and extending southwardly to include so much of the States of Alabama, Georgia, North Carolina, and Virginia as is or shall be occupied by national forces operating from the north.

The second special agency comprises so much of the Mississippi valley as lies west of the mouth of the Tennessee river, including West Tennessee, the State of Arkansas, and so much of the States of Mississippi and Louisiana as is or shall be occupied by national forces operating from the north.

The third special agency comprises so much of the States of Louisiana, Mississippi, Alabama, and the west part of Florida as is or shall be occupied by national forces operating from the south.

The fourth special agency comprises the State of Texas.

The fifth special agency comprises the south and east part of Florida, including Key West, the State of South Carolina, and so much of the State of Georgia as is or shall be occupied by national forces operating from the south.

The sixth special agency comprises the State of North Carolina, excepting so much thereof as lies north of Albemarle sound and east of Chowan river.

The seventh special agency comprises that section of country lying east of the Alleghany mountains, and extending southwardly to include so much of the State of North Carolina as lies north of Albemarle sound and east of Chowan river.

Additional special agencies, if established, will be numerically designated in the order of their establishment; and if the boundaries of agencies already established shall be changed, due notice thereof will be given.

Supervising special agents will supervise within their respective agencies the execution of the regulations, under the direction of the general agent, and will make, and from time to time change, such local rules not inconsistent with them as may be proper for that purpose, and temporarily suspend or qualify the authority to grant permits for supplies, as the public interest will require, subject to the approval of the general agent or of the Secretary of the Treasury; and they will confer with generals commanding departments, or, when such conference is impracticable, with generals commanding divisions or districts, and with naval officers commanding within the agency under their supervision, and obtain, as far as practicable, their sanction to such action as may affect military or naval movements.

The assistant and local special agents, agency aids, and officers of the customs above referred to, will communicate directly with the supervising special agent of the agency to which they may be assigned upon all questions affecting the discharge of their duties under the regulations. The several supervising special agents will reply to these communications, except where they regard the intervention of the department necessary, when they will transmit them, and all papers relating to them, with such recommendations as they may think proper, to the Secretary of the Treasury, and will keep the department advised of their action in all matters pertaining to the execution of their duties.

W. P. FESSENDEN,

Secretary of the Treasury.

WASHINGTON, July 29, 1864.

COMMERCIAL INTERCOURSE.

Rules and regulations under the several acts of Congress prohibiting or restricting Commercial Intercourse with and in States and parts of States declared to be in insurrection, and in portions of loyal States in dangerous proximity thereto.

PERMITS.

I. No goods, wares, or merchandise will be allowed to be transported to, from, or within any State or part of a State under restriction, or declared in insurrection, except under permits, certificates, and clearances, as hereinafter provided.

PERMIT OFFICERS.

II. The officers of the Treasury Department to be authorized, under instructions from the Secretary, to permit supplies to be transported to loyal persons residing in insurrectionary States or parts of States, or in restricted districts of loyal States with which commercial intercourse has been or may be licensed by the President, under regulations of the Secretary of the Treasury, are the surveyors of customs at Pittsburg, Wheeling, Cincinnati, Madison, Louisville, New Albany, Evansville, Paducah, Cairo, Quincy, St. Louis, Nashville, Memphis, and Baltimore; the collectors of customs at Boston, New York, Philadelphia, Georgetown, Alexandria, Beaufort in North Carolina, Port Royal in South Carolina, Brownsville, and New Orleans. Other officers will be designated to grant permits should the public interests require it; and the officers above named will respectively grant permits to such ports, places or districts only as shall be designated in the letter of instructions from the Secretary of the Treasury.

INTERCOURSE BEYOND MILITARY LINES PROHIBITED.

III. Commercial intercourse with localities beyond the lines of actual military occupation by the United States forces is absolutely prohibited; and no permit will be granted for the transportation of any property to any place under the control of insurgents against the United States.

LINES OF MILITARY OCCUPATION.

IV. Each supervising special agent will ascertain from the published order of the general commanding the department or district embracing his agency, the lines of actual occupation by the military forces of the United States, and will confer with the department commander, and agree with him in writing, as to the

place or places, within those lines in his agency, to which supplies may be taken for the loyal residents therein, and the aggregate amount which may be taken monthly to each of such places. Having so ascertained and agreed, he will promptly communicate the facts to the Secretary of the Treasury, and to the officers authorized to grant permits to the district so occupied.

SUPPLY STORES.

V. Supply stores, at places agreed upon by the commanding general of the department and the proper supervising special agent, may be established by such loyal persons as the supervising special agent or assistant special agents shall designate for that purpose. But the monthly amount agreed upon, as aforesaid, shall in no case be exceeded, and the maximum amount that any individual or firm may be permitted to take there for sale shall not exceed \$3,000 per month, except in cities with a population over twenty thousand, and except in cases where the commanding general of the district, for military reasons, requests it to be larger, in which cases all persons trading there shall be equally affected thereby, and no person shall be interested in more than one store.

APPLICATION FOR SUPPLY STORES.

VI. Any person desiring to establish a supply store at any place above provided may make application in writing to the proper supervising or assistant special agent, who shall file the application, and record the name of each applicant, with the date of application, in a book to be kept by him for that purpose; and all favoritism in granting the authorities so applied for shall be prevented, as far as possible, by local rules of the proper supervising special agent. No application made prior to military occupation will be considered.

APPLICATION FOR AUTHORITY TO ESTABLISH A SUPPLY STORE.

_____, 18—.

To _____, special agent, _____ agency:

SIR: _____, the undersigned, make application for authority to establish a supply store at _____, in the county of _____, and State of _____, under the regulations prescribed July 29, 1864, by the Secretary of the Treasury, concerning commercial intercourse with and in States declared in insurrection.

Respectfully, yours,

AFFIDAVIT OF APPLICANT FOR SUPPLY STORE.

Each applicant shall make and file with his application an affidavit in the following form:

"I _____, of _____, in the county of _____, and State of _____, being duly sworn, on oath or affirmation, say, that I am a citizen of the United States, (native born or naturalized, as the case may be,) and that I am in all respects true and loyal to the government thereof; that I always have faithfully conformed, and will at all times faithfully conform to the proclamations and orders of the President of the United States, and the military governors and generals exercising authority under him, and to departmental regulations authorized by law, and that I have aided, and will at all times aid, by my conversation and conduct, and by every other means I can properly use, in suppressing the rebellion and restoring obedience to the Constitution and laws of the United States.

Subscribed and sworn before me, this _____ day of _____, 18—.

NO AUTHORITY GRANTED WITHOUT AFFIDAVIT.

VII. No authority to sell supplies at any place in a State or part of a State declared in insurrection shall be given to any person who shall not accompany his application with the above affidavit taken before a competent officer.

AUTHORITY FOR SUPPLY STORE.

VIII. When authority shall be given to any person to establish a supply store at any place as above provided, it shall be in the following form :

———, of the county of ——— and State of ———, having applied to me for authority to establish a supply store at ———, in the county of ———, and State of ———, and having made and attached to ——— application the prescribed affidavit, and executed a bond to the United States in a penalty and with sureties approved by me, I hereby authorize the said ——— to establish a supply store at ———, in the county of ———, and State of ———, and, under proper permits, to transport to and sell at said store goods, wares, and merchandise, not prohibited, to an amount not exceeding ——— dollars (\$——) per month.

This authority is given subject to revocation at any time by the supervising special agent of this agency.

Dated at ———, this ——— day of ———, 18——.

BOND OF APPLICANT FOR SUPPLY STORE.

IX. Before the delivery of the authority above provided for, the applicant shall execute and deliver to the agent a bond to the United States, in a penalty of twice the monthly amount authorized, with sureties to be approved by such agent, which bond shall be in the following form :

Know all men by these presents, that we, ———, of ———, as principal, and ———, of ———, and ———, of ———, as sureties, are held and firmly bound unto the United States of America in the sum of ——— dollars, (\$——,) to be paid to the United States of America; for which payment, well and truly to be made, we bind ourselves, our heirs, executors, and administrators, jointly and severally, firmly by these presents. Sealed with our seals, and dated this ——— day of ———, in the year one thousand eight hundred and ———.

Whereas the said ——— has applied for and received authority to establish a supply store at ———, in the county of ———, and State of ———, under the license of the President and the regulations prescribed by the Secretary of the Treasury, July 29, 1864 :

The condition of the above obligation is such, that if the said ——— shall not transport goods to any place other than such supply store, nor engage, directly or indirectly, in any prohibited trade; and if no part of the goods transported by ——— shall, with ——— knowledge or assent, or by ——— connivance, be so used or disposed of as to give aid or encouragement to the insurgents; and if no military, naval, or civil officer, or person prohibited by law from trading, or receiving, or expecting profit or advantage from trade in an insurrectionary State shall be interested, directly or indirectly, in any sale made from said store; and if no goods, wares, or merchandise are sold or disposed of at said store, or other act done by him, or by others acting under his authority, in violation of any regulation of the Secretary of the Treasury, or local rule of the supervising special agent, then the above obligation to be void; otherwise to remain in full force and effect.

Signed, sealed, and delivered }
in presence of }

——— ———. [L. S.]
——— ———. [L. S.]
——— ———. [L. S.]

RECORDS OF AUTHORITIES.

X. Records shall be kept in the office of each supervising and district agency, in which every authority granted therein shall be recorded, with the locality of the supply store, the name of the party authorized, and his sureties with their respective residences, the date and monthly amount of the authority, and the date and amount of each shipment of goods authorized. And whenever a party authorized to sell, as aforesaid, shall desire to transport supplies to his store, he shall file with the supervising or assistant special agent in charge of the record of his authority, an application for such supplies, with a full memorandum thereof. Whereupon such agent may, if he knows no reason why he should not, give the applicant a certificate in the following form:

Certificate for supplies.

This certifies that _____ is duly authorized to sell supplies to loyal persons at _____, and that he may be permitted to ship to that place, during the month of _____, supplies included in the annexed memorandum to the amount of \$_____.

The permit officer to whom the certificate is presented, if the party holding it desires to ship only a part of the amount named therein, will indorse upon the certificate the date and amount of the permit, and will give the holder a certified copy of the original certificate with his indorsement thereon, retaining the original as his authority for the permit.

And the officer granting a permit on the certified copy will, in like manner, indorse upon it the date and amount of his permit, and give a certified copy of the certificate and indorsements as certified, and so on until the amount of the original certificate is exhausted; so that the stock permitted to, and transported by, the trader each month shall not exceed the amount above named. No permit will be granted upon this certificate after the close of the month of _____, 18____.

Dated at _____, this _____ day of _____, 18____.

_____, *Special Agent.*

To which certificate he shall annex a copy of the memorandum so filed with him, countersigned with his approval.

PERMIT FOR SUPPLY STORE.

XI. Upon presentation of the above certificate, or the certified copies thereof as provided, together with the application, copies, invoices, and affidavits, as hereinafter named, any permit officer named in Regulation II may permit the shipment of supplies included in the memorandum annexed to the certificate, so that the aggregate amount of the shipments under the certificate shall not exceed the sum named therein. Such permit shall be made subject to the approval of the permit officer of the last port of shipment in a loyal State through which the supplies shall pass *en route* to their destination.

XII. The application for permit shall be in the following form:

Application for permit for supplies.

To _____.

SIR: _____ desire permission to transport from this port to _____ the supplies named in the invoices of which the annexed are true copies, which supplies were purchased by _____ of the parties respectively indicated by the invoices, and are owned by _____, of _____, and consigned to _____, of _____, and are contained in _____ packages, which packages are marked and described as follows:

No. of packages.	Marks.	Description of supplies.	Value.

AFFIDAVIT OF APPLICANT FOR PERMIT FOR SUPPLIES.

XIII. The original invoices shall be presented with the application, and shall be compared with the copies annexed thereto by the officer granting the permit to ship. The applicant shall annex and file, with his application for permit to ship, an affidavit in the following form :

—, of —, being duly sworn, deposes and says that — is the owner of the goods, wares, and merchandise described in the invoices, true copies of which are hereto attached, and that the quantities, descriptions, and values of the said goods, wares, and merchandise are correctly stated in said invoices; that the marks on the packages are correctly stated in the above application; and that the packages contain nothing except as stated in the invoices.

And this deponent further swears, that the goods, wares, and merchandise permitted to be transported upon the above application shall not, nor shall any part thereof, be transported or disposed of by him, or by his authority, connivance, or assent, in violation of the terms of the permit.

PERMIT FOR SUPPLIES.

XIV. If the permit officer is satisfied that no fraud has been or is being practiced, he may permit the shipment so applied for, in the following form :

PORT OF —

This may certify that — has this day filed in my office an application for permit to transport from this port to —, to be delivered to — at —, by way of —, the goods, wares, and merchandise mentioned and described in the copies of invoices thereof hereto attached, each one of which is stamped with my official seal, which are contained in — packages, and are of the aggregate value of \$—, and are owned by —, shipped by —, consigned to —.

And the said — has presented with his application the original invoices of the said goods, wares, and merchandise, and filed in my office copies thereof, and made oath before me pursuant to the regulations of the Secretary of the Treasury, and local rules made under them :

Now, therefore, by virtue of the authority of the President of the United States, conferred on me through the Secretary of the Treasury, I do hereby authorize and permit the said — to transport, by the route above named, the said goods, wares, and merchandise to —.

The right is reserved to revoke, suspend or qualify this permit at such time and place and in such manner as the public interests may require; and it will expire ten days after date, and cease to have any force, except that merchandise properly shipped under it, within ten days, will be allowed to go to its place of destination.

In testimony whereof, I hereunto set my hand and affix the seal of this office, this — day of —, one thousand eight hundred and sixty—.

—,
— of Customs.

To which permit the officer granting the same shall annex copies of the invoices presented, with the application, except that the extension of prices need not be made in the copies annexed to the permit to transport, but the value of each lot shall be stated in the original invoices.

ACCOUNTS OF SALES OF SUPPLIES.

XV. All persons authorized to sell supplies shall keep true account of all their sales, with the name and residence of each purchaser, and the date and amount of each sale; and their books, invoices, and accounts shall at all times be open to the inspection of the supervising or assistant special agents. If any person so authorized shall violate any regulation or local rule, his authority shall be immediately revoked, and his stock in trade shall be seized and forfeited to the United States, and such steps shall be promptly taken as may be necessary to secure its condemnation by a court of competent jurisdiction.

NO SALES EXCEPT BY PERSONS AUTHORIZED.

XVI. No goods, wares, or merchandise shall be sold at any place in a State declared in insurrection, except by persons duly authorized, and none shall be transported from any place at which supplies are authorized to be sold, except under the permit of the local special agent appointed for that place. Loyal persons residing in the district of country contiguous to the place, and within the lines of actual occupation by the military forces of the United States as indicated by published order of the commanding general of the department or district in which it is situated, may be permitted by the local special agent to procure from any such store and take to their homes such individual, family, or plantation supplies as may be necessary for their own use, as provided in Regulation XVIII.

FAMILY SUPPLIES.

XVII. The permit above provided for shall be given by the local special agent upon application of the head of the family, or some person duly authorized by him or her in writing, and then only on an affidavit in the following form:

Affidavit of applicant.

STATE OF —, County of —, ss:

I, —, being duly sworn, depose and say that — reside at —, in the county of — and State of —, and that — has resided there for — years last past; that I am in all respects true and loyal to the government of the United States, and that I will in all things so deport myself, bearing true faith and allegiance thereto, and to the best of my ability protecting and defending the same. That — family consists of — white and — colored persons; that the supplies, invoices of which are hereto attached, are necessary for the use and consumption of said family during the ensuing month; that no part thereof shall be sold or otherwise disposed of by — or by — authority, connivance, or consent, except for the sole use and consumption of said family, and that, to the best of my knowledge and belief, no application has been made for any permit for the same or like supplies, to any other officer or agent, and that no supplies for the same family, for the period mentioned, have been or are expected to be applied for elsewhere, or otherwise obtained.

Subscribed and sworn before me this — day of — 186—.

PERMIT FOR FAMILY AND PLANTATION SUPPLIES.

XVIII. If the local special agent is satisfied as to the truth of the affidavit and the good faith of the applicant, he shall permit the purchase and

transportation applied for, subject to the approval of the commander of the post, or such person as he shall designate for that purpose, to be countersigned upon the permit, which permit shall be in the following form:

This may certify that ——— has this day filed in my office an application and the required affidavit for purchase of the ——— supplies described in the annexed memorandum countersigned by me, the aggregate value whereof is \$——, and for transportation thereof by way of ——— to the place of residence of ———.

And by virtue of the authority vested in me, I do hereby permit the said ——— to purchase the said supplies at ———, and to transport them from ——— to ———.

This permit will expire and cease to have any force ten days after its date.

———, *Local Special Agent.*

———, *Special Agency.*

Dated at ———, this ——— day of ———, 186—.

CERTIFICATE TO PURCHASE ELSEWHERE.

XIX. If the applicant prefers to purchase the supplies at some place in a loyal State, then, instead of the above permit, he shall give him a certificate in the following form:

I certify that ——— has made the prescribed affidavit and application before me for the supplies, a memorandum whereof is hereto attached, and countersigned by me, the estimated value whereof is \$——, which he desires to take to his home in the county of ———, State of ———.

I hereby recommend any authorized permit officer to permit the transportation of said supplies, to an amount not exceeding \$——, from the port where it is applied for to his home aforesaid, upon presentation of this certificate, countersigned with the approval of the general commanding this post, or some person authorized by him.

This certificate will cease to have any force thirty days after date.

Dated at ———, this ——— day of ———, 186—.

———, *Local Special Agent.*

PERMIT FOR TRANSPORTATION.

XX. Upon presentation of this certificate so countersigned, with duplicate invoices of the supplies to be transported, any authorized permit officer may grant the permit desired, in the following form:

In compliance with the recommendation of ———, local special agent at ———, approved by the proper military officer, permission is hereby granted to ———, residing at ———, in the county of ———, and State of ———, to take from this port to his home aforesaid the supplies mentioned in the invoices hereto attached and countersigned by me.

Dated at ———, this ——— day of ———, 186—.

CERTIFICATE TO BE FILED.

XXI. The certificate upon which permits are granted, attached to copies of the invoices permitted, shall be filed by the officer granting the permit.

EXCEPTED ARTICLES.

XXII. Fresh vegetables, fruits, butter and eggs, ice, poultry, coal, wood, beef cattle, hogs, and household goods of families moving, may be permitted by the officers named in Regulation II to go to any military post, naval fleet or vessel of the United States forces, other than within or attached to the blockade,

without the supply store authority and certificate above required. But in such cases the permit shall be conditioned that the supplies so permitted shall be reported to the assistant or local special agent at such post, fleet, or vessel, if there be such an officer there, and if not, then to the commanding officer of the post, fleet, or vessel, and that the same shall be disposed of only in compliance with these regulations.

SUTLERS' PERMITS.

XXIII. Permits will be granted to sutlers to transport to the regiments or post sutlered by them such articles as they are authorized to sell, free of the three per cent. fee; but no permit will be granted to a sutler except on presentation, to the proper permit officer, of the original certificate of his appointment from the commanding officer of his regiment or post, countersigned by the division commander thereof, and an application and affidavit in the following form:

AFFIDAVIT OF SUTLER.

———, being duly sworn, deposes and says that ——— is the sutler of the ———, duly appointed and commissioned in writing, a true copy of which appointment is hereto annexed; that there is no other person claiming to act as sutler to said ———, to the knowledge of this affiant; that no other goods, wares, or merchandise have been transported to said ——— under this commission, except such as have been duly permitted, and that a memorandum of each shipment permitted is indorsed on said commission, and truly appears on the copy thereof hereto attached; that no goods, wares, or merchandise transported under such permits have been sold to any persons except the officers or soldiers belonging to said ——— or other forces of the United States, and that none of those permitted under this application shall be so sold.

Subscribed and sworn to before me }
this ——— day of ———, 186—. }

AMOUNT PERMITTED TO SUTLERS.

XXIV. Transportation under the above regulation shall not be permitted to any regimental sutler for an amount of goods exceeding \$2,500 per month; nor for over two months' supply at one time; nor for any goods except such as he is by law and War Department orders allowed to deal in; nor to any post sutler to an amount larger than shall be stated in his commission and approved by the general commanding the department or division, and in such cases only one month's supply shall be permitted at one time.

RESTRICTIONS ON CARRIERS.

XXV. No vessel, boat, or other vehicle, used for transportation from any place in the loyal States, shall carry goods, wares, or merchandise into any place, section, or State not declared in insurrection, but with which commercial intercourse has been or may be restricted, without the permit of a duly authorized officer of the Treasury Department, application for which permit may be made to such authorized officer near the point of destination, as may suit the convenience of the shipper. Nor shall any vessel, boat, or other craft, or vehicle used for transportation, put off any goods, wares, or merchandise, at any place other than that named in the permit or clearance as the place of destination of such goods, wares and merchandise.

BOATS ON WESTERN WATERS.

XXVI. Before any boat or vessel running on any of the western waters south of Cairo, or other waters within or adjacent to any State or section, commercial intercourse with which now is, or may hereafter be, restricted, as aforesaid, shall depart from any port where there is a collector or surveyor of customs, there shall be exhibited to the collector or surveyor, or such other officer as may be authorized to act in his stead, a true manifest of its entire cargo, and a clearance obtained to proceed on its voyage; and when freights are received on board at a place where there is no collector or surveyor, as hereinafter provided in Regulation XXVII, then the same exhibit shall be made and clearance obtained at the first port to be passed where there is such an officer, if required by him, and such vessel or boat shall be reported and the manifest of its cargo exhibited to the collector or surveyor of every port to be passed on the trip where there is such an officer, if required by him; but no new clearance shall be necessary unless additional freights shall have been taken on board after the last clearance. Immediately on arriving at the port of final destination, and before discharging any part of the cargo, the manifest shall be exhibited to the surveyor of such port, or other officer authorized to act in his stead, whose approval for landing the cargo shall be indorsed on the manifest before any part thereof shall be discharged; and the clearance and shipping permits of all such vessels and boats shall be exhibited to the officer in command of any naval vessel or military post, whenever such officer may require it.

AGENCY AIDS.

XXVII. To facilitate trade, and guard against improper transportation, agency aids will be appointed by the proper supervising special agent, or, under his direction, by an assistant special agent, from time to time, on cars, vessels, and boats, when desired by owners, agents, or masters thereof, which aids will have free carriage on the respective cars, vessels, and boats on which they are placed, and will allow proper way freights to be taken on board without permit, keeping a statement thereof, and reporting the same to the first officer to be passed on the trip who is authorized to grant the permit desired, from whom a permit therefor must be obtained, or the goods shall be returned to the shipper under his direction. No permit will be granted for transportation into or within any State or district under restriction, or declared in insurrection, except on cars, vessels, and boats carrying such aids, or by private conveyance specified in the permit, or on boats, vessels, or cars bonded not to receive anything on board for transportation during the trip, nor to land or discharge anything at any point, except that of ultimate destination, without proper permit.

MERCHANDISE LIABLE TO REACH INSURGENTS—BOND REQUIRED.

XXVIII. When any collector, surveyor, supervising assistant, or local special agent, charged with the execution of these regulations, and the laws authorizing them, shall find within his proper limits any goods, wares, or merchandise, which, in his opinion, founded on satisfactory evidence in writing, are in danger of being transported to insurgents, he may require the owner or holder thereof to give reasonable security that they shall not be transported to any place under insurrectionary control, and shall not, in any way, be used to give aid or encouragement to the insurgents.

If the required security be not given, such officer shall promptly state the facts to the United States marshal for the district within which such goods are situated; or, if there be no United States marshal, then to the commander of

a near military post, whose duty it shall be to take possession thereof, and hold them for safe-keeping, reporting the facts promptly to the Secretary of the Treasury, and awaiting instructions.

ARTICLES PROHIBITED BY MILITARY ORDER.

XXIX. When any military order, issued by competent authority, shall absolutely prohibit the transportation of articles designated therein, to or within any State or part of State named in the order, no permit shall be granted for the transportation so prohibited. But when such prohibition is conditional, transportation may be permitted in accordance with the conditions named.

PACKAGES TO OFFICERS AND SOLDIERS.

XXX. In cases where military or naval commanders shall have ordered all packages sent by friends to the officers and soldiers of their command to be delivered only to designated regimental or vessel officers, for delivery to the proper parties, such packages may be transported, without collector's or surveyor's permits, by the Adams Express Company, or other carriers having authority for that purpose from the Secretary of the Treasury, on such carriers giving bond conditioned to render a true account of all such packages by them transported, and to carry no goods without proper permits, other than such packages.

ARMY AND NAVY SUPPLIES.

XXXI. Supplies and other property belonging to the United States for the use of the army or navy, moving under military or naval orders, are excepted from the operation of these regulations. Supplies for the army or navy, furnished under contract, will be permitted free of charge, upon the certificate of the proper military or naval officer that such supplies are required, and are to be shipped in fulfilment of an actual existing contract with the government.

COIN OR BULLION.

XXXII. All transportation of coin or bullion to any State or section heretofore declared to be in insurrection is absolutely prohibited, except for military purposes, and under military orders, or under the special license of the President.

BLOCKADED PORTS.

XXXIII. Clearances and permits to any port or place affected by the existing blockade will be granted only upon the request of the Department of War or the Department of the Navy. Applicants must present, with their application, a certificate from the Department of War or Department of the Navy, either directly or through a duly authorized officer, that the articles are required for military or naval purposes, and a request that the transportation of the same may be permitted, together with invoices in duplicate of the articles to be permitted, specifying their character, quantity, value, and destination. On receiving such certificate and request and duplicate invoices, the Secretary of the Treasury, or some officer specially authorized by him, will transmit to the proper officer one of the invoices, and direct the permitting of the transportation requested, and forward the other invoice to the assistant or local special agent at the port or place to which the goods are to be permitted, who will, in all cases, on the arrival of any articles claimed to have been permitted, examine and compare such articles with the duplicate invoices; and in case of any excess or evasion of the permit, he will seize the whole shipment, and report the

facts forthwith to the supervising special agent, that proceedings may be taken for their forfeiture under the acts of July 13, 1861, May 20, 1862, March 12, 1863, and July 2, 1864.

BLOCKADED PORTS REOPENED.

XXXIV. Where ports heretofore blockaded have been opened by proclamation of the President, licenses will be granted by United States consuls, on application by the proper parties, to vessels clearing from foreign ports to the ports so opened, upon satisfactory evidence that the vessel so licensed will convey no person, property, or information contraband of war, either to or from said ports, which license shall be shown to the collector of the port to which the vessel is bound, and, if required, to any officer in charge of the blockade. And on leaving any port so opened, the vessel must have a clearance from the collector, according to law, showing no violation of the conditions of the license. Any violation of the conditions will involve the forfeiture and condemnation of the vessel and cargo, and the exclusion of all parties concerned from entering the United States for any purpose during the war.

Vessels clearing from domestic ports to any of the ports so opened will apply to the custom-house officers of the proper ports, in the usual manner, for permits and clearances under the regulations heretofore established.

Commercial intercourse between the citizens of ports so opened and persons beyond the limits thereof shall be subject to the same restrictions and regulations as at other places in States and parts of States declared in insurrection.

REFUSAL OF CLEARANCE.

XXXV. Collectors and surveyors will refuse clearances and permits to all vessels or other vehicles laden with goods, wares, or merchandise destined for a foreign or domestic port, whenever they shall have satisfactory reason to believe that such goods, wares, or merchandise, or any part thereof, whatever may be their ostensible destination, are intended for ports or places in possession or under control of insurgents against the United States. And if any vessel or other vehicle for which a clearance or permit shall have been refused, as aforesaid, shall depart, or attempt to depart, for a foreign or domestic port, without being duly cleared or permitted, such collector or surveyor, or the supervising special agent or assistant special agent, shall cause such vessel or vehicle to be seized and detained, and proceedings to be instituted for the forfeiture to the United States of such vessel or other vehicle, with her tackle, apparel, furniture, and cargo.

BONDS FOR CLEARANCE.

XXXVI. Whenever application is made to a collector, or surveyor authorized, to grant it, for a permit or clearance, for either a foreign or domestic port, if, for satisfactory reasons, he shall deem it necessary to prevent the cargo of the vessel from being used in affording aid and comfort to any person or parties in insurrection against the authority of the United States, he shall require a bond to be executed by the master or owner of the vessel, in a penalty equal to the value of the cargo, and with sureties to the satisfaction of such collector or surveyor, conditioned that the said cargo shall be delivered at the destination for which it is cleared or permitted, and that no part thereof shall be used in affording aid or comfort to any person or parties in insurrection against the authority of the United States, with the knowledge or consent or connivance of the owner or shipper thereof, or with the knowledge, consent, or connivance of the master of the vessel on which the same may be laden, or of other persons having control of the same.

VESSELS TO REPORT.

XXXVII. Every vessel, on approaching a gunboat or revenue cutter, or vessel appearing to be such, before proceeding further, shall bear up and speak said boat or cutter, and submit to such examination as may be required.

TRANSPORTATION OF PRODUCTS.

XXXVIII. All loyal persons residing in a State or part of a State declared in insurrection, if within the lines of actual occupation by the military forces of the United States, as indicated by the published order of the commanding general of the department or district so occupied, may be permitted by the supervising special agent thereof, or such assistant special agent as he shall designate for that purpose, to bring or send to market in the loyal States any products which they shall have produced with their own labor, or the labor of freedmen or others employed and paid by them, upon making and filing with such officer an affidavit in the following form :

Affidavit of applicant to transport products.

State of _____,

County of _____, ss :

I, _____, being duly sworn, say that I reside in the county of _____, in the State of _____; that I have produced during the year 186- _____ with my own labor and the labor of freedmen and others whom I have employed and paid, or secured to be paid, according to the rules of the supervising special agent of the _____ agency; that I desire to transport the same to _____, in the State of _____, by way of _____, for sale, or other disposition; that the same is now at _____, in the county of _____, and State of _____, and is contained in _____ packages, marked _____; that I am in all respects true and loyal to the government of the United States, and have never committed any act by which my property is rendered liable to forfeiture or confiscation to the United States, under any law thereof.

Subscribed and sworn to before me this _____ 186—.

PERMIT TO TRANSPORT PRODUCTS.

XXXIX. Upon receiving the above affidavit, and being satisfied of its truth, such agent shall grant a permit authorizing the transportation of the products named to the first port or place in a loyal State where there is a permit officer named in Regulation II, and at which the same are to be unloaded or reshipped, which place shall be named in the permit. Such permit shall be in the following form :

_____ having made application to me for permit to transport _____ from _____, in the county of _____ and State of _____, to _____, in the State of _____, by way of _____, and having made and filed with me the affidavit prescribed for such cases, and given bond with approved sureties for the payment of all fees and government dues upon the said _____, upon its arrival at _____ aforesaid, permission is hereby given to the said _____ to transport the said, _____, which is contained in _____ packages, marked _____, from _____ aforesaid to _____ aforesaid.

Dated at _____ this _____ day of _____, 186—.

BOND TO TRANSPORT PRODUCTS.

XL. Before delivering the permit, the agent granting it shall require and receive from the applicant his bond to the United States, in duplicate, with two or more sureties, to be approved by him, in a penalty of twice the value of the products so permitted to be transported, in the following form :

Know all men by these presents, that we, _____ of _____, as principal, and _____, of _____, and _____, of _____, as sureties, are held and firmly bound unto the United States of America in the sum of _____ dollars, (\$ _____,) to be paid to the United States of America ; for which payment, well and truly to be made, we bind ourselves, our heirs, executors, and administrators, jointly and severally, firmly by these presents. Sealed with our seals, and dated this _____ day of _____, in the year one thousand eight hundred and sixty_____.

Whereas the said _____ has applied for and received a permit to transport _____ from _____, in the county of _____, in the State of _____ to _____, in the State of _____, by way of _____, which _____, is contained in _____ packages, marked _____ :

Now the condition of the above obligation is such, that if the said _____ shall transport the said _____ to _____ aforesaid, and there report it to the _____ of customs, and pay all fees and government dues upon the same, and if, in all things connected therewith, he shall comply with the laws and with the regulations of the Secretary of the Treasury concerning the same, then this obligation to be void ; otherwise to remain in full force and virtue.

In presence of—

_____. [L. S.]
 _____. [L. S.]
 _____. [L. S.]

DISPOSITION OF BOND.

XLI. Upon receiving the duplicate bond above required, the agent shall forthwith send the original to the officer of the port to whom the fees are to be paid, and inform him of any facts relating to the shipment and transportation which may enable him more certainly to secure the collection of government fees and dues ; and upon arrival of the products at his port, such officer shall collect the prescribed fees, and inform the internal revenue officer, that he may collect the tax upon it. When these payments are made, he shall cancel the bond, by writing across its face "cancelled," and shall sign his name thereto, and deliver it to the maker or his representative. The agent who received the bond shall, upon presentation to him of the bond so cancelled, also cancel the duplicate in his possession in the same manner, but shall retain the same so cancelled.

TRANSHIPMENT OF PRODUCTS.

XLII. If, from any cause, it becomes necessary to tranship any products *in transitu* under permit, as above provided, notice thereof shall be given to the permit officer of the port or place where it is made, or, if made where there is no such officer, then at the first port or place to be passed where there is one, and obtain his approval of the transhipment, to be indorsed on the permit. The officer so approving will promptly advise the proper officer at the port of destination of his action in the premises.

PLANTATION SUPPLIES.

XLIII. Stock implements, and supplies, for plantations worked by freedmen under the regulations relating thereto, may be permitted to be transported to such

plantations without payment of the fees hereafter prescribed, upon presentation to the permit officer of a certificate of the supervising special agent, or assistant special agent of the district in which they are located, in the following form :

Certificate for plantation supplies.

This may certify that ————— is a loyal person residing in the county of —————, in the State of —————, within the lines of actual occupation by the military forces of the United States, and that he is working the plantation known as the —————, in the ————— of —————, and State of —————, and that he employs ————— freedmen thereon, under the regulations of the Secretary of the Treasury relating thereto ; that the articles and supplies named in the memorandum thereof, countersigned by me, and hereto attached, are necessary in carrying on the said plantation and supporting the freedmen and their families thereon.

Dated at ————— this ————— day of —————, 186—.

—————, *Special Agent,*
————— *Agency.*

PRODUCTS MOVING WITHOUT PERMIT TO BE SEIZED.

XLIV. Officers and agents of the Treasury Department are directed to seize any products of an insurrectionary State found moving without permit as above provided, or without evidence that all fees and government dues have been paid, and to cause proceedings to be instituted for the forfeiture thereof to the United States.

FORFEITURE FOR VIOLATIONS.

XLV. All vessels, boats, and other vehicles used for transportation, violating regulations or local rules, and all cotton, tobacco, or other products or merchandise shipped or transported or purchased or sold in violation thereof, will be forfeited to the United States. If any false statement be made or deception practiced in obtaining an authority, certificate, or permit under these regulations, such authority, certificate, or permit, and all others connected therewith or affected thereby, will be absolutely void, and all merchandise purchased or shipped under them shall be forfeited to the United States. In all cases of forfeiture, as aforesaid, immediate seizure will be made and proceedings instituted promptly for condemnation. The attention of all officers of the government, common carriers, shippers, consignees, owners, masters, conductors, agents, drivers, and other persons connected with the transportation of merchandise, or trading therein, is particularly directed to the acts of July 13, 1861, May 20, 1862, March 12, 1863, and July 2, 1864, and to the orders of the Secretaries of War and of the Navy hereto appended.

FEES.

XLVI. The following fees are prescribed :

Fees for administering oath and certifying affidavit.....	10 cents.
Fees for authority from agent.....	3 dolls.
Fees for certificate of assistant or local special agent.....	10 cents.
Fees for each permit for purposes of trade.....	20 cents.
Fees for each permit to transport cotton from any insurrectionary district to any loyal State, per pound	4 cents.
Fees for permit to transport tobacco, per hhd.....	2 dolls.

Fees for permit to transport to or from such districts other products, goods, wares, or merchandise, three per centum on the sworn invoice value thereof at the place of shipment.

Fees for each permit for individual, family, or plantation supplies, on every purchase over \$20 and not over \$50..... 5 cents.
Over \$50 and not over \$100..... 10 cents.
Over \$100..... 15 cents.

For permits for individual, family, or plantation supplies, not over twenty dollars in amount, no charge is allowed, except for revenue stamps, on affidavits and certificates in districts under restriction; and no charge, except five cents for permit and five cents for each revenue stamp on affidavit and certificate, is allowed in States declared in insurrection. When purchases are less than five dollars, the permit officer may dispense with affidavits and certificates, when no ground to suspect fraud or imposition appears.

Internal revenue stamps are required by law to be attached to affidavits, certificates, and bonds, but not to any other instruments or writings provided for by these regulations. Stamps will be furnished by the proper special agents at the rate fixed by the internal revenue act, namely:

Affidavit..... 5
Bonds not exceeding \$1,000 50
Bonds exceeding \$1,000, for every additional \$1,000 or fractional part thereof.. 50
Certificates..... 5
Power of attorney..... 50

XLVII. Every officer authorized by the Secretary of the Treasury to grant permits under Regulation II shall keep in his office a record of every permit granted by him, showing the names of the owner, shipper, and consignee, the place from and to which each transportation is permitted, the character and invoice value of the merchandise permitted, and shall transmit to the Secretary, as nearly as possible on the first day of every month, an abstract of such record and an abstract statement, showing the permits granted daily to parts of States not declared in insurrection, but in which trade is restricted, and also showing the number and aggregate amount of permits granted daily to States declared in insurrection, the fees received, and the disposition made of the same, together with the names of all agency aids reporting to him, and the compensation paid to each.

AGENTS TO PAY OVER MONEY, ETC.

XLVIII. All money received by each assistant or local special agent shall be paid over as promptly as possible to the supervising special agent, or to an assistant treasurer, or designated depository, as directed by him, and so that all receipts during each month shall be paid over before the making of his required monthly report; and all money received by each supervising special agent, or collector, surveyor, or other officer authorized to grant permits under these regulations, shall be promptly paid over to the assistant treasurer or designated depository most convenient to him, and so that all receipts for each month shall be so paid over before the making of his monthly report.

OFFICERS TO REPORT.

XLIX. Every officer authorized to receive money under these regulations shall transmit to the Secretary, on the first of each month, a report, stating in detail all moneys so received by him during the preceding month, and from what sources received, together with all expenses of his office incidental to the execution of these regulations; and if any money has been paid out or otherwise disposed of by him during the month, an account thereof, and by what authority, to whom, or for what purpose it was so paid or disposed of, with the vouchers

therefor. A duplicate of this report and account, when made by officers in States declared to be in insurrection, or in restricted districts in loyal States, shall, at the same time, be transmitted to the supervising special agent for the agency in which it shall be made.

RECORDS—LOCAL SPECIAL AGENTS.

L. Local special agents shall keep a record of every permit and certificate given by them, with the date and amount thereof, and the name and residence of the party to whom given; of all bonds required of owners or holders of goods in danger of being transported to insurgents, and their action where the required bond is not given. And they will also, as nearly as possible on the first day of every month, transmit to the proper supervising special agent a transcript of such record, and will deliver to such agent all bonds or securities received by them under these regulations.

RECORDS—ASSISTANT SPECIAL AGENTS.

LI. Assistant special agents shall keep a record of all their official transactions, showing specifically and in detail every authority given to sell supplies; every authority for the transportation of products; every inspection of a supply store, and the results thereof; all appointments of agency aids on cars, vessels, and boats, and the compensation of each; all seizures in cases of excess or evasion of permits to blockaded ports; all seizures or detentions of vessels or vehicles departing, or attempting to depart, when clearance has been refused; all cases of security required when goods found in danger of being transported to insurgents, and if security not given, the action taken by them; all fees received for affidavits and authorities to sell supplies, and for the transportation of products, and from whom and for what received. And they shall, on the first day of every month, transmit to the proper supervising special agent a transcript of such record, and all bonds or securities received by them under these regulations.

RECORDS—SUPERVISING SPECIAL AGENTS.

LII. Supervising special agents shall keep a record of all their official transactions, showing fully the name and location of each local special agent and agency aid appointed by them, and the compensation of each; of conferences with generals commanding departments, and designations of military lines, (Reg. IV;) of all authorities given for supply stores, stating the date, name of trader, and amount of goods authorized; of the inspection of supply stores, and the results; of all authorities given for the transportation of products, to whom given, and the locality from which and to which transportation is permitted; of all the revocations of authorities, certificates, and permits; of all information touching any goods or transactions given to other officers of the department; of all appointments of agency aids upon cars, vessels, and boats; of all seizures and detentions of vessels or vehicles departing or attempting to depart after clearance has been refused; of all securities required and received of owners or holders of goods in danger of being transported to insurgents, and of their action if security was not given. And on the first day of every month, as nearly as possible, they shall transmit to this department an abstract of such record for the previous month, together with a copy of the abstracts of records, and a statement of all bonds and securities received by them from assistant and local special agents.

GENERAL AGENT.

LIII. The general agent will visit the several agencies and permit officers as often as practicable, and take or direct such action as may be necessary to in-

sure a uniform construction of these regulations and harmony of action under them; direct the making of such local rules by supervising special agents as in his judgment shall be proper; hear and decide, or refer to the Secretary of the Treasury, appeals from the action of the supervising or other special agents, and generally to cause the laws and regulations governing restricted intercourse to be faithfully and honestly administered. And he shall promptly report to the Secretary of the Treasury all misconduct or inefficiency on the part of supervising, assistant, or other agents and officers engaged in executing these regulations.

THESE REGULATIONS TO SUPERSEDE ALL OTHERS.

LIV. These regulations shall supersede those of September 11, 1863, and all others conflicting herewith affecting commercial intercourse with States declared in insurrection; and all permits hereafter granted by any officer of the Treasury Department will be granted in pursuance of them and of the local rules authorized by them, or by virtue of authority hereafter given by the Secretary of the Treasury.

AUTHORITIES REVOKED.

LV. All existing authorities to purchase products in insurrectionary States are hereby revoked, except that products purchased in good faith under such authorities, and paid for prior to the date hereof, may be transported in the same manner and subject to the same conditions as products raised by the labor of freedmen.—(Reg. XXXVIII.)

All authorities to transport goods, wares, or merchandise into an insurrectionary State are hereby revoked.

WHEN REGULATIONS TAKE EFFECT.

LVI. These regulations shall take effect upon the publication thereof.

ABANDONED, CAPTURED, AND CONFISCABLE PERSONAL PROPERTY.

Regulations prescribed by the Secretary of the Treasury concerning abandoned, captured, and confiscable property, under the acts of Congress respectively approved March 12, 1863, and July 2, 1864.

AGENTS TO CARRY OUT THESE REGULATIONS.

I. The regulations relative to abandoned, captured, and confiscable personal property will be carried into effect by the same agents and under the same supervision as are provided under the regulations concerning commercial intercourse.

ASSISTANT SPECIAL AGENTS IN EACH AGENCY.

II. There shall be assigned to each special agency such number of assistant special agents as may be necessary, who, with the supervising special agent, shall collect and receive all abandoned, captured, and confiscable property, except such as has been used or was intended to be used for waging or carrying on war against the United States, viz: arms, ordnance, ships, steamboats, or other water-craft, and their furniture, forage, military supplies, and munitions of war.

ABANDONED, CAPTURED, AND CONFISCABLE PROPERTY DESCRIBED.

III. Abandoned property is that which has been or may be deserted by the owners, or when the lawful owner thereof shall be voluntarily absent therefrom, and engaged either in arms or otherwise in aiding or encouraging the rebellion.

Captured property is that which has been or may be seized or taken from hostile possession by the military or naval forces of the United States.

Confiscable property is that which is liable to confiscation under the act of July 17, 1862.

AGENTS TO KEEP RECORDS.

IV. Each agent collecting or receiving any such property will immediately make and keep a full record of all the facts or information concerning it known or accessible to him, including, as nearly as possible, the following: the character and quantity of the property received or collected; where captured, or found, or received as abandoned; under what circumstances; by whom owned or alleged to be owned; noting, where practicable, the name and address of one or more truthful residents in the neighborhood acquainted with the property and the owner or claimant thereof, and any statements they may make in connexion therewith; by whom such property was captured, abandoned, or seized for confiscation; by whom received or collected; from whom received; all names, marks, signs, or devices, (whether distinct, indistinct, or partially erased,) upon such property; together with all other information which may in any way serve to identify or make known the history of any particular lot, or to trace the same, or the proceeds thereof, from the earliest period possible to its final disposition.

He will also charge against each lot, and keep a true and detailed account in triplicate of each item of expense incurred in its collection, transportation, care, and sale, or other disposition by him, or, where two or more lots are treated together, a fair and just proportion against each, as well as all fees due in any way to the government thereon.

AGENTS TO MAKE REPORTS.

V. When such property is collected or received by an assistant special agent he will promptly transmit one copy of the above record to the Secretary of the Treasury, and one to the proper supervising special agent, and will retain one copy for his own files. When it is so collected or received by a supervising special agent, he will transmit one copy of the record to the Secretary of the Treasury, and retain one copy for his own files.

AGENTS TO RECEIVE AND COLLECT ABANDONED PERSONAL PROPERTY AND GIVE RECEIPTS.

VI. Such agents will receive and collect abandoned personal property from any officer or private of the regular or volunteer forces of the United States, or any officer, sailor, or marine in the naval service of the United States, upon the inland waters of the United States, who may have, take, or receive any abandoned property from persons in such insurrectionary districts, or have it under their control, and the agent receiving it will in all cases give a receipt therefor, in the following form:

Received ——— of ———, estimated at \$ ———, taken or received and held by him as abandoned property in an insurrectionary district, and claimed to be the property of ———, and turned over to me by said ———, which property I have received as agent of the Treasury Department, appointed in pursuance of certain acts of Congress, approved July 13, 1861, May 20, 1862, March 12, 1863, and July 2, 1864.

The said property to be transported and disposed of under the regulations of the Secretary of the Treasury, prescribed in pursuance of the authority conferred on him by said acts.

Dated ———, 186—.

And a record of the property so collected and received shall be made, and the property disposed of as directed in Regulations IV, IX, XI, and XV.

AGENTS TO RECEIVE PROPERTY FROM PERSONS IN MILITARY OR NAVAL SERVICE.

VII. Such agents will collect and receive of any officer or private, or person employed in or with the regular and volunteer forces of the United States, any property held by him which shall have been captured in any district declared to be in insurrection against the United States, except such as shall be required for military use of the United States forces; and all property so held by them shall be received by the agent as captured property, leaving all questions concerning the class to which it belongs for the consideration of the Secretary of the Treasury; and they shall also receive with such property the necessary invoices thereof, and all receipts, bills of lading, and other papers, documents and vouchers, showing title to such property or the right to the possession, control, or direction thereof, and such order, indorsement, or writing as the party has power to make, to enable such agent to take possession of such property or the proceeds thereof.

And he will give to the officer, private, or person from whom any property is so received, a receipt, in the form following:

“Received of ———, estimated at \$———, captured by the forces of the United States, and claimed to be the property of ———, which property I have received as special agent of the Treasury Department, appointed in pursuance of certain acts of Congress approved July 13, 1861, May 20, 1862, March 12, 1863, and July 2, 1864. The said property to be transported and disposed of under the regulations of the Secretary of the Treasury prescribed in pursuance of the authority conferred on him by said acts.”

And a record of the property so collected and received shall be made, and copies transmitted, and the property disposed of, as directed in Regulations IV, IX, XI, and XV.

PROPERTY REQUIRED FOR PUBLIC USE TO BE APPRAISED AND DELIVERED OVER.

VIII. When any part of the goods or property received or collected by any supervising or assistant special agent is demanded for public use, and a requisition therefor is presented, signed by the general commanding department, or by some other officer authorized by such commander of department, the special agent having such property in charge shall select three competent and disinterested persons, to be approved by such officer, who shall make oath for the faithful discharge of their duties, and who shall appraise said goods or property, and make a certificate thereof in the following form:

The undersigned having been appointed by ———, special agent, to appraise certain property alleged to have been collected or received as abandoned or captured by ———, special agent of the Treasury Department, having each of us made oath for the faithful discharge of our duty as such appraisers, do certify that we have carefully examined and appraised the following described property, to wit: ———, and that said property is worth ———.

_____,
_____,
_____.

Appraisers.

Which certificate shall be certified by the special agent and by the officer receiving said property ; and the goods or property so appraised shall be delivered over to the officer appointed to receive it ; and the special agent shall in all such cases require from the officer or agent receiving said goods or property a receipt, in the following form :

Received of ———, alleged to have been collected or received by him as abandoned or captured, and which has been this day appraised by ——— appraisers appointed with my approval, to be worth ——— dollars, which property has been delivered to me by said agent to be appropriated to the public use, as provided in the second section of the act of Congress, approved March 12, 1863, entitled "An act to provide for the collection of abandoned property, and the prevention of frauds in insurrectionary districts within the United States."

And he shall keep a record of all expenses incurred on account thereof, with a full description of all such property, and shall make a full report of such appraisal proceedings to the Secretary of the Treasury, and transmit therewith copies of all papers in the case, and, if an assistant special agent, he shall send copies of the report and all other papers in the case to the proper supervising special agent.

DISPOSITION OF PERISHABLE PROPERTY AND SUCH AS CANNOT BE TRANSPORTED.

IX. In all cases where captured and abandoned property of a perishable nature shall be collected or received by the proper agents of this department, and its immediate sale is required by the interest of all concerned, such agent shall, where practicable, forward it without delay to the nearest place designated by the Secretary or by regulation as a place of sale within a loyal State, consigned to the proper officer of this department, who shall forthwith cause it to be sold at auction to the highest bidder ; all such shipments to be accompanied by a statement as required by Regulation IV.

If, from the character of the property, it shall be impracticable so to transport it, the agent shall cause the same to be appraised by three disinterested persons, and to be sold at public auction, and promptly submit a full report, as prescribed by Regulation IV, together with the certificate of appraisal, taken in triplicate, and the account of sales, and hold the proceeds subject to the direction of the supervising special agent for that agency.

CONTRACTS FOR COLLECTION AND DELIVERY OF PROPERTY.

X. When property is liable to be lost or destroyed, in consequence of its location being unknown to the special agents, or from other causes, and parties propose, for compensation, to collect and deliver it into the hands of such agents, at points designated by them, supervising special agents may contract, on behalf of the United States, for the collection and delivery to them of such property in their respective agencies, on the best possible terms, not exceeding twenty-five per cent. of the proceeds of the property, which percentage must be full compensation for all expenses, of whatever character, incurred in collecting, preparing, and delivering such property at the points designated. Prior to any such contract being made, the party proposing must submit in writing a statement of the kind and amount of property proposed to be collected, the locality whence to be obtained, and all the facts and circumstances connected with it, particularly as to its ownership. And any contract made in pursuance of this regulation must be in writing and restricted to the collection and delivery of particular lots at named localities ; or, when circumstances clearly justify it, to the general collection and delivery of all abandoned property in limited districts not greater in any case than one parish or county, and not more than one district to be assigned to one contractor.

Before payment to any contractor under any contract made in pursuance of this regulation, he shall execute a bond, with penalty equal to the amount stipulated to be paid to him, and with sureties satisfactory to the supervising special agent, indemnifying the United States against all claims to the property delivered on account of damages by trespass, or otherwise occasioned by the act or connivance of the contractor, and against all claims that may arise on account of expenses incurred in the collection, preparation, and transportation of said property to the points designated in said contract.

Should a case arise, in the opinion of the supervising special agent, justifying the payment of a larger percentage than one-quarter of the proceeds of the property, he will make a statement of the facts and circumstances, and the reasons, in his opinion, justifying such additional allowance, and refer the same to the Secretary for instructions.

And for the purpose of getting possession of and transporting to market as much of the captured and abandoned property as possible, supervising special agents, or assistant special agents under their direction, will appoint and employ in their respective agencies, at such per diem compensation as may be judged proper, subject to approval of the Secretary of the Treasury, such local special agents and agency aids as may be necessary therefor, instructing them fully as to the execution of the duties respectively assigned to them.

DISPOSITION OF CONFISCABLE PROPERTY.

XI. All confiscable personal property collected or received in any agency shall forthwith be forwarded to the supervising special agent thereof, or as directed by him to the proper officer of the Treasury Department, at the port or place to which it shall be sent for legal proceedings, under the act of July 17, 1862; and upon presentation to such officer by the United States marshal of the proper writ in such proceedings, issued by a court of competent jurisdiction, the said property shall be delivered to him. Upon making such delivery, the officer delivering will require from the marshal duplicate receipts therefor, in the following form :

Received of ———, supervising special agent, appointed to collect and receive confiscable property, as provided in the act of Congress approved July 2, 1864, the following described property, viz : ——— which it is alleged belonged to ———, of ———, in the State of ———, whose property, it is charged, is confiscable under the act of Congress approved July 17, 1862.

By virtue of a writ issued by the ——— court, in proceedings therein for the condemnation of said property, under the last-named act, I have demanded and received the same.

Dated ———, 186—.

RECORD TO BE KEPT OF CONFISCABLE PROPERTY.

XII. Agents collecting and receiving such property will be careful to ascertain and record, in addition to the requirements of Regulation IV, all allegations against the owner of the property, together with the names and residences of witnesses by whom they can be sustained, and all other facts relating thereto which may tend to secure justice under the law, and will transmit one copy thereof to the United States district attorney, who is to institute proceedings for confiscation.

CAPTURED, ABANDONED, OR CONFISCABLE PROPERTY TO BE RELEASED ONLY BY AUTHORITY OF SECRETARY.

XIII. No property collected or received as captured, abandoned, or confiscable under any act of Congress, shall be released by any agent, except by

special authority from the Secretary of the Treasury, to any persons claiming ownership of such property; nor shall any permit be given by such agents to individuals to remove such property; nor shall any liability be incurred or assumed or contract be made on the part of the United States by such agents, except as authorized by these regulations. No personal favor shall in any case be extended to one individual or party rather than another.

ASSISTANT AGENTS TO FORWARD PROPERTY.

XIV. All abandoned, captured, or confiscable property, collected or received by an assistant special agent, will be promptly forwarded by him to the supervising special agent of the agency in which it shall be collected or received, or to such place of sale as he may direct. And all such property collected or received by a supervising special agent shall be by him either sold or forwarded for sale in compliance with instructions to him from the Secretary of the Treasury, or from the general agent of the Treasury Department.

DISPOSITION OF PERSONAL PROPERTY.

XV. All personal property collected and received in compliance with these regulations, other than such as may be appropriated to public use, shall be transported to such places as shall be designated by the Secretary of the Treasury as places of sale, consigned to the supervising special agent of the agency in which it is collected or received, if within his agency, or to such other person as shall be specially authorized by the Secretary to receive the same, and shall there be sold by such supervising special agent, or other person, at public auction to the highest bidder, for lawful money, pursuant to notice previously published of the time and place of sale.

PAYMENT OF EXPENSES OF PROPERTY.

XVI. Supervising special agents, and such other persons as shall be specially authorized by the Secretary of the Treasury to receive and sell captured, abandoned, and confiscable property, will pay or cause to be paid, out of the general fund arising from the sale of all such property received and sold by him, all expenses necessarily incurred in collecting, receiving, securing, and disposing of the same, including fees, taxes, freights, storage, charges, labor, and other necessary expenses, being careful to avoid all useless or indiscreet expenditures; and will charge each particular lot or parcel with the specific or proportionate amount of all such expenses as can be made specific or proportionate charges to each lot or parcel; and will also charge and retain out of the proceeds of each lot or parcel one and one-half per centum thereof for the payment of such expenses connected with the collection, transportation and sale, or other disposition thereof, as cannot be made specific or proportionate charges against each lot or parcel, or are not otherwise provided for, such as rents, compensation to clerks, or other employes, auctioneers, printing, and advertising, a carefully stated account of which will be kept by such agents, or other persons, showing in detail all expenses paid out of this fund arising from such charge; and, unless unavoidably prevented, they will take vouchers for all expenditures made under this regulation, and transmit the same with their accounts to the Secretary of the Treasury. Out of the balance, if any, of said one and one-half per centum remaining after defraying said expenses the several supervising special agents, or other persons selling as aforesaid, may retain, as compensation for extra care and responsibility, a sum not exceeding three-fourths of one per centum of the amount of such sales; and with the remainder, if any, may reward extra services in the collection and care of property, rendered by agents and others, in such manner and to such amount as may be approved or directed by the Secretary of the Treasury.

SUPERVISING SPECIAL AGENTS TO RENDER MONTHLY ACCOUNT CURRENT.

XVII. Each supervising special agent, or other person as aforesaid, shall make a full record of each lot or parcel of property coming to his possession, in the manner prescribed by Regulation IV, and report the same, and all sales or other disposition thereof, made by him, rendering a monthly account current of all his transactions to the Secretary, accompanying the same with receipts or other vouchers for all moneys paid out by him. All balances remaining in his hands shall be deposited in the Treasury, from time to time, as directed by the Secretary.

 ABANDONED AND CONFISCABLE LANDS, HOUSES, AND TENEMENTS.

Regulations concerning the charge and leasing of abandoned and confiscable lands, houses, and tenements, in States declared in insurrection, made in pursuance of the act of Congress on that subject, approved July 2, 1864.

AGENTS TO CARRY OUT THESE REGULATIONS.

I. The regulations relative to abandoned and confiscable lands, houses and tenements will be carried into effect by the same agents, and under the same supervision, as are provided under the regulations concerning commercial intercourse.

AGENTS TO TAKE POSSESSION OF ABANDONED LANDS, TENEMENTS, ETC.

II. The supervising special agent of each agency, and such assistant special agents therein as shall be designated for that purpose, will take possession of all lands, houses and tenements therein, abandoned by the lawful owners thereof, and all such as are confiscable under the act of Congress approved July 17, 1862.

ASSISTANT AGENT TO KEEP RECORD AND MAKE REPORT.

III. When an assistant special agent shall take possession of any such property, he will promptly record, in a book to be kept by him for that purpose, a full description of the property, with a statement of its condition, the name of the owner, and any facts relating to him or to the property which may affect the rights of the United States or of others interested in the property, one copy of which record he will promptly transmit to the Secretary of the Treasury, and one copy to the proper supervising special agent, who will record the same in a book to be kept for that purpose.

SUPERVISING SPECIAL AGENT TO MAKE RECORD AND REPORT.

IV. When a supervising special agent shall take possession of any such property, he will make a record as above required of an assistant special agent, and will transmit a copy thereof to the Secretary of the Treasury.

LANDS, TENEMENTS, ETC., TO BE LEASED.

V. All property so possessed will be rented as soon as practicable by the supervising special agent or the assistant special agent, under his direction, having such possession. No lease will be made for more than twelve months, and, when practicable, such property shall be rented from month to month. All leases will be in writing, and those for plantations shall be in the following form:

Memorandum of agreement made this ——— day of ———, 186 —, between ———, special agent of the Treasury Department, duly appointed under the acts

of Congress respectively approved March 12, 1863, and July 2, 1864, for taking charge of captured and abandoned property, and leasing abandoned and confiscable lands, houses, and tenements in the _____ agency, and _____, of _____, in the county of _____, and State of _____.

Witnesseth, that in pursuance of said acts, and of the instructions of the Secretary of the Treasury, the said agent, for and in behalf of the United States, agrees, upon the terms hereinafter contained, to lease to the said _____ from the _____ day of _____, 186—, to the _____ day of _____, 186—, the following described lands and premises, to wit: _____.

And the said _____ hereby agrees that one equal _____ part of the productions realized by the cultivation and working of the plantation aforesaid shall be promptly gathered, prepared and delivered to the authorized agent of the United States at _____, on or before the _____ day of _____, 186—, in proper packages and condition for transportation.

And the said _____ further agrees in relation to the employment and payment of freedmen worked upon the said plantation, that he will employ and pay them, and provide for their families, in compliance with the regulations of the Secretary of the Treasury, dated July 29, 1864, concerning the employment and general welfare of freedmen, which regulations are made a part of this agreement so far as they relate to employers and employed; and, further, that he will do all things required of him by the regulations of the Secretary of the Treasury concerning abandoned, captured, and confiscable property.

Signed, sealed, and delivered }
in presence of }

_____. [L. S.]
_____. [L. S.]

WHEN LEASE IS FOR HOUSES AND TENEMENTS ONLY.

VI. When the lease is for houses and tenements only, then it shall be in the above form to the words "to lease to the said _____," and instead of what follows therein insert as follows:

from the _____ day of _____, 18—, from month to month, either party hereto being at liberty to terminate this lease at the end of any month from the date hereof, the following described premises: _____.

And the said _____ hereby agrees to pay to the said agent _____ dollars per month, for each month from the date hereof, so long as he shall continue in possession of the said premises, and to pay the rent of each month in advance, and at the expiration of this lease as aforesaid to deliver possession of the said property to the said agent, or his successor, in as good condition as the same is now in, loss by fire or other unavoidable injury excepted.

Signed, sealed and delivered }
in presence of }

_____. [L. S.]
_____. [L. S.]

LEASES TO BE MADE IN TRIPLICATE.

VII. All leases of lands, houses, and tenements shall be made in triplicate, one of which shall be retained by the lessee, one will be retained by the special agent making the lease, and one will be forwarded to the Secretary of the Treasury. A record will be made by each agent making a lease, containing a copy thereof, and any facts connected therewith which may affect the same. A copy of the record will also be made in a book kept by the supervising special agent for that purpose.

AGENT TO RECEIPT FOR RENTS.

VIII. Upon the receipt of products or money for rent, the agent receiving the same will indorse his receipt therefor upon the copy of the lease held by the lessee, and also give him a certified copy of the receipt, which the lessee will promptly forward to the Secretary of the Treasury.

ASSISTANT AGENTS TO KEEP RECORD OF RENTS RECEIVED.

IX. When products or money shall be received by an assistant special agent, he will make an entry in his books of account, stating the products or amount of money so received, the name of the person from whom received, and the lease upon account of which they are paid, the date of receipt, and any other facts connected therewith which should be recorded. He will promptly send the products or money so received, with a copy of the entry made, to the proper supervising special agent, who will credit the products or money in his books of account, and make an entry in each case similar to that above required, and send duplicate receipts in each case to the assistant special agent, who will retain one copy and send the other to the Secretary of the Treasury.

SUPERVISING AGENTS TO KEEP RECORD OF RENTS RECEIVED.

X. When the products or moneys are received by a supervising special agent, he will make the same entry above required of assistant special agents, in his books of account, and will send a copy thereof to the Secretary of the Treasury.

DESCRIPTION OF CONFISCABLE LANDS, TENEMENTS, ETC., TO BE KEPT.

XI. A careful description of all lands, houses, and tenements taken possession of by a supervising special agent, or by his direction, as confiscable, will be recorded by him in a book kept for that purpose, in which will be entered all allegations against the owner which are relied on for condemnation, together with the names and residence of the witnesses to substantiate them, a copy of which record in each case will be sent to the Secretary of the Treasury.

COPY OF RECORD OF CONFISCABLE LANDS, ETC., TO BE SENT TO UNITED STATES DISTRICT ATTORNEY IN CERTAIN CASES.

XII. When any such lands, houses, and tenements are situated in a district within jurisdiction of a federal court exercising its functions, a copy of the above record, together with a statement of any other facts known to the supervising special agent affecting the same, will be sent by him to the proper United States district attorney, that proceedings for confiscation may be instituted, but such agent will continue in charge of the property until relieved therefrom by order of the court in which such proceedings are instituted.

PRODUCTS RECEIVED FOR RENTS TO BE SOLD.

XIII. Supervising special agents will sell or dispose of all products received by them for rents, in the same manner and subject to the same regulations as are prescribed by the Secretary of the Treasury concerning the sale and disposition of captured, abandoned, and confiscable personal property.

MONEY RECEIVED FOR RENTS TO BE DEPOSITED.

XIV. All money arising from rents, after payment therefrom of any expenses that may be approved by the Secretary of the Treasury, will be deposited by the supervising special agents, with a designated United States depository or assistant treasurer, and each supervising special agent will make a full record

of all his proceedings, and will report the same from time to time to the Secretary of the Treasury, and will render to him a monthly account current of all his transactions, accompanying the same with receipts or other vouchers, for all moneys paid out by him, referring to the letter of approval thereof from the Secretary of the Treasury.

EMPLOYMENT AND WELFARE OF FREEDMEN.

XV. In leasing abandoned and confiscable lands, provisions shall be made, as far as practicable, for the employment and general welfare of freedmen, and provision may be made in such leases, and also with those working their own lands and employing freedmen under rules established in relation thereto, for obtaining supplies free from the payment of the fee charged in other cases, and for the support of the helpless among such freedmen.

FREEDMEN.

Regulations providing for the employment and general welfare of all persons within the lines of national military occupation within insurrectionary States, formerly held as slaves, who are or shall become free.

AGENTS TO CARRY OUT THESE REGULATIONS.

I. The regulations relative to the employment and general welfare of freedmen will be carried into effect by the same agents and under the same supervision as are provided under the regulations concerning commercial intercourse

FREEDMEN'S HOME COLONIES.

II. There shall be established in each special agency one or more places to be known as "Freedmen's Home Colonies," where all freed persons within the agency may be received and provided for in pursuance of these regulations.

SUPERINTENDENT OF FREEDMEN—HIS DUTIES.

III. A superintendent of freedmen will be appointed for each one of these colonies, under the general direction of the proper supervising special agent. Superintendents will make such arrangements as shall be necessary at each colony to provide temporary shelter and care for persons received there, and also such buildings as are proper for the permanent use of those retained there; and will obtain such working animals and other agricultural implements of labor and other supplies as may be necessary and proper for the economical conduct of these establishments. They will also keep books of record in which shall be entered the name, age, condition, former owner, residence, and occupation of each person received in these colonies; also, the marriages, births, and deaths occurring therein; also, all departures, and by whom those departing are employed, for what purpose, at what place, and on what terms.

CLASSIFICATION OF FREEDMEN AND THEIR WAGES.

IV. All persons of proper age and condition to labor, when received, shall be classified by the superintendent as follows: Sound persons, over 18 and under 40 years of age, shall be classed as No. 1 hands; over 14 and under 18, and over 40 and under 55, No. 2; over 12 and under 14, and over 55, No. 3. Persons suffering from any physical defect or infirmity, but able to work, shall be

classed as he considers proper. The minimum rate of wages of No. 1 males, shall be \$25 per month; No. 2, \$20; No. 3, \$15. Nos. 1, 2, and 3 females, \$18, \$14, \$10. These rates shall not restrict mechanics and others from contracting for higher wages if they can do so.

EMPLOYMENT TO BE PROVIDED FOR FREEDMEN OF PROPER AGE.

V. Superintendents will see that all persons so received, registered, and classified, who are able to labor, are promptly provided with employment by lessees or others desiring their labor, upon the terms specified, and they will permit none over the age of twelve capable of labor to remain in idleness; and they will, as far as possible, obtain from planters and others the names and other particulars above specified, of all freed persons in their employ or within their knowledge in the district within which these colonies are located, a record of which shall be kept by them as above provided, and they will do what they consistently can to see that all such persons are provided with employment at rates equal to those above specified, and that the helpless among them are properly cared for.

APPLICATIONS FOR LABORERS TO BE RECEIVED AND RECORDED.

VI. Superintendents will receive and record all applications for the labor of freedmen, that those received may be promptly furnished with employment. Planters and others employing parents will be required to take their children with them, unless the parent prefers to have them remain, in which case superintendents will see that provision is made to apply sufficient of the wages of the parent to support the children at the colony.

WRITTEN AGREEMENTS TO BE MADE BETWEEN EMPLOYERS AND EMPLOYÉS AND CONDITIONS.

VII. Superintendents shall see that written agreements are made between the employer and the employé, by which, in addition to the wages above fixed, the employer shall agree to furnish, without charge, sufficient quarters for the laborers, a separate tenement for each family, with proper regard for sanitary condition, one acre of ground for garden purposes to each family, fuel, medical attendance, and schools for children; also, that laborers shall be paid for full time, unless they are sick or voluntarily neglect to work; that one-half their monthly wages shall be paid to the laborer during each month, and the other half at the end of the term of employment; that, in case the laborer violates his contract by voluntary absence or continued neglect to work, the half wages due to him shall be forfeited, one half to the employer, and one half to the government to aid in supporting the helpless; that any wages due to the laborers, under the agreement, shall be a first lien upon all crops produced, and that no shipment of products shall be made until the superintendent shall certify that all dues to laborers are paid or satisfactorily arranged; that no labor in excess of ten hours per day shall be required, but if more shall be performed at the request of the employer extra payment shall be made therefor; that the employers shall keep on hand and sell to their employés, at actual cost on the plantation, a sufficient supply of wholesome food and proper clothing for themselves and their families.

INTEREST IN PROFITS OF LABOR MAY BE GIVEN INSTEAD OF WAGES.

VIII. In case any person employing freedmen to labor on plantations shall wish to give an interest in the profits of their labor instead of the wages above fixed, and the laborers desire to accept the same, an agreement in writing may be made accordingly, subject to the approval of the proper superintendent.

Where civil courts are established within reach of parties complaining under these agreements, they may seek redress there; but if no such courts are within reach, then the complaining party may state his case to a superintendent, who, after hearing both parties, shall decide between them. Either party may appeal to the proper supervising special agent, whose decision shall be final.

CARE OF AGED AND INFIRM FREEDMEN.

IX. Aged or infirm freed persons, and orphan children under twelve years of age, and others unfit for regular labor who cannot be otherwise provided for, will be retained and provided for by superintendents, and each superintendent will see that all such persons under his care perform all such labor as is proper, considering their condition; and he will employ as many hands, at regular rates, as may be requisite for producing on the plantation all things that can be raised, necessary to the support of the establishment, and no more; and he will require all freed persons temporarily there to labor without wages, until they can be employed elsewhere. He will provide such medical attendance and schools as are necessary and proper.

HOME COLONIES MAY BE ASSIGNED TO ASSOCIATIONS UPON CERTAIN CONDITIONS.

X. Any association or combination of associations desiring to improve the condition of freedmen will have assigned to their care and general charge such freedmen's home colonies as they may desire, and as they can give satisfactory assurance of their ability to provide for. Superintendents for any such colonies will be appointed upon the nomination and in pursuance of the wishes of such associations, and every proper facility for the execution of their purposes will be given by the supervising and assistant special agents. Associations, desiring to operate under this clause, are notified that the Secretary reserves the right to revoke or modify this regulation whenever, in his judgment, the public interests will be promoted by such action.

RESERVATIONS OF LAND FOR FREEDMEN'S LABOR COLONIES.

XI. For the purpose of promoting habits of industry and self-reliance among freedmen, and to encourage them to locate in colonies, and to enable them to work advantageously, there will be reserved in the respective special agencies such contiguous, abandoned, and confiscable lands and plantations as may be proper for that purpose, for the exclusive use and cultivation of freedmen, which reservations will be called Freedmen's Labor Colonies. Over each of these colonies there will be appointed a superintendent for leasing small tracts therein to such freedmen as are able to work them; and such lessees shall be subject to the same conditions and entitled to the same rights and privileges as other lessees.

LABOR COLONIES MAY BE ASSIGNED TO ASSOCIATIONS ON CERTAIN CONDITIONS.

XII. Any association, or combination of associations, desiring to aid lessees in such colonies who have not sufficient means to cultivate without aid, will have set apart to their beneficiaries such part or the whole of any one of these colonies as they shall give satisfactory assurance of their ability to provide for; and in case they agree to provide the necessary working animals, agricultural implements, seeds, and other aid which may be necessary for the cultivation of the whole of any such colony, such superintendent will be appointed as may be desired by the association. Associations desiring to operate under this

clause are notified that the Secretary reserves the right to revoke or modify this regulation whenever, in his judgment, the public interests will be promoted by such action.

SCHOOLS WILL BE ESTABLISHED.

XIII. Schools will be established within these home and labor colonies sufficient for the education of all children there under the age of twelve years, teachers for which will be provided by the superintendent or by the association, as the case may be.

PENALTIES FOR ILL USAGE OF FREEDMEN.

XIV. Ill usage of freedmen by lessees or others employed by them will be regarded as sufficient ground for the forfeiture of the contract between lessee and laborer, or, if the case be an aggravated one, of the lease of a plantation. Superintendents will promptly and fully investigate complaints of this character, and if they prove to be well founded, they will annul the contract for labor as above.

If, in their opinion, this action is inadequate, they will report the case to the proper supervising special agent, who may, if he thinks proper, cancel the lease, subject to appeal to the general agent.

EXPENSES TO BE APPROVED BY SECRETARY—COPIES OF ALL PAPERS TO BE TRANSMITTED.

XV. All expenses must be authorized and approved by the Secretary of the Treasury. Each superintendent, on the first of every month, will furnish the Secretary of the Treasury and the proper supervising special agent with copies of all records, agreements, and other papers under his charge, and also a monthly statement of accounts of all receipts and expenditures, with vouchers for all money paid out. Supervising special agents will render a monthly account current of all receipts and expenditures within their respective agencies under these regulations, accompanied with vouchers for all money paid by them.

ORDER OF SECRETARY OF WAR.

[General Orders No. 88.]

WAR DEPARTMENT, WASHINGTON,
March 31, 1863.

For the purpose of more effectually preventing all commercial intercourse with insurrectionary States, except such as shall be authorized in pursuance of law, and of securing consistent, uniform, and efficient action in conducting such intercourse as shall be so authorized, and for the purpose of carrying out the provisions of an act of Congress entitled "An act to provide for the collection of abandoned property and for the prevention of frauds in insurrectionary States," approved March 12, 1863, it is hereby ordered :

I.

That no officer of the army of the United States, nor other person connected therewith, shall authorize or have any interest in the transportation of any goods, wares, or merchandise (except supplies belonging to or contracted for by the United States, designed for the military or naval forces thereof, and moving under military or naval orders, and except, also, sutlers' supplies and other things necessary for the use and comfort of the troops of the United States,

and moving under permits of the authorized officers of the Treasury Department) into any State declared by the President to be in insurrection; nor authorize nor have any interest in the purchase or sale therein of any goods or chattels, wares or merchandise, cotton, tobacco, or other product of the soil thereof, nor the transportation of the same, except as aforesaid, therefrom or therein; nor shall any such officer or person authorize, prohibit, or in any manner interfere with any such purchase or sale or transportation, which shall be conducted under the regulations of the Secretary of the Treasury, unless under some imperative military necessity, in the place or section where the same shall be conducted, or unless requested by an agent or some other authorized officer of the Treasury Department, in which case all commanders of military departments, districts, and posts, will render such aid in carrying out the provisions of the said act, and in enforcing due observance of the said regulations of the Secretary of the Treasury, as can be given without manifest injury to the public service.

II.

It is further ordered that every officer or private, or person employed in or with the regular or volunteer forces of the United States, who may receive or have under his control any property which shall have been abandoned by the owner or owners, or captured in any district declared to be in insurrection against the United States, including all property seized under military orders, excepting only such as shall be required for military use of the United States forces, shall promptly turn over all such property to the agent appointed by the Secretary of the Treasury to receive the same, who shall give duplicate receipts therefor.

And every such officer or private, or person employed in or with the regular or volunteer forces of the United States, shall also promptly turn over to such agent, in like manner, all receipts, bills of lading, and other papers, documents, and vouchers showing title to such property, or the right to the possession, control, or direction thereof; and he shall make such order, indorsement, or writing as he has power to make, to enable such agent to take possession of such property or the proceeds thereof. Arms, munitions of war, forage, horses, mules, wagons, beef-cattle, and supplies which are necessary in military operations, shall be turned over to the proper officers of the ordnance, or of the quartermaster, or of the commissary departments, respectively, for the use of the army. All other property abandoned or captured or seized, as aforesaid, shall be delivered to the agent appointed by the Secretary of the Treasury.

The officer receiving or turning over such property shall give the usual and necessary invoices, receipts, or vouchers therefor, and shall make regular returns thereof, as prescribed by the army regulations. The receipts of the agents of the Treasury Department shall be vouchers for all property delivered to them, and whenever called upon by the agent of the Treasury Department authorized to receive such abandoned or captured or seized property, as aforesaid, or the proceeds thereof, all persons employed in the military service will give him full information in regard thereto; and if requested by him so to do, they shall give him duplicates or copies of the reports and returns thereof, and of the receipts, invoices, and vouchers therefor.

And every officer of the army of the United States hereafter receiving abandoned or captured or seized property, or the proceeds thereof, or under whose order it may be applied to the use of the military forces, as aforesaid, shall, upon request of a duly authorized agent of the Treasury Department, render a written report, with invoices thereof, to said agent, in which he will specify the arms, supplies, or other munitions of war, retained for the use of the military forces as aforesaid, and also separately the property turned over to said agent, or which may have been sold or otherwise disposed of.

And in case a sale of any such property shall be made under his authority, or under the authority of any one subject to his order, he will so state, and will describe the property so sold, and will state when and where and by and to whom sold, and the amount received therefor, and what disposition was made of the proceeds.

And all officers of the army of the United States will at all times render to the agents appointed by the Secretary of the Treasury all such aid as may be necessary to enable them to take possession of and transport all such property, so far as can be done without manifest injury to the public service.

III.

All commanders of military departments, districts and posts, will, upon receipt of this order, revoke all existing orders within their respective commands conflicting or inconsistent herewith, or which permit or prohibit or in any manner interfere with any trade or transportation conducted under the regulations of the Secretary of the Treasury; and their attention is particularly directed to said regulations, prescribed March 31, 1863, and they will respectively make such orders as will insure strict observance of this order throughout their respective commands.

All expenses of transporting property herein referred to will be reported by the officers of the quartermaster's department, who furnish such transportation, to the agents of the Treasury Department, and also, through the ordinary channels, to the Quartermaster General at Washington, in order that the said expenses may be reimbursed from the proceeds of sales of such transported property.

EDWIN M. STANTON, *Secretary of War*.

WAR DEPARTMENT, *July 29, 1864.*

The attention of all officers and soldiers of the army of the United States, whether volunteer or regular, is specially directed to the regulations of the Secretary of the Treasury, approved by the President, dated July 29, 1864, and superseding the regulations of September 11, 1863; and they will in all respects observe general order of this department numbered 88, and dated March 31, 1863, with regard to said regulations of July 29, 1864, as if the same had been originally framed and promulgated with reference to them; and attention is called to the several acts of Congress appended hereto, and especially to sections 9 and 10 of the act approved July 2, 1864.

EDWIN M. STANTON, *Secretary of War*.

ORDER OF SECRETARY OF NAVY.

NAVY DEPARTMENT,
Washington, March 31, 1863.

For the purpose of more effectually preventing all commercial intercourse with insurrectionary States, except such as shall be authorized in pursuance of law, and of securing consistent, uniform, and efficient action in conducting such intercourse as shall be so authorized, and for the purpose of carrying out the provisions of an act of Congress entitled "An act to provide for the collection of abandoned property and for the prevention of frauds in insurrectionary States," approved March 12, 1863, it is hereby ordered—

I.

That no officer of the navy of the United States, nor other person connected therewith, shall authorize or have any interest in the transportation of any goods,

wares, or merchandise (except supplies belonging to or contracted for by the United States, designed for the military or naval forces thereof, and moving under military or naval orders, and except also sutlers' supplies and other things necessary for the use and comfort of the naval forces of the United States, and moving under permits of the authorized officers of the Treasury Department) into any State declared by the President to be in insurrection; nor authorize nor have any interest in the purchase or sale therein of any goods or chattels, wares or merchandise, cotton, tobacco, or other products of the soil thereof, nor the transportation of the same, except as aforesaid, therefrom or therein; nor shall any such officer or person authorize, prohibit, or in any manner interfere with any such purchase or sale or transportation which shall be conducted under the regulations of the Secretary of the Treasury, unless under some imperative military necessity in the place or section where the same shall be conducted, or unless requested by an agent or some other authorized officer of the Treasury Department, in which case all officers of the navy of the United States and other persons connected therewith will render such aid in carrying out the provisions of the said act and of the law, and in enforcing due observance of the said regulations of the Secretary of the Treasury as can be given without manifest injury to the public service.

II.

It is further ordered that every officer, sailor, or marine in the naval service of the United States who shall receive or have under his control any property which shall have been abandoned by the owner or owners, or captured in any district declared to be in insurrection against the United States, including all property seized in any such district, under naval orders, excepting only such as shall be required for the use of the naval forces of the United States, and as is excluded by the act of March 12, 1863, shall promptly turn over all such property to the agent appointed by the Secretary of the Treasury to receive the same, who shall give receipts therefor, if desired.

And every such officer, sailor, or marine shall also turn over to such agent in like manner all receipts, bills of lading, and other papers, documents, and vouchers showing title to such property, or the right to the possession, control, or direction thereof; and he shall make such order, indorsement, or writing as he has power to make to enable such agent to take possession of such property, or the proceeds thereof. Arms, munitions of war, forage, horses, mules, wagons, beef-cattle and supplies which are necessary in naval operations, shall be turned over to the proper officers for the use of the navy. All other property abandoned, captured, or seized, as aforesaid, shall be delivered to the said agent of the Treasury Department.

The officer receiving or turning over such property shall give the usual and necessary invoices, receipts or vouchers therefor, and shall make regular returns thereof as prescribed by the navy regulations. The receipts of the agents of the Treasury Department shall be vouchers for all property delivered to them; and whenever called upon by the said agent of the Treasury Department authorized to receive such abandoned, or captured, or seized property, as aforesaid, or the proceeds thereof, all persons employed in the naval service of the United States will give him full information in regard thereto; and if requested by him so to do, they shall give him duplicates or copies of the reports and returns thereof, and of the receipts, invoices, and vouchers therefor.

And every officer of the navy of the United States hereafter receiving abandoned, or captured, or seized property in any insurrectionary State as aforesaid, or the proceeds thereof, or under whose order it may be applied to the use of the naval forces as aforesaid, shall, upon request of an agent appointed by the Secretary of the Treasury as aforesaid, render a written report, with invoices thereof,

to said agent, in which he will specify the arms, supplies, or other munitions of war retained for use of the naval forces, as aforesaid, and also, separately, the property turned over to said agent, or which may have been sold or otherwise disposed of. And in case a sale of any such property shall be made under his authority, or under the authority of any one subject to his order, he will so state, and will describe the property so sold, and will state when and where, and by and to whom sold, and the amount received therefor, and what disposition was made of the proceeds.

And all officers of the navy of the United States will, at all times, render to the agents appointed by the Secretary of the Treasury all such aid as may be necessary to enable them to take possession of any abandoned, or captured, or seized property aforesaid, and in transporting the same, so far as can be done without manifest injury to the public service.

All expenses of transporting property herein referred to will be reported by the officers who furnish the transportation to the agent of the Treasury Department, and also, through the proper channels, to the Navy Department at Washington, in order that the expenses may be reimbursed from the proceeds of sales of such transported property.

III.

All naval officers in command of squadrons, vessels, or stations, will, upon receipt of this order, revoke all existing orders throughout their respective commands conflicting or inconsistent herewith, or which permit, or prohibit, or in any manner interfere with any trade or transportation conducted under the regulations of the Secretary of the Treasury not understood as applying to any lawful maritime prize by the naval forces of the United States; and their attention is particularly directed to said regulations, prescribed March 31, 1863, and they will respectively make such orders as will insure strict observance of this order throughout their respective commands.

GIDEON WELLES,
Secretary of the Navy.

NAVY DEPARTMENT,
July 29, 1864.

The attention of all officers, sailors and marines of the navy of the United States is especially directed to the regulations of the Secretary of the Treasury, approved by the President, dated July 29, 1864, and superseding the regulations of September 13, 1863, and they will, in all respects, observe the order of this department, dated March 31, 1863, with regard to said regulations of July 29, 1864, as if the same had been originally promulgated in reference to them; and attention is called to the several acts of Congress appended hereto, and especially to sections 9 and 10 of the said act approved July 2, 1864.

GIDEON WELLES,
Secretary of the Navy.

ORDER OF QUARTERMASTER GENERAL.

[General Orders No. 32.]

QUARTERMASTER GENERAL'S OFFICE,
Washington City, August 4, 1864.

I. All officers of the quartermaster's department, upon receiving from the duly authorized agents of the Treasury Department written application for the use of transportation by land or water for collecting and forwarding to market

abandoned, captured, and confiscable property, under the regulations of the Secretary of the Treasury of 29th of July, 1864, will submit such applications to their immediate commander, with such explanation as to the available means of transportation on hand, and the quantity called for by the application, as will enable the commanding officer to decide whether it can be furnished without interference with or injury to the military service or operations of the troops under his command.

If approved by the commander, the transportation will be furnished.

II. Of all actual expenditures incurred by the quartermaster's department in executing this order, accurate account will be kept, which will be transmitted to the Quartermaster General, with full explanations, in order that the appropriation of the quartermaster's department may be reimbursed by the Treasury Department out of the proceeds of sales of property collected under this order.

No charge will be made for the use of steamers and sail vessels for the transportation or collection of such property, unless there is detention during the time of collecting, loading, or discharging the property.

For all time thus consumed, the proper charges, as of time of chartered vessels, of crews, and for coal and stores consumed, will be made.

M. C. MEIGS.

Bvt. Maj. Gen. and Q. M. Gen.

PROCLAMATIONS OF THE PRESIDENT.

[August 16, 1861.]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas, on the fifteenth day of April, eighteen hundred and sixty-one, the President of the United States, in view of an insurrection against the laws, Constitution, and government of the United States, which had broken out within the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas, and in pursuance of the provisions of the act entitled "An act to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions, and to repeal the act now in force for that purpose," approved February twenty-eight, seventeen hundred and ninety-five, did call forth the militia to suppress said insurrection, and to cause the laws of the Union to be duly executed, and the insurgents have failed to disperse by the time directed by the President; and whereas such insurrection has since broken out, and yet exists, within the States of Virginia, North Carolina, Tennessee, and Arkansas; and whereas the insurgents in all the said States claim to act under the authority thereof, and such claim is not disclaimed or repudiated by the persons exercising the functions of government in such State or States, or in the part or parts thereof in which such combinations exist, nor has such insurrection been suppressed by said States:

Now, therefore, I, Abraham Lincoln, President of the United States, in pursuance of an act of Congress approved July thirteen, eighteen hundred and sixty-one, do hereby declare that the inhabitants of the said States of Georgia, South Carolina, Virginia, North Carolina, Tennessee, Alabama, Louisiana, Texas, Arkansas, Mississippi, and Florida, (except the inhabitants of that part of the State of Virginia lying west of the Alleghany mountains, and of such other parts of that State and the other States hereinbefore named as may maintain a loyal adhesion to the Union and the Constitution, or may be, from time to time, occupied and controlled by forces of the United States engaged in the

dispersion of said insurgents,) are in a state of insurrection against the United States, and that all commercial intercourse between the same and the inhabitants thereof, with the exceptions aforesaid, and the citizens of other States and other parts of the United States, is unlawful, and will remain unlawful until such insurrection shall cease or has been suppressed; that all goods and chattels, wares and merchandise, coming from any of said States, with the exceptions aforesaid, into other parts of the United States, without the special license and permission of the President, through the Secretary of the Treasury, or proceeding to any of said States, with the exceptions aforesaid, by land or water, together with the vessel or vehicle conveying the same, or conveying persons to or from said States, with said exceptions, will be forfeited to the United States; and that, from and after fifteen days from the issuing of this proclamation, all ships and vessels belonging in whole or in part to any citizen or inhabitant of any of said States, with said exceptions, found at sea or in any port of the United States, will be forfeited to the United States; and I hereby enjoin upon all district attorneys, marshals, and officers of the revenue and of the military and naval forces of the United States to be vigilant in the execution of said act, and in the enforcement of the penalties and forfeitures imposed or declared by it; leaving any party who may think himself aggrieved thereby to his application to the Secretary of the Treasury for the remission of any penalty or forfeiture, which the said Secretary is authorized by law to grant, if, in his judgment, the special circumstances of any case shall require such remission.

In witness whereof I have hereunto set my hand, and caused the seal of the United States to be affixed.

Done at the city of Washington, this sixteenth day of August, in the year [L. s.] of our Lord eighteen hundred and sixty-one, and of the independence of the United States of America the eighty-sixth.

ABRAHAM LINCOLN.

By the President :

WILLIAM H. SEWARD, *Secretary of State.*

[July 1, 1862.]

BY THE PRESIDENT OF THE UNITED STATES.

A PROCLAMATION.

Whereas, in and by the second section of an act of Congress passed on the 7th day of June, A. D. 1862, entitled "An act for the collection of direct taxes in insurrectionary districts within the United States, and for other purposes," it is made the duty of the President to declare, on or before the first day of July then next following, by his proclamation, in what State and parts of States insurrection exists :

Now, therefore, be it known that I, Abraham Lincoln, President of the United States of America, do hereby declare and proclaim that the States of South Carolina, Florida, Georgia, Alabama, Louisiana, Texas, Mississippi, Arkansas, Tennessee, North Carolina, and the State of Virginia, except the following counties: Hancock, Brooke, Ohio, Marshal, Wetzel, Marion, Monongalia, Preston, Taylor, Pleasants, Tyler, Ritchie, Doddridge, Harrison, Wood, Jackson, Wirt, Roane, Calhoun, Gilmore, Barbour, Tucker, Lewis, Braxton, Upshur, Randolph, Mason, Putnam, Kanawha, Clay, Nicholas, Cabell, Wayne, Boon, Logan, Wyoming, Webster, Fayette, and Raleigh, are now in insurrection and rebellion, and by reason thereof the civil authority of the United States is obstructed, so that the provisions of the "Act to provide increased revenue from imports, to pay the interest on the public debt, and for other purposes," approved August fifth, eighteen hundred and sixty-one, cannot be peaceably executed, and that the taxes legally chargeable upon real estate under the act

last aforesaid, lying within the States and part of States as aforesaid, together with a penalty of fifty per centum of said taxes, shall be a lien upon the tracts or lots of the same, severally charged, till paid.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the city of Washington this first day of July, in the year [L. s.] of our Lord one thousand eight hundred and sixty-two, and of the independence of the United States of America the eighty-sixth.

ABRAHAM LINCOLN.

By the President :

F. W. SEWARD,

Acting Secretary of State.

[March 31, 1863.]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas, in pursuance of the act of Congress approved July 13, 1861, I did by proclamation, dated August 16, 1861, declare that the inhabitants of the States of Georgia, South Carolina, Virginia, North Carolina, Tennessee, Alabama, Louisiana, Texas, Arkansas, Mississippi, and Florida, (except the inhabitants of that part of Virginia lying west of the Alleghany mountains, and of such other parts of that State, and the other States hereinbefore named, as might maintain a loyal adhesion to the Union and Constitution, or might be from time to time occupied and controlled by forces of the United States engaged in the dispersion of said insurgents,) were in a state of insurrection against the United States, and that all commercial intercourse between the same and the inhabitants thereof, with the exceptions aforesaid, and the citizens of other States and other parts of the United States, was unlawful, and would remain unlawful until such insurrection should cease or be suppressed, and that all goods and chattels, wares and merchandise, coming from any of said States, with the exceptions aforesaid, into other parts of the United States, without the license and permission of the President, through the Secretary of the Treasury, or proceeding to any of said States, with the exceptions aforesaid, by land or water, together with the vessel or vehicle conveying the same to or from said States, with the exceptions aforesaid, would be forfeited to the United States :

And whereas experience has shown that the exceptions made in and by said proclamation embarrass the due enforcement of said act of July 13, 1861, and the proper regulation of the commercial intercourse authorized by said act with the loyal citizens of said States :

Now, therefore, I, Abraham Lincoln, President of the United States, do hereby revoke the said exceptions, and declare that the inhabitants of the States of Georgia, South Carolina, North Carolina, Tennessee, Alabama, Louisiana, Texas, Arkansas, Mississippi, Florida, and Virginia, (except the forty-eight counties of Virginia designated as West Virginia, and except, also, the ports of New Orleans, Key West, Port Royal, and Beaufort, in North Carolina,) are in a state of insurrection against the United States, and that all commercial intercourse, not licensed and conducted as provided in said act, between the said States and the inhabitants thereof, with the exceptions aforesaid, and the citizens of other States and other parts of the United States, is unlawful, and will remain unlawful until such insurrection shall cease or has been suppressed, and notice thereof has been duly given by proclamation; and all cotton, tobacco,

and other products, and all other goods and chattels, wares and merchandise, coming from any of said States, with the exceptions aforesaid, into other parts of the United States, or proceeding to any of said States, with the exceptions aforesaid, without the license and permission of the President, through the Secretary of the Treasury, will, together with the vessel or vehicle conveying the same, be forfeited to the United States.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed. Done at the city of Washington this [L. s.] thirty-first day of March, A. D. 1863, and of the independence of the United States of America the eighty-seventh.

ABRAHAM LINCOLN.

By the President:

WILLIAM H. SEWARD,
Secretary of State.

[December 8, 1863.]

BY THE PRESIDENT OF THE UNITED STATES.

A PROCLAMATION.

Whereas, in and by the Constitution of the United States, it is provided that the President "shall have power to grant reprieves and pardons for offences against the United States, except in cases of impeachment;" and

Whereas a rebellion now exists whereby the loyal State governments of several States have for a long time been subverted, and many persons have committed and are now guilty of treason against the United States; and

Whereas, with reference to said rebellion and treason, laws have been enacted by Congress, declaring forfeitures and confiscation of property and liberation of slaves, all upon terms and conditions therein stated, and also declaring that the President was thereby authorized at any time thereafter, by proclamation, to extend to persons who may have participated in the existing rebellion, in any State or part thereof, pardon and amnesty, with such exceptions and at such times and on such conditions as he may deem expedient for the public welfare; and

Whereas the congressional declaration for limited and conditional pardon accords with well-established judicial exposition of the pardoning power; and

Whereas, with reference to said rebellion, the President of the United States has issued several proclamations, with provisions in regard to the liberation of slaves; and

Whereas it is now desired by some persons heretofore engaged in said rebellion to resume their allegiance to the United States, and to reinaugurate loyal State governments within and for their respective States:

Therefore, I, Abraham Lincoln, President of the United States, do proclaim, declare, and make known to all persons who have, directly or by implication, participated in the existing rebellion, except as hereinafter excepted, that a full pardon is hereby granted to them and each of them, with restoration of all rights of property, except as to slaves, and in property cases where rights of third parties shall have intervened, and upon the condition that every such person shall take and subscribe an oath, and thenceforward keep and maintain said oath inviolate; and which oath shall be registered for permanent preservation, and shall be of the tenor and effect following, to wit:

"I, ———, do solemnly swear, in presence of Almighty God, that I will henceforth faithfully support, protect, and defend the Constitution of the

United States, and the Union of the States thereunder; and that I will, in like manner, abide by and faithfully support all acts of Congress passed during the existing rebellion with reference to slaves, so long and so far as not repealed, modified, or held void by Congress, or by decision of the Supreme Court; and that I will, in like manner, abide by and faithfully support all proclamations of the President made during the existing rebellion having reference to slaves, so long and so far as not modified or declared void by decision of the Supreme Court. So help me God."

The persons excepted from the benefits of the foregoing provisions are all who are, or shall have been, civil or diplomatic officers or agents of the so-called confederate government; all who have left judicial stations under the United States to aid the rebellion; all who are, or shall have been, military or naval officers of said so-called confederate government above the rank of colonel in the army, or of lieutenant in the navy; all who left seats in the United States Congress to aid the rebellion; all who resigned commissions in the army or navy of the United States, and afterwards aided the rebellion; and all who have engaged in any way in treating colored persons, or white persons in charge of such, otherwise than lawfully as prisoners of war, and which persons may have been found in the United States service as soldiers, seamen, or in any other capacity.

And I do further proclaim, declare, and make known, that whenever, in any of the States of Arkansas, Texas, Louisiana, Mississippi, Tennessee, Alabama, Georgia, Florida, South Carolina, and North Carolina, a number of persons, not less than one-tenth in number of the votes cast in such State at the Presidential election of the year of our Lord one thousand eight hundred and sixty, each having taken the oath aforesaid, and not having since violated it, and being a qualified voter by the election law of the State existing immediately before the so-called act of secession, and excluding all others, shall re-establish a State government which shall be republican, and in nowise contravening said oath, such shall be recognized as the true government of the State, and the State shall receive thereunder the benefits of the constitutional provision which declares that "the United States shall guaranty to every State in this Union a republican form of government, and shall protect each of them against invasion; and on application of the legislature, or the executive, (when the legislature cannot be convened,) against domestic violence."

And I do further proclaim, declare, and make known that any provision which may be adopted by such State government in relation to the freed people of such State, which shall recognize and declare their permanent freedom, provide for their education, and which may yet be consistent, as a temporary arrangement, with their present condition as a laboring, landless, and homeless class, will not be objected to by the national Executive. And it is suggested as not improper, that, in constructing a loyal State government in any State, the name of the State, the boundary, the subdivisions, the constitution, and the general code of laws, as before the rebellion, be maintained, subject only to the modifications made necessary by the conditions hereinbefore stated, and such others, if any, not contravening said conditions, and which may be deemed expedient by those framing the new State government.

To avoid misunderstanding, it may be proper to say that this proclamation, so far as it relates to State governments, has no reference to States where loyal State governments have all the while been maintained. And for the same reason, it may be proper to further say, that whether members sent to Congress from any State shall be admitted to seats constitutionally rests exclusively with the respective houses, and not to any extent with the Executive. And still further, that this proclamation is intended to present to the people of the States wherein the national authority has been suspended, and loyal State governments have been subverted, a mode in and by which the national authority and loyal State governments may be re-established within said States, or in any of them; and

while the mode presented is the best the Executive can suggest, with his present impressions, it must not be understood that no other possible mode would be acceptable.

Given under my hand at the city of Washington, the eighth day of December, A. D. one thousand eight hundred and sixty-three, and of the independence of the United States of America the eighty-eighth.

ABRAHAM LINCOLN.

By the President :

WILLIAM H. SEWARD,
Secretary of State.

ACTS OF CONGRESS.

AN ACT, approved March 2, 1799, to regulate the collection of duties on imports and tonnage, referred to in 5th section of the act approved May 20, 1862, and 4th section of the act approved March 12, 1863, appended hereto.

SEC 91. *And be it further enacted,* That all fines, penalties, and forfeitures recovered by virtue of this act (and not otherwise appropriated) shall, after deducting all proper costs and charges, be disposed of as follows : one moiety shall be for the use of the United States, and be paid into the treasury thereof by the collector receiving the same ; the other moiety shall be divided between, and paid in equal proportions to, the collector and naval officer of the district and surveyor of the port wherein the same shall have been incurred, or to such of the said officers as there may be in the said district ; and in districts where only one of the aforesaid officers shall have been established, the said moiety shall be given to such officer :

Provided, nevertheless, That in all cases where such penalties, fines, and forfeitures shall be recovered in pursuance of information given to such collector by any person other than the naval officer or surveyor of the district, the one-half of such moiety shall be given to such informer, and the remainder thereof shall be disposed of between the collector, naval officer, and surveyor or surveyors, in manner aforesaid :

Provided, also, That where any fines, forfeitures, and penalties incurred by virtue of this act are recovered, in consequence of any information given by any officer of a revenue cutter, they shall, after deducting all proper costs and charges, be disposed of as follows : one-fourth part shall be for the use of the United States, and paid into the treasury thereof in manner as before directed ; one-fourth part for the officers of the customs, to be distributed as hereinbefore set forth ; and the remainder thereof to the officers of such cutter, to be divided among them agreeably to their pay :

And provided, likewise, That whenever a seizure, condemnation, and sale of goods, wares, or merchandise shall take place within the United States, and the value thereof shall be less than two hundred and fifty dollars, that part of the forfeiture which accrues to the United States, or so much thereof as may be necessary, shall be applied to the payment of the cost of prosecution.

And be it further provided, That if any officer or other person entitled to a part or share of any of the fines, penalties, or forfeitures incurred in virtue of this act shall be necessary as a witness on the trial for such fine, penalty, or forfeiture, such officer or other person may be a witness on the said trial ; but in such case he shall not receive nor be entitled to any part or share of the said fine, penalty, or forfeiture, and the part or share to which he otherwise would have been entitled shall revert to the United States.

Approved March 2, 1799.

AN ACT, approved July 13, 1861, further to provide for the collection of duties on imports, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That whenever it shall, in the judgment of the President, by reason of unlawful combinations of persons in opposition to the laws of the United States, become impracticable to execute the revenue laws and collect the duties on imports by ordinary means, in the ordinary way, at any port of entry in any collection district, he is authorized to cause such duties to be collected at any port of delivery in said district until such obstruction shall cease; and in such cases the surveyors at said ports of delivery shall be clothed with all the powers and be subject to all the obligations of collectors at ports of entry; and the Secretary of the Treasury, with the approbation of the President, shall appoint such number of weighers, gaugers, measurers, inspectors, appraisers, and clerks, as may be necessary, in his judgment, for the faithful execution of the revenue laws at said ports of delivery, and shall fix and establish the limits within which such ports of delivery are constituted ports of entry, as aforesaid; and all the provisions of law regulating the issue of marine papers, the coasting trade, the warehousing of imports, and collection of duties, shall apply to the ports of entry so constituted in the same manner as they do to ports of entry established by the laws now in force.

SEC. 2. *And be it further enacted,* That if, from the cause mentioned in the foregoing section, in the judgment of the President, the revenue from duties on imports cannot be effectually collected at any port of entry in any collection district, in the ordinary way and by the ordinary means, or by the course provided in the foregoing section, then and in that case he may direct that the custom-house for the district be established in any secure place within said district, either on land or on board any vessel in said district, or at sea near the coast; and in such case the collector shall reside at such place, or on shipboard, as the case may be, and there detain all vessels and cargoes arriving within or approaching said district, until the duties imposed by law on said vessels and their cargoes are paid in cash: *Provided,* That if the owner or consignee of the cargo on board any vessel detained as aforesaid, or the master of said vessel, shall desire to enter a port of entry in any other district of the United States where no such obstructions to the execution of the laws exist, the master of such vessel may be permitted so to change the destination of the vessel and cargo in his manifest, whereupon the collector shall deliver him a written permit to proceed to the port so designated: *And provided further,* That the Secretary of the Treasury shall, with the approbation of the President, make proper regulations for the enforcement on shipboard of such provisions of the laws regulating the assessment and collection of duties as in his judgment may be necessary and practicable.

SEC. 3. *And be it further enacted,* That it shall be unlawful to take any vessel or cargo detained as aforesaid from the custody of the proper officers of the customs, unless by process of some court of the United States; and in case of any attempt otherwise to take such vessel or cargo by any force, or combination, or assemblage of persons, too great to be overcome by the officers of the customs, it shall and may be lawful for the President, or such person or persons as he shall have empowered for that purpose, to employ such part of the army or navy or militia of the United States, or such force of citizen volunteers, as may be deemed necessary, for the purpose of preventing the removal of such vessel or cargo, and protecting the officers of the customs in retaining the custody thereof.

SEC. 4. *And be it further enacted,* That if, in the judgment of the President, from the cause mentioned in the first section of this act, the duties upon imports in any collection district cannot be effectually collected by the ordinary means

and in the ordinary way, or in the mode and manner provided in the foregoing section of this act, then and in that case the President is hereby empowered to close the port or ports of entry in said district, and in such case give notice thereof by proclamation; and thereupon all right of importation, warehousing, and other privileges incident to ports of entry, shall cease and be discontinued at such port so closed, until opened by the order of the President on the cessation of such obstructions; and if, while said ports are so closed, any ship or vessel from beyond the United States, or having on board any articles subject to duties, shall enter or attempt to enter any such port, the same, together with its tackle, apparel, furniture, and cargo, shall be forfeited to the United States.

SEC. 5. *And be it further enacted*, That whenever the President, in pursuance of the provisions of the second section of the act entitled "An act to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions, and to repeal the act now in force for that purpose," approved February twenty-eight, seventeen hundred and ninety-five, shall have called forth the militia to suppress combinations against the laws of the United States, and to cause the laws to be duly executed, and the insurgents shall have failed to disperse by the time directed by the President, and when said insurgents claim to act under the authority of any State or States, and such claim is not disclaimed or repudiated by the persons exercising the functions of government in such State or States, or in the part or parts thereof in which said combination exists, nor such insurrection suppressed by said State or States, then and in such case it may and shall be lawful for the President, by proclamation, to declare that the inhabitants of such State, or any section or part thereof, where such insurrection exists, are in a state of insurrection against the United States; and thereupon all commercial intercourse by and between the same and the citizens thereof and the citizens of the rest of the United States shall cease and be unlawful so long as such condition of hostility shall continue; and all goods and chattels, wares and merchandise, coming from said State or section into the other parts of the United States, and all proceeding to such State or section by land or water, shall, together with the vessel or vehicle conveying the same, or conveying persons to or from such State or section, be forfeited to the United States: *Provided, however*, That the President may, in his discretion, license and permit commercial intercourse with any such part of said State or section, the inhabitants of which are so declared in a state of insurrection, in such articles, and for such time, and by such persons, as he, in his discretion, may think most conducive to the public interest; and such intercourse, so far as by him licensed, shall be conducted and carried on only in pursuance of rules and regulations prescribed by the Secretary of the Treasury. And the Secretary of the Treasury may appoint such officers, at places where officers of the customs are not now authorized by law, as may be needed to carry into effect such licenses, rules, and regulations; and officers of the customs and other officers shall receive for services under this section, and under said rules and regulations, such fees and compensation as are now allowed for similar service under other provisions of law.

SEC. 6. *And be it further enacted*, That from and after fifteen days after the issuing of said proclamation, as provided in the last foregoing section of this act, any ship or vessel belonging in whole or in part to any citizen or inhabitant of said State or part of a State whose inhabitants are so declared in a state of insurrection, found at sea, or in any port of the rest of the United States, shall be forfeited to the United States.

SEC. 7. *And be it further enacted*, That, in the execution of the provisions of this act, and of the other laws of the United States providing for the collection of duties on imports and tonnage, it may and shall be lawful for the President, in addition to the revenue cutters in service, to employ in aid thereof such other suitable vessels as may, in his judgment, be required.

SEC. 8. *And be it further enacted*, Thatt he forfeitures and penalties incurred by virtue of this act may be mitigated or remitted, in pursuance of the authority vested in the Secretary of the Treasury by the act entitled "An act providing for mitigating or remitting the forfeitures, penalties, and disabilities accruing in certain cases therein mentioned," approved March third, seventeen hundred and ninety-seven, or, in cases where special circumstances may seem to require it, according to regulations to be prescribed by the Secretary of the Treasury.

SEC. 9. *And be it further enacted*, That proceedings on seizures for forfeitures under this act may be pursued in the courts of the United States in any district into which the property so seized may be taken and proceedings instituted; and such courts shall have and entertain as full jurisdiction over the same as if the seizure was made in that district.

Approved July 13, 1861.

AN ACT, approved May 20, 1862, supplementary to an act approved on the thirteenth July, eighteen hundred and sixty one, entitled "An act to provide for the collection of duties on imports, and for other purposes "

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury, in addition to the powers conferred upon him by the act of the thirteenth July, eighteen hundred and sixty-one, be, and he is hereby, authorized to refuse a clearance to any vessel or other vehicle laden with goods, wares, and merchandise destined for a foreign or domestic port, whenever he shall have satisfactory reason to believe that such goods, wares, or merchandise, or any part thereof, whatever may be their ostensible destination, are intended for ports or places in possession or under control of insurgents against the United States; and if any vessel or other vehicle for which a clearance or permit shall have been refused by the Secretary of the Treasury or by his order, as aforesaid, shall depart or attempt to depart for a foreign or domestic port without being duly cleared or permitted, such vessel or other vehicle, with her tackle, apparel, furniture, and cargo, shall be forfeited to the United States.

SEC. 2. *And be it further enacted*, That whenever a permit or clearance is granted for either a foreign or domestic port, it shall be lawful for the collector of the customs granting the same, if he shall deem it necessary, under the circumstances of the case, to require a bond to be executed by the master or the owner of the vessel, in a penalty equal to the value of the cargo, and with sureties to the satisfaction of such collector, that the said cargo shall be delivered at the destination for which it is cleared or permitted, and that no part thereof shall be used in affording aid or comfort to any person or parties in insurrection against the authority of the United States.

SEC. 3. *And be it further enacted*, That the Secretary of the Treasury be, and he is hereby, further empowered to prohibit and prevent the transportation in any vessel or upon any railroad, turnpike, or other road or means of transportation within the United States, of any goods, wares, or merchandise, of whatever character, and whatever may be the ostensible destination of the same, in all cases where there shall be satisfactory reasons to believe that such goods, wares, or merchandise are intended for any place in the possession or under the control of insurgents against the United States, or that there is imminent danger that such goods, wares, or merchandise will fall into the possession or under the control of such insurgents; and he is further authorized, in all cases where he shall deem it expedient so to do, to require reasonable security to be given that goods, wares, or merchandise shall not be transported to any place under insurrectionary control, and shall not, in any way, be used to give

aid or comfort to such insurgents; and he may establish all such general or special regulations as may be necessary or proper to carry into effect the purposes of this act; and if any goods, wares, or merchandise shall be transported in violation of this act, or of any regulation of the Secretary of the Treasury established in pursuance thereof, or if any attempt shall be made so to transport them, all goods, wares, or merchandise so transported or attempted to be transported shall be forfeited to the United States.

SEC. 4. *And be it further enacted*, That the proceedings for the penalties and forfeitures accruing under this act may be pursued, and the same may be mitigated or remitted, by the Secretary of the Treasury, in the modes prescribed by the eighth and ninth sections of the act of July thirteenth, eighteen hundred and sixty-one, to which this act is supplementary.

SEC. 5. *And be it further enacted*, That the proceeds of all penalties and forfeitures incurred under this act, or the act to which this is supplementary, shall be distributed in the manner provided by the ninety-first section of the act of March second, seventeen hundred and ninety-nine, entitled "An act to regulate the collection of duties on imports and tonnage."

Approved May 20, 1862.

AN ACT, approved July 17, 1862, to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That every person who shall hereafter commit the crime of treason against the United States, and shall be adjudged guilty thereof, shall suffer death, and all his slaves, if any, shall be declared and made free; or, at the discretion of the court, he shall be imprisoned for not less than five years and fined not less than ten thousand dollars, and all his slaves, if any, shall be declared and made free; said fine shall be levied and collected on any or all of the property, real and personal, excluding slaves, of which the said person so convicted was the owner at the time of committing the said crime, any sale or conveyance to the contrary notwithstanding.

SEC. 2. *And be it further enacted*, That if any person shall hereafter incite, set on foot, assist or engage in any rebellion or insurrection against the authority of the United States, or the laws thereof, or shall give aid or comfort thereto, or shall engage in, or give aid and comfort to, any such existing rebellion or insurrection, and be convicted thereof, such person shall be punished by imprisonment for a period not exceeding ten years, or by a fine not exceeding ten thousand dollars, and by the liberation of all his slaves, if any he have; or by both of said punishments, at the discretion of the court.

SEC. 3. *And be it further enacted*, That every person guilty of either of the offences described in this act shall be forever incapable and disqualified to hold any office under the United States.

SEC. 4. *And be it further enacted*, That this act shall not be construed in any way to affect or alter the prosecution, conviction, or punishment of any person or persons guilty of treason against the United States before the passage of this act, unless such person is convicted under this act.

SEC. 5. *And be it further enacted*, That, to insure the speedy termination of the present rebellion, it shall be the duty of the President of the United States to cause the seizure of all the estate and property, money, stocks, credits, and effects of the persons hereinafter named in this section, and to apply and use the same and the proceeds thereof for the support of the army of the United States—that is to say:

First. Of any person hereafter acting as an officer of the army or navy of the rebels in arms against the government of the United States.

Secondly. Of any person hereafter acting as president, vice-president, member of congress, judge of any court, cabinet officer, foreign minister, commissioner or consul of the so-called Confederate States of America.

Thirdly. Of any person acting as governor of a State, member of a convention or legislature, or judge of any court of any of the so-called Confederate States of America.

Fourthly. Of any person who, having held an office of honor, trust, or profit in the United States, shall hereafter hold an office in the so-called Confederate States of America.

Fifthly. Of any person hereafter holding an office or agency under the government of the so-called Confederate States of America, or under any of the several States of the said confederacy, or the laws thereof, whether such office or agency be national, state, or municipal in its name or character: *Provided*, That the persons thirdly, fourthly, and fifthly above described shall have accepted their appointment or election since the date of the pretended ordinance of secession of the State, or shall have taken an oath of allegiance to or to support the constitution of the so-called Confederate States.

Sixthly. Of any person who, owning property in any loyal State or Territory of the United States, or in the District of Columbia, shall hereafter assist and give aid and comfort to such rebellion; and all sales, transfers, or conveyances of any such property shall be null and void; and it shall be a sufficient bar to any suit brought by such person for the possession or the use of such property, or any of it, to allege and prove that he is one of the persons described in this section.

SEC. 6. *And be it further enacted*, That if any person within any State or Territory of the United States, other than those named as aforesaid, after the passage of this act, being engaged in armed rebellion against the government of the United States, or aiding or abetting such rebellion, shall not, within sixty days after public warning and proclamation duly given and made by the President of the United States, cease to aid, countenance, and abet such rebellion, and return to his allegiance to the United States, all the estate and property, moneys, stocks, and credits of such person shall be liable to seizure as aforesaid, and it shall be the duty of the President to seize and use them as aforesaid or the proceeds thereof. And all sales, transfers, or conveyances of any such property after the expiration of the said sixty days from the date of such warning and proclamation, shall be null and void; and it shall be a sufficient bar to any suit brought by such person for the possession or the use of such property, or any of it, to allege and prove that he is one of the persons described in this section.

SEC. 7. *And be it further enacted*, That to secure the condemnation and sale of any of such property, after the same shall have been seized, so that it may be made available for the purpose aforesaid, proceedings *in rem* shall be instituted in the name of the United States in any district court thereof, or in any territorial court, or in the United States district court for the District of Columbia, within which the property above described, or any part thereof, may be found, or into which the same, if movable, may first be brought, which proceedings shall conform, as nearly as may be, to proceedings in admiralty or revenue cases; and if said property, whether real or personal, shall be found to have belonged to a person engaged in rebellion, or who has given aid or comfort thereto, the same shall be condemned as enemies' property and become the property of the United States, and may be disposed of as the court shall decree, and the proceeds thereof paid into the treasury of the United States for the purposes aforesaid.

SEC. 8. *And be it further enacted*, That the several courts aforesaid shall

have power to make such orders, establish such forms of decree and sale, and direct such deeds and conveyances to be executed and delivered by the marshals thereof where real estate shall be the subject of sale, as shall fitly and efficiently effect the purposes of this act, and vest in the purchasers of such property good and valid titles thereto. And the said courts shall have power to allow such fees and charges of their officers as shall be reasonable and proper in the premises.

SEC. 9. *And be it further enacted*, That all slaves of persons who shall hereafter be engaged in rebellion against the government of the United States, or who shall in any way give aid or comfort thereto, escaping from such persons and taking refuge within the lines of the army; and all slaves captured from such persons or deserted by them and coming under the control of the government of the United States; and all slaves of such persons found *on* [or] being within any place occupied by rebel forces and afterwards occupied by the forces of the United States, shall be deemed captives of war, and shall be forever free of their servitude, and not again held as slaves.

SEC. 10. *And be it further enacted*, That no slave escaping into any State, Territory, or the District of Columbia, from any other State, shall be delivered up, or in any way impeded or hindered of his liberty, except for crime, or some offence against the laws, unless the person claiming said fugitive shall first make oath that the person to whom the labor or service of such fugitive is alleged to be due is his lawful owner, and has not borne arms against the United States in the present rebellion, nor in any way given aid and comfort thereto; and no person engaged in the military or naval service of the United States shall, under any pretence whatever, assume to decide on the validity of the claim of any person to the service or labor of any other person, or surrender up any such person to the claimant, on pain of being dismissed from the service.

SEC. 11. *And be it further enacted*, That the President of the United States is authorized to employ as many persons of African descent as he may deem necessary and proper for the suppression of this rebellion, and for this purpose he may organize and use them in such manner as he may judge best for the public welfare.

SEC. 12. *And be it further enacted*, That the President of the United States is hereby authorized to make provision for the transportation, colonization, and settlement, in some tropical country beyond the limits of the United States, of such persons of the African race, made free by the provisions of this act, as may be willing to emigrate, having first obtained the consent of the government of said country to their protection and settlement within the same, with all the rights and privileges of freemen.

SEC. 13. *And be it further enacted*, That the President is hereby authorized, at any time hereafter, by proclamation, to extend to persons who may have participated in the existing rebellion in any State or part thereof, pardon and amnesty, with such exceptions and at such time and on such conditions as he may deem expedient for the public welfare.

SEC. 14. *And be it further enacted*, That the courts of the United States shall have full power to institute proceedings, make orders and decrees, issue process, and do all other things necessary to carry this act into effect.

Approved July 17, 1862.

AN ACT, approved March 12, 1863, to provide for the collection of abandoned property and for the prevention of frauds in insurrectionary districts within the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be lawful for the Secretary of the Treasury, from and after the passage of this act, as he shall from

time to time see fit, to appoint a special agent or agents to receive and collect all abandoned or captured property in any State or Territory, or any portion of any State or Territory of the United States, designated as in insurrection against the lawful government of the United States by the proclamation of the President of July first, eighteen hundred and sixty-two: *Provided*, That such property shall not include any kind or description which has been used, or which was intended to be used, for waging or carrying on war against the United States, such as arms, ordnance, ships, steamboats, or other water-craft, and the furniture, forage, military supplies, or munitions of war.

SEC. 2. *And be it further enacted*, That any part of the goods or property received or collected by such agent or agents may be appropriated to public use on due appraisement and certificate thereof, or forwarded to any place of sale within the loyal States, as the public interests may require; and all sales of such property shall be at auction to the highest bidder, and the proceeds thereof shall be paid into the treasury of the United States.

SEC. 3. *And be it further enacted*, That the Secretary of the Treasury may require the special agents appointed under this act to give a bond with such securities and in such amount as he shall deem necessary, and to require the increase of said amounts, and the strengthening of said security, as circumstances may demand; and he shall also cause a book or books of account to be kept, showing from whom such property was received, the cost of transportation, and the proceeds of the sale thereof. And any person claiming to have been the owner of any such abandoned or captured property may, at any time within two years after the suppression of the rebellion, prefer his claim to the proceeds thereof in the Court of Claims; and, on proof to the satisfaction of said court of his ownership of said property, of his right to the proceeds thereof, and that he has never given any aid or comfort to the present rebellion, to receive the residue of such proceeds, after the deduction of any purchase money which may have been paid, together with the expense of transportation and sale of said property, and any other lawful expenses attending the disposition thereof.

SEC. 4. *And be it further enacted*, That all property coming into any of the United States not declared in insurrection as aforesaid, from within any of the States declared in insurrection, through or by any other person than any agent duly appointed under the provisions of this act, or under a lawful clearance by the proper officer of the Treasury Department, shall be confiscated to the use of the government of the United States. And the proceedings for the condemnation and sale of any such property shall be instituted and conducted under the direction of the Secretary of the Treasury, in the mode prescribed by the eighty-ninth and ninetieth sections of the act of March second, seventeen hundred and ninety-nine, entitled "An act to regulate the collection of duties on imports and tonnage." And any agent or agents, person or persons, by or through whom such property shall come within the lines of the United States unlawfully, as aforesaid, shall be judged guilty of a misdemeanor, and on conviction thereof shall be fined in any sum not exceeding one thousand dollars, or imprisonment for any time not exceeding one year, or both, at the discretion of the court. And the fines, penalties, and forfeitures accruing under this act may be mitigated or remitted in the mode prescribed by the act of March three, seventeen hundred and ninety-seven, or in such manner, in special cases, as the Secretary of the Treasury may prescribe.

SEC. 5. *And be it further enacted*, That the fifth section of the "act to further provide for the collection of the revenue upon the northern, northeastern, and northwestern frontier, and for other purposes," approved July fourteen, eighteen hundred and sixty-two, shall be so construed as to allow the temporary officers which had been or may be appointed at ports which have been or may be opened or established in States declared to be in insurrection by the proclamation of the President on the first of July, eighteen hundred and sixty-

two, the same compensation which by law is allowed to permanent officers of the same position, or the ordinary compensation of special agents, as the Secretary of the Treasury may determine.

SEC. 6. *And be it further enacted*, That it shall be the duty of every officer or private of the regular or volunteer forces of the United States, or any officer, sailor, or marine in the naval service of the United States, upon the inland waters of the United States, who may take or receive any such abandoned property, or cotton, sugar, rice, or tobacco, from persons in such insurrectionary districts, or have it under his control, to turn the same over to an agent appointed as aforesaid, who shall give a receipt therefor; and in case he shall refuse or neglect so to do, he shall be tried by a court-martial and shall be dismissed from the service, or, if an officer, reduced to the ranks, or suffer such other punishment as said court shall order, with the approval of the President of the United States.

SEC. 7. *And be it further enacted*, That none of the provisions of this act shall apply to any lawful maritime prize by the naval forces of the United States.

Approved March 12, 1863.

AN ACT, approved July 2, 1864, in addition to the several acts concerning commercial intercourse between loyal and insurrectionary States, and to provide for the collection of captured and abandoned property and the prevention of frauds in States declared in insurrection.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That sales of captured and abandoned property under the act approved March twelve, eighteen hundred and sixty-three, may be made at such places, in States declared in insurrection, as may be designated by the Secretary of the Treasury, as well as at other places now authorized by said act.

SEC. 2. *And be it further enacted*, That, in addition to the captured and abandoned property to be received, collected, and disposed of, as provided in said act, the said agents shall take charge of and lease, for periods not exceeding twelve months, the abandoned lands, houses, and tenements within the districts therein named, and shall also provide, in such leases or otherwise, for the employment and general welfare of all persons within the lines of national military occupation within said insurrectionary States formerly held as slaves, who are or shall become free. Property, real or personal, shall be regarded as abandoned when the lawful owner thereof shall be voluntarily absent therefrom, and engaged, either in arms or otherwise, in aiding or encouraging the rebellion.

SEC. 3. *And be it further enacted*, That all moneys arising from the leasing of abandoned lands, houses, and tenements, or from sales of captured and abandoned property collected and sold in pursuance of said act or of this act, or from fees collected under the rules and regulations made by the Secretary of the Treasury, and approved by the President, dated respectively the twenty-eighth day of August, eighteen hundred and sixty-two, the thirty-first day of March, and the eleventh day of September, eighteen hundred and sixty-three, or under any amendments or modifications thereof, which have been or shall be made by the Secretary of the Treasury, and approved by the President, for conducting the commercial intercourse which has been or shall be licensed and permitted by the President, with and in States declared in insurrection, shall, after satisfying therefrom all proper and necessary expenses to be approved by the Secretary of the Treasury, be paid into the treasury of the United States; and all accounts of moneys received or expended in connexion therewith shall be audited by the proper accounting officers of the treasury. That the first section of the "act to

provide for the collection of abandoned property and for the prevention of frauds in insurrectionary districts in the United States." approved March twelve, eighteen hundred and sixty-three, is hereby extended so as to include the descriptions of property mentioned in an act entitled "An act further to provide for the collection of duties on imports, and for other purposes," approved July thirteen, eighteen hundred and sixty-one, and an act entitled "An act to suppress insurrection, to punish treason and rebellion, to seize and confiscate the property of rebels, and for other purposes," approved July seventeen, eighteen hundred and sixty-two, respectively; and that the sales provided for in said act first mentioned may be made at such place as may be designated by the Secretary of the Treasury. And section six of said first-mentioned act is hereby amended so as to include every description of property mentioned in the acts of July thirteen, eighteen hundred and sixty-one, and July seventeen, eighteen hundred and sixty-two, aforesaid; and that all property, real or personal, described in the acts to which this is in addition, shall be regarded as abandoned when the lawful owner thereof shall be voluntarily absent therefrom, and engaged, either in arms or otherwise, in aiding or encouraging the rebellion.

SEC. 4. *And be it further enacted*, That the prohibitions and provisions of the act approved July thirteen, eighteen hundred and sixty-one, and of the acts amendatory or supplementary thereto, shall apply to all commercial intercourse by and between persons residing or being within districts within the present or future lines of national military occupation in the States or parts of States declared in insurrection, whether with each other or with persons residing or being within districts declared in insurrection and not within those lines; and that all persons within the United States, not native or naturalized citizens thereof, shall be subject to the same prohibitions, in all commercial intercourse with inhabitants of States or parts of States declared in insurrection, as citizens of loyal States are subject to under the said act or acts.

SEC. 5. *And be it further enacted*, That whenever any part of a loyal State shall be under the control of insurgents, or shall be in dangerous proximity to places under their control, all commercial intercourse therein and therewith shall be subject to the same prohibitions and conditions as are created by the said acts, as to such intercourse between loyal and insurrectionary States, for such time and to such extent as shall from time to time become necessary to protect the public interests, and be directed by the Secretary of the Treasury, with the approval of the President.

SEC. 6. *And be it further enacted*, That so much of the fifth section of the act approved May twenty, eighteen hundred and sixty-two, and the fourth section of the act approved March twelve, eighteen hundred and sixty-three, as directs the manner of distributing fines, penalties, and forfeitures, is hereby repealed, and that, in lieu of the distribution thereby directed to be made to informers, collectors, and other officers of the customs, the court decreeing condemnation may award such compensation to customs officers, informers, or other persons, for any service connected therewith, as will tend to promote vigilance in protecting the public interests, and as shall be just and equitable, in no case, however, to exceed the aggregate amount heretofore directed by the said fifth section.

SEC. 7. *And be it further enacted*, That no property seized or taken upon any of the inland waters of the United States by the naval forces thereof shall be regarded as maritime prize; but all property so seized or taken shall be promptly delivered to the proper officers of the courts, or as provided in this act and in the said act approved March twelve, eighteen hundred and sixty-three.

SEC. 8. *And be it further enacted*, That it shall be lawful for the Secretary of the Treasury, with the approval of the President, to authorize agents to purchase for the United States any products of States declared in insurrection, at such places therein as shall be designated by him, at such prices as shall be

agreed on with the seller, not exceeding the market value thereof at the place of delivery, nor exceeding three-fourths of the market value thereof in the city of New York at the latest quotations known to the agent purchasing: *Provided*, That no part of the purchase money for any products so purchased shall be paid, or agreed to be paid, out of any other fund than that arising from property sold as captured or abandoned, or purchased and sold under the provisions of this act. All property so purchased shall be forwarded for sale at such place or places as shall be designated by the Secretary of the Treasury, and the moneys arising therefrom, after payment of the purchase money and the other expenses connected therewith, shall be paid into the treasury of the United States; and the accounts of all moneys so received and paid shall be rendered to, and audited by, the proper accounting officers of the treasury.

SEC. 9. *And be it further enacted*, That so much of section five of the act of thirteenth of July, eighteen hundred and sixty-one, aforesaid, as authorizes the President, in his discretion, to license or permit commercial relations in any State or section the inhabitants of which are declared in a state of insurrection, is hereby repealed, except so far as may be necessary to authorize supplying the necessities of loyal persons residing in insurrectionary States, within the lines of actual occupation by the military forces of the United States, as indicated by published order of the commanding general of the department or district so occupied; and, also, except so far as may be necessary to authorize persons residing within such lines to bring or send to market in the loyal States any products which they shall have produced with their own labor or the labor of freedmen or others employed and paid by them, pursuant to rules relating thereto which may be established under proper authority. And no goods, wares, or merchandise shall be taken into a State declared in insurrection or transported therein, except to and from such places and to such monthly amounts as shall have been previously agreed upon in writing by the commanding general of the department in which such places are situated, and an officer designated by the Secretary of the Treasury for that purpose.

SEC. 10. *And be it further enacted*, That all officers and privates of the regular and volunteer forces of the United States, and all officers, sailors, and marines in the naval service, are hereby prohibited from buying or selling, trading, or in any way dealing in the kind or description of property mentioned in this act, and the act to which this is in addition, whereby to receive or expect any profit, benefit, or advantage to himself or any other person, directly or indirectly, connected with him. And it shall be the duty of such officer, private, sailor, or marine, when such property shall come into his possession or custody or within his control, to give notice thereof to some agent appointed by virtue of this act, and to turn the same over to such agent without delay. Any officer of the United States, civil, military or naval, or any sutler, soldier, marine, or other person, who shall violate any provision of this act, or who shall take or cause to be taken into a State declared to be in insurrection, or to any other point to be thence taken into such State, or who shall transport or sell, or otherwise dispose of therein any goods, wares, or merchandise whatsoever, except in pursuance of license and authority of the President, as provided in said fifth section of the act of July thirteen, eighteen hundred and sixty-one, aforesaid, and any officer or other person aforesaid who shall make any false statement or representation upon which license and authority shall be granted for such transportation, sale, or other disposition, and any officer or other person aforesaid who shall, under any license or authority obtained, wilfully and knowingly transport, sell, or otherwise dispose of any other goods, wares, or merchandise than such as are in good faith so licensed and authorized, or shall wilfully and knowingly transport, sell, or dispose of the same, or any portion thereof, in violation of the terms of such license or authority, or of any rule or regulation prescribed by the Secretary of the Treasury concerning the same, or shall be guilty of any act of embezzlement, of wilful

misappropriation of public or private money or property, of keeping false accounts, or wilfully making any false returns, or of any other act amounting to a felony, shall be liable to indictment as for a misdemeanor, and fine not exceeding five thousand dollars, and to punishment in the penitentiary not exceeding three years, before any court, civil or military, competent to try the same. And it shall be the duty of the Secretary of the Treasury, from time to time, to institute such investigations as may be necessary to detect and prevent frauds and abuses in the trade and other transactions contemplated by this act or by the acts to which this is supplementary. And the agents making such investigations shall have power to compel the attendance of witnesses, and to make examinations on oath.

SEC. 11. *And be it further enacted*, That the Secretary of the Treasury, with the approval of the President, shall make such rules and regulations as are necessary to secure the proper and economical execution of the provisions of this act, and shall defray all expenses of such execution from the proceeds of fees imposed by said rules and regulations, of sales of captured and abandoned property, and of sales hereinbefore authorized.

Approved July 2, 1864.

No. 24.

General regulations for the purchase of products of the insurrectionary States on government account.

I. Agents shall be appointed by the Secretary of the Treasury, with the approval of the President, to purchase for the United States, under special instructions from the Secretary of the Treasury, products of States declared to be in insurrection, at places hereinafter designated, or that may from time to time be designated as markets or places of purchase.

II. The following places are hereby designated as such markets or places of purchase, to wit: New Orleans, Memphis, Nashville, Norfolk, Beaufort, N. C., Port Royal, and Pensacola.

III. Before entering upon the discharge of their duty, each of the agents so appointed shall execute a bond, with sureties, in the prescribed form, in a penal sum to be fixed by the Secretary of the Treasury, conditioned for the faithful discharge of his duty, and that he shall not engage, directly or indirectly, in the purchase of products on private account, nor be, in any way, interested in the products purchased by him, or the proceeds or profits arising therefrom.

IV. The price to be paid for any of the products so to be purchased shall be agreed upon between the seller and purchasing agent, but shall in no case exceed the market value thereof at the time and place of purchase, nor exceed three-fourths the market value thereof in the city of New York, according to the latest quotations known to the agent purchasing, at the date of the delivery of the products, less a sum equal to the internal revenue tax, and the permit fee prescribed in the regulations concerning commercial intercourse, dated July 29, 1864, and also subject to such other deductions to cover transportation, insurance, and other expenses, and to such arrangements for payment, as may be prescribed in special instructions to the several purchasing agents.

V. The proceeds of all sales made by the several agents, together with such funds as may be transmitted by the Secretary of the Treasury, shall be deposited in the most convenient depository, to the credit of the "purchasing fund," to be disbursed as hereinafter directed.

VI. Proper instructions shall be given, whereby daily quotations and prices current in New York shall be forwarded to the several agents, and to the collector or surveyor (as the case may be) of customs at the several markets or

places of purchase, by mail, every day, or as often as there shall be mail communication with such agents and collectors or surveyors.

VII. The purchasing agent shall to the extent of the funds at his command, and in pursuance of his instructions from the Secretary of the Treasury as to price and terms of payment, purchase all products offered to him, of the character or description which by such instructions he is authorized to purchase; but no liability of any character shall be authorized or assumed by any agent for or on account of government previous to the actual delivery of the products, other than a stipulation, in the form hereinafter prescribed, to purchase products owned or controlled by applicants at a price to be agreed upon, at the place and date of delivery.

VIII. Whenever any person shall make application to the purchasing agent, in writing, setting forth that he owns or controls products, stating the kind, quantity, and location thereof, or the date at which they will be delivered at some specified location, accessible to transportation, the purchasing agent, if authorized by special instructions to purchase such products, shall give a certificate that such application has been made, and request safe conduct for such party, with the necessary transportation, to the locations specified, and for himself and products in transitu from the points named to such purchasing agent.—(See form No. 1, appended to these regulations.)

IX. Parties having sold and delivered products shall, upon their request, be furnished by the purchasing agent with a certificate of the facts, which certificate shall state the character and quantity of the articles purchased, the price paid therefor, the aggregate amount of payment, the place whence and the route by which it was transported.—(See form No. 2, appended to these regulations.)

X. All bills or invoices of purchase shall be made in triplicate, after the products purchased shall have been actually delivered to the purchasing agent, their weight, quantity, and rating ascertained and determined by sworn weighers, measurers, or experts; and such bills or invoices shall be certified thereon as to their correctness by such sworn weigher, measurer, or expert, and the whole, as to prices and other stipulations expressed therein, certified by the purchasing agent, together with the date of the latest New York quotations known to the agent at time of the purchase.

The products, with such triplicate bills or invoices, shall then be delivered to the collector or surveyor of customs at the place of delivery, who, on satisfying himself of their correctness, and that the products correspond with the statement set forth in the bills or invoices, shall indorse thereon, over his own signature, a certificate of the facts, which certificate shall authorize payment of the bills to be made by such depository or other disbursing agent, at such time and in such manner as shall have been agreed upon, in writing, between the purchasing agent and seller, taking care to authorize payment at a date sufficiently remote to be certain that the proceeds therefrom may be realized, and such bills, duly receipted, shall be paid by the depository or disbursing agent named in the certificate as therein stipulated. One of the triplicates so paid shall be immediately transmitted to the Secretary of the Treasury, by the disbursing officer, one retained by him, and the other transmitted to the First Auditor, with his monthly accounts, for settlement.

XI. Purchasing agents shall keep a full and accurate record of all their transactions, including the names of all persons from whom they make purchases, the date of the purchase, a description of the products purchased, the quantity thereof, specifying the number and character [whether bundles, boxes, hogsheads, or bales] of packages, and their weight, if in pounds, or gallons, if in liquids, &c., and their quantity, as ascertained and certified to by sworn experts, weighers, &c. A transcript of this record will be transmitted to the Secretary of the Treasury on the first day of each month.

XII. Sales of products so purchased may be made weekly at public auction,

to the highest bidder, after due notice, at Memphis and New Orleans, and other places hereafter designated by the Secretary of the Treasury, not exceeding in quantity one-fifth of the amount received during the previous week, unless, in the opinion of the purchasing and disbursing agent, and the collectors or surveyors, (as the case may be,) the condition of the purchasing fund shall require larger sales than one-fifth, then sales of such further quantities as they may determine to be necessary are hereby authorized, but in no case in such amounts as unduly to affect the market; such additional sales, and the reason therefor, must be promptly reported to the Secretary of the Treasury.

XIII. The sales herein authorized shall be made by or under the direction or supervision of the purchasing agent, or an agent specially authorized by the Secretary, and all products so sold shall be delivered by the collector or surveyor (as the case may be) to the parties purchasing them, upon the presentation to him of the bill of sale, certified by the agent, designating the lot, character, and quantity of the products sold, and the price and amount to be paid therefor, together with the certificate from the depositary that the proceeds of such sale have been duly deposited with him, and the products so sold shall be allowed transportation to any desired port or place, in a loyal State, free from the payment of any taxes or fees other than such as have been paid under regulation IV.

XIV. Any person bringing products for sale to the purchasing agent desiring to repurchase and transport the same to a loyal State, may give notice thereof at the time of making sale to the purchasing agent; and the agent may, after they shall have been rated, weighed, &c., as provided above, sell and dispose of such products to the party applying, at prices not less than the market rates at places of purchase, nor less than the last quotations from New York known to the purchasing agent at the date of the transaction, from which shall be deducted a sum equal to the reduction of purchase price, which may have been made by the agent to cover transportation and other expenses.

The products so sold shall not be resold, either at public or private sale, until after transportation to a loyal State, or to a foreign port, and shall be liable to forfeiture for breach of this regulation. All products purchased by purchasing agents, the sale of which is not provided for in these regulations, shall be disposed of in such manner as may be directed by the Secretary of the Treasury.

XV. All products of insurrectionary States, which the purchasing agent is authorized by his instructions to purchase, moving with or without a permit, shall, on arrival at a place where there is a purchasing agent, be sold and delivered to him, except captured and abandoned property, and such as may have been produced within the lines of actual occupation by the military forces of the United States, by the labor of the person transporting, or of freedmen or others employed and paid by him, pursuant to rules relating thereto, established under proper authority; or such as were purchased under proper authority, prior to July 2, 1864, and were being transported in conformity with the regulations of the Secretary of the Treasury.

W. P. FESSENDEN,
Secretary of the Treasury.

WASHINGTON, D. C.,
September 24, 1864.

EXECUTIVE MANSION,
September 24, 1864.

The foregoing rules and regulations of the Secretary of the Treasury, having been seen and considered by me, are hereby approved.

ABRAHAM LINCOLN.

FORM NO. 1.

_____, 186—.

I, A—— B——, agent for the purchase of products of insurrectionary States on behalf of the government of the United States at _____, do hereby certify that I have agreed to purchase from C—— D——, of _____, _____; which products, it is represented, are, or will be, at _____, in the county of _____, in the State of _____, on the — day of _____, 186—, and which he stipulates shall be delivered to me, unless prevented from so doing by the authority of the United States.

I therefore request safe conduct for the said C—— D——, and his means of transportation, and said products from _____ to _____, where the products so transported are to be sold and delivered to me, under the stipulation referred to above, and pursuant to regulations prescribed by the Secretary of the Treasury.

A—— B——.

EXECUTIVE ORDER RELATIVE TO THE PURCHASE OF PRODUCTS OF INSURRECTIONARY STATES.

EXECUTIVE MANSION, *September 24, 1864.*

I. Congress having authorized the purchase for the United States of the products of States declared in insurrection, and the Secretary of the Treasury having designated New Orleans, Memphis, Nashville, Pensacola, Port Royal, Beaufort, North Carolina, and Norfolk, as places of purchase, and with my approval appointed agents, and made regulations under which said products may be purchased: Therefore,

II. All persons, except such as may be in the civil, military, or naval service of the government, having in their possession any products of States declared in insurrection which said agents are authorized to purchase, and all persons owning or controlling such products therein, are authorized to convey such products to either of the places which have been hereby, or may hereafter be, designated, as places of purchase, and such products, so destined, shall not be liable to detention, seizure, or forfeiture, while in transitu or in store awaiting transportation.

III. Any person having the certificate of a purchasing agent, as prescribed by treasury regulation VIII, is authorized to pass, with the necessary means of transportation, to the points named in said certificate, and to return therefrom with the products required for the fulfilment of the stipulations set forth in said certificate.

IV. Any person having sold and delivered to a purchasing agent any products of an insurrectionary State, in accordance with the regulations in relation thereto, and having in his possession a certificate setting forth the fact of such purchase and sale, the character and quantity of products, and the aggregate amount paid therefor, as prescribed by regulation IX, shall be permitted by the military authority commanding at the place of sale to purchase from any authorized

dealer at such place, or any other place in a loyal State, merchandise, and other articles not contraband of war, nor prohibited by the order of the War Department, nor coin, bullion, or foreign exchange, to an amount not exceeding in value one-third of the aggregate value of the products sold by him, as certified by the agent purchasing; and the merchandise and other articles so purchased may be transported by the same route, and to the same place, from and by which the products sold and delivered reached the purchasing agent, as set forth in the certificate; and such merchandise and other articles shall have safe conduct, and shall not be subject to detention, seizure, or forfeiture while being transported to the places and by the route set forth in the said certificate.

V. Generals commanding military districts and commandants of military posts and detachments, and officers commanding fleets, flotillas, and gunboats, will give safe conduct to persons and products, merchandise, and other articles, duly authorized as aforesaid, and not contraband of war, or prohibited by order of the War Department, or the orders of such generals commanding, or other duly authorized military or naval officer, made in pursuance hereof; and all persons hindering or preventing such safe conduct of persons or property will be deemed guilty of a military offence, and punished accordingly.

VI. Any person transporting, or attempting to transport, any merchandise or other articles, except in pursuance of regulations of the Secretary of the Treasury, dated July 29, 1864, or in pursuance of this order, or transporting or attempting to transport any merchandise or other articles contraband of war, or forbidden by any order of the War Department, will be deemed guilty of a military offence, and punished accordingly; and all products of insurrectionary States, found in transitu to any other person or place than a purchasing agent, and a designated place of purchase, shall be seized and forfeited to the United States, except such as may be moving to a loyal State, under duly authorized permits of a proper officer of the Treasury Department, as prescribed by regulation XXXVIII, concerning "commercial intercourse," dated July 29, 1864, or such as may have been found abandoned, or have been captured, and are moving in pursuance of the act of March 12, 1863.

VII. No military or naval officer of the United States, or person in the military or naval service, nor any civil officer, except such as are appointed for that purpose, shall engage in trade or traffic in the products of insurrectionary States, or furnish transportation therefor, under pain of being deemed guilty of unlawful trading with the enemy and punished accordingly.

VIII. The Secretary of War will make such general orders or regulations as will insure the proper observance and execution of this order; and the Secretary of the Navy will give instructions to officers commanding fleets, flotillas, and gunboats in conformity therewith.

ABRAHAM LINCOLN.

GENERAL ORDER }
No. 285. }

WAR DEPARTMENT,
Washington City, October 6, 1864.

First. The attention of officers and soldiers of the army of the United States whether volunteer or regular, is directed to the executive order dated September 24, 1864, and they will, in all respects, observe the same, and the commanders of all military departments, districts, posts, and detachments will, upon receipt of this order, revoke all other orders within their respective commands conflicting or inconsistent therewith, and will make such orders as will insure strict observance of this order throughout their respective commands.

Second. All commanders of military departments, districts, posts, and detachments will render such aid to the officers and agents of the Treasury Department in

carrying out the provisions of said order, and the treasury regulations therein referred to, as can be given without prejudice to the military service.

Third. Officers of the quartermaster's department, upon the written application of the duly authorized agents of the Treasury Department, or of persons authorized by them, may furnish transportation, by land or water, for collecting and forwarding to market articles of produce within the insurrectionary States specified within the aforesaid order, upon such reasonable terms as may be prescribed by the Quartermaster General, where the same can be done without prejudice to the military service, and not otherwise. The application for transportation must be first approved by the commander of the department, district, post, or detachment wherein the articles are received.

By order of the Secretary of War.

E. D. TOWNSEND,
Assistant Adjutant General.

GENERAL ORDER }
No. 42. }

NAVY DEPARTMENT,
Washington, December 1, 1864.

The attention of the commanding officers of squadrons, flotillas, and vessels of the navy, employed on blockade duty, or in the Mississippi river or other inland waters in the vicinity of the insurrectionary States, is required to the executive order hereto annexed, dated September 24, 1864, and they will adopt such measures as may be necessary to insure the strict observance of the order by those under their command.

The forms of certificates referred to in paragraphs III and IV of the executive order are also annexed hereto.

GIDEON WELLES,
Secretary of the Navy.
